COMITÉ EJECUTIVO DEL FONDO MULTILATERAL  
PARA LA APLICACIÓN DEL  
PROTOCOLO DE MONTREAL  
Sexagésima tercera Reunión  
Montreal, 4 – 8 de abril de 2011

**PROGRAMA DE PAÍS: TIMOR-LESTE**

El presente documento consta de:

- La hoja de evaluación del programa de país (preparada por la Secretaría del Fondo)
- Los comentarios y recomendaciones de la Secretaría del Fondo
- La carta de remisión del Gobierno de Timor-Leste
- La hoja de proyecto del programa de país y el resumen ejecutivo

## HOJA DE EVALUACIÓN DEL PROGRAMA DE PAÍS PARA TIMOR-LESTE

*Unidad Nacional del Ozono, Ministerio de Economía y Desarrollo*

### *Estado de la ratificación del Convenio de Viena y el Protocolo de Montreal*

Rúbrica	Ratificación	Fecha de vigor
Convenio de Viena (1985)	16.09.2009	15.12.2009
Protocolo de Montreal (1987)	16.09.2009	15.12.2009
Enmienda de Londres (1990)	16.09.2009	15.12.2009
Enmienda de Copenhague (1992)	16.09.2009	15.12.2009
Enmienda de Montreal (1997)	16.09.2009	15.12.2009
Enmienda de Beijing (1999)	16.09.2009	15.12.2009

**Producción de sustancias controladas:** No se producen sustancias controladas  
**Consumo total de sustancias controladas (2009):** 9,90 toneladas métricas 0,89 toneladas PAO

(toneladas)	CFC-11	CFC-12	CFC-115	Total CFC	HCFC-22	Total CFC y HCFC
métricas	0	0,34	0,04	0,38	9,52	9,90
PAO	0	0,34	0,03	0,37	0,52	0,89

**Distribución de PAO por sustancia:** CFC 42% HCFC-22 58%

**Distribución de PAO por sector:** Aire acondicionado y refrigeración 100%

### **Consumo de sustancias contempladas en el Protocolo de Montreal (toneladas PAO)**

Consumo básico del programa de país	CFC	Halones	1,1,1-tricloroetano	Bromuro de metilo	HCFC-22
Consumo básico	36,0	1,5	0,1	0,2	0,5*
Consumo admisible en 2010	0,0	0,0	0,0	0,0	0,5

\*Consumo básico estimado

**Duración del programa de país:** 2 años (2010-2012)

**Objetivo de la eliminación de SAO:** Mantenimiento del consumo nulo de CFC  
 Reducción del 10% del consumo del HCFC-22 a fines de 2014

**Esfera prioritaria de la eliminación:** Sector de mantenimiento de la refrigeración

**Costo de las actividades en el país** 271.700 \$EUA (más 40.000 \$EUA de financiación para el fortalecimiento institucional aprobados en la 61<sup>a</sup> Reunión)

### **Estrategia:**

*El Gobierno de Timor-Leste se comprometió a velar por el cumplimiento de las disposiciones del Protocolo de Montreal y, también, a reducir al mínimo el consumo de SAO de su país, con una buena relación de costo a eficacia y por etapas, para cumplir las obligaciones que incumben a las partes. El objetivo del plan de acción del programa de país consiste en mantener el consumo nulo de CFC, así como en eliminar gradualmente el consumo de HCFC, en cumplimiento del Protocolo de Montreal. El plan de acción incluye actividades para formular y aplicar una reglamentación y un sistema de otorgamiento de licencias eficaces a efectos de controlar y supervisar las importaciones de SAO (comprendidos los HCFC) y los equipos que utilizan dichas sustancias, así como actividades para mejorar las capacidades del país en materia de prácticas de mantenimiento. La ejecución del programa de país debería permitir a Timor-Leste el logro de los objetivos de reducción de las SAO.*

## COMENTARIOS Y RECOMENDACIONES DE LA SECRETARÍA DEL FONDO

### **DESCRIPCIÓN**

1. Segundo los datos relativos al Artículo 7 y un estudio realizado recientemente para preparar el programa de país para Timor-Leste y el plan de gestión de eliminación de HCFC, en 2009 el consumo total de esas sustancias notificado ascendió a 0,52 toneladas PAO. El país también notificó 0,37 toneladas PAO de CFC que se utilizan como refrigerantes. No se notificó consumo alguno de halones, bromuro de metilo u otras SAO durante ese período. El consumo básico calculado de HCFC para Timor-Leste asciende a 9,635 toneladas métricas (0,53 toneladas PAO). Al terminar 2009, el consumo de CFC debería ser nulo.
2. Timor-Leste declaró su independencia en 2002. A fines de 1999, el 70 por ciento de las infraestructuras económicas del país habían sido gravemente deterioradas por escuadrones y milicias opuestos a la independencia. Bajo la dirección de las Naciones Unidas, el país recibió una importante asistencia internacional para rehabilitar sus infraestructuras y restablecer la administración civil.
3. En Timor-Leste aún no se ha terminado el proceso de creación de capacidades para la administración pública, ni de formulación de reglamentaciones. Los distintos ministerios y departamentos del sector público siguen recibiendo un importante apoyo de las Naciones Unidas y de países donadores mediante la presencia de consejeros establecidos a largo plazo y de asistencia técnica internacional.
4. Timor-Leste se adhirió al Protocolo de Montreal en septiembre de 2009. En la 56<sup>a</sup> Reunión, el Fondo Multilateral aprobó la primera fase de la financiación para el fortalecimiento institucional, que se puso a disposición en octubre de 2009. En el marco de esa financiación, se estableció una Unidad Nacional del Ozono en el Ministerio de Economía y Desarrollo. Se organizaron campañas de información y comunicación para sensibilizar sobre la importancia del Protocolo de Montreal y la eliminación de las sustancias que agotan la capa de ozono (SAO). También se estableció un Comité de Dirección del Ozono a fin de involucrar a los principales ministerios e interesados del sector privado en el programa de eliminación de SAO. Los importadores de esas sustancias, los minoristas y el sector de mantenimiento de la refrigeración han sido informados sobre la eliminación de los HCFC y la prohibición de los CFC. Algunos interesados manifestaron preocupación sobre las consecuencias de la eliminación de los HCFC en la economía y solicitaron que se impartieran sin tardanza los comunicados, capacitación y asistencia. El Comité Ejecutivo, en su 59<sup>a</sup> Reunión, aprobó la financiación para preparar el programa de país y el plan de gestión de eliminación de HCFC. Timor-Leste también recibió la segunda fase de la financiación para el fortalecimiento institucional, así como, de conformidad con la Decisión 56/16, 55.000 \$EUA adicionales destinados a la preparación del plan de gestión de eliminación de HCFC debido al consumo de esas sustancias establecido en el estudio. Se realizó el estudio para preparar el programa de país y el plan de gestión de eliminación de HCFC que se someten actualmente a la consideración de la 63<sup>a</sup> Reunión.
5. Timor-Leste carece de legislación, reglamentos y sistemas de otorgamiento de licencias para controlar la importación y utilización de las SAO. A fin de cumplir las medidas de control del Protocolo de Montreal relativas a la eliminación de esas sustancias, la Secretaría de Estado para el Medio Ambiente del Ministerio de Economía y Desarrollo aprobó una comunicación gubernamental (MED/NOU/2010) por la que se prohibía la importación de SAO y de equipos que utilizan esas sustancias a partir del 1 de diciembre de 2010. El Gobierno de Timor-Leste ha previsto formular una política de otorgamiento de licencias de importación y exportación, así como un sistema de cuotas, para controlar la importación de HCFC.
6. La propuesta de programa de país, preparada con la asistencia del PNUMA, comprende los siguientes objetivos:

- a) Prestar apoyo a la Unidad Nacional del Ozono para el cumplimiento de sus obligaciones relativas a la recopilación de datos y la notificación de los consumos de SAO;
- b) Establecer y aplicar medidas de control para mantener el consumo nulo de CFC, como la prohibición de la importación de esas sustancias y los equipos que las utilizan;
- c) Formular la legislación del caso y establecer sistemas de otorgamiento de licencias y de cuotas eficaces para apoyar la eliminación de HCFC;
- d) Ejecutar las actividades del plan de gestión de eliminación de HCFC para asegurarse la reducción gradual del consumo de HCFC;
- e) Establecer un sistema de vigilancia de las importaciones y el consumo de SAO, y
- f) Organizar campañas de educación y sensibilización del público sobre la eliminación de los HCFC.

7. La propuesta de programa de país para Timor-Leste comprende un programa de fortalecimiento institucional y la ejecución de un plan de gestión de eliminación de HCFC. El programa de fortalecimiento institucional ya fue aprobado y renovado una vez. Las futuras solicitudes de financiación para ese programa se someterán en momentos en que deba renovárselo. La solicitud de financiación para el plan de gestión de eliminación de HCFC se presenta, a la 63<sup>a</sup> Reunión, junto con la propuesta de programa de país. Visto que en Timor-Leste no se ha ejecutado programa de eliminación de los CFC alguno, las actividades para eliminar esas sustancias se integraron en el plan de gestión de eliminación de HCFC.

## **COMENTARIOS DE LA SECRETARÍA**

8. La Secretaría observó que si bien la preparación del programa de país y el plan de gestión de eliminación de HCFC se han terminado, Timor-Leste aún no cuenta con la legislación, la reglamentación y los sistemas de otorgamiento de licencias necesarios para controlar las importaciones de SAO (CFC y HCFC) y pidió información sobre el avance, el estado actual y las disposiciones que se adoptarán para formular la legislación y las reglamentaciones, así como para establecer el sistema de otorgamiento de licencias, a efectos de controlar las importaciones.

9. El PNUMA indicó que el establecimiento del sistema de otorgamiento de licencias está en curso, pero que avanza lentamente. El Gobierno está considerando la posibilidad de incorporar el Protocolo de Montreal y sus enmiendas en la legislación nacional. El programa de país se incluirá en las recomendaciones al Gabinete para la preparación de la legislación. El PNUMA informó a la Secretaría de que, debido a que la aprobación de la legislación en el Parlamento podría demorarse hasta dos o tres años, se seguiría utilizando el procedimiento de comunicaciones gubernamentales para controlar las importaciones de HCFC y asegurarse el cumplimiento de los objetivos de control del Protocolo de Montreal.

## **RECOMENDACIONES**

10. La Secretaría del Fondo recomienda la aprobación del programa de país para Timor-Leste, y señala que esa aprobación no conlleva la aprobación de los proyectos que comprende, ni de sus montos de financiación. El programa de país para Timor-Leste se aprobará sin perjuicio de la aplicación del mecanismo del Protocolo de Montreal para abordar posibles incumplimientos.

11. La Secretaría del Fondo también recomienda que se pida al Gobierno de Timor-Leste la presentación anual, al Comité Ejecutivo, de información sobre el avance de la ejecución del programa de

país, de conformidad con la decisión del Comité Ejecutivo sobre la aplicación de esos programas (UNEP/OzL.Pro/ExCom/10/40, párr. 135), mediante el formulario aprobado disponible en línea. El primer informe, relativo al período que se extenderá del 1 de enero de 2011 al 31 de diciembre de 2011, deberá presentarse a la Secretaría del Fondo, a más tardar, el 1 de mayo de 2012.

***Cost of activities in country***US \$271,700 (plus US \$40,000 institutional strengthening funding approved on the 61<sup>st</sup> meeting)***Strategy:***

The Government of Timor-Leste is committed to ensure compliance with the provisions of the Montreal Protocol and further commits to minimise Timor-Leste's consumption of ODS, in a cost effective and staged manner, to fulfil its obligations as a party. The objective of the Country Programme (CP) action plan is to maintain zero consumption of CFCs and gradually phase out the consumption of HCFCs in compliance with the Montreal Protocol. The Action Plan comprises activities to establish and implement an effective regulations and licensing system to regulate and monitor the imports of ODS (including HCFCs) and ODS-based equipment, and activities to build the country's capacity for improved servicing practice. The implementation of the CP is expected to assist the country to achieve the ODS reduction targets.

## **COMMENTS AND RECOMMENDATIONS OF THE FUND SECRETARIAT**

### **DESCRIPTION**

1. According to the Article 7 data and a recent survey conducted for the preparation of the Timor-Leste Country Programme (CP) and HCFC phase-out management plan (HPMP), total HCFC consumption was reported at 0.52 ODP tonnes for 2009. The country also reported 0.37 ODP tonnes of CFCs used as refrigerants. No consumption of halon and methyl bromide or other ODS is reported for this period. The calculated HCFC baseline for Timor-Leste is 9.635 metric tonnes (0.53 ODP tonnes). The CFC consumption was expected to be zero after the end of 2009.

2. Timor-Leste became an independent country in 2002. In late 1999, 70 per cent of the economic infrastructure in Timor-Leste was badly damaged by troops and anti-independent militias. Intensive international assistance led by the United Nations was provided to the country to rehabilitate its infrastructure and reinstate civil administration.

3. Timor-Leste is still in the process of building its capacity for public administration and developing its regulations. The various government ministries, departments, and the public sector continue to receive substantial support from United Nations and donor countries through the presence of long-term advisors and external technical assistance.

4. Timor-Leste acceded to the Montreal Protocol in September 2009. Phase I of the institutional strengthening (IS) funding by the Multilateral Fund (MLF) was approved at the 56<sup>th</sup> meeting and released in October 2009. Under the support of the IS funding a National Ozone Unit (NOU) was established under the Ministry of Economy and Development. Public information and communication programmes were organized to raise awareness on the Montreal Protocol and the phase-out of ozone depleting substances (ODS). An Ozone Steering Committee was also established to involve key government ministries and stakeholders from the private sectors in the ODS phase-out programme. ODS importers, retailers and the refrigeration servicing sector are aware of the HCFC phase-out and the ban on CFCs. Stakeholders raised concerns about the impact of the HCFC phase-out on the economy and requested that the communications, training and assistance be provided at an early stage. At the 59<sup>th</sup> Meeting of the Executive Committee, preparation funding for the CP and HPMP was approved. The country also received Phase II of the IS funding and additional funding of US \$55,000 for the preparation of the HPMP due to the HCFC consumption identified during the survey, based on decision 56/16. The survey for the preparation of the CP and HPMP was conducted and the CP and HPMP are now submitted to the 63<sup>rd</sup> Meeting for consideration.

5. Timor-Leste has not established legislation, regulations and licensing systems for controlling the import and use of ODS. In order to comply with the Montreal Protocol control measures on ODS phase-out, the Secretariat of State for Environment, Ministry of Economy and Development issued a Government Notification (GN) (MED/NOU/2010) to ban the import of ODS and ODS-based equipment with effect from 1 December 2010. The Government of Timor-Leste plans to establish an import/export licensing policy and quota system to control the import of HCFCs.

6. The CP proposal, prepared with the assistance of UNEP, includes the objectives as listed below:

- (a) To support the NOU to fulfil its obligations in data collection and reporting on ODS consumptions;
- (b) To develop and implement control measures to maintain zero consumption of CFCs such as a ban on import of CFCs and CFC-based equipment;

- (c) To develop relevant legislation and effective licensing and quota system to support HCFC phase-out;
- (d) To implement the HPMP activities to ensure gradual reduction of HCFC consumption;
- (e) To establish a monitoring system for ODS import and consumption; and
- (f) To conduct public education and awareness programme for HCFC phase out.

7. The CP proposal for Timor-Leste includes an IS programme and the implementation of a HPMP. The IS programme has already been approved and renewed once. Future funding requests for IS programme will be submitted when it is due for renewal. The HPMP funding request is being submitted together with the CP proposal to the 63<sup>rd</sup> Meeting. Since Timor-Leste has not implemented any phase-out programme for CFCs, the activities for CFC phase-out have been integrated into the HPMP.

#### **SECRETARIAT'S COMMENTS**

8. Noting that the CP and HPMP preparation has been completed, but legislation, regulations and licensing systems for the control of ODS (CFCs and HCFCs) imports and use have not been established, the Secretariat inquired about the progress, current status and future steps planned for the development of the legislation, regulations and licensing system for import control.

9. UNEP responded that the development of the licensing system is ongoing, but the progress is slow. The Government is considering incorporating the Montreal Protocol and its amendments into the National Laws. The CP will be included in the recommendations, to the Cabinet, for the preparation of the legislation. UNEP informed the Secretariat that, as passing of legislation by the parliament could take up to two to three years, the GN procedure will continue to be used for the control of HCFC imports to ensure compliance with the Montreal Protocol control targets.

#### **RECOMMENDATIONS**

10. The Fund Secretariat recommends approval of the Timor-Leste country programme (CP), noting that approval of the CP does not denote approval of the projects identified therein or their funding levels. Approval of the Timor-Leste CP should be without prejudice to the operation of the Montreal Protocol's mechanism for addressing possible non-compliance.

11. The Fund Secretariat also recommends that the Government of Timor-Leste be requested to submit information annually to the Executive Committee on progress being made in the implementation of the CP, in accordance with the decision of the Executive Committee on implementation of CPs (UNEP/OzL.Pro/ExCom/10/40, para. 135) using the approved on-line format. The initial report covering the period 1 January 2011 to 31 December 2011 should be submitted to the Fund Secretariat no later than 1 May 2012.

DEMOCRATIC REPUBLIC OF TIMOR-LESTE  
MINISTRY OF ECONOMY AND DEVENPMENT  
SECRETARIAT OF STATE FOR ENVIRONMENT  
GABINET OF THE SECRETARY OF STATE

---

To : Ms. Maria Nolan,  
Chief Officer Secretariat of the Multilateral Fund for the Implementation of the Montreal Protocol Montreal, Canada  
Fax: (514) 282-0068

Ref. Number: ...15...../GSEMA/01/11

Date: 31 of January 2011

Subject: Endorsement Letter for the Multilateral Fund for Country Programme for Timor-Leste

Dear Ms. Maria Nolan,

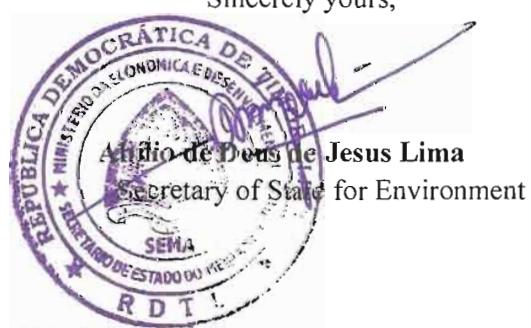

It is our great honour to submit the Country Programme for Timor-Leste for consideration at the 63<sup>rd</sup> Meeting of the Executive Committee of the Multilateral Fund (MLF). This Country Prgramme jointly with HPMP has been developed by the Secretariat of State for Environment, Ministry of Economy and Development with the assistance of UNEP and UNDP Dili.

We would like to thank the MLF for all the support provided to Timor-Leste and appreciate your continuous support to Timor-Leste in its implementation of the Montreal Protocol.

The Secretariat of State for Environment, Ministry of Economy and Development of the Government of Timor-Leste would avail itself of this opportunity to renew its thanks to the Secretariat of the Multilateral Fund for the Implementation of the Montreal Protocol.

Please accept the assurances of my highest consideration.

Sincerely yours,

Cc: Rajendra M. Shende

and Development**

**PERIOD COVERED BY  
COUNTRY PROGRAMME**

**2011 - 2015**

## 1. PHASE OUT SCHEDULE

<b>Substance</b>	<b>2009 Consumption (import) in ODP Tonnes</b>	<b>Planned Total Cons. until end 2015 (Tonnes x ODP)</b>	<b>Planned year of Reduction</b>
CFC-12 & CFC-115 (in R-502)	0.37	0	2010
<b>Total (Annex A)</b>	<b>0.37</b>	<b>0</b>	
HCFC-22 in R-502	0.0022	0	2010
HCFC-22	0.5214	2.621	2015
<b>Total Annex C</b>	<b>0.5236</b>	<b>2.621</b>	

## 2. ACTION PLAN OF Timor Leste

In order to implement its phase out strategy, the Government has developed an Action Plan as follows: (Since 100% of ODS consumption is in the Refrigeration and air-conditioning sector, this action plan matches the one drawn up within the HCFC Phase-Out Management Plan for Phase I up to 2015).

- Support the National Ozone Office which has been established within the Secretariat of Environmental Affairs, Ministry of Economy & Development as the focal point for all activities related to the Montreal Protocol.
- Develop and implement control measures including:
  - Ban imports of Annex A substances and equipment using these substances by 2011 or earlier.
  - Prohibit new enterprises producing and/or assembling equipment, foams, or aerosols using ODS at the earliest.
  - Develop and implement appropriate legislation to restrict and control imports and exports of ODS and other refrigerants.
  - Establish import quotas and licenses for HCFCs.
- Establish a monitoring system for ODS imports and consumption
- Embark on a communication programme
- Implement and monitor the following components of the HPMP with assistance from the Multilateral Fund and implementing agencies/bilateral donors:
  - Development of legislation and regulations
  - Training of Trainers in Good Refrigerant Management Practices
  - Train Customs Department, Statistics Division and NOU in monitoring and collection of data to meet the reporting requirements of the Protocol

- Set up servicing infrastructure for good practice and recovery and recycling

### 3. PROJECTS

A summary of the projects identified and detailed in the HPMP are as follows:

Name of Project		Time Frame	Amount Requested from Fund (US\$)
HCFC Phase-out Management Plan – Phase 1 (up to 2015)	Training in Monitoring and Control of ODS (including procurement of refrigerant identifiers)	2011 - 2015	\$59,000
	Training of Technicians	2011 - 2015	\$45,000
	Public Awareness	2011 - 2015	\$30,900
	Equipment for Training school and recovery equipment and tools for technicians	2011 - 2015	\$96,800
	Project Coordination & Management	2011 - 2015	\$40,000
<b>TOTAL</b>			<b>\$271,700</b>

### 4. COSTS

ODP to be phased out	0.418 ODP tonnes
Total Cost of phase-out	US\$ 271,700
Cost of projects being submitted with this Country Programme	US\$ 271,700
Amount being requested from Fund	US\$ 271,700
Cost effectiveness (on Funds requested)	US\$650/ODP kg

## EXECUTIVE SUMMARY

Timor-Leste (officially the Democratic Republic of Timor-Leste) is a country at the eastern end of the Indonesian archipelago. Timor Leste was colonized by Portugal in the 16th century, and was known as Portuguese Timor until Portugal's decolonization of the country. In late 1975 Timor Leste declared its independence but was invaded and occupied by Indonesia later that year, and declared that country's 27<sup>th</sup> province the following year. In 1999, following the United Nations-sponsored act of self-determination, Indonesia relinquished control of the territory and Timor Leste became the first new sovereign state of the twenty-first century on May 20, 2002 and joined the United Nations on September 22, 2002.

In late 1999, about 70% of the economic infrastructure of Timor Leste was laid waste by Indonesian troops and anti-independence militias. Over the next three years a massive international program, manned by 5,000 peacekeepers (8,000 at peak) and 1,300 police officers, led to substantial reconstruction in both urban and rural areas. The country continues to face great challenges in rebuilding its infrastructure, strengthening the civil administration, and generating jobs for young people entering the work force. The development of oil and gas resources in offshore waters has greatly supplemented government revenues. This technology-intensive industry, however, has done little to create jobs for the unemployed because there are no production facilities in Timor and the gas is piped to Australia. The underlying economic

policy challenge the country faces remains how best to use oil-and-gas wealth to lift the non-oil economy onto a higher growth path and to reduce poverty.

Timor Leste acceded to the Vienna Convention, Montreal Protocol, the London Amendment, the Copenhagen Amendment, the Montreal Amendment and the Beijing Amendment on September 16, 2009. With an Annex A per capita consumption of 0.00033 kilograms (0.38 ODP Tonnes in 2009 for a population of 1.13 million), Timor Leste is classified as a developing country operating under paragraph 1 of Article 5 of the Montreal Protocol. In order to comply with the provisions of the Protocol, as a first step, the Government of Timor Leste has carried out a national survey and formulated its Country Programme and HCFC Phase out Management Plan with the assistance of UNEP and funding assistance from the Multilateral Fund.

The Country Programme provides data on consumption and use of ODS in Timor Leste and expresses the commitment of the Government to phase out consumption of Annex A substances immediately and reduce the consumption of Annex C substances as per the requirements of the Protocol. An Action Plan has been defined, and steps will be taken to implement some or all of the action items, after scrutiny, to ensure a smooth phase out and reduction without causing undue economic hardship to the industrial, commercial and, in particular, the domestic consumers.

Timor Leste does not produce any ODS and all its requirements are met through imports. The 2009 Annex A substances import amounted to 0.38 ODP Tonnes, while Annex C substances import amounted to 0.5236 ODP Tonnes. The entire consumption of ODS was in the Refrigeration and Air Conditioning Service sector.

Timor Leste, as the "new country of the new millennium", is still in the process of building its administration and governmental institutions, developing its own rules, regulations, import export policies, data bases etc. The various government ministries, departments, and the public sector continue to receive a lot of support from UN agencies and donor countries as aid and through the presence of long-term advisors attached to them. There is no specific Environmental Act or Legislation within the Laws of Timor Leste. Consideration is being given to include the Montreal Protocol and its Amendments into the National Laws. This Country Programme will form a part of the recommendations submitted to Cabinet for preparation of legislation. Recently, the Ministry of Development issued a Government Notification (MED/NOU/2010) to ban ODS and ODS using equipment imports (Non HCFC). The efforts to assist the government to establish an import/export licensing policy for HCFCs and other refrigerants is ongoing.

Customs has started using computerized records of all imports and exports but to date the data base does not have any entries for the HS Codes related to ODS and blends and other refrigerants also as they are not declared appropriately and customs does not have the necessary training. Import/Export legislation and regulations will need to be designed with Customs inputs to ensure that ODS can be identified and data entered appropriately.

The Don Bosco Vocational School at Comoro (near Dili) teaches refrigeration and air-conditioning as part of their electrical trade curriculum, but the training concentrates on the electrical aspects of refrigeration and air-conditioning.

Timor Leste's consumption is totally driven by market availability and demand. Annex A substances are no longer available for imports from Indonesia or Singapore and this has resulted in zero imports of CFC-12 and R-502 during the period January – May 2010. The importers also advised that their suppliers in these countries had advised that these refrigerants were not going to be available any more.

In the case of HCFC-22 the demand for comfort air-conditioning has gone up substantially since 2005 with the rebuilding of government buildings, presence of expatriates working as long term advisors to

various government departments, significant presence of international aid agencies, and of course the international peace keeping and police forces in the country. In addition Timorese citizens are also being able to afford the equipment thanks to the low prices of small split and window air-conditioners.

The institutional strengthening project was approved by the Multilateral Fund and the government has established the National Ozone Unit (NOU) under the Secretary of State for Environment, Ministry of Economic & Development. The NOU is the focal point for all ODS phase-out activities, data collection and reporting and for implementing public awareness programs. It will also be the link with the Minister, the Minister of State for Environment and the various departments to ensure the implementation of all measures and coordinate all projects.

The Government is concerned about its lack of an established infrastructure for controlling and phasing out ODS. It has requested that their situation be considered unique and that there be an exception to the strict funding guidelines for HPMPs to enable the country to quickly develop its capacity to manage ODS phase out as otherwise there is a strong possibility of the country being in non-compliance from 2013 onwards.

A total of US\$ 271,700 is being requested from the Multilateral Fund to implement the Country Programme and the first stage HPMP projects to sustain CFC phase-out and to achieve the HCFC freeze from 2013 and 10% phase out from 2015.
