COMITÉ EXÉCUTIF
DU FONDS MULTILATÉRAL AUX FINS
D'APPLICATION DU PROTOCOLE DE MONTRÉAL
Quatre-vingt-douzième réunion
Montréal, 29 mai – 2 juin 2023
Point 9 (c) et (d) de l'ordre du jour provisoire¹

PROGRAMME DE TRAVAIL DE L'ONUDI POUR 2023

¹ UNEP/OzL.Pro/ExCom/92/1

OBSERVATIONS ET RECOMMANDATION DU SECRÉTARIAT DU FONDS

1. L'ONUDI demande au Comité exécutif d'approuver le montant de 1 723 122 \$US, plus les coûts d'appui d'agence de 121 219 \$US, pour son programme de travail de 2023 présenté dans le Tableau 1. La soumission est jointe au présent document.

Tableau 1 : Programme de travail de l'ONUDI pour 2023

| Pays | Activité/Projet | Montant demandé (\$ US) | Montant recommandé (\$ US) |
|---|---|-------------------------|----------------------------|
| SECTION A: ACTIVITÉS RECOMMANDÉES POUR APPROBATION GLOBALE | | | |
| A1: Renouvellement des projets de renforcement des institutions | | | |

^a PNUE comme agence d'exécution coopérante

^b PNUE comme agence d'exécution principale

* Recommandé pour examen individuel

SECTION A : ACTIVITÉS RECOMMANDÉES POUR APPROBATION GLOBALE

A1 : Renouvellement des projets de renforcement des institutions

Description des projets

2. L'ONUDI a soumis des demandes de renouvellement de projets de renforcement des institutions (RI) dont la liste figure dans la section A1 du Tableau 1. La description de ces projets se trouve à l'Annexe I du présent document.

Observations du Secrétariat

3. Le Secrétariat a examiné les demandes de renouvellement de quatre projets de RI, soumises par l'ONUDI au nom des gouvernements concernés, en tenant compte des lignes directrices² et des décisions pertinentes sur l'admissibilité et les niveaux de financement. Les demandes ont été recoupées avec les plans de travail originaux pour la phase précédente, les données du programme de pays et les données déclarées en vertu de l'article 7, le dernier rapport sur la mise en œuvre de leurs PGEH, le rapport périodique de l'agence et toute décision pertinente des Réunions des Parties. Il a été constaté que ces pays ont soumis leurs données du programme de pays pour 2021-2022 et se conforment aux cibles de contrôle du Protocole de Montréal, que leur consommation annuelle de HCFC ne dépasse pas la consommation annuelle maximale admissible mentionnée dans leurs Accords sur les HCFC conclus avec le Comité exécutif. En outre, toutes les demandes soumises contenaient une évaluation des indicateurs de performance et de l'atteinte des objectifs de RI, selon la décision 91/63(b).

4. Le Secrétariat a pris note que la Bosnie-Herzégovine n'avait pas encore remis son rapport sur la mise en œuvre du programme de pays pour 2022 et encouragé le pays à le remettre avant ou à la réunion du Comité exécutif, car la remise ponctuelle des données est un des objectifs du financement de RI.

Recommandation du Secrétariat

5. Le Secrétariat recommande l'approbation globale des demandes de renouvellement des projets de renforcement des institutions pour la Bosnie-Herzégovine, l'Équateur, la Macédoine du Nord et Oman, aux niveaux de financement indiqués dans la section A1 du Tableau 1 du présent document. Le Comité exécutif peut souhaiter transmettre aux gouvernements des pays mentionnés ci-dessus, les observations contenues à l'Annexe II du présent document.

A2 : Préparation de projets pour les plans de gestion de l'élimination des HCFC

Description des projets

6. L'ONUDI, en qualité d'agence d'exécution principale, a présenté une demande pour la préparation de la phase III du PGEH pour l'Albanie, avec le PNUE comme agence d'exécution coopérante. Cette demande figure dans la section A2 du Tableau 1. En tant qu'agence d'exécution coopérante, le PNUE a demandé un montant de 10 000 \$US, plus des coûts d'appui d'agence de 1 300 \$US, dans son programme de travail pour 2023.³

² Décision 91/63 : (b) D'approuver le format révisé des rapports finaux et des demandes de prolongation du financement des projets de renforcement des institutions, et les indicateurs de performance correspondants; et (c) Demander aux pays visés à l'article 5, par l'intermédiaire des agences bilatérales et d'exécution, d'utiliser le format révisé mentionné à l'alinéa (b) ci-dessus pour toutes les demandes de renouvellement des projets de renforcement des institutions à partir de la première réunion du Comité exécutif en 2023.

³ UNEP/OzL.Pro/ExCom/92/18.

7. La soumission incluait : la justification du financement demandé pour la préparation de projet; un rapport périodique sur la mise en œuvre de la phase II du PGEH; et la liste des activités qui seront entreprises durant la préparation du projet, avec les budgets correspondants.

Observations du Secrétariat

8. Lors de l'examen de cette demande, le Secrétariat a tenu compte des lignes directrices sur le financement de la phase II des PGEH pour des pays visés à l'article 5 contenues dans la décision 71/42, du rapport périodique sur la phase II du PGEH incluant l'état de la mise en œuvre des tranches au moment de la préparation du présent document, et de la décision 84/46(e)⁴. Le Secrétariat a constaté que le financement demandé correspond à la décision 71/42 et que la demande se conforme à la décision 82/45 qui permet l'inclusion de demandes de préparation de projet pour la phase III, deux ans avant la date d'achèvement de la phase II du PGEH.

9. L'ONUDI a confirmé que la phase III du PGEH pour l'Albanie éliminera 100 pour cent de la valeur de référence des HCFC d'ici le 1^{er} janvier 2030.

Recommandation du Secrétariat

10. Le Secrétariat recommande l'approbation globale de la préparation de projet pour la phase III du plan de gestion de l'élimination des HCFC pour l'Albanie, au niveau de financement indiqué dans la section A2 du Tableau 1.

A3 : Préparation de projets pour les plans de mise en œuvre de l'Amendement de Kigali sur les HFC

Description des projets

11. L'ONUDI a soumis des demandes pour la préparation de la phase I du KIP pour un pays en tant qu'agence d'exécution désignée, et pour un autre pays en tant qu'agence d'exécution coopérante, avec le PNUE comme agence principale, et pour la préparation d'un projet d'investissement pour un KIP dans le secteur de la fabrication d'équipements de réfrigération dans un pays, tel qu'indiqué dans la section A3 du Tableau 1. Le PNUE, à titre d'agence d'exécution principale pour le Burundi, a demandé un montant de 119 000 \$US, plus des coûts d'appui d'agence de 15 470 \$US, dans son programme de travail pour 2023.⁵

Observations du Secrétariat

12. Lors de l'examen de ces demandes, le Secrétariat a tenu compte des lignes directrices sur la préparation des KIP contenues dans la décision 87/50, des activités proposées pour la préparation de projet et de leur lien avec des activités de facilitation et autres projets reliés aux HFC dans les pays. Le Secrétariat a constaté que l'ONUDI, à titre d'agence d'exécution désignée, a fourni des descriptions des activités requises pour la préparation de la stratégie globale pour la phase I du KIP pour la République bolivarienne du Venezuela. La soumission incluait des données sur la consommation de HFC et de mélanges à base de HFC. Les activités de préparation de projet incluaient une enquête et une collecte de données sur la consommation de HFC à l'échelle du pays; une analyse de l'utilisation des HFC et des produits de remplacement; un examen des politiques et de la législation concernant la réduction progressive des HFC; une analyse du renforcement des capacités nécessaire pour le service des douanes; une évaluation de la capacité de récupération et de destruction dans le pays; l'élaboration d'une stratégie globale de réduction progressive des HFC; des consultations et la validation auprès des parties prenantes; l'élaboration d'un plan de communication et de sensibilisation; une étude sur l'efficacité énergétique des équipements de

⁴ L'inclusion de la phase III des PGEH dans le plan d'activités est autorisée seulement pour les pays dont la phase II a été approuvée et dont les cibles de réduction se situent bien en-deçà des objectifs de conformité de 2025.

⁵ UNEP/OzL.Pro/ExCom/92/18.

réfrigération et de climatisation; et une évaluation de la capacité et des besoins de formation dans le secteur de l'entretien.

13. En ce qui concerne la demande pour la préparation d'un projet d'investissement pour le KIP dans le secteur de la fabrication d'équipements de réfrigération pour le Maroc, l'ONUDI a fourni les informations demandées à l'appui de la demande de financement pour la conversion d'une entreprise (MANAR), du HFC-134a au R-600, dans le secteur de la fabrication nationale d'équipements de réfrigération. L'entreprise a remis également une lettre d'engagement, attestant qu'elle éliminera tous les HFC une fois le projet approuvé et mis en œuvre. Le financement demandé est conforme à la décision 87/50(f)(v) sur la préparation des projets d'investissement/plans sectoriels pour la phase I des KIP. Le Maroc a reçu du financement pour la préparation de la phase I du KIP à la 91^e réunion.

14. Le Secrétariat a pris note que les deux pays pour lesquels l'ONUDI est l'agence d'exécution désignée, ont ratifié l'Amendement de Kigali;⁶ que les pays ont fourni des lettres d'appui indiquant leur intention de prendre des mesures hâties pour la réduction progressive des HFC; et que le financement demandé est conforme à la décision 87/50.

15. Le PNUE, à titre d'agence d'exécution principale pour le Burundi, a fourni une description des activités requises pour la préparation du KIP, avec les coûts correspondants pour chaque activité dans son programme de travail⁷; les observations du Secrétariat y sont incluses également.

Recommandation du Secrétariat

16. Le Secrétariat recommande l'approbation globale de la préparation de projet pour les plans de mise en œuvre de l'Amendement de Kigali sur les HFC (KIP) pour le Burundi et la République bolivarienne du Venezuela ainsi que pour la préparation d'un projet d'investissement pour le KIP du Maroc, aux niveaux de financement indiqués dans la section A3 du tableau 1.

d'un projet d'investissement pour le KIP dans le secteur de la fabrication d'équipements de réfrigération

SECTION B : ACTIVITÉS RECOMMANDÉES POUR EXAMEN INDIVIDUEL

B1 : Assistance technique pour la préparation d'un rapport de vérification de la consommation de HCFC

Description du projet

17. Conformément à la décision 61/46(c)⁸, le Secrétariat a sélectionné un échantillon de 16 pays visés à l'article 5 avec un faible volume de consommation (FVC), afin de vérifier la conformité aux accords contenus dans leurs PGEH. La liste des pays sélectionnés figure au Tableau 5 du document UNEP/OzL.Pro/ExCom/92/13 sur l'Aperçu des questions soulevées pendant l'examen des projets. L'ONUDI, à titre d'agence principale, demande un financement pour la vérification de la phase II du PGEH pour le Niger.

⁶ Maroc (22 avril 2022) et République bolivarienne du Venezuela (5 décembre 2022).

⁷ UNEP/OzL.Pro/ExCom/92/18.

⁸ Le Secrétariat a été chargé de remettre au Comité exécutif, à la première réunion de chaque année, une liste représentant 20 pour cent des pays dont la consommation de base de HCFC est inférieure ou égale à 360 tonnes métriques et dont le PGEH a été approuvé afin que le Comité exécutif puisse approuver le financement en vue de la vérification de la conformité du pays à l'accord du PGEH pour l'année en question.

Observations du Secrétariat

18. Conformément à la proposition du Secrétariat de rationaliser le processus d'approbation du financement de la vérification de la consommation de HCFC pour les pays FVC, telle que décrite dans le document UNEP/OzL.Pro/ExCom/92/13, la demande de financement pour le Niger est incluse dans le présent document.

19. Le Secrétariat a mentionné que le financement demandé correspondait aux fonds approuvés pour des vérifications similaires lors de réunions précédentes et que le rapport de vérification doit être remis au moins 10 semaines avant la réunion du Comité exécutif durant laquelle le financement de la prochaine tranche du PGEH sera demandé.

20. Le Secrétariat a ajouté que la demande dépendra de l'approbation de la liste de pays sélectionnés pour la vérification de la conformité, contenue dans le document UNEP/OzL.Pro/ExCom/92/13.

Recommandation du Secrétariat

21. Dans l'esprit de la discussion sur la vérification de la conformité des pays à faible volume de consommation sélectionnés avec les Accords de leur plan de gestion de l'élimination des HCFC au point 9 (a) de l'ordre du jour, Aperçu des questions soulevées durant l'examen des projets, le Comité exécutif pourrait envisager l'approbation de la préparation du rapport de vérification pour la phase II du plan de gestion de l'élimination des HCFC pour le Niger, au montant de 30 000 \$US, plus des coûts d'appui d'agence de 2 700 \$US, étant entendu que le rapport de vérification doit être remis au moins 10 semaines avant la réunion du Comité exécutif durant laquelle le financement de la prochaine tranche du PGEH sera demandé.

B2 : Préparation de projet pour les plans de mise en œuvre de l'Amendement de Kigali sur les HFC

Description des projets

22. L'ONUDI a présenté une demande pour la préparation de la phase I du KIP pour un pays, à titre d'agence d'exécution principale, avec le PNUE comme agence d'exécution coopérante, tel qu'indiqué dans la section B2 du Tableau 1. Le PNUE, à titre d'agence coopérante pour le Guatemala, a demandé 51 000 \$US, plus des coûts d'appui d'agence de 6 630 \$US, dans son programme de travail pour 2023.⁹

23. La soumission incluait des données sur la consommation de HFC et de mélanges à base de HFC pour la période de 2019 à 2021 et des descriptions des activités requises pour la préparation de la stratégie globale pour la phase I du KIP pour le Guatemala. Les activités de préparation de projet incluaient une enquête et la collecte de données sur la consommation de HFC à l'échelle du pays; une analyse de l'utilisation des HFC et des produits de remplacement; un examen des politiques et de la législation concernant la réduction progressive des HFC; une analyse du renforcement des capacités nécessaire pour le service des douanes; une évaluation de la capacité de récupération et de destruction dans le pays; l'élaboration d'une stratégie globale de réduction progressive des HFC; des consultations et la validation auprès des parties prenantes; l'élaboration d'un plan de communication et de sensibilisation; une étude sur l'efficacité énergétique des équipements de réfrigération et de climatisation; et un examen des normes et des codes de sécurité pour les produits de remplacement inflammables et toxiques.

24. L'ONUDI a soumis cette demande en prenant note que le gouvernement du Guatemala avait approuvé la ratification de l'Amendement de Kigali mais les instruments de la ratification n'avaient pas encore été déposés au Secrétariat des Nations Unies.

⁹ UNEP/OzL.Pro/ExCom/92/18.

Observations du Secrétariat

25. Lors de l'examen de cette demande, le Secrétariat a tenu compte des lignes directrices sur la préparation des KIP contenues dans la décision 87/50, des activités proposées pour la préparation de projet et de leur lien avec des activités de facilitation et autres projets reliés aux HFC dans le pays. Le Secrétariat a pris note que l'ONUDI, à titre d'agence d'exécution principale, a décrit les activités requises pour la préparation de la stratégie globale à l'aide du format prévu pour les demandes de préparation de projet pour un KIP et que le pays avait remis une lettre d'appui, signifiant son intention de prendre des mesures hâtives pour la réduction progressive des HFC; et que le financement demandé est conforme à la décision 87/50.

26. Le Secrétariat a pris note également que le gouvernement du Guatemala, tout en ayant approuvé la ratification de l'Amendement de Kigali, était en train de finaliser le processus interne d'approbation pour le dépôt des instruments de ratification au Secrétariat des Nations Unies, ce qui devrait être terminé avant ou au moment de la réunion du Comité exécutif.

27. Le Secrétariat a indiqué que la ratification de l'Amendement de Kigali est une condition préalable à l'examen du financement pour la préparation d'un KIP et informé l'ONUDI du fait que la demande est incluse pour examen individuel, étant entendu que le processus de ratification sera achevé avant la réunion du Comité exécutif ; toutefois si l'instrument de ratification n'était pas déposé d'ici la réunion, la demande serait retirée et soumise à la prochaine réunion. L'ONUDI a accepté cette approche et assuré que le processus de ratification serait finalisé d'ici là.

Recommandation

28. Le Comité exécutif pourrait envisager l'approbation de la préparation de projet pour le plan de mise en œuvre de l'Amendement de Kigali sur les HFC pour le Guatemala, au montant de 119 000 \$US, plus des coûts d'appui d'agence de 8 330 \$US, à condition que l'instrument officiel de ratification ait été déposé et reçu au Secrétariat des Nations Unies, signifiant ainsi la ratification de l'Amendement de Kigali par le pays.

1. Summary of activities and funds approved by the Executive Committee:

| Summary of activities | Funds approved (US \$) |
|--|-----------------------------------|
| (a) Investment projects: | 3,496,799 |
| (b) Institutional strengthening: | 735,384 |
| (c) Project preparation, technical assistance, training and other non-investment projects: | 864,600 |
| | Total: 5,096,783 |
| (d) HFC activities funded from additional voluntary contributions | 95,000 |

Progress report

2. During phase VII of the institutional strengthening (IS) project, the national ozone unit (NOU) of Bosnia and Herzegovina continued to be an active member of the Regional Montreal Protocol Network for Europe and Central Asia (ECA). The NOU continued to implement activities under stages I and II of the HCFC phase-out management plan (HPMP) and prepared the HFC outlook. The legislation for the control of HCFCs approved by the Council of Ministers, including the HCFC quota system, permits for HFCs and

the ban on HCFC-based equipment, were enforced by the NOU in cooperation with the Indirect Taxation Authority of Bosnia and Herzegovina. HFC import permits were established prior to ratification of the Kigali Amendment. The Government of Bosnia and Herzegovina took steps to include consideration of the Kigali Amendment as an activity in the bi-annual work plan of Council of Ministers and as a result the procedure for the ratification of Kigali Amendment was finalised on 26 May 2021 and was only multi-lateral agreement ratified by the country in the last six years. Of the seven IS objectives, five were achieved and two were partially achieved due to HPMP delays caused by the COVID 19 pandemic (objective 3, and no collection of gender data or incorporation of gender competencies vis-à-vis staff recruitment (objective 7).

Plan of action

3. Under phase VIII, the NOU is committed to build national capacity and enhance regulatory efforts to achieve compliance with upcoming HCFCs consumption phase-out target. The NOU will be responsible for: monitoring the promulgation and enforcement of policy and legislation focussing on the additional restrictions on HCFCs; cooperation with the customs sector to prevent illegal trade in controlled substances; and cooperating with the refrigeration and air-conditioning equipment (RAC) Association. The NOU will continue implementation of stage II of the HPMP, upgrade the HFC outlook model, prepare the project proposal for the Kigali HFC implementation plan (KIP); continue awareness activities and attendance and regional and international meetings. The NOU will also continue cooperation with climate authorities on inclusion of F-gases in the Nationally determined contributions and will continue cooperation the authorities responsible for safety standards and energy efficiency. Gender mainstreaming will be integrated into implementation of the next phase of the IS project.

Sustainability and risk assessment

4. The NOU reported that the implementation of the IS project had been supported through timely and efficient UNIDO support and timely disbursement of funds. With regard to sustainability, the NOU of Bosnia and Herzegovina was established in 2000 and has a reputation in the country as the best model for coordination of implementation of a multilateral environmental agreement. The main risk for the IS project is that procedures for consultations and adoption of plans have to take into account the complex administrative structure in the country. UNIDO support, including high level missions to the country, can mitigate the risk.

Ecuador: Renewal of institutional strengthening

| Summary of the project and country profile | | |
|--|-------------------|-----------|
| Implementing agency: | | UNIDO |
| Amounts previously approved for institutional strengthening (US \$): | | |
| Phase I | Mar-93 | 204,000 |
| Phase II: | Jul-99 | 97,300 |
| Phase III: | Apr-04 | 176,800 |

| ODS to be phased out (as at December 2022) (ODP tonnes): | 842.0 |
| ODS phased out (as at December 2021) (ODP tonnes): | 690.9 |

* Funds for phase VII approved at the 83rd meeting were transferred from UNEP to UNIDO at the 87th meeting as per the change of implementing agency (decision 87/21(e)).

5. Summary of activities and funds approved by the Executive Committee:

| Summary of activities | Funds approved (US \$) |
|--|-----------------------------------|
| (a) Investment projects: | 7,612,662 |
| (b) Institutional strengthening: | 1,510,616 |
| (c) Project preparation, technical assistance, training and other non-investment projects: | 3,131,187 |
| | Total: 12,254,465 |
| (d) HFC activities funded from additional voluntary contributions | 180,000 |

Progress report

6. During phase VII of the IS project, which had been transferred to UNIDO in November 2020, the NOU worked to achieve broad consensus on the revised legislation for controlled substances. An operational import/export licensing system for controlled substances in place including a quota system for HCFCs. Country programme and Article 7 data were submitted to the Fund and Ozone Secretariats, respectively, in a timely manner. Other NOU activities included: completion of the enabling activities for HFC phase-down; coordination of activities under stage I and stage II of the HPMP; training sessions for customs to combat illegal ODS trade; consultations with stakeholders; public awareness activities including celebration of International Ozone Day; and active participation in regional network and Montreal Protocol meetings. Of the seven IS objectives, five were achieved and two were partially achieved because the system to register equipment containing controlled substances is not yet operational (objective 1), and as no reports on gender issues were prepared (objective 7).

Plan of action

7. In phase VIII, the NOU of Ecuador will continue implementing stage II of the HPMP and submit the KIP to meet the HCFC phase out and HFC phase-down targets while ensuring gender mainstreaming during their implementation. In addition, the NOU will: continue strengthening the legislation for controlled substances to fulfil the requirements of stage II of the HPMP and the Kigali Amendment; develop national capacity to implement the provisions of the Kigali Amendment; strictly monitor and control imports and use of HCFCs and HFCs; facilitate access to and use of new alternative substances and technologies; and, continue public awareness activities especially within the education sector and with a gender focus during World Refrigeration Day and International Ozone Day celebrations as well as other national events.

Sustainability and risk assessment

8. The IS project for Ecuador is implemented with a high level of government support, timely and efficient UNIDO support and timely disbursement of funds. The NOU works in close collaboration with all stakeholders to ensure the sustainability of Montreal Protocol activities and the incorporation of the gender perspective. Changes in government administration can jeopardize the achievement of the IS objectives; however, when there is a change of government administration, a presentation is made on the country's commitments to the Montreal Protocol and the role that each of the departments plays in the project implementation.

North Macedonia: Renewal of institutional strengthening

| Summary of the project and country profile | | |
|--|--------|-----------|
| Implementing agency: | | UNIDO |
| Amounts previously approved for institutional strengthening (US \$): | | |
| Phase I: | Oct-96 | 152,900 |
| Phase II: | Mar-00 | 101,950 |
| Phase III: | Dec-01 | 101,950 |
| Phase IV: | Apr-04 | 132,347 |
| Phase V: | Apr-06 | 132,347 |
| Phase VI: | Apr-09 | 132,347 |
| Phase VII: | Nov-21 | 169,404 |

| ODS phased out (as at December 2021) (ODP tonnes): | | 576.49 |

9. Summary of activities and funds approved by the Executive Committee:

| Summary of activities | Funds approved (US \$) |
|--|-----------------------------------|
| (a) Investment projects: | 4,637,328 |
| (b) Institutional strengthening: | 923,245 |
| (c) Project preparation, technical assistance, training and other non-investment projects: | 1,246,824 |
| Total: | 6,807,397 |
| (d) HFC activities funded from additional voluntary contributions | 95,000 |

Progress report

10. Phase VII of the IS project supported the NOU to coordinate activities for phasing out/phasing down controlled substances thus allowing the Government of North Macedonia to successfully implement the Montreal Protocol. During phase VII the following activities were carried out: finalization of the certification scheme and regulatory framework for HFC phase-down; and daily monitoring of the trade in controlled substances through the issuance of permits for HCFC-22 and HFC imports; and combating illegal trade and seizures of illegal ODS imports; and active participation in regional network and Montreal Protocol meetings. Public awareness activities included a booklet for Customs on the control and monitoring of controlled substances, and distribution of information materials and a presentation at the International HVAC/R Conference in 2022. Steps were taken to incorporate gender policy in planning awareness activities and the procurement procedure for the upgrade of the website was initiated. North Macedonia implemented the iPIC procedure and was awarded with Europe and Central Asia Montreal Protocol award for customs and enforcement officers. Of the seven IS objectives, six were achieved and one was partially achieved as some information materials had not been prepared/disseminated as planned due as the celebration of International Ozone Day was cancelled due to COVID-19 restrictions (objective 5).

Plan of action

11. Under phase VIII, the NOU's activities will include drafting and implementation of regulations related to the HFC phase-down and raising awareness of importers and the RAC sector to the HCFC and HFC quota system. In addition, the establishment of sustainable certification system and the incorporation of HFCs into the recovery, recycling and leak check system will support ODS phase-out and HFC phase-down. The NOU will continue to coordinate the recording and labelling of RAC equipment; monitoring of the recovery and recycling scheme; import/export controls; strengthening the cooperation and coordination between stakeholders and facilitating their active participation controlled substances trade chain; coordination and implementation of the HPMP ensuring synergies with the development of the KIP; country programme and Article 7 data reporting; active participation in regional network and Montreal Protocol meetings; and public awareness and communication activities, including celebration of International Ozone Day. Gender policy will be taken into account in all IS activities.

Sustainability and risk assessment

12. The NOU reported that IS activities had been implemented successfully for several years and that high-level government support, support from UNIDO as implementing agency, and timely disbursement of funds were all factors contributing to the achievement of IS objectives. The IS project is a core activity that sustains the successful implementation of other Montreal Protocol projects. No problems or risks were identified in terms of IS implementation though public awareness activities, including live events and the preparation and dissemination of information materials, had been negatively impacted by the Covid-19 pandemic.

Oman: Renewal of institutional strengthening

| Summary of the project and country profile | | |

13. Summary of activities and funds approved by the Executive Committee:

| Summary of activities | Funds approved (US \$) |
|--|-----------------------------------|
| (a) Investment projects: | 1,444,464 |
| (b) Institutional strengthening: | 596,611 |
| (c) Project preparation, technical assistance, training and other non-investment projects: | 1,854,064* |
| | Total: 3,895,139 |
| (d) HFC activities funded from additional voluntary contributions | 0 |

* Includes US \$150,000 for HFC enabling activities

Progress report

14. During phase VIII of the IS project, the NOU of Oman was transferred from the Civil Aviation Authority to the Environment Authority of the General Directorate for Climate. Activities under the current phase included: strict monitoring of HCFC trade through the ODS regulatory framework and allocation of quotas; strengthening cooperation with the customs authorities; training customs officers on the prevention of illegal ODS trade; development of the national RAC certification programme; preparatory work towards ratification of the Kigali Amendment; collaboration and sharing information with the industry associations; coordination of activities under stage II of the HPMP; public awareness including celebration of

International Ozone Day; and active participation in regional network and Montreal Protocol meetings. The NOU also consulted with stakeholders on the ban on the use and import of refrigerants in disposable cylinders. Of the seven objectives, four were achieved and two were partly achieved as the Kigali Amendment had not yet been ratified (objective 1), and the country could not attend all Montreal Protocol meetings due to COVID-19 pandemic restrictions (objective 6); there were no gender mainstreaming activities (objective 7) in the phase VIII work plan.

Plan of action

15. During phase IX the NOU's priority will be for Oman to achieve the reduction targets under stage III of the HPMP. Activities planned include country programme implementation and Article 7 data reporting; continued monitoring the licensing system and quota allocations against the records of customs to maintain full control over the HCFC imports; implementation of activities under stage II of the HPMP; continued cooperation with custom authorities and industry associations; facilitation of the ratification process of the Kigali Amendment; development of the RAC certification programme; facilitating the introduction of hydrocarbons in cooperation with industries and other relevant institutions; public awareness and attendance at regional network and Montreal Protocol meetings. Gender mainstreaming will be ensured in all Montreal Protocol project activities.

Sustainability and risk assessment

16. The NOU was relocated to the Environment Authority and is now well positioned under the Oman Governance structure with clear roles and responsibilities. The current legislation ensures that the NOU can conduct its responsibilities while strengthening the capacity of the NOU team. To ensure sustainability, the NOU is coordinating the activities with other government bodies and the private sector to assist the NOU to make informed and coordinated decisions, thus avoiding any potential risks.

Annexe II

PROJET DE POINTS DE VUE DU COMITÉ EXÉCUTIF SUR LE RENOUVELLEMENT DES PROJETS DE RENFORCEMENT DES INSTITUTIONS SOUMIS À LA 92^E RÉUNION

Bosnie-Herzégovine

1. Le Comité exécutif a examiné le rapport présenté avec la demande de renouvellement du projet de renforcement des institutions pour la Bosnie-Herzégovine (phase VIII) et noté avec gratitude que le gouvernement de Bosnie-Herzégovine avait transmis les données du programme de pays au Secrétariat du Fonds et les données exigées en vertu de l'article 7 au Secrétariat de l'ozone, indiquant que le pays était en conformité avec le Protocole de Montréal. Le Comité a pris note également avec gratitude de la ratification de l'Amendement de Kigali par la Bosnie Herzégovine, le 26 novembre 2021. Le Comité exécutif apprécie les efforts de la Bosnie Herzégovine et il a bon espoir qu'au cours des trois prochaines années, le pays poursuivra la mise en œuvre des activités incluses dans la phase II du plan de gestion de l'élimination des HCFC et dans la préparation du plan de mise en œuvre de l'Amendement de Kigali, en tenant compte de la politique d'égalité des sexes, afin de permettre au pays de se conformer aux cibles du Protocole de Montréal.

Équateur

2. Le Comité exécutif a examiné le rapport présenté avec la demande de renouvellement du projet de renforcement des institutions pour l'Équateur (phase VIII) et noté avec gratitude que le gouvernement de l'Équateur avait transmis les données du programme de pays au Secrétariat du Fonds et les données exigées en vertu de l'article 7 au Secrétariat de l'ozone, indiquant que le pays était en conformité avec le Protocole de Montréal. Le Comité a pris note également de la mise en place d'un système opérationnel d'octroi de permis d'importation/d'exportation pour les substances réglementées, incluant un système de quotas pour les HCFC et les HFC. Le pays a formé les techniciens en réfrigération sur les bonnes pratiques en réfrigération et la manipulation sécuritaire des substances de remplacement, obtenu le soutien des parties prenantes et s'engage à adopter les normes de sécurité pertinentes et à sensibiliser davantage le public. Le Comité apprécie les efforts du gouvernement de l'Équateur et il a donc bon espoir qu'au cours des trois prochaines années, le pays poursuivra avec succès la coordination avec d'autres agences et parties prenantes nationales pour mettre en œuvre des politiques, des règlements et des activités, intégrer la politique d'égalité des sexes, maintenir l'élimination des SAO et faciliter la réduction progressive des HFC, afin de permettre au pays de se conformer aux cibles du Protocole de Montréal.

Macédoine du Nord

3. Le Comité exécutif a examiné le rapport présenté avec la demande de renouvellement du projet de renforcement des institutions pour la Macédoine du Nord (phase VIII) et noté avec gratitude que le gouvernement de la Macédoine du Nord avait transmis les données du programme de pays au Secrétariat du Fonds et les données exigées en vertu de l'article 7 au Secrétariat de l'ozone, indiquant que le pays était en conformité avec le Protocole de Montréal. Le Comité a pris note également des mesures prises par le pays pour éliminer la consommation de HCFC et préparer la réduction progressive des HFC, incluant la surveillance stricte du commerce de HCFC et de HFC à travers un cadre réglementaire et l'allocation de quotas pour les HCFC et le maintien d'une coopération étroite entre l'administration douanière et les inspecteurs nationaux de l'environnement afin de renforcer l'efficacité de la législation sur les substances réglementées. Le Comité apprécie les efforts du gouvernement de la Macédoine du Nord pour la mise en œuvre des phases I et II du plan de gestion de l'élimination des HCFC et la préparation de projet pour la mise en œuvre du plan de Kigali sur les HFC et la sensibilisation du public, incluant la politique d'égalité des sexes du Fonds multilatéral. Le Comité a donc bon espoir qu'au cours des trois prochaines années le gouvernement de la Macédoine du Nord poursuivra la mise en œuvre des activités pour permettre au pays de se conformer aux cibles du Protocole de Montréal.

Oman

4. Le Comité exécutif a examiné le rapport présenté avec la demande de renouvellement du projet de renforcement des institutions pour Oman (phase IX) et noté avec gratitude que le gouvernement d'Oman avait transmis les données du programme de pays au Secrétariat du Fonds et les données exigées en vertu de l'article 7 au Secrétariat de l'ozone, indiquant que le pays était en conformité avec le Protocole de Montréal. Le Comité a pris note également des mesures prises par le pays afin de poursuivre l'élimination de la consommation de HCFC, y compris la surveillance stricte du commerce des HCFC à travers un cadre réglementaire sur les SAO et l'allocation de quotas ainsi que l'amélioration continue de la base de données électronique. Le Comité a pris note également de l'étroite collaboration que l'Unité de l'ozone maintient avec l'administration douanière afin d'exploiter le système de permis électronique. Le Comité a donc bon espoir qu'au cours des trois prochaines le gouvernement d'Oman progressera vers la ratification de l'Amendement de Kigali et poursuivra la mise en œuvre des activités dans le cadre de la phase III du plan de gestion de l'élimination des HCFC pour permettre au pays de se conformer aux cibles du Protocole de Montréal.

UNITED NATIONS
INDUSTRIAL DEVELOPMENT ORGANIZATION

UNIDO WORK PROGRAMME

Presented to the 92nd Meeting of the Executive Committee of the Multilateral Fund

Introduction

The UNIDO Work Programme (WP) for the consideration of the 92nd Meeting of the Executive Committee (ExCom) of the Multilateral Fund (MLF) has been prepared following the Government requests as well as based on ongoing and planned activities. The Work Programme will support the implementation of UNIDO's three year Rolling Business Plan 2023-2025.

The 92nd UNIDO WP is addressing preparatory assistance, institutional strengthening requests and request for verification report.

Preparatory assistance is submitted for the 92nd Executive Committee Meeting consideration for Albania to enable the country to overview and update data necessary for the launch and implementation of HPMP Stage III.

UNIDO is submitting preparatory assistance for HFC phase-down plans for Burundi, Guatemala, Morocco and Venezuela (Bolivarian Republic of) to assist the countries with the implementation of the next phases of the Kigali Amendment to the Montreal Protocol.

Institutional strengthening extension requests are submitted based on the countries' requests for Bosnia and Herzegovina, Ecuador, North Macedonia and Sultanate of Oman.

The UNIDO Work Programme for the consideration of the 92nd ExCom Meeting comprises the following sections:

- **Section 1:** Consolidated list of activities foreseen for the above requests by project types and country; and
- **Section 2:** Project concepts indicating details and funding requirements.

Funding is requested as follows:

- Preparatory assistance funding for HPMP Stage III for Albania amounting to US\$ 21,400 (including US\$ 1,400 representing 7.0 % agency support costs);
- Preparatory assistance funding for HFC phase-down plans in Burundi¹, Guatemala, Morocco and Venezuela (Bolivarian Republic of) amounting to US\$ 449,400 (including US\$ 29,400 representing 7.0% agency support costs);
- Institutional strengthening project amounting to US\$ 1,340,841 (including US\$ 87,719 representing 7.0 % agency support costs); and
- Verification Report funding amounting to US\$ 32,700 (including US\$ 2,700 representing 9.0 % A.S.C.).

Total: US\$ 1,844,341 (including US\$ 121,219 agency support cost).

¹ The Project Concept for Burundi is included in the Lead Agency (UNEP) Work Programme.

| Item | Yes | No |
|---|---|-------------------------------------|
| 1. Official endorsement letter from Government specifying roles of respective agencies (where more than one IA is involved) | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 2. Written confirmation – balances from previous PRP funding approved for stage II HPMP had been returned / will be returned (Decision 71/42(i)) | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| • Specify meeting at which PRP funding balance had been returned/will be returned | PRP funding for stage II had been fully used. | |

A. Information required to support PRP funding (Overarching strategy)

| | | | | | |
|---|---|---|-------------|--|--|
| 1. Montreal Protocol compliance target to be met in <input type="checkbox"/> stage II / <input checked="" type="checkbox"/> stage III of the HPMP | | | | | |
| Phase-out commitment (%) | 100% | Year of commitment | 2030 | | |
| <input checked="" type="checkbox"/> Servicing only | <input type="checkbox"/> Manufacturing only | <input type="checkbox"/> Servicing and manufacturing only | | | |
| 2. Brief background on previous stage of the HPMP (i.e., when the HPMP was approved; a description of the progress in implementation of the previous stage of the HPMP to demonstrate that substantial progress had been made) | | | | | |
| <p>The HCFC Phase-Out Management Plan (HPMP) stage I for the Republic of Albania was approved at the 64th Meeting of the Executive Committee of the Multilateral Fund for the Implementation of the Montreal Protocol held in Montreal, Canada from 25 to 29 July 2011. Albania was committed to reducing the consumption of HCFCs by 35% from the calculated baseline by year 2020.</p> <p>The First stage of (HPMP) covered the freeze of HCFC-s consumption in 2013 (baseline level is average annual consumption in 2009 – 2010), 10% reduction of HCFC-s consumption by 2015 and 35% reduction by 2020.</p> <p>The activities for this stage were implemented through the following:</p> | | | | | |

- Policy instruments: bans of import, import quota system, mandatory reporting by importers and exporters, environmental taxes for import of ozone depleting substances (ODS) and ODS containing equipment.
- Projects: training of involved stakeholders, Improvement of Refrigerant Recovery and Recycling scheme, and establishment of the Waste Disposal Centre.
- Institutional strengthening: preparation and implementation of policy instruments, preparation of project proposals, implementation of approved projects, awareness raising, etc.

The Second stage of the HPMP for Albania started in 2021. It targets the reduction by 67.5% in HCFC consumption below the baseline of 6.0 ODP tonnes in 2025. In particular, Stage II aims at further strengthening the implementation and enforcement capacities of national institutional and legal framework for the implementation of the Montreal Protocol.

Table 1: HPMP Compliance Goals

| Substance | Anne x | Group | Starting point for aggregate reductions in consumption (ODP tonnes) | Total phase-out to be achieved under Stage I (ODP tonnes) | Remaining HCFC consumption after Stage I (ODP tonnes) | Total phase-out to be achieved under Stage II (ODP tonnes) |
|--------------|----------|----------|---|---|---|--|
| HCFC-22 | C | I | 6.0 | 2.1 | 3.9 | 1.95 |
| Total | C | I | 6.0 | 2.1 | 3.9 | 1.95 |

The following activities are therefore tackled:

- Legislation and policies
- Recovery, recycling and reclamation assessment and business planning including awareness raising among potential female technicians.
- Training of customs officers for enforcement and technicians at the vocational training centers
- Training for maintenance service technicians for large end users such as commercial and industrial refrigeration and chillers

More precisely, below is an overview of the work currently in progress under Tranches 1 and 2.

3. Current progress in implementation of previous stage of the HPMP

HPMP Stage II Tranche I

| Activity | Description | Implementing agency |
|---|---|---------------------|
| ODS legislations and policies | <ul style="list-style-type: none"> • On 22.06.2022 the Law on F-gases was approved by DCM No. 432 and was sent along to the National Parliament for final approval. • The Government of Albania has already issued HCFC import quotas for 2022, 2023 and 2024 in accordance with the Montreal Protocol control targets. | UNIDO |
| Recovery, recycling, and reclamation assessment and business planning including | <ul style="list-style-type: none"> • Training of technicians took place at 9 vocational schools. | UNIDO |

| | | |
|---|---|-------|
| awareness raising for potential female technician candidates | <ul style="list-style-type: none"> Obtained training workshop reports including session end test results of the participants and participant lists. Addressing recovery, recycling, and reclamation. With regard to the disposal of unwanted ODS, Albania has legislation in force on the disposal of controlled substances under the Montreal Protocol, and of products and equipment containing or relying on such substances. | |
| Training for maintenance service technicians for large end users such as commercial and industrial refrigeration and chillers | <ul style="list-style-type: none"> Review and revision of training materials by a working group. Consulting stakeholders to develop the best approach and an equipment inventory will be developed. Designing training programme; and identifying an expert familiar with the sub-sector to assist the country with implementation of the activity. | UNIDO |
| Capacity building activities related to enforcement and RAC sector activities | <ul style="list-style-type: none"> Produced a series of RAC related information / training materials covering ozone layer protection, Kigali Amendment, Covid-19, energy-efficiency, safety standards and leakage control Updated training materials for customs / enforcement officers. Organized 4 training workshops for RAC technicians Organized 2 training workshops for customs / enforcement officers and environmental inspectors Montreal Protocol topics have been integrated into the regular and mandatory training curriculum for the customs officers. Customs training is delivered by a team of experts including the Head of Anti-traffic Department and Focal Point of Customs for the Montreal Protocol of the General Directorate of Customs, NOU staff and RAC-sector experts to cover various aspects of the capacity development of customs officers. Instead of sending an expert trainer for training abroad, international trainers will train and certify 12-15 local trainers in Tirana in June 2023. | UNEP |

| HPMP Stage II Tranche II | | |
|--|---|----------------------------|
| Activity | Description | Implementing Agency |
| Training for maintenance service technicians for large end users such as commercial and industrial | <ul style="list-style-type: none"> Two female consultants have been recruited The approach to larger equipment in the country is being formulated | UNIDO |

| | | |
|---|--|------|
| refrigeration and chillers | | |
| Capacity building activities related to enforcement and RAC sector activities | • Albania HPMP stage II tranche 2 has been approved by ExCom 91 in December 2022. Contractual arrangements have been prepared. | UNEP |

4. Overview of current HCFC consumption in metric tonnes by substance (last three years)

| Substance | Sector | 2018 | 2019 | 2020 | 2021 |
|-----------|---------------|--------|--------|--------|--------|
| HCFC-22 | RAC servicing | 72.257 | 61.975 | 70.734 | 36.638 |

5. Based on the consumption data given above, please provide a description of the sector/sub-sector that use HCFCs in the country, including a short analysis and explanation of the consumption trends (i.e., increasing or decreasing)

It is worth mentioning that there is no production of HCFCs and other ODS alternatives in Albania, so the data and trends depict here refer to import exclusively. During the year 2021 there was no illegal cases of controlled substances import.

Hydrochlorofluorocarbons (HCFCs) are widely used in the refrigeration and air-conditioning servicing sector, which is largest consumer of HCFCs in Albania with 78.4 % of the total HCFCs used. The chiller sub-sector is the most commonly widespread within the country comprising 45.8 % of the HCFC consumptions. The air-conditioning sub-sector, the second most commonly used within the country, accounts for 32.6 % of the HCFC consumption. The industrial sub-sector is the third most commonly used within the country, comprising 16.4 % of the HCFC consumption. Lastly, the commercial refrigeration sub-sector is the fourth sector, comprising 4.3 % of the HCFC consumption.

The consumption of HCFCs has been declining due to the implementation of the HPMP and an increase in the import of non HCFC-based refrigeration equipment. Indeed, based on the consumption data reported by Albania in 2021, the country is experiencing a reduced demand of HCFCs, which is increasingly being replaced in the local market by HFCs and other alternatives.

The refrigeration and air-conditioning sector is the primary sector that uses ODS alternatives in Albania. Regarding the refrigeration sector, the domestic and commercial refrigeration, mobile air-conditioning and chillers are increasingly developing in Albania. Furthermore, the air conditioning sector has increased significantly in the recent years. It is worth singling out in this sector the small and split air-conditioning, due to its massive use in the country. Table below represents the most commonly used ODS alternatives in the sector at present:

Table 2: Most commonly used ODS alternatives by RAC sector

| Chemical* | GWP ¹ | Sectors | |
|---------------------|------------------|---------|--|
| | | RAC | |
| HFC-22 | 1,810 | X | |
| HFC-134A | 1,430 | X | |
| HFC-152a | 124 | | |
| HFC-227ea | 3,220 | | |
| R-32 | 675 | X | |
| R-407C | 1,774 | X | |
| R-410A | 2,088 | X | |
| R-404A | 3,922 | X | |
| R-507A | 2,465 | X | |
| R-1234yf | <1 | X | |
| R-600a | 20 | X | |
| R-290 | 5 | X | |
| R40 (R51/53) | | | |

6. Description of information that needs to be gathered and updated. Explain why this has not been undertaken during preparation for the previous stage of the HPMP.

| Information needed | Description | Agency |
|--|---|--------|
| Updated data on HCFC consumption in servicing sector | Collection, verification, and validation of HCFC consumption through survey of Government departments, traders, distributors, importers, and manufacturers to assess the distribution of HCFC consumption (update previous data collection) | UNIDO |
| New information on ODS regulations | identification of gaps and required enforcement of the regulations and by-laws to be enhanced | UNEP |

7. Activities to be undertaken for project preparation and funding

| Activity | Indicative funding (US \$) | Agency |
|---|----------------------------|--------|
| Coordinating Stage III PRP activities with activities related to Kigali Amendment Implementation Plan PRP | 2,000 | UNIDO |
| Data Collection and Surveys | 6,000 | UNIDO |
| Develop a plan for implementation of the servicing related activities to be integrated in the overall strategy. | 2,000 | UNIDO |
| Evaluate the climate co-benefits. | 1,000 | UNIDO |
| Awareness activities : Stakeholder consultations and steering committee meetings for the organization of a workshop to inform the public and private sectors, and promote Albania's commitment in the framework of Montreal Protocol and Kigali Amendment, related policy and regulatory framework, and progress to date in phasing out HCFCs and phasing down HFCs | 4,000 | UNIDO |
| Preparing document | 5,000 | UNIDO |
| Policies and legislations: Gap analysis, need for new or amended legislation and policies. | 2,000 | UNEP |
| Enforcement related | 2,000 | UNEP |

| | | |
|---|---------------|------|
| capacity building: Training needs assessment for customs / enforcement officers, environmental inspectors and trainers, need for updated training materials / curricula, need for training of trainers, gender considerations, sustainability. | | |
| RAC servicing sector related capacity building: Training needs assessment for RAC technicians and trainers, need for updated training materials / curricula, need for training of trainers, gender considerations, sustainability. | 2,000 | UNEP |
| Outreach and awareness campaign: Need and impact analysis for technology awareness and general public awareness | 3,000 | UNEP |
| Preparing document | 1,000 | UNEP |
| TOTAL | 30,000 | |
| 8. How will activities related to implementation of the Kigali Amendment to phase down HFCs be considered during project preparation for stage III of the HPMP? | | |
| The Government of Albania is currently preparing the Kigali HFC implementation plan (KIP) and designing the required interventions for compliance with the HFCs phase-down targets. Albania's KIP is expected to be submitted to ExCom 93 in December 2023. Albania's HPMP stage III and KIP activities will be implemented in parallel, and to the extent possible, certain activities e.g. training activities will be co-founded and delivered in an integrated manner. The overarching strategy will be based on strengthening the implementation of the existing quota and licensing system and technical capacity building of trainers and technicians, to support appropriate technology choices. The Government will promote the use of zero-ODP and zero-GWP refrigerants. | | |
| How will the Multilateral Fund gender policy be considered during project preparation? | | |
| Under previous stages of the HPMP women's attendance at training workshops was promoted and efforts were provided in raising awareness on the need for gender-friendly work environments. This work will continue under stage III of the HPMP. The Fund Secretariat's operational policy on gender mainstreaming will be applied. | | |

PROJECT CONCEPT – Guatemala

**Multilateral Fund FOR THE
IMPLEMENTATION OF THE MONTREAL PROTOCOL
KIGALI-hfc IMPLEMENTATION PLAN (KIP) project preparation (PRP)
Kigali HFC Phase Down plan (Overarching strategy)**

Part I: Project information

|---|---------------------------------|-----------------------------------|
| Country: | Guatemala | |
| Lead implementing agency: | UNIDO | |
| Cooperating agency (1): | UNEP | Click or tap here to enter text. |
| Implementation period for stage I of the KIP: | 2024-2029 | |
| Duration of PRP implementation (i.e., time (in months) from the approval of PRP to submission of the KIP (please specify): 24 months | | |
| Funding requested: | | |
| Agency | Sector | Funding requested (US \$)* |
| UNIDO | Overarching | 119,000 |
| UNEP | Overarching | 51,000 |

*Details should be consistent with information provided in the relevant sections below.

Part II: Prerequisites for submission

| Item | Yes | No |
|--|-------------------------------------|--------------------------|
| Official endorsement letter from Government, indicating the specifying roles of respective agencies (where more than one IA is involved) | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

A. Information required for PRP funding request for the overarching strategy of the KIP

| | | | |
|--|----------------------|---|--|
| 1. Montreal Protocol compliance target to be met in <input checked="" type="checkbox"/> stage I of the KIP | | | |
| Phase-out commitment (%) | 10% reduction | Year of commitment | 2029 |
| <input checked="" type="checkbox"/> Servicing only | | <input type="checkbox"/> Manufacturing only | <input type="checkbox"/> Servicing and manufacturing |
| 2. Brief background/description/information on approved relevant projects and multi-year agreements as follows: | | | |
| <ul style="list-style-type: none"> • The current progress in implementation of any funded HFC-related project (enabling activities or stand-alone HFC investment projects) • The current progress in ongoing HCFC phase-out management plan (HPMPs) • Consideration of integrating HFC phase-down activities with HPMP activities considering previously approved HFC-related projects, if this information is available. | | | |
| The current progress in implementation of any funded HFC-related project (enabling activities or stand-alone HFC investment projects) | | | |
| <p>In response to Decision 79/46 of the Executive Committee on guidelines for Enabling Activities for HFC Phase down, the Government of Guatemala submitted a proposal to the 80th Executive Committee meeting of the Multilateral Fund (MLF) for the Implementation of Montreal Protocol. The Executive Committee approved the project for Guatemala's Enabling Activities for HFC Phase Down, to facilitate early ratification of the Kigali Amendment and undertake activities to meet the initial obligations of the</p> | | | |

Amendment.

The specific objectives of the Enabling Activities (EA) Project were mainly to:

- 1- Achieve a broader understanding of the Kigali amendment provisions and prepare the legislative basis for the ratification.
- 2- Provide basic training to the NOU, the servicing sector, and end-users for addressing the emerging responsibilities of the Kigali Amendment and identify the needs of servicing sector that would facilitate the HFC phase-down.
- 3- Develop a required regulatory package to set up an import/export licensing system for HFC and HFC's alternatives.
- 4- Enhance the expertise of service sectors and end-users for adopting alternatives of low impact with respect to the climate, and safe handling of flammable refrigerants.

It is noteworthy that the implementation of the EA was accomplished using the existing national infrastructure and institutional setting already established for ODS phase-out activities. Institutional arrangements in Guatemala for the management of ODS projects were executed by the National Ozone Unit (NOU), Department for the Environmentally Sound Management of Chemical Products and Hazardous Wastes of Guatemala, the Ministry of Environment and Natural Resources (MARN).

The project achieved the following outputs and results:

- a) HFCs and alternatives are included in the existing licensing system (Governmental Agreement 317/2019) since December 2019.
- b) The policymakers were made aware of the global challenges of ozone-layer depletion, global warming, and climate change, the international instrument addressing these challenges, and why the Government of Guatemala should ratify such international agreement including the Kigali Amendment to the Montreal Protocol.
- c) Raised awareness of national stakeholders and the public regarding the importance and benefits of the Kigali Amendment. Concerned national stakeholders understood their new expected roles and responsibilities under the Kigali Amendment implementation.
- d) Understanding of the needs of the servicing sector for further planning of the activities related to the adoption of low-GWP and zero-GWP replacement technologies to HFCs.
- e) Improved legislative frameworks for the effective implementation of HFCs licensing and quota system, as well as the monitoring and reporting mechanism in Guatemala.
- f) Ministry of Energy / Dept. of climate change identified the linkage between the HFC phase-down and energy efficiency.
- g) The ratification process of the Kigali Amendment was completed on April 12, 2023. It is expected to be deposited before the end of April 2023.

The current progress in ongoing HCFC phase-out management plan (HPMPs)

Guatemala successfully completed the HPMP and the first tranche of the HPMP II is ongoing. As a result of Stage I, HCFC consumption has been decreasing since 2016 due to the strict enforcement of the licensing system, the implementation of the activities included in the HPMP and the ban on the import of HCFC-based equipment implemented in 2015. HCFC consumption has been below the 2020 target of 5.4 ODP tonnes since 2017. There have been no imports of HCFC-141b contained in pre-blended polyols since 2018 due to the complete phase-out in the foam sector, or imports of HCFC-124 or HCFC-142b (contained in blends) since 2014 and 2015, respectively.

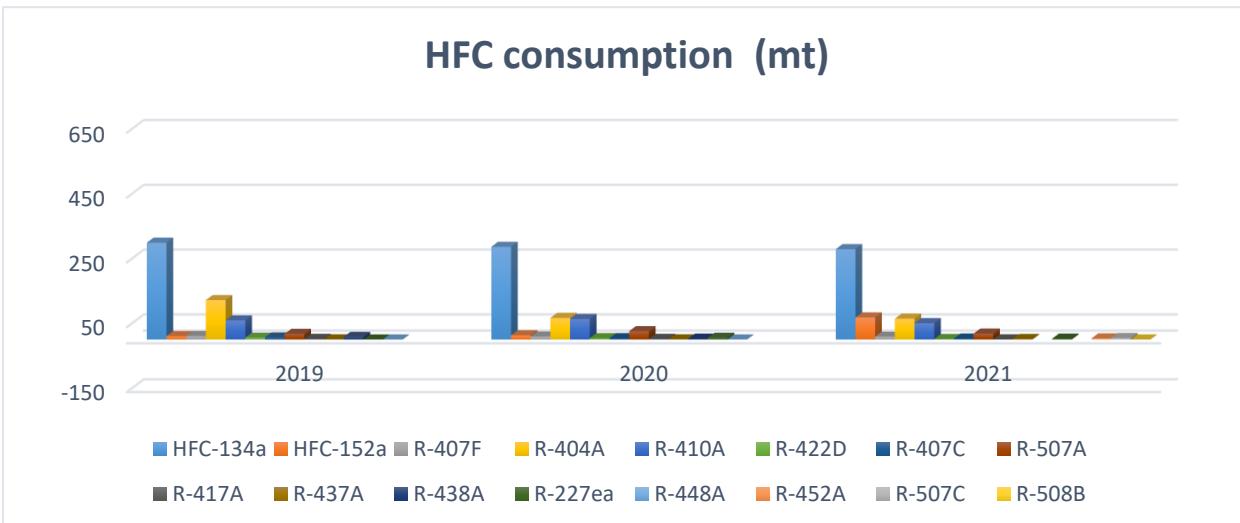

Stage II of the HPMP aims to meet the 67.5 per cent reduction from its HCFC baseline by 2025, and 100 per cent by 2030, and will build upon the experience gained during implementation of stage I. In order to

minimize the introduction of HFC-based RAC equipment as alternatives to HCFCs, the Government will reinforce training in good practices with a focus on refrigerant containment and capacity-building for the safe handling of flammable refrigerants; implement mandatory certification for labour competencies for RAC technicians; and establish a specialized training centre on the safe handling of flammable refrigerants during installation, operation, repair, maintenance and decommissioning of RAC equipment.

3. Overview of current HFC consumption in metric tonnes by substance (last three years)

| Substance/blend | Sector | 2019 | 2020 | 2021 |
|------------------------|-------------------------------------|--------------|--------------|---------------|
| HFC-134a | Manufacturing & Service RAC | 298.75 | 286.05 | 278.85 |
| HFC-152a | Other, specify. Glass Manufacturing | 10.45 | 13.08 | 68.15 |
| R-407F | RAC servicing | 10.90 | 9.27 | 8.77 |
| R-404A | Manufacturing & Service RAC | 121.61 | 66.65 | 64.39 |
| R-410A | RAC servicing | 59.14 | 63.28 | 50.41 |
| R-422D | RAC servicing | 5.76 | 4.07 | 1.58 |
| R-407C | RAC servicing | 6.61 | 4.21 | 3.18 |
| R-507A | RAC servicing | 17.56 | 25.75 | 18.32 |
| R-417A | RAC servicing | 2.02 | 1.98 | 0.45 |
| R-437A | RAC servicing | 0.5 | 0.57 | 1.78 |
| R-438A | RAC servicing | 7.88 | 2.69 | 0 |
| R-227ea | RAC servicing | 0 | 5.52 | 2.88 |
| R-448A | RAC servicing | 0 | 0.23 | 0 |
| R-452A | RAC servicing | 0 | 0 | 3.63 |
| R-507C | RAC servicing | 0 | 0 | 4.52 |
| R-508B | RAC servicing | 0 | 0 | 0.11 |
| Total | | 541.2 | 483.3 | 507.02 |

HFC consumption (mt)

Source: MARN, April 2023

Consumption for 2022 is being calculated by the Government of Guatemala.

4. Based on the consumption data given above, please provide a description of the sector/sub-sector that use HFCs in the country, including a short analysis and explanation of the consumption trends (i.e., increasing or decreasing)

Import data shows that the main HFC refrigerant imported in 2019-2021 period was HFC-134a, as it is widely used in domestic and stand-alone commercial refrigeration and mobile air conditioning, followed by the R-404A, used in commercial refrigeration mainly. They are followed by R-410A refrigerant, which is used in stationary air conditioning. The import of R-410A and R-404A will increase with the implementation of the HPMP to eliminate the R-22 in these sectors.

Description of the sector/sub-sector that use HFCs in the country.

- ✓ **Domestic Refrigeration** mainly uses R-134a as refrigerant. The imports of R-600a have been showing an incremental behaviour in the last years.
- ✓ **Commercial refrigeration. Stand-alone equipment.** The most common refrigerants used in this sector are R-134a and R-404A. **Condensing units** can be fully imported as equipment or imported as spare parts to be assembled in the country. Practically all of these units have R-404A as refrigerant.
- Refrigeration Centralized systems:** Lately, imports of these systems have grown. Refrigerant found in this equipment is R-404A.
- ✓ **Industrial refrigeration.** Industrial refrigeration consumes mainly R-717. However, during the last years, R404A displaced R-717 probably due to the health and safety risks associated to work with ammonia as refrigerant.
- ✓ **Transport refrigeration.** The refrigerant gas consumed in this subsector is mainly R-404A.
- ✓ **Residential AC.** Most common refrigerants used in residential AC are R-22, R-407C and R-410A.
- ✓ **Chillers.** The refrigerant used was R-22. Nonetheless, imports also show other refrigerants such as R-407C, R-410A, and R-717.
- ✓ **Mobile AC.** Mobile AC is related mainly to AC systems in the automobile sector. Until 2021, the most common refrigerant gas used was R-134a. It is expected that the forthcoming years could present new substances such as HFO-1234yf.

5. Description of information that needs to be gathered during project preparation. Explain how this data will be gathered

| Information needed | Description | Agency |
|--------------------------------------|---|--------|
| HFC sectoral consumption information | HFC consumption figures by sectors for the recent years and identification of companies, distributors, manufacturers, and other stakeholders related with the supply chain of HFCs. Data will be collected over surveys, interviews, side visits and workshops. | UNIDO |
| HFC sectoral consumption information | Compilation and processing of information for F-gases through surveys, conference calls, interviews, and meetings. | UNIDO |
| Capacity building | Identification of capacity building in the context of quota system, customs, safety standards, reclaiming and disposal of ODS. | UNEP |
| | | |

| 6. Activities to be undertaken for project preparation and funding (decision 87/xx(b)) | | |
|---|-----------------------------------|---------------|
| Activity | Indicative funding (US \$) | Agency |
| 1.- HFC sectorial distribution of consumption for the years 2020, 2021 and 2022 and modelling consumption for the period 2023 – 2029. Analysis on global markets of HFCs and low-GWP alternatives undertaken. Identification of conventional or reference HFC technologies and estimation of HFC demand by reference technology in relevant sectors and subsectors. Analysis on HFC markets and low-GWP alternatives in the country: HCFC phase-out impact; Technology evolution; Costs & availability; Regulation and standards; and estimation of potential market penetration of low-GWP abatement technologies. | USD 45,000 | UNIDO |
| 2.- Assessment of capacity building: a) Identification, revision, analysis and documentation of the national laws, rules and standards which based the elaboration of the HFCs quota rules. b) Customs capacity building assessment. Number of customs officers trained and type of equipment to understand the needs training required for the HFC controls, additional capacity building options and tools to comply with the new obligations under the Kigali amendment; promote actively the participation of women in the capacity building activities. c) Existing safety standards for handling flammable and toxic alternatives and the general regulation modifications needed; d) Evaluation of the Reclaiming and destruction capacity in the country. | USD 40,000 | UNEP |
| 3- Conducting studies, stakeholders' workshops, and assessment: a) Assessment of the actual standards for the energy efficiency for RAC equipment in Guatemala b) Identification of the main HFC commercial applications and related end-users: refrigeration technologies in supermarkets, convenience stores, restaurants, hotels, among others. | USD 29,000 | UNIDO |
| 5 - Communication and outreach plan: Preparation of a comprehensive communication and outreach strategy in consultation with key stakeholders including RAC associations and media. The communication and outreach plan will be prepared in a way that supports the gender mainstreaming activities under the project. | USD 11,000 | UNEP |
| 6 - HFC phase-down strategy development: | USD 45,000 | UNIDO |

| | | |
|---|--------------------|--|
| Technical and legal experts to prepare all documents, consult all key stakeholders and develop detailed strategy. Integration and harmonization of the reports and studies previously developed with respect to HFC consumption, BAT technologies, License system, and energy efficiency. Identification of feasible measures to reach Kigali Amendment scenarios in the long, medium, and large term and its associated costs. | | |
| TOTAL | USD 170,000 | |
| 7. How will activities related to preparing the KIP be linked to the current stages of the HPMP being implemented in the country? (OPTIONAL) | | |
| Synergies from ongoing and future HPMP activities will be assessed in an integrated manner and incorporated into the HFC phase-down plan development. Furthermore, lessons learned from HPMP implementation will be taken into considered to the extent possible. | | |

PROJECT CONCEPT – Morocco

MULTILATERAL FUND FOR THE IMPLEMENTATION OF THE MONTREAL PROTOCOL KIGALI-HFC IMPLEMENTATION PLAN (KIP) KIP (INV - REF)

Part I: Project information

| Project title: | HFC Phase-Down Management Plan Preparation | | |
|---|--|-----------------------------------|--|
| Country: | Morocco | | |
| Lead implementing agency: | UNIDO | | |
| Implementation period for stage I of the KIP: | 2025 to 2029 | | |
| Duration of PRP implementation (i.e., time (in months) from the approval of PRP to submission of the KIP (please specify): 24 months | | | |
| Funding requested: | | | |
| Agency | Sector | Funding requested (US \$)* | |
| UNIDO | Manufacturing | 30,000 | |

*Details should be consistent with information provided in the relevant sections below.

A. Information required for PRP funding request for the overarching strategy of the KIP

| 1. Montreal Protocol compliance target to be met in <input checked="" type="checkbox"/> stage I of the KIP | | | |
|--|---|--|-------------|
| Phase-out commitment (%) | 10% reduction | Year of commitment | 2029 |
| <input checked="" type="checkbox"/> Servicing only | <input type="checkbox"/> Manufacturing only | <input type="checkbox"/> Servicing and manufacturing | |
| 2. Brief background/description/information on approved relevant projects and multi-year agreements as follows: | | | |
| <ul style="list-style-type: none"> The current progress in implementation of any funded HFC-related project (enabling activities or stand-alone HFC investment projects) The current progress in ongoing HCFC phase-out management plan (HPMPs) Consideration of integrating HFC phase-down activities with HPMP activities considering previously approved HFC-related projects, if this information is available. | | | |

The current progress in implementation of any funded HFC-related project (enabling activities or stand-alone HFC investment projects)

In response to Decision 79/46 of the Executive Committee on guidelines for Enabling Activities for HFC Phase down, the Government of Venezuela submitted a proposal to the 81st Executive Committee meeting of the Multilateral Fund, which approved the project for Venezuela's Enabling Activities for HFC Phase Down by a sum of US\$250,000, to facilitate and support the country's ratification of the Kigali Amendment and to undertake specific initial activities that pave the way to reduce the HFCs in the country through the following lines of actions:

- Provide policy and technical advice and guidance to all the Government institutions involved in the ratification process of the Kigali Amendment.

- b) Support the Government by identifying the key elements and specific activities aimed at initiating institutional arrangements to comply with the Kigali Amendment initial obligations regarding quota and license system, Country data reporting and articulation with national priorities and policies.
- c) Strengthen the capacity of the National Ozone Unit, service workshops, customs officials, end-users, and other newly identified national partners to address the new responsibilities of the Kigali Amendment.

It is noteworthy that the implementation of the Enabling Activities is being executed using the existing national infrastructure and institutional setting already established for ODS phase-out activities. The EA project achieved the following outputs and results:

- a) The Government of Venezuela ratified the Kigali Amendment, which entered into force on October 28, 2021, by Presidential Decree No. 6.659. Ratification was deposited on December 5, 2022.
- b) Venezuela Strengthened the enforcement of the HFCs license system established under resolution N° 227 referring the requirements and regulation for the proper handling and import of HFCs published in the Official Gazette in June 2015. The resolution applied for reclaimed and pure HFCs and its blends.
- c) Venezuela carried out several meetings with industry association and importers, academy, government officers, RAC technicians, and other relevant actors with regard the implications of the Kigali Amendment in terms of low-GWP alternatives for HFCs, challenges and barriers to be address for the initial reductions, legal aspects, policies and measures, funding, and technological transfer.
- d) The Government of Venezuela carried out an HFC consumption assessment that included the penetration of low GWP alternatives in relevant sector. The assessment included general recommendations on policy measures, technical assistance activities and investment activities, which were used as a roadmap for the implementation of the Kigali Amendment.
- e) Two online workshops were carried out on Alternatives to HFCs for importers, distributors, and government officers.
- f) The NOU has strengthened the partnership with the Ministry of Popular Power for Electrical Energy and the Ministry of Industries to identify the linkage between the HFC phase-down, energy efficiency and Eco designed.

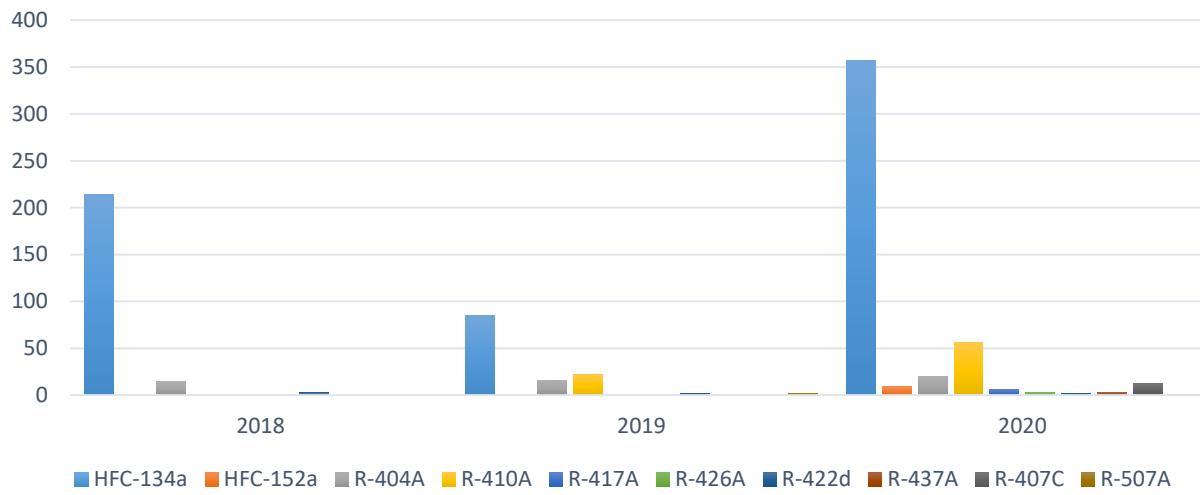

The project was completed in June 2022 and the final report was submitted to the MLF Secretariat in October 2022.

3. Overview of current HFC consumption in metric tonnes by substance (last three years)

| Substance/ blend | Sector | 2018 | 2019 | 2020 |
|---------------------|---------------------------------|------|------|------|
| HFC-134a | RAC Manufacturing and Servicing | 214 | 85 | 357 |
| HFC-152a | RAC servicing | 0 | 0 | 9 |
| R-404A | RAC Manufacturing and Servicing | 15 | 16 | 20 |
| R-410A | RAC servicing | 0 | 22 | 56 |
| R-417A | RAC servicing | 0 | 0 | 6 |
| R-426A | RAC servicing | 0 | 0 | 3 |

| | | | | |
|--------|---------------|-----|-----|-----|
| R-422d | RAC servicing | 2 | 1 | 1 |
| R-437A | RAC servicing | 0 | 0 | 3 |
| R-407C | RAC servicing | 0 | 0 | 12 |
| R-507A | RAC servicing | 0 | 2 | 1 |
| Total | | 232 | 126 | 468 |

HFC consumption in metric tons for the period 2018-2020

Source: MINEC, February 2021

Consumption for 2021 is being calculated by the Government of Venezuela, at the time of the elaboration of this document, the data is not available yet.

4. Based on the consumption data given above, please provide a description of the sector/sub-sector that use HFCs in the country, including a short analysis and explanation of the consumption trends (i.e., increasing or decreasing)

Import data confirms that high GWP HFCs imports continue growing rapidly. In that respect, the main HFC refrigerants imported in 2019-2021 period was HFC-134a, as it is widely used in domestic and stand-alone commercial refrigeration and mobile air conditioning, followed by the R-410A refrigerant, which is used in stationary air conditioning. They are followed by R-404A, used in commercial refrigeration mainly. The import of R-410A and R-404A will increase with the implementation of the HPMP to eliminate the R-22 in these sectors.

Description of the sector/sub-sector that use HFCs in the country.

- ✓ **Domestic Refrigeration** mainly uses R-134a as refrigerants. The imports of R-600a have been showing an incremental behaviour in the recent years.
- ✓ **Commercial refrigeration. Stand-alone equipment.** The most common refrigerants used in this sector are R-134a and R-404A. **Condensing units** can be fully imported as equipment or imported as spare parts to be assembled in the country. Practically all of these units have R-404A as refrigerant.
- Refrigeration Centralized systems** Lately, imports of these systems have grown. Refrigerant found in this equipment is R-404A.
- ✓ **Industrial refrigeration.** Industrial refrigeration consumes mainly R-717. However, during the last years, R404A displaced R-717 probably due to the health and safety risks associated to work with ammonia as refrigerant.
- ✓ **Transport refrigeration.** The refrigerant gas consumed in this subsector is mainly R-404A.
- ✓ **Residential AC.** Most common refrigerants used in residential AC are R-22, R-407C and R-410A.

- ✓ **Chillers.** The refrigerant used was R-22. Nonetheless, imports also show other refrigerants such as R-407C, R-410A, and R-717.
- ✓ **Mobile AC.** Mobile AC is related mainly to AC systems in the automobile sector. Until 2020, the most common refrigerant gas used was R-134a. It is expected that the forthcoming years could present new substances such as HFO-1234yf.

5. Description of information that needs to be gathered during project preparation. Explain how this data will be gathered

| Information needed | Description | Agency |
|---|--|--------|
| HFC sectoral consumption information | Update the HFC overall consumption and its alternatives for the years 2020, 2021 and 2022 with sectorial and sub-sectorial data through questionnaires and interviews as this period was not included in the enabling activities. This includes data related to the subsector, number, and age of equipment in the subsectors, energy efficiency, and prices of alternative equipment. The data will be gathered through surveys, interviews, and workshops. | UNIDO |
| Analysis of the types of equipment using HFCs | To determine the existing stock of appliance systems in domestic, commercial, and industrial RAC sector, its main characteristics and use by regions in the country, to make predictions of emissions, and mitigation actions in each subsector and by regions. The data will be gathered through analysis of data bases, institutions meetings, and workshops | UNIDO |
| Others, specify. | Status of refrigeration servicing technicians trained, tools delivered and reclaiming centres installed. Interviews with NOU and other stakeholders involved in the HFC con | UNIDO |
| Others, specify. | Assessment of the low GWP alternatives to HFC in Venezuela, availability, and cost. | UNIDO |

6. Activities to be undertaken for project preparation and funding (decision 87/xx(b))

| Activity | Indicative funding (US \$) | Agency |
|--|----------------------------|--------|
| 1- HFC Consumption and distribution survey, trends and HFC forecast calculation: Review of documents and existing regulations as well as measure new data on HFCs and its alternatives. Prepare questionnaires for HFC importers, distributors and final | USD 50,000 | UNIDO |

| | | |
|---|------------|-------|
| <p>users, and conduct interviews, site visits, meetings, and workshops with relevant stakeholders (including government, private sector, civil society organizations, vocational centres, academic communities) to update data on HFC consumption and manufacturing by sectors, including market trends and penetration of technologies alternatives.</p> | | |
| <p>2.- Assessment of capacity building activities and enforcement: a) Analysis on the national capacities and needs on training and certification in the use of HFC alternatives; organize and conduct workshops with main training institutions and key stakeholders; promote actively the participation of women in the capacity building activities. b) Evaluation of the Reclaiming and destruction capacity in the country: Consultant(s) to conduct surveys, interviews, site visits and consultations in the targeted sectors and key stakeholders c) Customs capacity building assessment. Number of customs officers trained and type of equipment to understand the needs training required for the HFC controls, additional capacity building options and tools to comply with the new obligations under the Kigali amendment. d) Assessment of existing legislation, policies and regulations as required for the import/export licensing and quota systems for HFCs.</p> | USD 40,000 | UNIDO |
| <p>3- Conducting studies, stakeholders' workshops and assessment related to the promotion of energy efficiency in all sectors, by: a) assessment of policy measures and programs for the promotion of energy efficiency in the RAC sector b) Evaluation of the domestic and commercial RAC sector, data collection, assessment, and detailed planning. Development sectorial proposal for the promotion of energy efficiency in this sector.</p> | USD 45,000 | UNIDO |
| <p>4 - Communication and outreach plan: Preparation of a comprehensive communication and outreach strategy in consultation with key stakeholders including RAC associations and media. The plan will focus on technology and policy awareness raising to influence the</p> | USD 15,000 | UNIDO |

| | | |
|---|------------|---|
| investment and user behaviours. The communication and outreach plan will be prepared in a way that supports the gender mainstreaming activities under the project. | | |
| 5 - HFC phase-down strategy development: Technical and legal experts to prepare all documents, consult all key stakeholders and develop detailed strategy, including: a) Desegregated HFC consumption data by sectors, including trends and forecast calculation of the HFC baseline and scenarios of compliance, b) legal assessment of the HFC regulations for the control of the imports c) Overview of the refrigeration servicing sector, including main stakeholders and institutions (e.g., customs authorities, refrigeration associations, training institutions and an Action Plan to address the freeze in 2024 and 10 per cent reduction in HFC consumption by 2029 d) Policy measures and programs for the promotion of energy efficiency in the RAC sector. | USD 50,000 | UNIDO |
| 6. Validation and dissemination: Consultations, review, and validation of the prepared strategy with Institutions, Industry, Academy, and other relevant stakeholders. | USD 20,000 | UNIDO |
| TOTAL | | USD 220,000 |
| 7. How will activities related to preparing the KIP be linked to the current stages of the HPMP being implemented in the country? (OPTIONAL) | | Synergies from ongoing and future HPMP activities will be assessed in an integrated manner and incorporated into the HFC phase-down plan development. Furthermore, lessons learned from HPMP implementation will be taken into considered to the extent possible. |

Country: Bosnia and Herzegovina

Title: Institutional Strengthening for the implementation of Montreal Protocol in Bosnia and Herzegovina

Project Duration: 36 months (June 2023 – May 2026)

Project Budget: 252,594 (excl. 7% Agency Support Costs)

Implementing Agency: UNIDO

Coordinating Agency: Ministry of Foreign Trade and Economic Relations / National Ozone Unit (NOU)

Project Summary

Bosnia and Herzegovina is an active member of the ECA Regional Ozone Network for Europe and Central Asia. Bosnia and Herzegovina was member of the Bureau MOP and served as vice-president. The National Ozone Unit of Bosnia and Herzegovina is responsible for monitoring the implementation of the HCFCs phase-out plans. The NOU is coordinating the promulgation and enforcement of policy and legislation with a specific focus on the HCFCs. Under the current phase, the Government of Bosnia and Herzegovina was supported through increased capacity building of the NOU by achieving a smooth implementation of the HPMP activities, HFC outlook which was very demanding and very useful project in terms of Kigali Amendment ratification and implementation activities to be performed by the NOU. The legal procedures for controlling the HCFCs (quota system for HCFCs, permits for HFCs and ban on HCFC and its mixtures based equipment) are approved by the Council of Ministers of Bosnia and Herzegovina and are operated smoothly by the NOU in cooperation with ITA. Also, HFC permitting is established prior to Kigali Amendment ratification. Performance indicators set for the current IS phase were fully achieved.

The NOU is further committed to build up capacity at country level in view of compliance with the HCFCs consumption phase-out targets and it is expected that the ongoing regulatory efforts will be further enhanced by the implementation of new phase of IS. The National Unit of Bosnia and Herzegovina will be responsible for tracking the promulgation and enforcement of policy and legislation with specific focus on HCFCs additional restrictions; special focus will be given to the cooperation with the customs authorities sector in order to prevent illegal trade and the cooperation with the RAC association. The Government of Bosnia and Herzegovina was committed through NOU to ratify the Kigali Amendment and have made the necessary steps by including this activity in the bi-annual work plan of the Council of Ministers. The procedure for the ratification of Kigali Amendment was finalized in May 2021. Preparatory activities for ratification were done with industry importers, customs administration, climate NFPs and all other relevant stakeholders under the Enabling activities for HFC phase-down, considering also safety standards and energy efficiency in cooling sector. The preparatory funding for the Kigali HFC Implementation Plan (KIP) was approved. HFC outlook model is to be upgraded. Plan is to continue cooperation with climate authorities on inclusion of F-gases in ND. The cooperation with safety standards authorities will continue.

Country: Ecuador

Title: Institutional Strengthening for the implementation of Montreal Protocol in Ecuador

Project Duration: 36 months (June 2023 – May 2026)

Project Budget: 468,452 (excl. 7% Agency Support Costs)

Implementing Agency: UNIDO

Coordinating Agency: Ministerio de Producción, Comercio Exterior, Inversiones y Pesca (MPCEIP)/
National Ozone Unit (NOU)

Project Summary

The implementation of Montreal Protocol activities in Ecuador is continuing with significant progress. The NOU worked to achieve broad consensus on revised national ODS legislation. An operational ODS import/export licensing and HCFC quota system is in place. Licensing system includes HFC substances. Article 7 and Country Programme implementation data were submitted to the Fund and Ozone Secretariats, respectively, accurately and in a timely manner. The project for enabling activities for HFC phase-down project was completed in December 2021. NOU staff coordinated activities under HPMP stage I final tranches and HPMP stage II, first tranche. Several training sessions for Customs Officers were organized. The country's encouraged the continued participation of stakeholders in the implementation of the Montreal Protocol at the national level, it organized awareness-raising activities and the World Ozone Day celebrations, as well as active participation in regional network/events.

With the continued support of the institutional strengthening project, Ecuador will continue implementing HCFC phase-out and submit the Kigali HFC implementation plan in an effective manner to meet the HCFC phase out and HFC phase-down targets, while ensuring gender mainstreaming in implementing of those projects. In addition, as mentioned, it will continue strengthening the ODS legislation to fulfil the requirements of the HPMP second stage and the Kigali Amendment and development of national capacities to allow the efficient implementation of all its provisions. The action plan also includes a strict monitoring and control of the imports and use of HCFCs/HFCs, as well as facilitating access to and use of new alternative substances and technologies. The NOU will continue public awareness activities especially with the education sector and with a gender focus during the World Refrigeration Day and World Ozone Day celebrations as well as national events.

Country: North Macedonia

Title: Institutional Strengthening for the implementation of Montreal Protocol in North Macedonia

Project Duration: 36 months (July 2023 – June 2026)

Project Budget: 350,666 (excl. 7% Agency Support Costs)

Implementing Agency: UNIDO

Coordinating Agency: Ministry of Environment and Physical Planning /National Ozone Unit (NOU)

Project Summary

The institutional strengthening (IS) project and the National Ozone Unit with its role of coordinator of the overall national activities for phasing-out/phasing-down of the controlled substances, are of great importance for the successful implementation of the Montreal Protocol in the Republic of North Macedonia.

The IS phase implemented in the reporting period was dedicated to finalization of the certification scheme and regulatory framework for HFC phase-down. The controlled substances trade was monitored on a daily basis by issuing permits for HCFC-22 and HFC-import, and illegal traffic prevention and smuggling seizures were implemented by the coordinated action performed by the NOU, Customs Administration and State Environmental Inspectorate. The recovery and recycling scheme is functioning well. Public awareness activities are everyday task of the NOU, the relatively new moment is incorporation and promotion of the gender policy in the public awareness planning. The NOU actively participates in the ECA Network meetings and duly implements the iPIC procedure, so it has been awarded with Europe and Central Asia Montreal Protocol award for customs and enforcement officers.

The NOU is committed to the consistent implementation of the activities related to the implementation of Montreal Protocol provisions. The drafting and implementation of the HCFC licensing and quota system and legislation with regards to HFC licensing system, as well as the establishment of sustainable certification and recovery and recycling system that will support the planned pathway towards ODS phase out and HFCs phase-down.

Furthermore, the coordination of the activities on recording and labelling of the equipment with 3 and more kilograms of refrigerant charge, monitoring of the recovery and recycling scheme, and import/export control will continue on a regular basis. A deliberate emphasis will be put on strengthening the cooperation and coordination between certain stakeholders (customs-importers/exporters, inspectors-retail sellers/end-users) and facilitating their active participation in the controlled substances and equipment containing controlled substances trade chain.

The NOU will be responsible for coordinating the first and second tranches of HPMP II, and ensure a synergy is created with the development and further implementation of the Kigali HFC Implementation Plan.

Timely and accurate reporting in accordance to the Article 7 of the Montreal Protocol and in line with the

rules of the Country Programme reporting remains as a permanent task of the NOU.

The efficient coordination between national agencies/stakeholders to support the objectives of the Montreal Protocol is provided by active participation of all relevant institutions and organizations, in the first place RAC association that provides timely and consistently disseminating of information and adequate involvement of stakeholders in the management of the controlled substances throughout their overall life-cycle.

Additionally, active participation in the ECA Network meetings adds value to the promotion of national activities as well as sharing information and experience among countries in the region. NOU's OEWG and COP/MOP participation gives possibility for the country to take an active part in the international negotiations and decision-making on global level.

Finally, public awareness and communication with the general public have been an everyday task of the NOU. Namely, the celebration of the International Ozone Day is an opportunity to present the on-going activities and inform on the upcoming events, changes in legislation and future activities. The inclusion of gender policy in national activities for the implementation of the Montreal Protocol will be a task to promote with special attention in the next phase of IS.

Country: Sultanate of Oman

Title: Institutional Strengthening for the implementation of Montreal Protocol in the Sultanate of Oman

Project Duration: 36 months (September 2023 – August 2026)

Project Budget: 181,410 (excl. 7% Agency Support Costs)

Implementing Agency: UNIDO

Coordinating Agency: National Ozone Unit/ Environment Authority

Project Summary

Since the approval of the current phase in December 2020, the National Ozone Unit under the Civil Aviation Authority and then under the Environment Authority, has advanced with the implementation of the Montreal Protocol activities in the country and ensured country's compliance with the reduction targets. The focus in the current phase was on: strict monitoring of HCFC trade through the national ODS regulatory framework and allocation of quotas, further strengthening the cooperation with the customs authorities ensuring sustained ODS phase-out, organization of training activities with customs officers on prevention of illegal trade, development of the national certificate program, take steps towards Kigali Amendment ratification, collaboration and sharing information with the industry associations, re-establishing the National Ozone Committee, coordination of the HPMP Stage III activities; public awareness activities including celebration of International Ozone Day; Country Programme and Article 7 data reporting; and active participation in regional network and Montreal Protocol meetings.

During phase IX the NOU's priority will be for the Sultanate of Oman to achieve the 2024 HCFC reduction targets and to continue working on HPMP Stage III for the after 2024 reduction targets. Activities planned include: CP and Article 7 data reporting; continued monitoring the licensing system and allocate quotas against the records of customs to maintain full control over the imports of all HCFCs; implementation of activities under the HPMP Stage III; continue cooperation with custom authorities and industry associations; facilitate the ratification process of the Kigali Amendment; development of the national certification program, continue finding solutions to increased introduction of hydrocarbons on the market in cooperation with industries and other relevant institutions. Public awareness activities will include celebration of international ozone day and the country plans to participate in regional network and Montreal Protocol meetings, whether online or physical. Gender mainstreaming will be ensured in all activities under the Montreal Protocol projects.

|-----------------------------|---|
| Country: | Niger |
| Title: | Verification report of national consumption targets |
| Project Duration: | 24 months |
| Project Budget: | US\$ 30,000 (excl. 9% Agency Support Costs) |
| Implementing Agency: | UNIDO |
| Coordinating Agency: | National Ozone Unit |

Project Summary

Funding for the preparation of verification report is being requested in accordance with proposed list of low-volume consuming (LVC) countries as suggested by the Multilateral Fund Secretariat, put forward for consideration and approval by the Executive Committee at its 92nd meeting, taking place from 29th of May until 2nd of June 2023.

The verification report funding is requested for preparing a verification report under the Stage II of the HCFC Phase-out Management Plan for Niger. The verification report will be submitted with the next tranche request scheduled for submission to the first meeting in 2025. Last time funding for verification report was approved for Niger was at the 82nd meeting in December 2018. The requested verification report will cover all years not covered with the previous verification report.
