COMITÉ EJECUTIVO DEL FONDO MULTILATERAL  
PARA LA APLICACIÓN DEL  
PROTOCOLO DE MONTREAL  
Septuagésima séptima Reunión  
Montreal, 28 de noviembre de - 2 de diciembre de 2016

**ENMIENDAS AL PROGRAMA DE TRABAJO DE LA ONUDI  
PARA 2016**

## **OBSERVACIONES Y RECOMENDACIÓN DE LA SECRETARÍA DEL FONDO**

1. La ONUDI solicita al Comité Ejecutivo la aprobación de la suma de 327.082 \$EUA, más gastos de apoyo al organismo de 23.496 \$EUA, para las enmiendas al programa de trabajo para el 2016 que se indican en el Cuadro 1. La presentación de la ONUDI se adjunta al presente documento.

**Cuadro 1: ENMIENDAS AL PROGRAMA DE TRABAJO DE LA ONUDI PARA 2016**

País	Actividad/Proyecto	Monto solicitado (\$EUA)	Monto recomendado (\$EUA)
<b>SECCIÓN A: ACTIVIDADES RECOMENDADAS PARA APROBACIÓN GENERAL</b>			
<b>A1: Renovación de proyectos de fortalecimiento institucional</b>			
Libia	Renovación de proyecto de fortalecimiento institucional (etapa IV-año 2)	87.082	87.082
	Subtotal A1	87.082	87.082
Gastos de apoyo al organismo (7% para fortalecimiento institucional) para A1:		6.096	6.096
	Total A1	93.178	93.178
<b>A2: Elaboración de proyectos</b>			
Argentina	Elaboración de plan de gestión para la eliminación de HCFC (etapa II) (sector servicio técnico de equipos de refrigeración)	90.000	90.000
Túnez	Elaboración de plan de gestión para la eliminación de HCFC (etapa II) (sector servicio técnico de equipos de refrigeración)	60.000	60.000
Túnez	Preparación de actividades de inversión relativas a la eliminación de HCFC (etapa II) (sector espumas de poliuretano rígido)	60.000	60.000
	Subtotal A2	210.000	210.000
Gastos de apoyo al organismo (7% para elaboración de proyectos):		14.700	14.700
	Total A2	224.700	224.700
<b>A3: Asistencia técnica para elaboración de informes de verificación</b>			
Ecuador	Informe de verificación, etapa I del plan de gestión para eliminación de HCFC	30.000	30.000
	Subtotal A3	30.000	30.000
Gastos de apoyo al organismo (9% para asistencia técnica):		2.700	2.700
	Total A3	32.700	32.700
	Total general (A1, A2, A3):	350.578	350.578

\* Para consideración individual.

### **SECCIÓN A: ACTIVIDADES RECOMENDADAS PARA APROBACIÓN GENERAL**

#### **A1: Fortalecimiento institucional**

- a) Libia (etapa IV, año 2): 87.082 \$EUA

#### **Antecedentes**

2. La ONUDI ha solicitado la renovación del proyecto de fortalecimiento institucional para Libia que figura en el Cuadro 1. La descripción del proyecto se adjunta en el Anexo I al presente documento.
3. Durante la 74<sup>a</sup> Reunión, el Comité Ejecutivo, consciente de la especial situación por la que atraviesa el Gobierno de Libia, aprobó la etapa IV del proyecto de fortalecimiento institucional para este país sólo para el primer año, en el monto de 68.033 \$EUA, sin perjuicio de la operación del mecanismo de incumplimiento previsto en el Protocolo de Montreal, y llamó al gobierno libio a trabajar con la

ONUDI para retornar a una situación de cumplimiento y a solicitar el financiamiento del segundo año de la etapa IV ante la primera reunión del Comité Ejecutivo prevista para 2016<sup>1</sup> (decisión 74/32).

4. En junio de 2015 el Gobierno de Libia promulgó el Decreto Ley 228, norma que regula el sistema de otorgamiento de licencias y cuotas de HCFC, dando así cumplimiento a un prerrequisito para la presentación del plan de gestión para la eliminación de HCFC. Dicho plan se aprobó durante la 75<sup>a</sup> Reunión, en el entendido de que se hacía sin perjuicio de que operara el mecanismo de incumplimiento previsto en el Protocolo de Montreal<sup>2</sup> (decisión 75/50).

5. Según los antecedentes presentados por Libia en virtud del artículo 7, su consumo de HCFC en 2015 alcanzó a 119.81 toneladas PAO, cifra menor a las 122.3 toneladas PAO permitidas para dicho año.

### **Observaciones de la Secretaría**

6. La Secretaría analizó la solicitud de renovación del proyecto de fortalecimiento institucional para Libia a la luz de las correspondientes pautas y decisiones sobre criterios de admisibilidad y niveles de financiamiento. La solicitud se confrontó con el plan de trabajo de fortalecimiento institucional de la etapa anterior, con la información del programa país y los datos proporcionados en virtud del artículo 7, con el último informe de ejecución del plan de gestión, con el informe de avance presentado por el organismo interviniente, y con la decisión XXVII. Se tomó nota de que Libia ha dado cumplimiento a las metas de eliminación de HCFC contempladas en el plan de acción previsto en la decisión XXVII, y de que, según lo dispone la decisión 74/51(e),<sup>3</sup> la solicitud presentada contenía indicadores de desempeño para las actividades previstas en la siguiente etapa del proyecto de fortalecimiento institucional.

### **Recomendación de la Secretaría**

7. El Comité Ejecutivo recomienda la aprobación general de la solicitud de financiamiento para la etapa IV (año 2) del proyecto de fortalecimiento institucional para Libia al nivel de financiamiento señalado en el Cuadro 1, sin perjuicio de la operación del mecanismo de incumplimiento previsto en el Protocolo de Montreal. Si lo estima adecuado, el Comité Ejecutivo podrá hacer llegar al gobierno libio las observaciones que se formulan en el Anexo II al presente documento.

---

<sup>1</sup> El segundo año del proyecto de fortalecimiento institucional para Libia se presentó ante la 76<sup>a</sup> Reunión, pero fue posteriormente retirado por existir aún suficiente financiamiento para el período marzo-noviembre de 2016.

<sup>2</sup> En su decisión XXVII/11, la 27<sup>a</sup> Reunión de las Partes tomó nota del plan de acción para garantizar el retorno de Libia a una situación de cumplimiento con las medidas de control de los HCFC contenidas en el Protocolo, conforme a las cuales, sin perjuicio de la operación del mecanismo financiero del Protocolo, se comprometió a retornar a una situación de cumplimiento a partir de 2022 y años posteriores. En concreto, Libia se comprometió a: a) Reducir su consumo de HCFC de 122.4 toneladas PAO en 2014 a no más de: i) 122.3 toneladas PAO en 2015; ii) 118.4 toneladas PAO en 2016 y 2017; iii) 106.5 toneladas PAO en 2018 y 2019; iv) 76.95 toneladas PAO en 2020 y 2021; y v) Los niveles permitidos por el Protocolo de Montreal en 2022 y años posteriores.

<sup>3</sup> El Comité Ejecutivo decidió mantener el formato para renovación de proyectos de fortalecimiento institucional aprobado durante la 61<sup>a</sup> Reunión (decisión 61/43(c)), agregando en la sección 10 que el Anexo XIX al documento UNEP/OzL.Pro/ExCom/74/56 (decisión 74/51(e)) dispone la inclusión de indicadores de desempeño.

## A2: Elaboración de proyectos

Argentina: Elaboración de un plan de gestión para la eliminación de HCFC (etapa II) (estrategia general): 90.000 \$EUA

### Descripción del proyecto

8. En nombre del Gobierno de la Argentina, la ONUDI presentó una solicitud relativa a la elaboración de la estrategia general para la etapa II del plan de gestión para la eliminación de HCFC, al nivel de financiamiento que se muestra en el Cuadro 1.

9. Esta presentación incluye una puesta al día sobre la ejecución de la etapa I del plan de gestión, la justificación del financiamiento solicitado, las actividades que se prevé ejecutar, y los presupuestos correspondientes.

### Observaciones de la Secretaría

10. La Secretaría analizó la solicitud a la luz de las pautas de preparación de financiamiento para la etapa II del plan de gestión en países del artículo 5 contenidas en la decisión 71/42, y la evaluó conforme a lo dispuesto en la decisión 76/21, la que considera fondos para preparación de proyectos relativos a actividades de inversión para la eliminación de HCFC en la Argentina (etapa II) (sector espuma) por un monto de 137.500 \$EUA, más gastos de apoyo para el Banco Mundial.

11. La Secretaría tomó nota de que la solicitud de 90.000 \$EUA para proyectos relativos a la estrategia general para la etapa II del plan de gestión se ajusta a la decisión 71/42 y al consumo admisible remanente de HCFC de 293.98 toneladas PAO.

### Recomendación de la Secretaría

12. La Secretaría recomienda la aprobación general de la solicitud de la ONUDI para la elaboración de los proyectos de la etapa II del plan de gestión (estrategia general) para la Argentina, al nivel de financiamiento que se muestra en el Cuadro 1.

Túnez: Preparación para la eliminación de HCFC (etapa II) (estrategia general): 60.000 \$EUA  
Túnez: Preparación de actividades de inversión relativas a la eliminación de HCFC (etapa II) (sector espuma): 60.000 \$EUA

### Descripción del proyecto

13. En nombre del Gobierno de Túnez, la ONUDI presentó solicitudes relativas a la elaboración de los proyectos de la etapa II del plan de gestión para eliminación de HCFC (60.000 \$EUA) y a la preparación de actividades de inversión relativas a la eliminación de HCFC en el sector espuma (60.000 \$EUA), al nivel de financiamiento que se muestra en el Cuadro 1.

### Observaciones de la Secretaría

14. La Secretaría analizó la solicitud a la luz de lo dispuesto en la decisión 71/42, tomando nota de que se incluye una puesta al día sobre la ejecución de la etapa I del plan de gestión, la justificación del financiamiento solicitado, las actividades que se prevé ejecutar, y los presupuestos correspondientes.

15. La solicitud se encuentra dentro de los parámetros fijados en la decisión 71/42(d), (f) y (g) sobre la base de un consumo admisible remanente para Túnez de HCFC de 35.08 toneladas PAO, lo que hace al gobierno tunecino acreedor a un máximo de 60.000 \$EUA, más gastos de apoyo, para la elaboración de la estrategia general de la etapa II del plan de gestión. Asimismo, la solicitud para la elaboración de

proyectos sobre actividades de inversión relativas a la eliminación de HCFC en el sector espuma (60.000 \$EUA) se ajusta al acuerdo alcanzado durante la discusión de la etapa I del plan de gestión en cuanto a que dicho sector quedará postergado para la etapa II.

### **Recomendación de la Secretaría**

16. La Secretaría recomienda la aprobación general de las solicitudes relativas a la elaboración de los proyectos para la etapa II del plan de gestión y la preparación de las actividades de inversión relativas a la eliminación de HCFC en el sector espuma en Túnez, al nivel de financiamiento que se muestra en el Cuadro 1.

### **A3: Asistencia técnica para elaboración de informes de verificación del consumo de HCFC**

Ecuador: Asistencia técnica para informe de verificación de metas de consumo nacional: 30.000 \$EUA

#### **Descripción del proyecto**

17. En su decisión 76/17, el Comité Ejecutivo solicitó a los organismos bilaterales y de ejecución pertinentes que incluyeran en sus respectivas enmiendas al programa de trabajo a presentar ante la 77<sup>a</sup> reunión el financiamiento necesario para informes de verificación de la etapa I del plan de gestión en, entre otros países, Ecuador, donde el principal organismo de ejecución es la ONUDI.

#### **Observaciones de la Secretaría**

18. La Secretaría tomó nota de que el financiamiento solicitado concuerda con lo aprobado en reuniones anteriores para similares informes, haciendo notar que el informe de verificación debe presentarse por lo menos 60 días antes de la reunión del Comité Ejecutivo que deba discutir el siguiente tramo de financiamiento del plan de gestión.

### **Recomendación de la Secretaría**

19. La Secretaría recomienda la aprobación general del informe de verificación para la etapa I del plan de gestión para la eliminación de HCFC para Ecuador, al nivel de financiamiento que se muestra en el Cuadro 1, en el entendido de que los informes de verificación deben ser presentados con al menos 60 días de anticipación a la reunión del Comité Ejecutivo que deba abordar el siguiente tramo de financiamiento del plan de gestión para la eliminación de HCFC.

## Annex I

### INSTITUTIONAL STRENGTHENING PROJECT PROPOSALS

#### **Libya: Renewal of institutional strengthening**

<b>Summary of the project and country profile</b>		
Implementing agency:		UNIDO
Amounts previously approved for institutional strengthening (US \$):		
Phase I:	Dec-00	157,000
Phase II:	Nov-09	136,065
Phase III:	Dec-13	136,065
Phase IV (year 1)	May-15	68,033
	Total:	497,163
Amount requested for renewal (phase IV)(year 2) (US \$):		87,082
Amount recommended for approval for phase IV (year ) (US \$):		87,082
Agency support costs (US \$):		6,096
Total cost of institutional strengthening phase IV (year2 )to the Multilateral Fund (US \$):		93,178
Date of approval of country programme:		1999
Date of approval of HCFC phase-out management plan:		2015
Baseline consumption of controlled substances (ODP tonnes):		
(a) Annex B, Group III (methyl chloroform) (average 1998-2000)		0.0
(b) Annex C, Group I (HCFCs) (average 2009-2010)		118.38
(c) Annex E (methyl bromide) (average 1995-1998)		94.1
Latest reported ODS consumption (2015) (ODP tonnes) as per Article 7:		
(a) Annex B, Group III (methyl chloroform) (average 1998-2000)		0.0
(b) Annex C, Group I (HCFCs) (average 2009-2010)		119.81*
(c) Annex E (methyl bromide) (average 1995-1998)		0.0
	Total:	119.81
Year of reported country programme implementation data:		2015
Amount approved for projects (as at May 2016) (US \$):		8,976,563
Amount disbursed (as at December 2014) (US \$):		5,995,675
ODS to be phased out (as at May 2016) (ODP tonnes):		1,591.5
ODS phased out (as at December 2014) (ODP tonnes):		866.8

\*The plan of action for Libya approved under decision XXVII/11 allows HCFC consumption in 2015 of no greater than 122.3 ODP-tonnes.

#### 1. Summary of activities and funds approved by the Executive Committee:

<b>Summary of activities</b>	<b>Funds approved (US \$)</b>
(a) Investment projects:	7,500,900
(b) Institutional strengthening:	497,163
(c) Project preparation, technical assistance, training and other non-investment projects:	978,500
	Total: 8,976,563

#### Progress report

2. During phase IV (year 1), the NOU was fully staffed and substantive progress was achieved in legislation enforcement. In June 2015 Libya issued 2015 decree Law No. 228 which provides the legal framework to support the implementation of regulatory measures including licensing and quota systems for imports of HCFCs and HCFC-based equipment. Quotas for 2016 were established and are being

monitored on regular basis. Stage I of the HPMP for Libya was submitted to and approved at the 75<sup>th</sup> meeting and Article 7 data indicate that the country achieved compliance with its commitments in decision XXVII/11 to reduce HCFC consumption to no more than 122.3 ODP tonnes. The NOU continued to maintain cooperation with other public institutions through regular bilateral meetings, inter-ministerial meetings and steering committees. The Libyan National Committee for Climate Change and Ozone Depletion was maintained and includes members from Ministry of Industry, Ministry of Meteorology, National Oil Company, Environmental General Authority and Ministry of Agriculture. The NOU also submitted the country programme data report for 2015, published awareness materials for the private sector, and organized awareness activities for Ozone Day. Libya participated in Montreal Protocol meetings in 2015 and 2016.

#### Plan of action

3. During phase IV (year 2) the NOU will continue to monitor HCFCs consumption to maintain compliance with quota system and with licensing system. Quotas will be issued for the years 2017 and 2018 to maintain HCFC consumption in line with the Agreement with the Executive Committee and with Libya's commitments under decision XXVII/11. Monitoring of HCFC distribution by sub-sectors will be given special attention as it will be critical for the successful implementation of the HCFCs phase-out policies.

**Anexo II**

**PUNTOS DE VISTA DEL COMITÉ EJECUTIVO EN CUANTO A LA RENOVACIÓN DE  
PROYECTOS DE FORTALECIMIENTO INSTITUCIONAL PRESENTADOS  
ANTES DE LA 77<sup>a</sup> REUNIÓN**

**Libia**

1. El Comité Ejecutivo tomó conocimiento del informe adjunto a la solicitud relativa al proyecto de fortalecimiento institucional para Libia (etapa IV, segundo año) y tomó nota con beneplácito de que los datos proporcionados por Libia a la Secretaría del Ozono para el año 2015 muestran el cumplimiento con los compromisos adquiridos en virtud de la decisión XXVII/11 de las Partes en el Protocolo de Montreal. El Comité Ejecutivo hizo notar además que en el marco del proyecto de fortalecimiento institucional, Libia ha logrado sustantivos avances en el control de los HCFC. El Comité Ejecutivo reconoció que la Dependencia Nacional del Ozono ha continuado en funciones en forma ininterrumpida pese a las dificultades enfrentadas desde el año 2011, observando además con beneplácito que el Decreto Ley 228 de junio de 2015 estableció un sistema de otorgamiento de licencias y cuotas, que se elaboró un plan de acción para el retorno a una situación de cumplimiento al año 2018 que será presentado ante el Comité de Aplicación, y que Libia presentó la etapa I del plan de gestión para eliminación de HCFC como medida para llevar efectivamente a la práctica el plan de acción, principalmente a través de reducir el consumo de HCFC en el sector fabricación de espuma. Por consiguiente, el Comité Ejecutivo espera que Libia siga ejecutando con éxito el plan de gestión para la eliminación de HCFC y el proyecto de fortalecimiento institucional, y que continúe otorgando prioridad al cumplimiento de las metas previstas en la decisión XXVII/11 de modo tal que retorne a una situación de cumplimiento con lo dispuesto en el Protocolo de Montreal.

**UNITED NATIONS INDUSTRIAL DEVELOPMENT ORGANIZATION**

77<sup>th</sup> Executive Committee of the  
Multilateral Fund for the Implementation of the Montreal Protocol

**UNIDO Work Programme**

**77<sup>th</sup> Executive Committee**

## **Introduction**

The UNIDO Work Programme for the consideration of the 77<sup>th</sup> Meeting of the Executive Committee (ExCom) of the Multilateral Fund (MLF) has been prepared following the Government requests as well as based on ongoing and planned activities. The Work Programme will support the implementation of UNIDO's three year Rolling Business Plan 2016-2018.

The 77<sup>th</sup> UNIDO WPA is addressing institutional strengthening request for Libya in line with the Decision 74/51 of the ExCom that increased eligible funding amount with 28% against the historical approved levels.

Preparatory assistance is submitted for the 77<sup>th</sup> Executive Committee Meeting consideration for Argentina and Tunisia, to enable the countries to address the HPMP Stage II.

Verification Report related funding is required in line with the Decision 76/17 for Ecuador, classified as an LVC country.

The UNIDO 77<sup>th</sup> Work Programme Amendment included UNIDO Core Unit funding that has been individually submitted to the Multilateral Fund Secretariat for its consideration.

The UNIDO Work Programme Amendment for the consideration of the 77<sup>th</sup> ExCom Meeting comprises the following sections:

### **Section 1**

Gives in a tabulated form by project types and country the consolidated list of activities foreseen for the above requests

Funding is requested as follows:

- IS extension request for Libya amounting to US\$ 93,178 (including US\$ 6,096 representing 7.0 % A.S.C)
- Preparatory assistance funding for HPMP Stage II amounting to US\$ 224,700 (including US\$ 14,700 representing 7.0 % A.S.C)
- Verification Report funding amounting to US\$ 32,100 (including US\$ 2,100 representing 7.0 % A.S.C)
- Administrative support funding amounting US\$ 2,055,000

**Total: US\$ 2,382,082 (including US\$ 22,896 agency support cost)**

Project concepts indicating details and funding requirements are provided in Section 2.

## Section 2

### Project Concept

<b>Country:</b>	<b>Libya</b>
<b>Title:</b>	Extension of Institutional Strengthening for the implementation of Montreal Protocol in Libya – Phase IV second year funding
<b>Project Duration:</b>	12 months (December 2016 – November 2017)
<b>Project Budget:</b>	US\$ 87,082 (excluding US\$ 6,096 representing 7% Agency Support Costs)
<b>Implementing Agency:</b>	UNIDO
<b>Coordinating Agency:</b>	National Ozone Unit / Environmental General Authority

---

#### **Project Summary**

The project is addressing further institutional strengthening and capacity building for the National Ozone Unit / Environmental General Authority and will ensure that the Government will meet its obligations under the Montreal Protocol on the substances that deplete the Ozone Layer.

During phase IV (year 2) the NOU will continue to monitor HCFCs consumption to maintain compliance with quota system and with licensing system. Quotas will be issued for the years 2017 and 2018 to maintain HCFC consumption in line with the Agreement between the Executive Committee and the Executive Committee and with its commitments in decision XXVII/11. Monitoring of HCFC distribution monitoring by sub-sectors will be given special attention as it will be critical for the successful implementation of the HCFCs phase-out policies.

Libya has passed through challenges due to administrative restructuring and delays in adoption HCFCs specific regulatory measures to ensure full control of the country consumption. Being in non-compliance, the country was relying on the institutional strengthening funding in the year 2015, and the financial support approved for one year duration by the 74<sup>th</sup> ExCom enabled the country to complete its HPMP and the expedite the national legislation in the approval process.

The HPMP Stage I was approved and is under implementation. NOU was maintained active, staff continuity was ensured and there are no major administrative changes to further affect functionality of NOU. This underlines the country commitment to comply with the Montreal Protocol obligations.

The National Ozone Unit is responsible for and oversees the implementation of the HPMP project and ensures the further phase-out of the annual HCFCs consumption, beyond the 10 % reduction target achieved in 2015. It has a major role in the process of monitoring of the project activities.

The NOU actively cooperate with ministries and inter-ministerial bodies as well as with advisory groups such as customs authorities, refrigeration sector representatives, NGOs and others.

## Project Concept

**Country:** Argentina

**Title:** Project preparation for stage II of HPMP

**Project Duration:** 12 months

**Project Budget:** US\$ 90,000 (excl. 7% Agency Support Costs)

**Implementing Agency:** UNIDO

**Coordinating Agency:** OPROZ - National Ozone Unit

---

### Project Summary

The Implementing Agency has received an official request from the Government of Argentina for project preparation in the stage II of HPMP. In response to the decision 71/42(b) UNIDO is submitting a request for funds for the preparation of stage II of HPMP.

Argentina's base line consumption of HCFCs amounted to 400.7 ODP tonnes. After the approval of the HPMP Stage I, Argentina committed to reduce 53.46 by 2015, once completed, the remaining consumption in the HPMP will be 273.33 ODP.

Argentina is a major consumer of HCFC-141b and HCFC-22, and a producer of HCFC-22. Thus, the phase out of the national consumption of Annex C, group I substances (HCFCs) by 356.86 ODP Tonnes from the starting point established at the HPMP Stage I.

The reduction and compliance targets are as follows:

Year	Consumption (ODP Tonnes)	Reduction (ODP Tonnes)	Consumption allowed (ODP Tonnes)
2009	326.15	N/A	N/A
2010	475.16	N/A	N/A
<b>Base line</b>	<b>400.66</b>	N/A	N/A
2015	295.42		
Year	Control measure		
2013	Freeze	125.72	401
2015	10% reduction	40.07	361
2020	35% reduction	100.16	260
2025	67.50% reduction	130.21	130
2030	97.50% reduction	120.20	10
2040	100% reduction	10.02	-

The strategy followed by Argentina is based on the following criteria and priorities:

- I. Accelerated elimination of the production and consumption of the HCFC, in agreement with decision XIX/6 of the Parties.
- II. Application of well-known, affordable, available and widely used HCFC replacement alternatives and related technologies, while supporting efforts for identification and selection of such alternatives.
- III. To start elimination of HCFC in those HCFC consuming manufacturing sectors, this would guarantee timely compliance with the freeze and 10% reduction targets by 2015, and focus in the servicing sector to reach 35% reduction by 2020.

IV. Through adoption of appropriate alternative technologies, limit climate and adverse environmental impact of converted enterprises and comply with safety, economic and sustainability requirements.

Policy measures:

To achieve compliance with the control measures Argentina is preparing several policy interventions.

- a. The quota system was redesigned to address production of HCFC-22 and imports of several HCFCs,
- b. The quota system is being updated in harmony with the reduction targets.
- c. The installation of new HCFC production capacities is banned.
- d. The import of HCFC-based domestic Air conditioning equipment has been banned.
- e. Production of HCFC-22 is being monitored at FIASA
- f. All stakeholders are being updated on the progress and requirements of the legislation.
- g. Regular public awareness activities are being designed and implemented.

Regarding the HPMP implementation the general strategy has been executed successfully. The following activities summarize the progress in the project:

Implementation progress

The HPMP Stage I addressed to the extent possible conversion at large enterprises:

- a. Conversion of HCFC-22 in room and unitary air-conditioning equipment manufacturing sector approved at 61<sup>st</sup> Executive Committee Meeting (Component 1, UNIDO)
- b. Conversion from HCFC-141b in the manufacture of polyurethane rigid insulation foam for domestic refrigerators at Mabe Argentina (Component 2, World Bank)
- c. Technical assistance to reduce the use of HCFC-141b in flushing during servicing (Component 3, UNIDO)
- d. Training of technicians on good practices, servicing using alternatives (Component 3, UNIDO)
- e. Support to the project coordination and monitoring. (Component 3, UNIDO)
- d. Monitoring Production (Component 4, World Bank)

The remaining eligible consumption of HCFCs in manufacturing and servicing sector to reach 2020 is 100.16 ODP Tons. It is projected that this amount will be phased out from the servicing sector using HCFC-22. The World Bank will continue be in charge of th foam, for which at the 76<sup>th</sup> Meeting, PRP amounting 137,000 was approved.

The training and support of technicians already started during the HPMP stage I. It is expected to continue and enlarge the scope during the Stage II of the HPMP as stipulated in overarching HPMP strategy document approved by 61<sup>st</sup> Executive Committee.

## **Funding Requirement**

In accordance with the guideline 71/55 the preparatory funds are requested for UNIDO, as follows:

<b>Activities</b>	<b>Total</b>
Survey to update consumption all over the country	15,000
Survey to update the numbers of technicians related to the refrigeration sector for all Provinces	15,000
Consultancy (international consultant)	40,000
Stake holders meetings	10,000
Consultation meeting	10,000
	90,000

## **Activities to be undertaken to develop Stage-II document**

The following activities shall be undertaken for the preparation of stage-II HPMP to be prepared from the proposed funding:

- Data Collection and Surveys
- Collection, verification and validation of HCFC consumption in various sectors/ sub-sectors through survey of Government departments, traders, distributors, importers and manufacturers to access the sectoral distribution of HCFC consumption (update previous data collection)
- Collect information to determine the number of technicians, their needs, in all 28 Provinces of Argentina.
- Develop a plan for implementation of the servicing sector related activities to be integrated in the overall strategy
- Evaluate the climate co-benefits
- Prepare a project document

## PROJECT CONCEPT

<b>Country:</b>	Tunisia
<b>Title:</b>	Preparatory funding request - Second Stage of HPMP
	Servicing sector
	Investment component for pre-blended polyols (Rigid PU foam)
<b>Project Duration:</b>	12 months
<b>Project Budget:</b>	US\$ 120,000 (excl. 7% Agency Support Costs)
	US\$ 60,000 to Servicing sector
	US\$ 60,000 to Pre-blended polyol sector
<b>Implementing Agency:</b>	UNIDO
<b>Coordinating Agency:</b>	Ministry of Environment and Sustainable Development (National Ozone Unit)

### **1. Project Summary**

The Implementing Agency has received an official request from the Government of Tunisia for preparatory funding for the stage II of HPMP. In response to the decision 71/42(b) UNIDO is submitting a request for funds for the preparation of stage II of HPMP.

Tunisia's base line consumption of HCFCs amounted to 40.7 ODP tonnes. During the implementation of the first phase, 9.26 ODP tonnes of HCFC-22 and 1.60 ODP tonnes of HCFC-141b, excluding pre-blended polyol consumption, are planned to be eliminated by 2018, while the remaining eligible consumption amounts to 29.75 ODP tonnes of HCFC-22 and 5.02 ODP tonnes of HCFC-141b contained in imported pre-blended polyols.

In the Second Stage of HPMP, Tunisia will further address with priority the servicing sector aiming to reach a 68% (67.5) reduction in HCFCs consumption by the year 2025. The Stage II strategy will also include activities to address investment component in the the pre-blended polyol sector

### **2. Description of current implementation**

The Executive Committee for the Implementation of the Montreal Protocol (ExCom) approved, at its 72nd Meeting (May 2014) Stage I of the HCFC Phase-Out Management Plan (HPMP) for Tunisia for the period 2014-2018 (Decision 72/36) to reduce HCFC consumption by 15 per cent of the baseline of 40.7 ODP tonnes. Under this framework, the first tranche of Stage I of the HPMP for Tunisia and the corresponding 2014–2015 implementation plans, were approved. Lastly, at its 76<sup>th</sup> Meeting (May 2016), the ExCom approved the second tranche of Stage II for this country, corresponding to the period 2016–2018.

Since the approval of Tunisia HPMP Stage I, activities have been implemented in relation with all the corresponding activities identified in the project document. Thus, concerning all HCFCs, the licensing system with the quota-based HCFC control is currently in operation in Tunisia, and additional potential regulatory and policy measures will be assessed for its implementation.

On its turn, investment projects linked to the use of HCFC-141b as solvent have made substantial progress so far on the identification of available alternatives, the selection of the most appropriate ones and the replacement of that substance in two Tunisian companies, SOFAP and SNCFT. Whereas SOFAP is expected to undertake the pilot-scale trial of the pre-selected alternative before the end of 2016, the replacement at the SNCFT has already been successfully completed.

Finally, with respect to HCFC-22 consumption, the activities undertaken so far have focused on providing information on available alternatives to four companies of the air conditioning manufacturing sector and training their personnel in the use of some of these alternatives. This is the basis for the conversion of the respective production lines, which is expected to take place in the period 2016-2018. In line with this, and always under this component, the servicing sector has also been assisted to reduce HCFC-22 consumption. Thus, whilst a training and certification programme has been designed and proposed, the equipment and tools needed by training centers have been identified, procured and delivered with the corresponding training on its use. The provision of tools and equipment for workshops will be effective before the end of 2016.

In addition to activities under the HPMP, a demonstration project for the introduction of trans-critical CO<sub>2</sub> refrigeration technology for supermarkets in Tunisia was approved by the ExCom at its 76<sup>th</sup> Meeting (Decision 76/27).

### **3. Overarching strategy 2018 – 2025**

#### **3.1. Current HCFC consumption**

Progress of HCFC consumption in the last five years is shown in the following table.

**Table 1. HCFC consumption in the last five years in Tunisia (metric tonnes)**

	2011	2012	2013	2014	2015
HCFC-22	599.532	577.245	566.85	610.43	629.748
HCFC-141b	8.46	8.46	8.46	8.46	8.46
HCFC-123	0	0.5	0	0	0

In table 2, information on the import quotas for the last two years is provided.

**Table 2. HCFC import quotas – 2015 and 2016**

Substance	2015		2016	
	Mt	No of companies	Mt	No of companies
HCFC-22	646.29	19	569.887 <sup>(1)</sup>	20
HCFC-141b	8.46	1	8.46	1
HCFC-141b	4.073	1 <sup>(2)</sup>	4.073	1 <sup>(2)</sup>

(1) An additional reserve of 33.8 metric tons must be here considered (this amount can be distributed if the NOU receives further demands or in case of urgency or need).

(2) Trader which do not use HCFC-141b for own purposes.

### 3.2. Information to be gathered and updated

Besides the gathering and updating of information related to consumption of HCFCs in the corresponding verification reports, additional information will be gathered and subsequently updated on those aspects related to the expected activities of Stage II.

For addressing the Stage II to the servicing sector, a comprehensive survey will be required to give response to the servicing needs post 2020, considering also the small and medium enterprises operating discontinuous with assembly field applications.

Stage II will also address the consumption of HCFC 141b contained in non-reported imported pre-blended polyol used for various foam applications. Consequently, information on the imports of this material will be gathered accordingly. This kind of information has not been gathered yet due to the fact that its use is linked to implementation of activities under Stage II.

### 3.3. Activities to be undertaken for PRP

In accordance with the guideline 71/55, the preparatory activities and the corresponding funds requested for UNIDO, are as follows:

Activities	Total
<b>Preparation of Refrigeration Servicing (including assembly)</b>	<b>60,000</b>
Survey to update consumption all over the country	25,000
Consultation meetings	15,000
Consultancy (international consultant)	12,000
National consultants and data validation process	8,000
<b>Preparation of investment activities in polyol sector and for elimination of the use of HCFCs in rigid PU</b>	<b>60,000</b>
Survey on use of pre-blended polyol for foam applications	20,000
Site-visits and sites selection criteria setting-up	8,000
Stakeholders consultation meetings	10,000
International consultant for preparing project concepts	22,000
<b>Grand total</b>	<b>120,000</b>

In both components, the consultation meetings refer to those with parties involved in the investment activities. The team in charge of project management will visit Tunisia to discuss and agree with national counterparts and relevant stakeholders on the basics of project design and implementation.

Concerning the survey on the use of pre-blended polyol for foam applications it is necessary to analyze the consumption of HCFC-141b in this sector. This will also include a first assessment on the needs of Customs to identify this type of material.

## **4. Investment component**

### 4.1. Information on enterprises

According to information obtained during HPMP preparation, imports of HCFC-141b in pre-blended polyol are undertaken by two types of entities:

- Traders which sell the imported pre-blended polyol to end-users in the country;
- End-users.

There are three identified traders which import HCFC-141b pre-blended in polyol: *BASF Tunisie*, *Promochimie* and *Adly Chimique*. *BASF Tunisie*, which is the main importer in volume, refused to provide data on their imports of HCFC-141b pre-blended in polyol. Data provided by the two other traders (24.7% of the total amount) are included in the table below:

**Table 3: Break-down of imports of HCFC-141b in pre-blended polyol by importer**

Importer	Imports (MT)					
	2007	2008	2009	2010	2011	2012
Promochimie	6.42	9.67	4.68	4.20	1.65	5.70
Adly Chimique	4.01	10.54	15.73	14.87	7.18	10.50

Concerning end users, the foam sector in Tunisia is, in terms of production volumes, dominated by the flexible slabstock market where companies have been converted in the past from CFC-11 to CO<sub>2</sub>. There have been several companies funded through the World Bank and UNIDO under the NPP program that have been converted to HCFC-141b. The sector consists mainly of small companies with consumption lower than 10 MT/year of HCFC-141b. Major concentration of the industry is in the capital Tunis and in the industrial city of Sfax.

The companies in this sector work with imported HCFC-141b pre-blended in polyol, which they obtain either through direct imports or through traders, as above indicated. There is currently no company in this sector working with HCFC-141b pure.

In order to clearly define the consumption of HCFC-141b in this sector, companies have been grouped as follows:

1. Companies which are of no foreign ownership, have not been previously supported by the Multilateral Fund and have set up their production based on HCFC-141b prior to 21 September 2007; the following table shows the consumption data for these companies for the period 2007-2012:

**Table 4: Consumption of HCFC-141b pre-blended in polyol by Group 1 companies**

Company	Sector	Consumption (MT of HCFC-141b)					
		2007	2008	2009	2010	2011	2012
Misaft	Elastomer foam (filters)	12.40	13.86	14.99	15.97	15.22	18.00
Mont Blanc Electromenager «GAN»	Wood imitation	6.00	6.45	7.50	8.25	6.90	9.45
Sotufca	Elastomer foam	1.50	2.25	3.75	4.50	3.75	4.50
GIF	Elastomer foam (filters)	4.58	5.40	6.23	5.56	4.88	4.50
Le Panneau	Sandwich panels	7.92	7.92	11.85	13.92	5.28	2.64

Company	Sector	Consumption (MT of HCFC-141b)					
		2007	2008	2009	2010	2011	2012
Polysieges		0.85	2.43	1.48	1.67	1.58	2.36
Afri-Chrome	Flexible molded foam	1.58	1.58	1.80	1.65	1.58	1.65
Frigomeuble	Refrigerator insulation	0.45	0.63	0.69	0.73	0.76	0.93
Société Tunisienne d'Equipement (STE)	Sandwich panels	0.33	0.30	0.33	0.40	0.36	0.45
Attia Refrigeration	Refrigerator insulation	0.06	0.10	0.10	0.20	0.15	0.07
<b>Total Consumption</b>		<b>35.66</b>	<b>40.91</b>	<b>48.71</b>	<b>52.83</b>	<b>40.45</b>	<b>44.54</b>

2. Companies which are of no foreign ownership, have been previously supported by the Multilateral Fund and have set up their production based on HCFC-141b prior to 21 September 2007; the following table shows the consumption data for these companies, some of which have only provided their consumption data for 2012:

**Table 5: Consumption of HCFC-141b pre-blended in polyol by Group 2 companies**

Company	Sector	Consumption (MT of HCFC-141b)					
		2007	2008	2009	2010	2011	2012
Bafes - Frigobaf	Refrigerator insulation						4.60
Frigo Technique	Refrigerator insulation						4.40
REI	Refrigerator insulation						3.70
Societe Moderne Refrigeration	Refrigerator insulation						2.50
Sotiem	Refrigerator insulation						2.30
Sotim	Slabstock						2.00
Coldeq	Sandwich panels	2.12	2.49	0.90	1.45	1.45	1.64
Meublatex	Wood imitation	1.50	1.50	1.50	1.50	1.50	1.50
Sogima	Refrigerator insulation						1.50
Tabrid	Refrigerator insulation						1.00
Chahed Réfrigération	Refrigerator insulation	0.63	0.44	0.76	0.79	0.22	0.19
<b>Total Consumption</b>		<b>4.25</b>	<b>4.43</b>	<b>3.16</b>	<b>3.74</b>	<b>3.18</b>	<b>25.33</b>

3. Companies which are of foreign ownership and/or have set up their production based on HCFC-141b after 21 September 2007; the following table shows the consumption data for these companies for the period 2007-2012:

**Table 6: Consumption of HCFC-141b pre-blended in polyol by Group 3 companies**

Company	Sector	Consumption (MT of HCFC-141b)					
		2007	2008	2009	2010	2011	2012
Draxlmaier	Flexible molded foam	2.32	4.26	3.21	4.51	6.42	2.64
Almia Refrigeration	Refrigerator insulation	0.00	2.72	3.02	1.67	1.92	2.21
<b>Total Consumption</b>		<b>2.32</b>	<b>6.98</b>	<b>6.23</b>	<b>6.18</b>	<b>8.34</b>	<b>4.85</b>

4. Companies which used HCFC-141b pre-blended in polyol during the period 2007-2012 but they do not do so anymore:

**Table 7: Consumption of HCFC-141b pre-blended in polyol by Group 4 companies**

Company	Sector	Consumption (MT of HCFC-141b)					
		2007	2008	2009	2010	2011	2012
SNCI	Sandwich panels	0.00	108.38	127.50	112.50	75.00	0.00
Soften	Water Heaters	7.01	7.01	7.01	7.01	0.00	0.00
Sofrifac	Sandwich panels	0.75	1.20	1.50	2.25	0.00	0.00
Biome Solar Industry (BSI)	Water Heaters	0.23	0.63	1.47	1.80	0.00	0.00
Polymex	Wood imitation	0.90	0.90	0.90	0.90	0.00	0.00
Technochem	Sandwich panels	2.82	3.12	16.25	0.00	0.00	0.00
<b>Total Consumption</b>		<b>11.70</b>	<b>121.23</b>	<b>154.63</b>	<b>124.46</b>	<b>75.00</b>	<b>0.00</b>

Taking into account the data in the tables above, the following table shows the annual consumption of HCFC-141b in pre-blended polyol for the period 2007-2012 in Tunisia:

**Table 8: HCFC consumption in the foam manufacturing sector**

Substance	Consumption (MT)					
	2007	2008	2009	2010	2011	2012
HCFC-141b	53.92	173.55	212.73	187.20	126.96	74.72

#### 4.2. Activities for a project proposal

The preparatory activities that will be undertaken to develop a project proposal for the conversion of these enterprises are those indicated in section 3.3 above and, as previously explained, they include a survey for updating the information on consumption contained in tables 3 to 8.

## **Project Concept**

<b>Country:</b>	<b>Ecuador</b>
<b>Title:</b>	Verification report of national consumption targets
<b>Project Duration:</b>	12 months
<b>Project Budget:</b>	US\$ 30,000 (excl. 7% Agency Support Costs)
<b>Implementing Agency:</b>	UNIDO
<b>Coordinating Agency:</b>	Unidad de Gestión Ambiental - MIPRO - NOU

---

## **Project Summary**

### 1. Background

Funding requirement for the preparation of verification report of national program is being requested in accordance with UNEP/OzL.Pro/ExCom/76/17.

The HCFC Phase-out Management Plan for Ecuador was approved in November 2011 at the 65<sup>th</sup> Meeting of Executive Committee of the Multilateral Fund for the implementation of the Montreal Protocol. The project was approved in accordance with the Agreement between the Government and the Executive Committee for the period 2011 to 2020 to meet the 35 per cent reduction in HCFC consumption, and on the understanding that US\$ 630,000 was provided to address HCFC consumption in the refrigeration servicing sector to reach up to and include the 35 per cent reduction in 2020 in line with decision 60/44.

Decision 76/17: '*The Executive Committee decided to request relevant bilateral and implementing agencies to include in their respective amendments to their work programmes due for submission to the 77th meeting, funding for verification reports for stage I of the HPMPs in the amount of US \$30,000, plus agency support costs, for the following 17 Article 5 countries: Benin, Cabo Verde, Chad, Ecuador, El Salvador, Grenada, Guyana, Jamaica, Kyrgyzstan, Liberia, Mozambique, Nepal, Saint Kitts and Nevis, Saint Vincent and the Grenadines, Sierra Leone, Swaziland, and Zambia.*'
