Annex I

DETAILED ANALYSIS OF THE STATUS OF IMPLEMENTATION IN COUNTRIES SUBJECT TO DECISIONS OF THE PARTIES ON COMPLIANCE AND THOSE AT RISK OF NON-COMPLIANCE

1. Annex I presents the detailed analysis of the status of implementation in countries subject to decisions of the Parties on compliance and those at risk of non-compliance. The data tables in Appendixes I-VI indicate whether a country has received a total phase-out agreement for a specific controlled substance. The analysis of halons (Appendix II) indicates whether a halon banking activity has been approved. Halon banking guidelines require that regulations facilitating production and import bans are established within six months of the establishment of a reclamation centre (decision 18/22). The methyl bromide analysis (Appendix III) indicates further whether a country has received funding for a phase-out to meet the 2005 control measures. Appendices IV and V present information on the carbon tetrachloride (CTC) and methyl chloroform (TCA) phase-out, respectively. Appendix VI provides information on latest HCFC consumption only, as the baseline will not be established until after 2010.

ANALYSIS OF COMPLIANCE FOR CFCs (Appendix I)

2. Countries have been grouped into two categories: (a) those whose latest consumption exceeds the 85 per cent baseline reduction target of 2007 that applies until December 2009; and (b) those whose latest consumption exceeds the 2010 100 per cent phase-out target.

(a) Countries at risk of not achieving the 85 per cent CFC baseline reduction

3. This category consists of two countries, which may need to achieve additional CFC phase-out amounting to 294.9 ODP tonnes by 2007 in order to comply with the 85 per cent reduction target. Of these two countries, one was to receive projects with phase-out in the 2011 business plans.

4. The two countries that may require additional actions to achieve the 85 per cent reduction are Bangladesh and Iraq. All countries currently eligible for Fund assistance have national CFC phase-out agreements with the Executive Committee, which contain a phase-out schedule that is consistent with the targets in the Montreal Protocol. All of the countries that are at risk have received support from the Executive Committee to address their compliance needs.

(b) Countries whose latest consumption exceeds the 2010 phase-out target

5. This category consists of 63 countries, including 33 LVC countries, which may need to achieve additional CFC phase-out amounting to 4,105 ODP tonnes by 2010 in order to comply with the 100 per cent reduction target. Of these 63 countries, three have phase-out projects included in the 2011 business plans.

6. Of the 63 countries, the Executive Committee has approved national CFC phase-out agreements for 57 countries including 29 LVC countries. Two countries (the Republic of Korea and the United Arab Emirates) have agreed not to receive funding from the Multilateral Fund. The remaining four countries do not have projects for complete phase-out of CFC or included in the 2011-2014 business plans including Angola, Ethiopia, Somalia and Timor-Leste. The CFC TPMP for these countries will be integrated into HPMs according to decision 60/5(d).

ANALYSIS OF COMPLIANCE FOR HALONS (Appendix II)

7. Seventy-five countries have reported no consumption of halons between 1995 and 2009.

8. Sixty-one countries have received support for halon banking activities or phase-out agreements. This includes those countries participating in regional halon banks. Halon banking is presumed to be the last funded activity in the halon consumption sector for most countries but there are some halon phase-out activities that are part of multi-sectoral phase-out agreements.

9. Countries have been grouped into the following two categories: (a) those whose latest consumption exceeds the 50 per cent reduction target of 2005 that applies until December 2009; and (b) those whose latest consumption exceeds the 2010 100 per cent phase-out target.

(a) Countries at risk of not achieving the 50 per cent baseline reduction for halons

10. All countries are in compliance with the 50 per cent halon baseline reduction target.

(b) Countries whose latest consumption exceeds the 2010 phase-out target

11. This category consists of six countries that may need to phase-out additional halons amounting to 2,163 ODP tonnes by 2010 in order to comply with the 100 per cent reduction targets. These countries have received support from the Multilateral Fund, except the Republic of Korea and the United Arab Emirates. The Republic of Korea and the United Arab Emirates have agreed not to receive funding from the Multilateral Fund.

ANALYSIS OF COMPLIANCE FOR METHYL BROMIDE (Appendix III)

12. This section presents the analysis for compliance with methyl bromide control measures. It should be noted that all data reported and used in this analysis relate to controlled use only, which means that the data exclude quarantine and pre-shipment (QPS). All of the 144 Article 5 countries that have ratified the Copenhagen Amendment have reported complete baseline data. Of these 144 countries, 57 reported zero for both the baseline consumption and the latest consumption.

13. Ninety-nine Article 5 countries have received support from the Multilateral Fund for methyl bromide activities and/or projects. This includes projects that will lead to a complete phase-out of methyl bromide in 60 of these countries, partial phase-out in an additional 10, and other forms of assistance received by 29.

14. Countries have been grouped into the following two categories: (a) those whose latest consumption exceeds the 20 per cent reduction target of 2005 that applies until December 2014; and (b) those whose latest consumption exceeds the 2015 100 per cent phase-out target. Appendix III identifies those countries that have not ratified the Copenhagen Amendment.

(a) Countries whose latest consumption exceeds the 20 per cent MB baseline reduction target

15. This category consists of only one country, Turkmenistan. This country may need to meet additional combined reduction amounting to 0.02 ODP tonnes in order to comply with the 20 per cent reduction targets. Turkmenistan has approved projects that will lead to complete phase-out of methyl bromide.

(b) Countries whose latest consumption exceeds the 2015 phase-out target

16. This category consists of 32 countries that may need to meet additional combined reduction amounting to 2,646 ODP tonnes by 2015 in order to comply with the 100 per cent reduction targets. Of the 32 countries, 23 countries have approved projects that will lead to complete phase-out of methyl bromide. Seven countries may need additional assistance from the Multilateral Fund to achieve the phase-out of methyl bromide by 2015. The remaining two countries (South Africa and Singapore) are

currently not eligible to receive funding from the Multilateral Fund. It should be noted that South Africa could receive funding for HCFC phase-out.

CARBON TETRACHLORIDE (CTC) (Appendix IV)

17. This section presents the analysis of compliance with CTC control measures. All data reported and used in this analysis are those related to controlled use only, which excludes feedstock. Reported CTC consumption was not differentiated by specific end use, such as solvents, process agents and laboratory use.

18. Of the 146 countries with reported baseline data, 90 reported zero both for the baseline and the latest consumption.

19. Countries have been grouped into the following two categories: (a) those whose latest consumption exceeds the 85 per cent reduction target that applies until December 2009; and (b) those whose latest consumption exceeds the 2010 100 per cent phase-out target. Appendix IV notes those countries that have not ratified the London Amendment.

- (a) Countries whose latest consumption exceeds the 85 per cent CTC baseline reduction target

20. One country might not achieve compliance with the 85 per cent reduction: Ecuador. This country would need to phase out a total of 0.03 ODP tonnes to meet the 85 per cent reduction by 2005.

21. Ecuador is the only country that may not need additional assistance to meet the 100 per cent reduction target for CTC since its consumption is for laboratory uses.

- (b) Countries whose latest consumption exceeds the 2010 phase-out target

22. This category consists of 12 countries that may need to phase out additional CTC amounting to 149.3 ODP tonnes to meet the 100 per cent reduction by 2010. Ten of the 12 countries have received funding for CTC phase-out agreements or projects from the Multilateral Fund. The Republic of Korea has agreed not to receive CTC funding from the Multilateral Fund. Ecuador may not need additional assistance to meet the 100 per cent reduction target for CTC since its consumption is for laboratory uses.

METHYL CHLOROFORM (TCA) (Appendix V)

23. This section presents the analysis for compliance with TCA control measures. Of the 146 countries that have reported baseline data, 103 reported zero both for the baseline and the latest consumption.

24. Countries have been grouped into three categories: (a) those whose latest consumption exceeds the 30 per cent reduction target that applies until December 2009; (b) those whose latest consumption exceeds the 70 per cent reduction target of 2010; and (c) those whose latest consumption exceeds the 2015 100 per cent phase-out target. Appendix V specifies those countries that have not ratified the London Amendment.

- (a) Countries whose latest consumption exceeds the 30 per cent TCA baseline reduction target

25. All countries are in compliance with the 30 per cent TCA baseline reduction target.

(b) Countries whose latest consumption exceeds the 70 per cent TCA baseline reduction target

26. This category consists of two countries: Bangladesh and the Republic of Korea. These countries may need to phase out additional TCA amounting to 27.6 ODP tonnes by 2010 in order to comply with the 70 per cent reduction targets. Bangladesh has received funding for agreement or projects for complete phase-out of TCA. The Republic of Korea is not eligible for funding from the Multilateral Fund.

(c) Countries whose latest consumption exceeds the 100 per cent TCA baseline reduction target

27. This category consists of eight countries that may need to meet additional combined reduction amounting to 280.8 ODP tonnes by 2015 in order to comply with the 100 per cent reduction target. Seven of those eight countries have received funding for TCA phase-out agreements or projects from the Multilateral Fund. The remaining country (the Republic of Korea) is not eligible to receive TCA funding from the Multilateral Fund.

HCFCs (Appendix VI)

28. Appendix VI includes an analysis of the latest consumption data on HCFCs and indicates whether the country had received HPMP preparation funding, the number of investment projects approved, the number of demonstration projects approved, total phase-out approved in ODP tonnes and activities planned in the 2011 business plans. The baseline data will not be available until 2011 when both of the baseline years (2009 and 2010) will have been reported. All countries have received HPMP preparation funds. Information was provided for HPMPs approved to-date and those submitted to the 63rd Meeting and the duration covered by the HPMP (such as, HPMP approved to achieve the 10 per cent reduction in 2015 or to achieve the 35 per cent reduction in 2020, for example).

D. Qualitative assessment of the operation of HPMP

1. Is the HPMP and its components (recovery and recycling programmes, equipment retrofit, training of technicians and customs, and legislation) proceeding as scheduled:

- Yes
 No
 N/A HPMP already completed

If not, please specify milestones and completion dates with delays, and explain reasons for the delay and measures taken to overcome the problems:

2. The HCFC import licensing and quota system scheme functions:

- Very well
 Satisfactorily
 Not so well

Please specify problems encountered: _____

3. The HCFC recovery and recycling programme functions:

- Very well
 Satisfactorily
 Not so well

Please specify problems encountered: _____

4. The HPMP will enable the Government to achieve:

- the 10% HCFC reduction target in 2015
 the 35% HCFC reduction target in 2020
 the 97.5% HCFC reduction target in 2030
 the complete phase-out of HCFC in 2040
 Accelerated total phase-out by _____

5. Additional measures that are needed and planned to assist in the implementation of the HPMP and to achieve compliance:
