EXECUTIVE COMMITTEE OF THE MULTILATERAL FUND FOR THE IMPLEMENTATION OF THE MONTREAL PROTOCOL Seventy-third Meeting Paris, 9-13 November 2014

PROGRESS REPORT OF THE WORLD BANK AS AT 31 DECEMBER 2013

1. This document presents the progress report of the World Bank as of 31 December 2013^1 , and consists of:

Executive summ	Executive summary									
Part I:	Implementation progress as at 31 December 2013 (cumulative)									
Part II:	Project implementation progress in 2013									
Part III:	Comments and recommendations made by the Secretariat									
Annex I:	Project implementation data in 2013 by country									

Executive summary

2. The following is a summary of progress in the implementation of projects and activities implemented by the World Bank up to 31 December 2013 for the year 2013 and cumulative since 1991:

- (a) Phase-out: In 2013 alone, 327.7 ODP tonnes of consumption were phased out and an additional 376.9 ODP tonnes of consumption were approved for phase-out. Since 1991, 127,524 ODP tonnes of consumption and 174,895 ODP tonnes of production had been phased out at the end of 2013, of an expected total of 298,621 ODP tonnes from projects approved up to the end of 2013 (excluding cancelled and transferred projects);
- (b) **Disbursements/Approvals:** In 2013, US \$37.60 million was disbursed and US \$29.58 million was planned for disbursement based on the 2012 progress report representing a rate of disbursement of 127 per cent of that planned. Cumulatively,

¹ The progress report is attached. The data has been included in the Consolidated Progress Report database that is available upon request.

Pre-session documents of the Executive Committee of the Multilateral Fund for the Implementation of the Montreal Protocol are without prejudice to any decision that the Executive Committee might take following issuance of the document.

US \$956.57 million had been disbursed out of the total US \$1.03 billion approved for disbursement up to the end of 2013 (excluding agency fees). This represents a rate of disbursement of 93 per cent. In 2013, US \$44.61 million was approved for implementation;

- (c) **Cost-effectiveness (in ODP):** Since 1991, the average cost-effectiveness of investment projects approved leading to a permanent reduction in consumption was US \$3.29/kg. The cost-effectiveness for the production sector was US \$3.97/kg. The average cost-effectiveness of investment projects per ODP tonne was US \$2.89/kg for completed projects and US \$75.59/kg for ongoing projects²;
- (d) **Number of projects completed:** In 2013, 15 projects were completed. Since 1991, 1,005 projects of the 1,034 projects approved for the World Bank (excluding closed or transferred projects) were completed by the end of 2013. This represents a completion rate of 97 per cent;
- (e) Speed of delivery investment projects: Projects that were completed in 2013 were completed on average 75 months after their approval. Since 1991, the average time for completion of investment projects has been 40 months after their approval. First disbursements under these projects occurred, on average, 24 months after they had been approved;
- (f) **Speed of delivery non-investment projects:** Projects that were completed in 2013 were completed on average 53 months after their approval. Since 1991, the average time for completion of non-investment projects has been 35 months after their approval. First disbursements under these projects occurred, on average, 19 months after they had been approved;
- (g) **Project preparation:** Of the 274 project preparation activities approved by the end of 2013, 272 have been completed, leaving two ongoing;
- (h) Implementation delays: There were a total of 18 ongoing investment projects under implementation at the end of 2013. These projects, on average, are experiencing a delay of 24 months. However, projects classified as "projects with implementation delays" that are subject to the procedures of project cancellation amount to one project (as multi-year agreements (MYAs) are not subject to those procedures);
- (i) MYAs: In 2013, the World Bank was implementing one MYA for accelerated CFC production, one MYA for CTC³, one MYA for methyl bromide (MB) consumption, six MYAs for HCFC phase-out management plans (HPMPs) and one MYA for the HCFC production phase-out management plan (HPPMP) in China. Since 1991, 34 MYAs have been approved and 24 MYAs have been completed.

 $^{^{2}}$ The higher cost-effectiveness for ongoing projects is largely due to the lower ODP values of HCFCs but also due to the means of assigning phase-out by agencies.

³ Plans of action to use the remaining budgets for the CFC production that is considered as an ongoing MYA as well as for the MYAs considered completed (halon, CTC, foam and CFC servicing) are addressed in document UNEP/OzL.Pro/ExCom/73/17, "Status Reports and Compliance".

Part I: Implementation progress as at 31 December 2013 (cumulative)

3. As of that date, the Executive Committee had approved approximately US \$1.13 billion consisting of US \$1.03 billion for the implementation of investment and non-investment projects and US \$101.91 million for agency fees and administrative support costs, as shown in Table 1. In 2013, eight new projects and activities were approved. This level of funding is expected to result in the phase-out of 298,621 ODP tonnes of ODS consumption and production.

Sector	Funding (US \$)
Aerosol	23,058,919
Destruction	400,000
Foam	134,961,693
Fumigants	7,093,426
Halon	70,221,038
Multiple sectors	2,341,168
Other	5,059,360
Phase-out plan	164,308,180
Process agent	114,342,497
Production	289,532,020
Refrigeration	181,049,335
Several	27,268,921
Solvents	10,147,394
Sterilant	661,227
Sub-total	1,030,445,178
Administrative cost	101,914,004
GRAND TOTAL	1,132,359,183

 Table 1: Approved funding by sector for the World Bank as at 31 December 2013

4. A summary of the status of projects implemented by the World Bank, by category, is presented in Table 2.

 Table 2: Status of project implementation by project type

	Nu	mber of projec	ets*	Funding (US \$)					
Туре	Approved	Completed	% completed	Approved	Disbursed	Balance	% disbursed		
Country programme	29	29	100	1,627,732	1,627,732	0	100

2003	24	24	100	72,734,119	72,734,119	0	100			
2004	29	29	100	77,133,930	77,111,770	22,160	100			
2005	28	27	96	70,576,671	68,042,259	2,534,412	96			
2006	22	22	100	65,484,461	64,473,610	1,010,851	98			
2007	25	24	96	66,555,270	66,005,270	550,000	99			
2008	28	27	96	40,839,663	39,943,059	896,604	98			
2009	23	19	83	27,072,190	25,447,013	1,625,177	94			
2010	16	16	100	1,533,623	1,148,623	385,000	75			
2011	10	5	50	44,854,962	32,254,404	12,600,558	72			
2012	11	1	9	12,485,679	2,838,230	9,647,449	23			
2013	8	1	13	44,613,067	77,698	44,535,369	0			
Total	1,034	1,005	97	1,030,445,178	956,574,929	73,870,249	93			

Table 3: Status of project implementation by year

*Excludes closed and transferred projects.

Part II: Project implementation progress in 2013

6. The Secretariat reviewed the status of implementation on a country-by-country basis taking into account implementation delays that have occurred with respect to planned completion dates that had been reported in 2013, the potential impact of these delays on phase-out and the rate of planned disbursements, and noted that the World Bank completed 54 per cent of the projects they had planned to complete in 2013 and met 64 per cent of the phase-out target planned. The World Bank had planned disbursements in nine countries or regions, and achieved an overall rate of disbursement of 127 per cent in 2013.

⁴ The data is presented according to the year when a project was approved by the Executive Committee. It treats all approvals (investment and non-investment projects) equally (i.e., an investment project or a funding tranche of an MYA of US \$1 million is considered one project, same as a country programme preparation of US \$30,000). Key indicators from the annual summary are: the percentage of projects completed, ODP phased out, and percentage of funds disbursed. In reviewing the data on funds disbursed, it should be noted that there are three types of disbursements: during implementation, after implementation and for retroactively-financed projects.

7. This part of the progress report summarises progress and financial information on the following ongoing $projects^5$:

- (a) CFC- and CTC-related activities;
- (b) Projects for the phase-out of consumption of MB;
- (c) Projects related to metered-dose inhalers (MDIs), ODS waste disposal, and chillers;
- (d) Projects related to the phase-out of HCFCs, including project preparation, demonstration projects, HPMPs and HPPMP;
- (e) IS projects; and
- (f) Administrative costs.

CFC- and CTC-related activities

8. As of 31 December 2013, a total of two MYAs for the phase-out of CFC and CTC were still ongoing. All phase-out activities associated with 23 MYAs have been completed, pending only the financial closure and the submission of project completion reports, where applicable. The two ongoing activities, including the accelerated CFC production phase-out and the CTC phase-out plans in India have now been reported as operationally completed in 2014.

Projects for the phase-out of consumption of MB

9. As of 31 December 2013, one MYA for the phase-out of the consumption of MB in Viet Nam was still ongoing. The final annual programme and tranche request was submitted to the 72^{nd} meeting. In 2013, the country's MB consumption of 49.98 ODP tonnes was below the maximum allowable consumption. Of the US \$1,058,284 approved by the Executive Committee, US \$1,037,698 has been disbursed as of 31 December 2013. The project is expected to be completed by December 2014.

MDIs, ODS waste disposal and chillers

Pharmaceutical aerosol and MDIs

10. The World Bank is implementing one project in the pharmaceutical aerosol sector in China (CPR/ARS/51/INV/447) that was approved in March 2007. It indicated that the technical assistance activities to establish the specifications of the substitutes are completed and that the State Food and Drug Administration (SFDA) issued a ban on the use of CFCs in non-MDI pharmaceutical products. Moreover, the additional ODS phase-out contracts related to the 26 enterprises were signed in May 2013. The project funds have been fully disbursed to China due to the closing of the umbrella project in June 2013. The Foreign Economic Cooperation Office/Ministry of Environmental Protection (FECO/MEP) and the SFDA decided that the disbursement deadline for these contracts will be 31 December 2014. All balances at the end of 2014 should be returned to the Fund in 2015. The project is planned for completion by December 2014.

⁵ Ongoing projects are all projects that have been approved by the Executive Committee and were under implementation as of 31 December 2013. Key indicators of progress include: percentage of funds disbursed and percentage of projects that have begun disbursing funds; funding expected to be disbursed by the end of the year (funds disbursed plus estimated disbursements in 2013) as a percentage of the approved funding; the average length of projected delay in implementation (project completion per proposal and currently planned date of completion); and information provided in the remarks column in the progress report database.

11. The World Bank is also implementing one MDI conversion project in Argentina (ARG/ARS/56/INV/159) that was approved in November 2008. The World Bank indicated that the "Laboratorio Pablo Cassará" submitted its new formulation based on hydrocarbon propellant to the national health authority for review and has requested approval to bring the product to the market. The approval of the new formulation is awaited. CFCs are no longer used as propellant in formulations of salbutamol. The project is planned to be completed by December 2014.

ODS disposal

12. The World Bank received funding for the preparation of ODS disposal projects in Indonesia (IDS/DES/57/PRP/187) and the Philippines (PHI/DES/57/PRP/85) and has used funds to prepare studies that were submitted to the 73^{rd} meeting⁶.

Chiller projects

13. The World Bank is implementing the following projects under the global chiller replacement project (GLO/REF/47/DEM/268), approved in November 2005, and for which only US \$1,567,640 of the US \$3,735,556 approved has been disbursed as shown in Table 4.

	Table 4. Status on the implementation of chiner projects								
Country	Project status								
Argentina	The project was incorporated into a new grant agreement between the Government and the								
	World Bank; the country is currently processing a presidential decree to make the grant agreement								
	effective, and is expected to enter into force in 2014.								
India	Four chillers were replaced in 2013 and several meetings were organised with chiller manufactures								
	and potential beneficiaries. An energy-efficiency initiative was also carried out.								
Indonesia	The project has been canceled after failure to obtain endorsement from the Global Environment								
	Facility (GEF) due to Council objections on possible use of HFC-based refrigerants in replacements.								
Jordan	The project has been completed, and 4 metric tonnes of CFCs has been recovered.								
Philippines (the)	The project restructuring was approved by the World Bank. The Government identified 46 potential								
	chillers for replacement; letters of intent confirming the enrollment of 25 chillers have been received.								
	By the end of 2013, eight sub-grant agreements covering the replacement of 13 chillers were signed.								
	The online monitoring system is now operational and a marketing plan has been developed to								
	encourage additional chiller owners to participate in the project.								

Table 4: Status on the i	mplementation of	chiller projects
--------------------------	------------------	------------------

14. The Executive Committee may wish to request the World Bank to provide an update on the status of disbursement for the global chiller demonstration project including the signing of the grant agreement of the Argentina component to the 74th meeting.

Projects related to the phase-out of HCFCs

HPMP preparation

15. As of 31 December 2013, the Executive Committee has approved US \$2.6 million for 18 project preparation activities in seven Article 5 countries to address HCFC control measures. Implementation of these activities resulted in the approval of stage I of HPMPs in six Article 5 countries⁷.

⁶ The report on these studies can be found in the Status Reports and Compliance document (UNEP/OzL.Pro/ExCom/73/17).

⁷ One of the seven preparation activities was for the Philippines where the World Bank is not an implementing agency for the approved stage I of the HPMP.

HCFC demonstration projects

16. The Executive Committee has approved two HCFC demonstration projects in the foam sector for China. As of 31 December 2013, one project has been completed and the other project (CPR/FOA/59/DEM/491) covering three enterprises, and approved in November 2009, is still under implementation. The World Bank indicated that of the three enterprises, one has received approval from local authorities to start commercial production; one dismantled its baseline equipment and received approval from the firefighting bureau to start commercial production with the new technology but local Environmental Protection Bureau approval is still pending; and one received its equipment and started testing. A technical problem with product quality was identified during trials and was expected to be resolved by the end of March 2014. The HCFC demonstration projects in the foam sector for China have now been reported as operationally completed in 2014.

HPMPs

17. As of 31 December 2013, there are six HCFC MYAs under implementation in six countries valued at US \$111.48 million in principle for which US \$75.93 million has been approved for tranche activities. The Executive Committee has also approved two HCFC individual projects including one investment and one technical assistance projects. These individual projects have been completed. The issues identified during the progress review are summarized in Table 5.

Country	Project status
Argentina	The grant agreement has been negotiated and finalized but is pending approval by presidential decree. Nevertheless, the World Bank reported that the retroactive financing modality had been used to allow the country to initiate the procurement of the new equipment.
Indonesia	The low disbursement rate results from the late signing of the agreement which occurred in July 2013. Since then, agreements have been signed between the national ozone unit and three foam companies. First payments have been released to three companies that have started their conversions and are currently designing their cyclopentane production lines.
Jordan	The zero disbursement rate results from the late signing of the grant agreement (only in May 2013) and from some delays in processing the disbursement. Legislation has been updated and the HCFC quota system was issued by January 2013. Of the three sub-grants with the three enterprises, one was signed in February 2014 and a second one is planned for signing in September 2014. In addition, a workshop was held for HCFC importers, including air-conditioning manufacturers. The second tranche request is planned for submission in 2015.
Thailand	The grant agreement, which requires cabinet approval and whose negotiation was finalised in February 2014 was submitted to the Government for its counter-signature in April 2014. Given the political situation in the country, its approval is expected after the selection of the new cabinet and once the World Bank engagement has been renewed.

 Table 5: Status on implementation of HCFC MYAs with implementation issues

18. The Executive Committee may wish to request the World Bank to provide an update to the 74th meeting on the signing of the grant agreements for the HPMPs in Argentina and Thailand, and the disbursement rates for the HPMPs in Indonesia and Jordan.

HPPMP

19. As of 31 December 2013, the Executive Committee has approved the HPPMP for one Article 5 country (China). The World Bank reported that the production quotas for 2013 were issued and that the Government of China signed the quota reduction contracts with six HCFC-141b and six HCFC-142b producers for a total value of US \$10.427 million. The production quotas for 2014 were also issued.

Thirty percent of the first funding tranche was transferred to China in February 2014. Consequently, there was no disbursement in 2013. A total of US \$5,213,500 was disbursed against 12 contracts during the first quarter of 2014 from the Government of China and the production target for 2013 has been met.

IS projects

20. The Executive Committee has approved 45 IS projects in seven countries that are implemented by the World Bank. As of 31 December 2013, 43 IS projects have been completed and two projects are still ongoing (Jordan and Thailand). The World Bank has not renewed any IS activities during 2013.

Administrative costs

21. Of the net US \$1.03 billion approved for project implementation, US \$101.91 million has been disbursed for administrative costs resulting in an overall administrative cost ratio of 9.9 per cent since 1991. In 2013, of the US \$44.61 million approved, US \$4.55 million has been disbursed for administrative costs.

Part III: Comments and recommendations of the Secretariat

Comments

Implementation delays

22. There is one project with implementation delays, after taking into consideration any projects that are no longer subject to monitoring, related to decisions of the Executive Committee. This project, which can be found in Appendix I of Annex III of the consolidated progress report (UNEP/OzL.Pro/ExCom/73/10), was also classified as having implementation delays in 2012. The Executive Committee may wish to note that the World Bank will report to the 74th meeting on one project with implementation delays.

Streamlining in the annual progress and financial report

23. The Secretariat appreciated the World Bank's efforts and its ability to describe the activities in the Remarks column in line with decision $70/7(b)(i)^8$. However, it often appeared that there was no implementation issue but in some cases it was not clear if the activities described were all of the activities planned during the reporting period or whether there were any delays. For a smooth implementation of decision 70/7(b)(i), the World Bank and the Secretariat agreed on a reporting format taking into account the World Bank projects' specifics. The new reporting format is presented below:

(a) In the case of the HPMP annual tranches, the "remarks" column shall contain the following data points and milestones where applicable:

Work/institutional arrangements agreed (mm/yr); Grant Agreement signed (mm/yr); TORs for overall technical and implementation support completed (mm/yr); Brief summary of progress made in the reporting year including any signing of sub-grant agreements and next milestone/action; Any delay during reporting year? (yes/no); If yes,

⁸ The Executive Committee requested the implementing agencies when submitting their progress reports to confirm whether the activities reported for the review period represented all those planned for it, or systematically to provide for each project the list of activities planned but not implemented, the reasons for the delay in implementing the activities, the action plan for resolving the issues, and whether or not the delay in implementing specific activities would have an impact on the project completion date, in the Remarks column of their annual progress and financial reports.

reasons for delay, action(s) to resolve it and whether it will impact project completion date; Any ongoing problems (that hamper implementation)? (yes/no); If yes, is any action required by ExCom? All funds disbursed (mm/yr).

(b) For non-investment projects, the "remarks" column shall contain the following data points and milestones where applicable:

Work/institutional arrangements agreed (mm/yr); Grant Agreement signed (mm/yr); Brief summary of progress made in the reporting year, and next milestone/action; Any delay during reporting year? (yes/no); If Yes, reasons for delay & action plan to resolve it and whether it will impact project completion date; Any ongoing problems (that hamper implementation)? (yes/no); If Yes, is any action required by ExCom?

Data discrepancies

24. There remain several data inconsistencies between the data in the Secretariat's Inventory of Approved Projects and the data in the World Bank's progress report, including the following:

- (a) The phase-out for the production sector per proposal varies from the progress report and the Inventory with the progress report having 7,000 ODP tonnes more of phase-out than the Inventory;
- (b) Two projects are classified as financially completed but there remain balances of funds that have not been returned;
- (c) Data submitted for funds committed by the Executive Committee and funds released do not match the Secretariat's data;
- (d) There is a project in the World Bank's progress report that is not in the Inventory (PHI/REF/19/INV/45);
- (e) There is an approved project without an approved amount that does not correspond to the Secretariat's data;
- (f) At its 71st meeting, the Executive Committee agreed that there should be a new modality for those projects where funds are transferred from the implementing agency to a country for final onward distribution to enterprises. The Bank did not provide that indicator but actually included funding for the aerosol project (CPR/ARS/51/INV/447) as well. With the inclusion of this project, this modality has been identified for non-HCFC projects in China as well;
- (g) There remain differences in ODP estimates where the Inventory's data show a phase-out of 11,000 ODP tonnes more than the World Bank's progress report; and
- (h) There are project adjustments that are different in the World Bank's progress report and the Inventory, but these differences have already been taken into account with respect to the reconciliation of accounts with the exception of the project preparation in Argentina for the foam sector (ARG/FOA/65/PRP/167) that will need to be addressed in the next reconciliation.

25. The discrepancies with respect to financial matters have been or will be resolved in the context of the annual reconciliation of account. The other data discrepancies will be addressed in the submission of the 2014 annual progress and financial reports.

Status reports requested at the 72nd meeting for submission to the 73rd meeting

26. The Secretariat reviewed the status reports requested at the 72^{nd} meeting in the light of the updated information provided in the 2013 progress report to ascertain if the issues identified at the 72^{nd} meeting had been resolved. The issues raised at that meeting continue to be the subject of an updated report.

RECOMMENDATIONS

- 27. The Executive Committee may wish:
 - (a) To note:
 - (i) The progress report of the World Bank as at 31 December 2013 as contained in document UNEP/OzL.Pro/ExCom/73/15;
 - (ii) That the World Bank will report to the 74th meeting on one project with implementation delays which was also classified as such in 2012, as indicated in Appendix I of Annex III of the consolidated progress report (UNEP/OzL.Pro/ExCom/73/10);
 - (b) To request the World Bank to submit additional status reports to the 74th meeting to monitor:
 - (i) The disbursement rates of approved funds for the global chiller demonstration project (GLO/REF/47/DEM/268) and the signing of the grant agreement for the Argentina component;
 - (ii) The signing of the grant agreement for the HCFC phase-out management plans (HPMPs) in Argentina and Thailand;
 - (iii) The disbursement rates of approved funds for the HPMPs in Indonesia and Jordan; and
 - (c) To request the World Bank and the Secretariat to report on a resolution to the difference in phase-out of 11,000 ODP tonnes in the consumption sector and 7,000 ODP tonnes in the production sector between the Inventory of Approved Projects and the World Bank's progress report.

Annex I

WORLD BANK PROJECT IMPLEMENTATION BY COUNTRY

I. PROJECT APPROVALS AND DISBURSEMENTS

A. Annual Summary Data

1. Implementation of World Bank Multilateral Fund activities has advanced in the calendar year 2013. Maintaining a cumulative ODP phaseout of over 302,000 metric tonnes (MT), over 100 percent of the total ODP to be phased out through World Bank conversion and closure projects has been achieved. Cumulative disbursement for the entire World Bank portfolio in the year 2013 is US\$956.57 million. Eight new project approvals by the MLF have increased the number of active projects in the Bank's portfolio to a total of 1,034. The cumulative number of ongoing multi-year projects in the Bank's portfolio, including newly approved multi-year HCFC phaseout projects, was 10 in 2013.

2. Implementing Agency performance is measured by a set of nine weighted performance indicators in accordance with Executive Committee Decision 41/93. In 2013, six annual programs associated to existing and new multi-year agreements were submitted and approved out of seven planned in the approved table of World Bank 2013 performance targets, which is 86% percent of the target of this "approval" indicator. In regards to the ODP phaseout target which is covered in two of four "implementation" indicators that deal with multi-year projects on the one hand, and with individual projects on the other, the World Bank can claim phaseout of a total of 327 tonnes in ODP consumption for 2013 from the ongoing individual and multiyear projects. The target has been achieved if taking account the phase-out from two ongoing inividual projects in 2013. In the context of multi-year projects, the indicator of milestone activities was 100% completed. World Bank performance for all four implementation indicators is highlighted in Section IV of this annual report.

3. The World Bank met two of its three "administrative" indicators for 2013. The 2013 Progress Report was submitted on time. In its 2013 Business Plan, the Bank committed to submit to the Executive Committee 100 percent of PCRs for the number of projects completed in the 2013 PCR reporting period. In the PCR reporting period (July 2012-June 2013), four investment projects completed which require PCRs. Five PCRs were submitted in 2013. If these are counted against the PCR target set with the Senior Monitoring and Evaluation Officer for CY2012, then the Bank achieved this target by more than 100%. In terms of speed of financial completion, a third administrative indicator, the actual speed was more than double of the 2013 target of 30 months primarily because of the impact of tranches of multi-year agreements physically completed over a long duration. This is explained further in Section IV.

4. According to Decision 41/93, the MLF Secretariat was requested to continue to monitor traditional indicators of performance on the basis of trend analysis. These indicators include disbursement, value of projects approved, cost of project preparation, cost-effectiveness, distribution of projects among countries, speed of first disbursement, speed of completion and net emission due to delays. 2013 outcomes in relation to these traditional indicators are also provided in Section IV.

B. Summary of Data by Project Type (CPG, DEM, INS, INV, PRP, TAS, TRA)

5. Table I-2 summarizes the entire portfolio of World Bank project approvals, adjustments and disbursements by type of project or activity. As can be seen from the table, the major proportion of the Bank's approved funding to date has gone for investment projects, US\$1,002,378,580. The amounts allocated for institutional strengthening and country program development are US\$8,402,668 and US\$2,383,906 respectively.

Table I-2: Summary of Data by Project Type

C. Multi-year Agreements

6. The World Bank has received approval for a total of 31 multi-year projects as of the end of 2013 with one of these having been cancelled before implementation start in 2006. The latest and sole approval of a multi-year agreement (MYA) in 2013 is Stage I of the China HCFC Production Phaseout Management Plan (HPPMP). Approved in principle for US\$95 million, the Stage I HPPMP will move 3,970 ODP tonnes of HCFCs out of production. The first tranche worth US\$24 million was released to China in April 2014. Details underpinning the agreement's execution between the Executive Committee and China for permanent HCFC elimination through 2015 were finalized in December 2013.

7. In addition to its role in leading implementation for the 31 multi-year projects, the World Bank was a Cooperating Agency for chiller replacements under two multi-year agreements with UNIDO as the Lead Agency (in Argentina and Mexico) which are, as of the end of 2013 both completed. It was also a Cooperating Agency for CFC phase-out sector plans under Indonesia's National ODS Phaseout Plan where UNDP was the Lead Agency.

8. Out of the cumulative ongoing multi-year activities in the Bank's portfolio, four annual programs (or plans) were approved in 2013, for the HCFC foam sector plan in China, for an HPMP and Methyl Bromide Phaseout Plan in Vietnam and the HCFC foam sector plan in Indonesia. The second half of the final tranche of the India Accelerated CFC Production Sector Plan was released in April 2013 and the work plan for the India CTC Consumption and Production Sector Plan was approved in July of the same year (without funding). Taken together, the tranches are worth over US\$20 million.

9. The four tranches approved belong to a group of nine previously approved multi-year projects that were ongoing as of the end of 2013. Three are for the sustainable phase-out of CFCs, CTC, and methyl bromide and six are multi-year projects involving the phase-out of HCFC consumption in the foam and air-conditioning sectors. These are in addition to the newly approved HPPMP.

10. As of 2013, 27 multi-year projects received full funding by the Executive Committee. Although fully funded for phase-out taking place by 2010, several of these projects continue to be active in different ways. Decision 56/13 requires that sector plans in the foam, halon and CFC production sectors in China be tracked until the full utilization of the remaining balances. In accordance with Decision 56/13, the World Bank will continue to cooperate with China on monitoring the ongoing implementation of sector plan activities despite that the grant agreement (ODS IV) under which these sector plans fall closed on June 30, 2013. Completion of three remaining sector plans in India (two CFC production plans and the CTC sector plan) is expected in 2014 after which time, any balances will be settled. 11. The reporting year saw the completion of three multi-year projects in the Bank's portfolio. The Thailand National CFC Phaseout Plan (NCPP) and the National Methyl Bromide Phase-out Plan completed by the end of December 2013 as had been planned per the 2012 Progress Report. This completion coincided with Decision 70/7 of the Executive Committee on ongoing, performance-based multi-year projects covering ODS with 1 January 2010 phaseout whereby Implementing Agencies were requested not to incur new commitments is 2013 and return fund balances by the end of the year.

12. The decision however impacted other ongoing MYAs under World Bank implementation in Argentina and India. In these cases, the countries were advised to stop implementation and return balances as of the end of 2013 to comply with the decision which has in effect unilaterally superseded bilateral agreements between countries and the Executive Committee. Thus, the chiller component of the Argentina NCPP was physically and financially completed 31 December 2013. The completion of the India CTC Consumption and Production Sector Plan was further defined by Decision 70/18 at the same Executive Committee meeting, allowing India to fulfill commitments made in an agreed work plan (hence planned completion in 2014).

13. All Stage I HCFC Phaseout Management Plans and HCFC Sector Plans that were targeted by the World Bank and its partner countries have, as of 2013, been approved by the Executive Committee for implementation under the World Bank. The total value of Stage I HPMPs and sector plans in the Bank's portfolio is more than US\$206 million. US\$99.9 million in funds have been released by the Executive Committee to date and the remainder of the funding will be released between 2014 and 2018.

14. All World Bank partner countries currently implementing multi-year projects, appear to have met their annual consumption and production targets for the 2013 calendar year – the first year of the HCFC phase-out compliance period for Article 5 countries. In addition, these countries have maintained the total phaseout from previous agreements in 2013 according to preliminary information. Table I-3 presents a summary of multi-year agreements for projects under World Bank implementation. Additional country information is also found in Annex I of this report.

*Reporting Year in this case is 2013. However, in line with the agreement reached with the MLF Secretariat and reflected in the 66th Meeting decision of the Executive Committee, more recent progress in the current year (2014) is included.

Table I-3: Multi-Year Projects (cont.)

Antigua	CFC phase-out	
Barbuda	management plan	Project completed.
	CFC production	
Argentina	closure plan	Project completed.
Argentina	National CFC phase- out plan	Given overall economic situation in Argentina and the requirement imposed by Dec. 70/7, it was not possible to initiate and finalize the chiller replacements that were planned during 2013. Only one chiller conversion agreement was finalized by the end of 2013: ALPARGATAS, 4 chillers. Project was closed 31 Dec. 2013.
	HCFC phase-out management plan	At the request of the GoA, the Grant Agreement (GA) was formally negotiated in early Jun 13, following which WBG approval was confirmed in late July. GoA has been processing the Presidential Decree required to make the GA effective. During project appraisal, option to proceed with retroactive financing was presented to MABE so as to prevent implementation delays. UEPRO and WBG team provided assistance to MABE to prepare bidding documents for procurement to commence. In early Dec 2013, GoA solicited a 6-month extension for the GA effectiveness deadline. The WB is using various senior GoA channels to prompt GA effectiveness. UEPRO carried out office-based monitoring and reporting of national HCFC-22 production, based on production and input information provided by the only producer, FIASA S.A. A supervision mission took place 17-18 Mar 14. The Decree package moved from the Ministry of Economy to the Presidential Office. Meanwhile, project activities continue to advance based on the use of the retroactive financing modality. MABE initiated a request for bids and has awarded the contract to purchase the new equipment with the goal of meeting its original completion target of Dec. 2014. The NOU and WBG received the 2013 monitoring report from UEPRO in Jan 2014. Total HCFC-22 production in 2013 was 1,951 tons well below the max. national production target of 4,083 tons for
Argentina	(stage I, first tranche)	2013.
	Terminal CFC	
	Phaseout Plan for The	
Bahamas	Bahamas	Project completed.
	Phase-out of all the remaining uses of methyl bromide in soil application pest	
Chile	control	Project cancelled Jul 06.
China	Halon Sector	Project completed. Sector plan financially closed as June 30, 2013.
China	CFC Production Sector	CFC production for non-essential uses stopped by July 2007 but there was still demand for CFCs for non-MDI pharmaceutical products and for the refrigeration servicing sector. The supply for those applications are from the national stock of CFCs that is managed by FECO and maybe some stocks held by dealers and former producers. Only qualified users can buy CFC from the national stock and stock of former producers - and only through the CFC procurement licensing system. Cost related to management and monitoring of CFC sales are covered by remaining funds of the sector plan. Some TA activities are still ongoing to ensure long term sustainability. Verification audit conducted in 2013 and submitted to the 71st ExCom Meeting.
China	Foam Sector	Project completed. Sector plan financially closed as June 30, 2013.
China	TCA Sector	TCA sector plan completed.
Cillia	CTC/PA Sector Phase	
China	I	CTC/PA Sector Phase I completed
China	CTC/PA Sector Phase II	CTC/PA Sector Phase II completed.

	phase-out plan: MAC	
maonesia	Refrigeration sector	r roject completed.
Indonesia	CFCs in the foam sector	Project completed.
	Phase-out of residual	
India	-	TA work plan approved in July 2013 and some funds disbursed for continued operation of the PMU.
India	Accelerated CFC Production Phase-out	Second part of the second tranche was approved by ExCom in Apr. 2013 and was under processing. Funding released by the WB to the designated account in Mar. 14. Final disbursement to four producers pending clearance by the Ozone Cell. Financial completion expected 31 Jul. 2014.
India	CFC production sector gradual phase-out project	CFC production sector plan is now completed physically and financially.
Ecuador	National CFC phase- out plan	Project completed. Original ExCom approval and funds released amount to US\$1,689,800. Upon closing, balance of \$495,329 was returned to the MLF at the 62nd ExCom Meeting.
China	HCFC production phase-out management plan (stage I)	HCFC production phase-out management plan and its first tranche approved in Apr. 2013. Production quotas for 2013 were issued. FECO signed quota reduction contracts with 6 HCFC-141b producers and 6 HCFC-142b producers with a total value of \$10.427 million. Production quotas for 2014 were issued. Thirty percent of the first funding tranche was transferred to China in Feb. 2014. There was no disbursement in 2013. A total of US\$ 5,213,500 was disbursed against 12 contracts during Q1 of CY14 from FECO. FECO has informally confirmed that the production target for 2013 has been met.
China	HCFC phase-out management plan (polyurethane rigid foam sector plan) (stage I)	As of end Dec. 13, 31 subgrant agreements were signed with committed funding of \$35.97 million. Including TA activities, total commitments under the first funding tranche is \$38.4 million. Additional 16 subgrant agreements were signed in Jan. 2014 with total commitment of \$22.05 million which will be funded by the second and third funding tranches. FECO has informally confirmed that the HCFC-141b consumption target for the foam sector for 2013 has been met.

	National strategy for	
	phasing out the use of

	assistance, and	
	enterprise investment	
Indonesia	initiatives	Project completed.
Indonesia	HCFC Phase Out Plan (Stage I): Foam Sector Plan	Agreement between the WB and Government of Indonesia signed on 11 Jul 13. Project launch workshop arranged by NOU in Aug 13 and was followed by a training workshop for the 3 big foam enterprises to assist in preparing Foam Technology Replacement Proposals. The 3 foam enterprises, covering consumption of about 50% of targeted ODP phaseout, submitted the proposals to NOU in Sep 13, and this was followed with signing of subgrant agreements (in Nov and Dec 13) which include phaseout milestones. Due to internal admin. reasons, NOU was not able to mobilize consultants to help run the PMU. Therefore, during 2013, NOU acted also as PMU. Arrival of equipment, completion of civil structural and mechanical works expected by Aug 14. Foam Technology Replace
Jordan	HCFC Phase Out Plan (Stage I): Air- conditioning Sector Plan	Legislative updates and HCFC quota issued Jan. 13. Gov. of Jordan-WB negotiations on a new Grant Agreement completed Mar 13. GA approved by the Bank on 26 Apr. 13 and signed by GoJ and the Bank by 20 May 13. Workshop held for HCFC importers, including AC manufacturers. SGA and subproject document for 1 of 3 enterprises prepared and technically reviewed Sep. 13. Disbursement to start in early 2014 following some delays in processing of disbursement-related prerequisites. Disbursement under the AC Sector Plan was initiated in Jan. 2014 to retroactively finance project management expenditures incurred the previous year. A subgrant agreement (SGA) for 1 of 3 enterprises was signed Feb. 2014. Another subgrant agreement is under preparation for a second enterprise and is expected to be completed by Apr. 2014. Second tranche request is slated for the 73rd ExCom Meeting.
Jordan	National CFC phase-	expected to be completed by Apr. 2014. Second transme request is stated for the 75rd Excont Meeting.
	out plan: Chiller	
Mexico	Subsector	Project completed.
	National CFC	
Malaysia	phaseout plan	Project completed.
	National CFC phase	Original ExCom approval and funds released amount to US\$10,216,876. Transfer of \$1.8 million balance of the overall NCPP done in
Philippines	out plan	Apr 12 by the WB. UNEP continued as IA for remaining NCPP servicing sector component.
		Training of trainers of Office of Vocational Education Commission (OVEC)was conducted in Oct and Dec 13. Ninety sets of training
	National CFC	equipment were acquired for 90 training centers of OVEC thru the voucher scheme. Delivery and commissioning of equipment was
Thailand	phaseout plan	completed in Dec 13. Financial completion expected 30 Apr 14.
		No MB consumption for non-QPS in 2013; QPS use was 156.1 MT. 13 type I subprojects physically and financially completed and
		training on integrated pest management (IPM) and code of good practice on fumigation was provided to these beneficiaries. For type
		II beneficiaries, PMU-DoA successfully organized training on code of good practice and IPM in 4 locations across Thailand. As of
	National methyl	completion of type II sub-projects, 83 vouchers for basic fumigation equipment and 81 vouchers for IPM equipment provided to
	bromide phase-out	beneficiary enterprises. Due to high responsiveness of enterprises, PMU-DoA reproduced an additional 500 copies of the Code of Good
Thailand	plan	Practice Phosphine Funigation. Financial completion expected 30 Apr 14.

Thailand	HCFC phase-out management plan (stage I, first tranche)	Pre-appraisal mission completed for new Grant Agreement (GA)/umbrella project. Implementation arrangements for HPMP Stage I discussed and agreed among all stakeholders. The Environmental Management Plans (EMPs) for the AC sector and Environmental Management Framework (EMF) for Foam Sector were prepared. Negotiation of the GA is to be conducted after disclosure of EMP and EMF. Negotiation of the GA successfully concluded on 27 Feb 14. The GA will be sent to the Thai Government for its counter-signature by mid-April which requires Cabinet approval. Because of this procedure, it is expected that the GA will be signed by Jun 14. Preliminary information indicates that Thailand 's HCFC consumption respects the freeze level.
Tunisia	National ODS phase- out plan	Umbrella project closed in June 2012. Original ExCom approval and funds released amount to US\$1,135,395. Balance of NOPP funds transferred to UNIDO at the 68th Meeting of the ExCom.
Turkey	CFC Phase-out plan for Turkey Phased reduction and	Refrigeration Sector Project (RSP) and overall ODS umbrella project with the World Bank physically and financially completed.
Venezuela	closure of the entire CFC production	Project completed.
	National CFC and	
Vietnam	halon phase-out plan National phase-out plan for methyl bromide	Project completed. Formats for MB Import License and Reporting on Funigation updated thru a new circular issued in Jan 13. Law of Plant Protection and Quarantine was approved by the National Assembly in Nov 13. Training for funigation service companies and owners of storage facilities ended, with 10 training workshops organized in 2013. In summary, a total of 26 3-day workshops with a total 718 participants held at 5 Regional Plant Quarantine Sub-Departments (RPQSD) assigned as training centers. Eight farmer training workshops organized with 4 completed in 2013. A total of 467 farmers and technicians trained. Public awareness materials including videos and leaflet templates were printed in Apr 13 and disseminated at workshops in Dalat and Sapa. 2014 plans include a survey on potential new MB alternatives for Non-QPS applications and 2 follow-up workshops. Final annual program and tranche request submitted on 17 Mar 2014 to the 72nd ExCom Meeting for its consideration. 2013 consumption limit respected in accordance with the agreement between ExCom and Vietnam with 49.98 ODP tons of MB consumed.
Vietnam	HCFC phase-out management plan (stage I, first tranche) (foam sector plan)	HCFC import quota issued for 2013. Foam enterprise study tour done Apr 13. Project launch workshop took place May 13. First subproject (MIDICO) out of 12 completed May 13. Another 7 enterprises signed subgrant agreements by end of Dec. 13 and 2 of these started equipment procurement. Workshops and training held for Customs and refrigeration sector. Four technical consultants hired, including one for developing the MIS for imported HCFC bulk and in preblended polyol one to support subproject implementation. 2013 consumption verification initiated and will be completed end of Apr 14. Preliminary information indicates that Vietnam 's HCFC consumption is below the freeze level. Three TA activities are ongoing as scheduled. By end of Jun 14, it is expected that 3 beneficiary enterprises will have completed subprojects (MIDICO, 6M and Thanh Canh) and another 3 by end 2014.

D. Sector Phaseout by Country

15. The Bank has implemented and is implementing several projects that will result in sectorwide or nation-wide ODS phaseout but which are not projects with multi-year agreements. With one-time funding by the Executive Committee, these projects aim, nonetheless, to entirely phase out the consumption of ODS through investment activities and policy measures in a sector or countrywide.

16. Two of these projects, the National Transition Strategy to CFC-free Metered Dose Inhalers (MDIs) in Indonesia and the National Methyl Bromide Phaseout Strategy in the Philippines were successfully completed in 2010.

17. The World Bank is also an Implementing Agency for two other aerosol projects, the China Pharmaceutical Aerosol CFC Phaseout project and the project in Argentina to phase out consumption of CFCs in MDI manufacturing. The project in China was planned for completion in 2013 but has been extended to 2014. It will continue along with the Argentina project that has been targeted for completion in 2014. The duration of the projects is directly linked to the time needed for registration of new formulations of the medicinal and pharmaceutical products.

18. The main MDI manufacturer of the Argentina project, Laboratorio Pablo Cassará (LPC) submitted its new formulation to the national health authority for review and has requested approval to bring the product to market. Approval of the new formulation is awaited. The HFA formulation it developed in tandem has been authorized for sale. CFCs are no longer used as propellant in formulations of salbutamol in Argentina.

19. Under the China Pharmaceutical Aerosol CFC Phaseout project all contracts with pharmaceutical companies have been signed. The Chinese State Food and Drug Administration (SFDA) has issued a ban on the use of CFCs in non-MDI pharmaceutical products as of 1 July 2012 – thus all CFC consumption has been phased out through the project since 2013.

II. PROJECT COMPLETIONS SINCE LAST REPORT

Projects completed during this reporting period (January 1, 2013 to December 31, 2013) are highlighted in Table II-1 below.

A. ODP Phased Out Since Last Report

20. The total quantity of ODP phased out in association with the 13 projects completed during the reporting period amounts to 2,268 ODP tonnes of consumption and production. Of this phaseout, 327 ODP tonnes was achieved in 2013. The majority was eliminated in previous years while the projects were active. Completed projects in Table II-1 are 52 percent disbursed, leaving a balance of US\$3,709,891.

B. Non-Investment Project Completions Since Last Report

21. <u>Country Programs</u>: There were no new completions in 2013 for country programs.

22. <u>Technical Assistance</u>: Two technical assistance projects completed in 2013. A study on resource mobilization for HCFC phase-out co-benefits that was approved in 2011 by the Executive Committee for US\$180,000 was finalized, peer reviewed and submitted to the Committee's 71st Meeting. The study sought to identify potential opportunities and sources of co-financing to meet the additional costs of energy efficiency and climate mitigation benefits associated with the HCFC phase-out supported by the MLF. It explored strategies to maximize synergies with climate financing in general, and in combination with the World Bank's energy efficiency and climate mitigation portfolios in particular. Moreover, the study established that a significant share of the World Bank portfolio across a variety of sectors offered opportunity for linkages with the Montreal Protocol agenda. As the study was completed entirely in-house with teams across the Bank, some savings were incurred which will be returned in 2014.

23. Another activity classified as technical assistance completed in 2013 was the verification of production of CFCs in China for essential uses in metered-dose inhalers, including exported CFCs. This US\$40,000 activity produced a verification report that was considered in the Subgroup on the Production Sector at the 71st Meeting of the Executive Committee. The Committee asked the Bank to continue carrying out verification audits in future years and will provide funding for this service.

24. <u>Training</u>: Through its agency support costs, the World Bank hosted with the Government of Thailand a regional three-day workshop in Pattaya, Thailand for its East Asia country counterparts in July 2013. It is the eighth ODS workshop held in the region in the last ten years. The first day of the workshop was devoted to policies and procedures under the Montreal Protocol, the MLF and the Bank surrounding ODS project implementation (quotas and control measures, monitoring and reporting, procurement, financial management, safeguards, etc.). The next two days focused on technical aspects of HCFC phaseout in the production, foam and refrigeration sectors. The state of technologies was reviewed by experts, including from the private sector, with a concentration on air-conditioning. Countries facing similar challenges in implementing the Montreal Protocol were also given the opportunity to share experiences.

III. GLOBAL AND REGIONAL PROJECT HIGHLIGHTS

A. Global Projects

25. The World Bank continued to have one global project ongoing in 2013, the Global Chiller Replacement Project. The project's original objective was to replace CFC chillers in China, India, Indonesia, Jordan, Malaysia, the Philippines and Tunisia. Five countries had embarked on a national chiller replacement project as of the end of 2012 – demonstrating a number of implementation modalities that meet specific needs of the countries. In 2013, the number of countries to have ongoing chiller activities under the global project dropped to two for reasons explained below on a country-by-country basis.

26. The India Chiller Energy Efficiency Project originally had three separate financing modalities (the MLF, GEF and CDM (through KfW)). The carbon finance component was dropped in 2012. Restructuring of the project to take this change into account was still pending at the end of the calendar year however four chillers were replaced nonetheless, bringing the cumulative replacement figure to 35. Approximately twelve meetings were held in 2013 with chiller suppliers, potential beneficiaries from CFC phaseout and the financial intermediary. Energy efficiency initiatives were also carried out.

27. The Philippines Energy Efficiency Project, closely modeled on the India chiller project, received US\$1 million in MLF funding and US\$2.6 million in GEF funding. Carbon finance through KfW was also envisioned, but similar to the India chiller project, the ERPA was deemed not viable and cancelled. Partly as a result, a project restructuring was required and completed by the Bank in June 2013. In 2013, letters of intent confirming enrollment of 25 chillers were received by the Department of Environment and Natural Resources. By the end of 2013, eight subgrant agreements covering replacement of thirteen chillers had been signed. The project management unit completed its evaluation of the eligibility of new chillers and confirmed that another eleven were eligible for financing. An online monitoring system is operational and a marketing plan was developed to encourage additional chiller owners to participate in the project.

28. The Jordan CFC Chiller Replacement Project was physically completed on 31 December 2012. The project provided a 30% subsidy to building owners based on a nominal value. All 20 CFC-based chillers were replaced, 15 of which fell under subgrant agreements with four building owners. A total of 4 MT of mixed CFCs were safely recovered after dismantling the chillers that fell directly under the project.

29. The Indonesia chiller energy efficiency project, which aimed to bring together US \$3.66 million in GEF funding with US\$1 million from the Global Chiller Replacement Project was canceled in 2013 after failure to obtain GEF CEO endorsement, the final step of the GEF approval process. This was in light of certain Council member objections on the possible use of HFC-based refrigerants in replacement chillers. The allocated MLF funds, along with savings from the Jordan component were returned at the 71st Meeting of the Executive Committee in December 2013.

30. Finally, the fifth country to be included in the Global Chiller Replacement Project is Argentina (as of late 2012). The Argentina Chiller Replacement project has been incorporated into a new ODS grant agreement between the Government of Argentina and the World Bank. The agreement was approved in July 2013 and is expected to become effective in 2014 which will permit chiller replacements to resume under this new activity.

B. Regional Projects

31. The World Bank has no outstanding regional projects.

IV. PERFORMANCE INDICATORS

A. Agency Performance Goals

32. Executive Committee Decision 41/93 requests Implementing Agencies (IAs) to employ nine weighted indicators to assess their annual performance. These indicators are classified as approval, implementation and administrative indicators. The basis for setting and measuring these indicators are the annual progress reports and annual plans of multi-year projects as implied in the background document to the new indicator system, UNEP/OzL.Pro/ExCom/41/80, as well as the IA business plans.

33. "Approval" indicators measure projects that received Executive Committee approval against those planned to be delivered as per multi-year agreements (MYAs) and the 2013 Business Plan. For the first approval indicator, 7 annual programs associated with existing and new multi-year agreements were targeted for approval in 2013 according to Executive Committee Decision 69/10(b). The actual number of activities submitted was 6 out of the 7 annual programs targeted by the decision. This included the second part of a tranche for the India Accelerated CFC Production Sector Phaseout Plan. Two multi-year agreement tranches that were part of the original target under the Jordan Air-conditioning Sector Plan and Thailand HCFC Phaseout Management Plan (HPMP) respectively were not submitted for approval as foreseen in the Executive Committee agreements on each country's Stage I HPMP. The target was therefore met by 86%.

34. The second approval indicator, the planned number of new individual projects (investment projects, RMPs, halon banks, institutional strengthening, and technical assistance) for approval was set at 2 in the Business Plan. In 2013, an activity for independent verification of production of CFCs in China for essential use was approved. The second activity approved was the 2013 core unit budget. Hence, the World Bank fully met the target.

35. There are four "implementation" indicators. The first implementation indicator measures performance in ongoing multi-year projects, namely whether milestone activities and ODS consumption and production levels were achieved as planned in approved annual tranches. Bank partner countries executing existing multi-year agreements (approved prior to 2013) that were targeted in the business plan met all targeted ODS phaseout and policy milestones (a total of 6).

36. The second implementation indicator focuses on ODS phased out in individual projects versus what was planned in the progress report (this excludes multi-year project phaseout per MLF Secretariat guidance). The World Bank targeted 240.4 ODP tonnes of phaseout in 2013 by individual projects based entirely on one individual aerosol project in China that was expected to complete in 2013 per the 2012 Progress Report at the time of business plan preparation. The phaseout was fully achieved in 2013, although the project could not be declared completed. Another ongoing project contributed to an additional 1.75 ODP tonnes. If counting phase-out from ongoing individual projects, the Bank has fully met its target.

37. For the third implementation indicator, "project completion," the World Bank expected 4 investment and non-investment projects to be completed in 2013 as per its 2013 Business Plan. The number of projects reaching completion in 2013 was 3. The Bank has met this target by 75%.

38. The fourth implementation indicator, "Percentage of policy/regulatory assistance completed vs. that planned" was achieved as policy and regulatory assistance was provided in the context of all sector and national ODS phaseout plans, as well as institutional strengthening projects.

39. There are three "administrative" indicators. The Bank met one of the three administrative targets. For Speed of Financial Completion, the Bank had anticipated 30 months for the average number of months from project completion to financial completion in 2013. In actuality, the number was 74. The reason that the average time is more than double of the indicator is because of multi-year agreements which are reaching completion in increasing numbers. Early tranches of these MYAs were, upon use of funds for targeted activities, not declared financially completed because of the World Bank's position that a multi-year agreement should be treated as one program for a country and only be closed upon 100% completion of all funding tranches. This allows a multi-year project to be monitored at the program level, particularly when disbursement still remains from a country to a beneficiary. In 2013, five China ODS phaseout sector plans – Halon, CFC Production, Foam, and Process Agents I and II – captured in 46 separate tranches spanning completion dates over 15 years were financially completed which has significantly skewed the rate of financial completion.

40. The Bank committed to submit to the Executive Committee 100 percent of PCRs for the number of projects completed in the 2013 PCR reporting period in its 2013 Business Plan. In the 2013 PCR reporting period (July 2012-June 2013), four individual project PCRs were due. Five individual project PCRs-were submitted in 2013. If applying the target set with the Senior Monitoring and Evaluation Officer of submitting 4 PCRs in 2013, the result is a 100% achievement rate. Finally, the 2013 Progress Report was submitted on time for achievement of the third administrative indicator.

41. Table IV-1 summarizes the World Bank's performance relative to indicators per Decision 69/10(b) on the Bank's 2013 Business Plan.

Category of Performance Indicator	Item	Weighting	2013 Target	2013 Actual
Approval	Number of annual programmes of existing multi- year agreements approved vs. those planned	15	7	6
Approval	Number of individual projects/activities approved vs. those planned	10	2	2
Implementation	Milestone activities completed (e.g., policy measures, regulatory assistance)/ODS levels achieved for approved multi-year annual tranches vs. those planned	20	6	6
Implementation	ODS phased-out for individual projects vs. those planned per progress reports	15	240.4	242.15
Implementation	Project completion (pursuant to Dec. 28/2 for investment projects) and as defined for non-investment projects vs. those planned in progress reports	10	4 ⁽¹⁾	3 ⁽²⁾
Implementation	Percentage of policy/regulatory assistance completed vs. that planned	10	100%	100%
Administrative	Speed of financial completion vs. that required per progress report completion dates	10	30 months	74 months
Administrative	Timely submission of project completion reports vs. those agreed	5	On time	On time
Administrative	Timely submission of progress reports and responses unless otherwise agreed	5	On time	On time

Table IV-1: World Bank Performance Goals

 ⁽¹⁾ Represents the number of projects expected to be completed in 2013.
 ⁽²⁾ This figure includes completion of all individual investment and non-investment activities in 2013, but excludes annual programs of multi-year agreements. The total number of projects completed in 2013 is 13 excluding the global activity for agency core unit costs.

 Table IV-2: World Bank Indicators of Implementation Progress

42. Actual cost of project preparation in 2013 was US\$108,037 (excluding support costs), or less than a half percent of investment project approvals in 2013. The average overall speed of ODS phaseout from the time of approval to the realized phaseout since the inception of the program in 1991 is, in 2013, 39 months. Actual average overall speed of first disbursement is 24 months (again taking projects in the Bank's entire 22-year portfolio) and total disbursement in 2013 was US\$37 million.

43. Six investment projects were submitted in 2013, worth a total of US \$11.99 million (excluding support costs and after negotiation with the Executive Committee) representing the first tranche funding for the new HCFC Production Phaseout Management Plan in China, and 5 tranches of 5 existing multi-year projects. The average cost-effectiveness values of the projects approved in 2012 and 2013 are not meaningful, as they do not all have ODP phaseout associated with the year of delivery of the sector plan tranches approved and they also include technical assistance and project management funding. As far as distribution among countries is concerned, 4 different countries received approvals in 2013.

44. The Bank completed 3 non-investment projects in the reporting period. The overall speed of first disbursement is 14 months at the end of 2013. Overall speed of completion is 21 months by the end of the reporting period. Total funds disbursed for non-investment activities (excluding project preparation) in 2013 are US\$430,544.

23

B. Cumulative Completed Investment Projects

45. Since 1991, the World Bank's cumulative total of completed investment projects has grown to 597, resulting in the reduction in consumption of 124,152 tonnes ODP and in production of 174,895 tonnes ODP. Out of a total of US\$863,915,982 of approved Multilateral Fund financing for completed projects, 100 percent of funds have been disbursed. The average number of months from approval to first disbursement has been 24, the average number of months from approval to completion has been 40, at an average cost-effectiveness of US\$2.89/kg. These averages include projects both before and after initiation of the umbrella grant agreement approval process.

46. The number of investment projects completed in 2013 was ten, including tranches of multiyear agreements. Table IV-3 which follows provide`s a summary of completed investment projects at both a regional and sectoral level.

Item	No. of Projects	Approved Funds + Adjustment (US\$)	% of Funds Disbursed	Consump- tion ODP Phased Out	Productio n ODP Phased Out	Avg. No. of Months from Approval to 1st Dis- bursement	Avg. No. of Months from Approval to Completio n	Overall Cost- Effective- ness to the Fund (US\$/kg.)

Table IV-3: Cumulative Completed Investment Projects

Note: The sum of each section (Region, Sector, etc.) equals the Grand Total.

C. Cumulative Completed Non-Investment Projects

47. Since 1991, the World Bank's cumulative total of completed non-investment projects has grown to 136. Out of a total of US\$21,974,153 of approved Multilateral Fund financing, 99 percent of funds have been disbursed. As these are non-investment projects, funds are usually made available quickly, thus the average number of months from approval to first disbursement has been 19; the average number of months from approval to completion has been 35.

Table IV-4: Cumulative Completed Non-Investment Projects

Note:

(1) Per decision 22/11(a)(vi), project preparation is not included as a non-investment project.

(2) The sum of each section (Region, Sector, etc.) equals the Grand Total.

D. Cumulative Ongoing Investment Projects

48. Since 1991, the World Bank's cumulative total of ongoing investment projects is 18 (including tranches of multi-year agreements). Out of a total of US\$112,384,698 of approved Multilateral Fund financing, 41 percent of funds have been disbursed. The average number of months from approval to first disbursement has been 18, the average number of months from approval to the current expected completion date is 38, with an average cost-effectiveness of US\$75.59/kg. Table IV-5 below summarizes ongoing investment projects at regional and sectoral levels.

E. Cumulative Ongoing Non-Investment Projects

49. The World Bank's cumulative total of ongoing non-investment projects is 9 as captured in the following Table IV-6. Out of a total of US\$6,126,811 of approved Multilateral Fund financing, 44 percent of funds have been disbursed. The average number of months from approval to first disbursement has been 25; the average number of months from the date of approval to the current expected completion date is 44.

Table IV-6: Cumulative Ongoing Non-Investment Projects

Note:

Per decision 22/11(a)(vi), project preparation is not included as a non-investment project.
 The sum of each section (Region, Sector, etc.) equals the Grand Total.

V. STATUS OF AGREEMENTS & PROJECT PREPARATION (WHERE APPLICABLE), BY COUNTRY

A. Agreements to be Signed/Executed/Finalized & When They Will be Ready for Disbursing

50. Projects with either new partner countries or with new operational modalities require legal agreements between the country and the World Bank. With HCFC phaseout project approvals occurring between 2011 and 2013 in Argentina, China, Indonesia, Jordan, Thailand, and Vietnam, new grant agreements were required.

51. New grant agreements have been in place for Vietnam and China since 2012 permitting disbursements to take place from the Bank to the countries throughout 2013. Grant agreements and the related project appraisal and environmental safeguards documentation were finalized for Argentina, Indonesia, and Jordan in 2013. The Jordan grant agreement was approved and signed in May 2013, followed by those for Argentina and Indonesia in July. Both new HCFC umbrella projects for Jordan and Indonesia are disbursing while that for Argentina awaits internal approval. This is expected in the first half of 2014. A clause for retroactive financing has been included in the grant agreement in order to permit investment activities to commence prior to the approval by relevant ministries and the Presidential Office.

52. World Bank project preparation activities and processing were completed for Thailand for a new Bank HCFC phaseout umbrella project by the end of 2013 during a pre-appraisal mission, including a draft grant agreement and environmental management plans for the air-conditioning (AC) sector and an environmental management framework (EMF) for the foam sector. Negotiation of the Grant Agreement is expected in February 2014 with agreement signing expected after Thailand Cabinet approval.

B. Project Preparation by Country, Approved Amount, and Amount Disbursed

53. A list of active World Bank project preparation activities is presented in the table below. Total funds approved for these projects are US\$100,000, of which US\$34,989 has been disbursed. Planned commitments for these two project preparation activities are US\$65,011.

Region	Project Number	Project Name	First Disburse- ment Date	Approved Funding (US\$)	Adjust- ment (US\$)	Disbursed (US\$)	% of Funds Dis- bursed	Balance (US\$)	Planned Commit- ment in Cur. Year (US\$)
ASP	IDS/DES/57/PRP/187	Preparation for pilot	Dec-13	50,000	0	17,495	35	32,505	32,505
		demonstration project on ODS							
		waste management and disposal							
ASP	PHI/DES/57/PRP/85	Preparation for pilot	Dec-13	50,000	0	17,495	35	32,505	32,505
		demonstration project on ODS							
		waste management and disposal							
	Total			100,000	0	34,989	35%	65,011	65,011

Table V-1: Active Project Preparation

JANUARY- DECEMBER 2013

VI. ADMINISTRATIVE ISSUES (OPERATIONAL, POLICY, FINANCIAL, AND OTHER ISSUES)

A. Meetings Attended

54. Table VI.1 indicates the meetings attended by World Bank Staff on all Montreal Protocol related work in 2013.

Table VI-1: MP Meetings Attended by World Bank Staff in 2013

2013 Dates	Location	Meetings Attended
January 31-Feb. 1	Montreal, Canada	Interagency coordination meeting
April 15-19	Montreal, Canada	69 th Executive Committee Meeting
June 21-22	Bangkok, Thailand	50 th Meeting of the Implementation Committee
June 24-28	Bangkok, Thailand	33 rd Meeting of the Open-Ended Working Group
July 1-5	Bangkok, Thailand	70 th Executive Committee Meeting
September 5-6	Paris, France	Compliance Assistance Programme Advisory Group meeting
September 9-12	Yinchuan, China	Joint Meeting of South Asia and Southeast Asia and Pacific Networks of Ozone Officers
September 24-25	Montreal, Canada	Interagency coordination meeting
October 18-19	Bangkok, Thailand	51 st Meeting of the Implementation Committee
October 21-25	Bangkok, Thailand	25 th Meeting of the Parties to the Montreal Protocol
November 6-9	Manila, Philippines	4th Ozone2Climate Technology Roadshow and Industry Roundtable
December 2-6	Montreal, Canada	71 st Executive Committee Meeting

B. Implementing Agency and Other Cooperation

55. Cooperation and coordination by the World Bank with the three Implementing Agencies and Bilateral Agencies continues through shared project implementation in national ODS phase-out plans, in new HCFC phase-out projects, and in ODS meetings and workshops that take place throughout the year.

56. In regards to cooperation with bilateral agencies, the World Bank is working with the Government of Japan to support implementation of Thailand's Stage I HCFC Phaseout Plan approved at the 68th Meeting of the Executive Committee. Japan's role is to provide technical assistance to address technical and regulatory barriers to the introduction of HFC-32 technology in residential air-conditioner manufacturing.

57. In 2013, Japan, Thailand, and the World Bank worked closely with the Japanese and Thai industries to initiate preparatory work that is essential to effective transfer of technology. This included assessment of the baseline environmental and safety practices of potential beneficiary manufacturers in Thailand. Through this assistance, all twelve air-conditioning manufacturers that are covered by the HPMP have completed environmental and safety management plans. In addition, this bilateral cooperation contributed to the early signing of non-assertion agreements between beneficiary AC manufactures and Daikin.

58. With preparatory work now in place, the technical assistance activities as proposed in the HPMP will be formally channeled through a new Grant Agreement between the Bank and Thailand (expected to be effective by mid-2014). Japan's support will take the form of guidance for the conversions to ensure safe storage and use of HFC-32 in manufacturing of HFC-32 AC, technical assistance and training on proper installation, and, training for service technicians. It will also assist Thailand in necessary revision of building codes and standards. The Government of Japan will continue to bridge discussions on HFC-32 technology transfer between the Thai and Japanese airconditioning industry as well.

59. The Bank is a Cooperating Agency in Argentina on the NCPP in the chiller sector, and in the foam and production sectors under the HPMP approved in April 2012. The NCPP has now closed by Decision 70/7 and the balance of funds not utilized before the Executive Committee's deadline of 31 December 2013 will be returned to the MLF. The Bank is also a Cooperating Agency in Jordan where UNIDO serves as the Lead Agency, and in Indonesia and China, where UNDP serves as the Lead Agency. In order to meet overall requirements of the respective Executive Committee agreements, the Agencies must have regular dialogue and access to relevant information to be able to execute their part, particularly in terms of annual consumption verification. This will be critical in the case of China whereby the HCFC production sector plays a large role in determining compliance with targets.

60. With the concentration of efforts in delivering HPMPs and HCFC phase-out sector plans for Article 5 countries around the world on HCFC consumption and production now that the compliance period has commenced, cooperation and coordination will continue to be a necessity among the four Implementing Agencies. In fact, because of the tight implicit requirements on the maximum level of country consumption that may be funded under Stage I HPMPs, this is all the more the case in countries where more than one agency is active.

C. Other Issues

61. There are no additional issues other than those captured in the previous pages that the Bank would like to raise for the 2013 progress reporting year.

Annex I

COUNTRY DEVELOPMENTS

Environment Department

The World Bank

ARGENTINA

Country Developments

In 2013, two projects were physically and financially closed, the chiller replacement component of the National CFC phaseout plan and the methyl bromide phaseout demonstration project. This leaves three active project activities under execution by Argentina through the World Bank: the aerosol metered dose-inhaler (MDI) project, a foam conversion project to eliminate HCFC-141b (at Mabe) and technical assistance for monitoring and reporting on HCFC-22 production. The latter two fall under the country's HCFC Phaseout Management Plan (HPMP) with UNIDO as the Lead Agency.

The CFC-based chiller replacement work under the NCPP was progressing slowly in 2013due to the overall economic situation in the country (the replacement project only funded a portion of chiller replacement). However its implementation was cut short through a unilateral decision to close a group of ongoing multi-year agreements that targeted ODS to be phased out by 2010. Completion was accordingly arranged in December 2013 after fulfilling a commitment to one last chiller owner.

The aerosol MDI project will continue implementation in 2014 as explained in Section D, Part I of this report. Disbursement for HPMP project activities will begin in 2014. These activities fall under a new ozone operation. The Grant Agreement (GA) for the operation, which will also include a chiller replacement project (part of the Global Chiller Replacement Project) was formally negotiated in June 2013 and World Bank approval followed in late July. The Government has been processing the Presidential Decree required to make the GA effective. During project appraisal, an option to proceed with retroactive financing was presented to MABE so as to prevent implementation delays. UEPRO, the project implementation unit, and the Bank team provided assistance to MABE to prepare bidding documentation. In early December 2013, the Government of Argentina requested a six-month extension for the GA effectiveness deadline. The Bank is working with counterparts to accelerate GA effectiveness as is possible. UEPRO carried out office-based monitoring and reporting of national HCFC-22 production, based on production and input information provided by the only producer, FIASA S.A.

A Bank mission took place in April 2013 and another is expected in March 2014.

CHINA

Country Developments

China has phased out well over 200,000 ODP tonnes in the consumption and production sectors through World Bank-implemented projects since the early 1990s and has met its overall ODS phaseout targets under the Montreal Protocol as well as specific requirements under its various sector plans. In 2013, active projects under implementation by the Bank for China fell under the "ODS IV" Umbrella Project and the 2012 approved HCFC Phaseout Project (Stage I).

The ODS IV umbrella project closed on June 30, 2013. The Bank will continue to monitor the associated sector plans (the CFC production, Halon, Process Agents, and foam sector plans) within the context of Executive Committee Decision 56/13 however as far as World Bank processes are concerned the projects are financially closed as well.

In 2013, two individual projects remained under implementation, the HCFC foam demonstration project at a system house and the pharma-aerosol project. Both are expected to complete in 2014. The HPMP Foam Sector Plan continued implementation in 2013 with first disbursement from the Bank to China occurring early on. By the end of the year, 31 subgrant agreements had been signed with FECO worth \$35.97 million.

After several meetings of presenting the HCFC production phase-out management plan to the Executive Committee, fruitful negotiations in April 2013 led to its approval in April 2013 at \$95 million for Stage I. The Committee also agreed that the entire plan would not exceed \$385 million. This approval permitted production quotas to be issued for 2013 and the signing of quota reduction contracts with six HCFC-141b producers and six HCFC-142b producers and FECO with a total value of \$10.427 million.

The World Bank conducted two supervision and preparation missions in 2013. In addition, a representative from FECO attended the Bank's 8th East Asia ODS Phaseout Workshop held in Pattaya, Thailand in July 2013.

INDIA

Country Developments

As of the end of 2013, three MLF projects were active under three grant agreements: the Accelerated CFC Production Sector Plan (ACPP), the CTC Phaseout Plan for the Production and Consumption Sectors, and the India Chiller Replacement Project.

Funding release for the second tranche of the ACPP depended on meeting specific conditions as per the agreement between India and the Executive Committee. In July 2012, the Executive Committee released part of the funding (US\$739,900) on the understanding that the remaining amount for the tranche would be approved once contaminated CFCs at one producer were destroyed. This remaining amount (\$317,000) was approved the following year in April 2013. For the CTC sector plan, the activity that remained in 2013 continued to be the technical assistance (TA) component. The TA work plan was agreed in 2013.

In regards to the Chiller Replacement Project, the project moves steadily forward with four chiller replacements in 2013 and the hosting of a series of technical and awareness raising meetings and workshops with and for stakeholders.

Three Bank missions were conducted in 2013 for supervision of the ongoing MLF projects.

INDONESIA

Country Developments

The HCFC foam sector plan commenced in 2013 after the Grant Agreement between the Government of Indonesia and the World Bank was signed in July 2013. A project launch workshop was arranged by the national ozone unit in August and was followed by a training workshop for three large foam enterprises for preparation of proposals. The foam enterprises, covering consumption of about 50% of the targeted ODP phaseout, submitted their proposals in September. Signing of subgrant agreements followed.

The Indonesia chiller energy efficiency project aimed to bring together GEF funding of \$3.66 million and \$1 million from the MLF-funded global chiller project. A grant agreement between Indonesia and the World Bank was prepared but not approved as the project was canceled in 2013. This followed the failure to obtain GEF CEO endorsement, the final step of the GEF approval process in light of certain Council member objections on the possible use of HFC-based refrigerants in replacement chillers.

The ODS disposal preparation activity commenced with the signing of a contract with and disbursement to a consulting firm in January 2013. Discussions between the Bank and senior Government officials were held in order to engage, and ensure access to, appropriate national stakeholders. Data collection and development of an inventory system for unwanted ODS was completed. Guidelines for collection, handling, packaging, transport, and procedure of final disposal, based on results of data collection and inventory, and consistent with existing protocols and criteria of the major voluntary carbon markets, were under preparation in late 2013.

The Bank conducted a total of three missions in 2013 and several Government representatives and consultants attended the Bank's 8th East Asia ODS Phaseout Workshop held in Pattaya, Thailand in July 2013.

JORDAN

A. Country Developments

Jordan is implementing an Air-conditioning Sector Plan to eliminate HCFC-22 in manufacturing of residential air-conditioning units at three enterprises and to manage the overall sector's transition away from HCFC with policy and technical assistance. The project has fallen under a new grant agreement (GA) between the Government of Jordan and the World Bank (which also includes the Institutional Strengthening Project).

Legislative updates and the HCFC quota were issued in January 2013. Negotiations on the GA were completed in March 2013, the GA was approved by the Bank in April and then signed with the

Government of Jordan in May. Preparation of the subgrant agreements and subproject documents for the AC enterprises commenced in 2013.

B. Institutional Strengthening

In December 2012, Jordan received approval of the tenth phase of the Institutional Strengthening Project (ISP). Implementation of the ISP progressed in 2013 while the new Grant Agreement between the Bank and the country was under finalization. The national ozone unit (NOU) facilitated issuance of instructions for controlling ODS import and export of ODS and broadening the quota system for HCFC control. It issued 455 approvals for HCFC imports; reported to the Ozone and MLF Secretariats and organized international ozone day celebrations; and attended international / regional ozone meetings. In addition, the NOU continued monitoring by conducting field visits to HCFC-using industry. The NOU participated in discussions on the new umbrella GA implementation arrangements, particularly in regards to the IS component. It was instrumental in obtaining a legal opinion for the GA from Ministry of Justice and for interagency coordination in order to start the umbrella project.

In 2013, one World Bank supervision mission was conducted. Several additional visits with the NOU by the Task Team Leader were also undertaken.

PHILIPPINES

A. Country Developments

There are two remaining active project activities under the Philippines-World Bank Montreal Protocol partnership, the Philippines Chiller Energy Efficiency Project and the ODS disposal study.

The Chiller Energy Efficiency Project was restructured in June 2013 and has progressed steadily since that time. Forty-six potential chillers were identified for replacement. By the end of 2013, eight subgrant agreements covering replacement of 13 chillers were signed. The PMU completed its evaluation of the eligibility of identified chillers and confirmed that another 11 chillers are eligible for financing. An online monitoring system is now operational and a marketing plan was developed to encourage additional chiller owners to participate in the project.

The ODS disposal study will complement the chiller project by not only addressing unwanted ODS from service shops but the CFCs that will be retired from dismantled chillers. Recruitment of a consulting firm took place and the first disbursement was made in January 2013. Discussions between the Bank and senior Government officials were held in order to engage, and ensure access to, appropriate national stakeholders. Data collection and development of an inventory system for unwanted ODS were completed. Guidelines for collection, handling, packaging, transport, and procedure of final disposal, based on results of data collection and inventory, and consistent with existing protocols and criteria of the major voluntary carbon markets, were under preparation in late 2013. The ODS study will be circulated to the Government and stakeholders in early 2014.

The Bank Task Team conducted two supervision missions in 2013 for the chiller project. DENR representatives also attended the Bank's 8th East Asia ODS Phaseout Workshop in Pattaya, Thailand in July 2013.

THAILAND

A. Country Developments

Three investment projects were active in 2013, including the HPMP, the National CFC Phaseout Plan (NCPP) and the National Methyl Bromide Project. However, both the CFC and methyl bromide projects were declared completed on 31 December 2013 in conjunction with the closing of the overall umbrella grant agreement between Thailand and the World Bank.

Preparation of a new grant agreement (GA) between Thailand and the Bank to house the Stage I HCFC Phaseout Management Plan took most of the 2013 calendar year. The pre-appraisal mission was completed and implementation arrangements were discussed and agreed upon by all stakeholders. The Environmental Management Plans (EMPs) for the AC sector and Environmental Management Framework (EMF) for Foam Sector were prepared. Negotiation of the GA was expected by February 2014.

B. Institutional Strengthening

Institutional strengthening (IS) funds have been used to enhance the capacity of the National Ozone Unit (NOU) and government agencies to effectively implement ODS phaseout in compliance with the country's obligations. In 2013, a quota for each HCFC importer was determined. The country complied fully with reporting obligations under Art. 7 and the Country Programme reporting requirement. A memo of understanding between Customs and the Office of Vocational Education Commission was signed to set up a collaborative mechanism for strengthening ODS phaseout efforts. The NOU participated in MP-related meetings and coordinated with UNEP to facilitate the 25th MOP and 33rd OEWG meeting in Thailand in 2013.

NOU staff also attended all relevant international and regional (network) Montreal Protocol meetings in 2013. Government representatives cohosted and attended the Bank's 8th East Asia ODS Phaseout Workshop in Pattaya, Thailand in July 2013. A large number of Thailand's air-conditioning sector was also present on the second and third day of the workshop. A total of four Bank missions were conducted in 2013 for supervision of the NCPP, ISP and methyl bromide project, as well as the preparation of the HPMP.

TURKEY

A. Country Developments

All ODS project activities for the Government of Turkey that had been implemented under the World Bank came to an end in 2007 and in April 2009, the umbrella ODS phaseout project for Turkey closed financially as well. The Bank was required to conduct monitoring of the Total Phaseout of CFC Plan until 2009 through performance and financial verification. An implementation status report was prepared and submitted to the World Bank in 2011, as was a project completion report. The verification will not be conducted given the time elapsed and the continued compliance of the Government of Turkey with total CFC phaseout. The balance of the funds was returned in 2013.

B. Institutional Strengthening

The Institutional Strengthening Project (ISP) was transferred to UNIDO in 2009.

VIETNAM

Country Developments

Implementation of the methyl bromide phaseout plan, which was launched in 2009, continued to progress well in 2013. Vietnam successfully met its 2013 methyl bromide consumption reduction targets as per the agreement with the Executive Committee and the import quota for 2014 has been issued.

The Vietnam HPMP and associated foam sector plan was approved in 2011 and the new grant agreement between the Government of Vietnam and the Bank was signed in November 2012. The HCFC import quota was issued for 2013 and subproject implementation commenced immediately in 2013 with one enterprise out of the 12 completing its project as early as May. A foam enterprise study tour was completed in April 2013 to demonstrate use of hydrocarbons and related foam blowing equipment. The project launch workshop followed in May 2013 in Ho Chi Minh City.

An additional seven enterprises signed subgrant agreements by the end of December 2013 and two of these started equipment procurement. Workshops and training held for Customs and the refrigeration sector. Four technical consultants hired, including one for developing a management information system for imported HCFC bulk and in preblended polyol one to support subproject implementation. The 2013 consumption verification will be completed in the first half of 2014. Preliminary information indicates that Vietnam 's HCFC consumption is below the freeze level.

One World Bank supervision and preparation mission was conducted in 2013. In addition, Government representatives attended the Bank's 8th East Asia ODS Phaseout Workshop held in Pattaya, Thailand in July 2013.
