EXECUTIVE COMMITTEE OF
THE MULTILATERAL FUND FOR THE
IMPLEMENTATION OF THE MONTREAL PROTOCOL
Twenty-eighth Meeting
Montreal, 14-16 July 1999

Addendum

PROJECT PROPOSALS: THAILAND

In document UNEP/OzL.Pro/ExCom/28/43 insert the following on page 8 after paragraph 5.

6. The data subsequently provided by the World Bank covers 109 of the 224 enterprises originally included in the project. This data which is still based on the ODS purchase records of the enterprises concerned was verified using an estimate of the average CFC consumption per refrigeration unit and the total number of units produced by each enterprise. Data based on the different models produced by each enterprise, originally requested by the Secretariat, is still being collected by the World Bank.

7. The information now available on CFC consumption provides the basis for releasing a second tranche of US \$1,000,000. Additional data currently being collected will assist in confirming the level of consumption and thus the amount of the final tranche.

RECOMMENDATIONS

1. The Secretariat recommends that the Executive Committee consider releasing the second tranche of US \$1 million the World Bank plus agency support costs of US \$120,000.
