I. Introduction

1. The request of the Executive Committee to the implementing agencies to collect sector ODS consumption data from countries they are implementing institutional strengthening projects can be traced back to the Twenty-eighth Meeting in July 1999, approximately one year ago. Subsequently, Decision 28/25 which gave rise to this request has been reiterated and re-inforced by Decisions 29/10 and Decision 30/20.

2. As a follow-up to Decision 30/20, the Secretariat revised the format of the consolidated report contained in Annex II of UNEP/OzL.Pro/ExCom/30/19 by including two columns on baseline data and the latest total consumption, and sent the revised format to the implementing agencies, both in hard copy and electronic form, to be used for preparing their final report.

3. This document includes in Annex II the submissions of the implementing agencies and the consolidation by the Secretariat of these submissions in Annex I.

II. Submissions from the implementing agencies

4. All the implementing agencies responsible for the implementation of institutional strengthening projects in Article 5 countries submitted data with various degrees of completeness. The agencies submission is discussed below.

A. Submission from UNDP

5. UNDP's submission covers 22 countries, and includes a covering note to the Secretariat, explaining the way some of the data was collected. Both this note and the submission are included in Annex II (a).

Comments of the Secretariat

6. UNDP reported baseline data which differed from that reported under Article 7 of the Protocol for the following substances and countries:

(a) CFCs:

Bangladesh, Sri Lanka and Venezuela.

(b) Halons:

India.

(c) Methylbromide:

Columbia, Costa Rica, Lebanon, Sri Lanka, Thailand, Uruguay and Venezuela.

(d) CFCs, Halons, Methyl bromide:

Brazil, China, Indonesia, Iran, Kenya, Malaysia, Nigeria, Pakistan, and Trinidad and Tobago.

7. For ten countries the refrigeration sector data is not separated between manufacturing and servicing.

B. Submission from UNEP

8. UNEP's submission covers 78 countries. UNEP reported that 8 of these countries are having their country programmes prepared and 12 countries have not responded to UNEP's request for data. The submission is attached in Annex II (b).

Comments of the Secretariat

9. UNEP reported baseline data which differed from that reported under Article 7 of the Protocol for the substances and countries indicated below:

(a) CFCs:

Barbados, Belize, Bolivia, Cameroon, Dominica, Gambia, Georgia, Honduras, Korea DPR, Malawi, Mongolia, Mozambique, Panama, Papua New Guinea, Paraguay, Peru, Saint Lucia, Saint Vincent, Seychelles, Togo, Vietnam and Yemen.

(b) Halons:

Bahamas, Brunei, Burkina Faso and Morocco.

(c) CFCs and Halons:

Antigua and Barbuda, Botswana, Namibia and Nepal.

(d) CFCs, Halons, Methylbromide:

Algeria, Croatia, El Salvador, Guatemala, Guyana, Lesotho and Zimbabwe.

10. Countries for which UNEP's latest consumption data for CFC is from 1997 include: Benin, Bolivia, Botswana, Cameroon, Dominica, Guatemala, Mali, Morocco, Mozambique, Myanmar, Nepal, Papua New Guinea, Samoa, Swaziland, Vietnam, Yemen and Zimbabwe.

C. Submission from UNIDO

11. UNIDO's submission covers 4 of the 7 countries it is responsible for the institutional strengthening projects, namely, Egypt, F.R. of Yugoslavia, Macedonia and Syria. As of May 25, 2000 UNIDO has not sent in data from the other 3 countries, namely Bosnia and Herzegovina, Qatar, and Romania. The submission is attached as Annex II (c).

Comments of the Secretariat

12. Countries for which UNIDO's baseline data for CFC, halon and methyl bromide are all different from those of the Ozone Secretariat include: Egypt, F. R. of Yugoslavia and Macedonia. For Syria, UNIDO's baseline data for halons and methyl bromide are different from those of the Ozone Secretariat.

13. The 1999 data submitted for Egypt and Syria are different from those reported recently by the two countries on the implementation of their country programmes; no date is indicated on the latest data submitted for Macedonia.

14. Data for the refrigeration sector is separated between manufacturing and servicing for all four countries.

D. Submission from the World Bank

15. The submission from the World Bank covers the 6 countries where the Bank is implementing the institutional strengthening projects. The submission is attached in Annex II (d).

Comments from the Secretariat

16. For Chile, Ecuador, Philippines, Tunisia and Turkey, the Bank's baseline data for CFC, halon and methyl bromide are all different from those of the Ozone Secretariat.

17. For Jordan, the Bank's baseline data for halon and methyl bromide are different from those of the Ozone Secretariat.

18. The latest 1998 consumption data for Tunisia and Turkey are different from those reported under Article 7 of the Protocol. The 1999 data for the Philippines does not include data for halon, CTC, TCA and methyl bromide.

III. DATA VERIFICATION

19. The Fund Secretariat requested the Ozone Secretariat's assistance to validate and update (up to May 20, 2000), the baseline and the latest consumption data for CFCs, halons and methyl bromide, as well as the latest consumption data for CTC and TCA.

20. The ODS sector consumption data submitted by the implementing agencies were compared to those reported by the Article 5 countries to the Ozone Secretariat under Article 7 of the Protocol. The comparison covered only the compliance baseline data and the latest consumption data of CFCs, halons and methyl bromide. Where the data from the implementing agencies did not match the Ozone Secretariat data, the latter was used.

21. Data from the reports received (as of May 2000) from the 44 Article 5 countries on the implementation of their country programmes was used to supplement and update the latest consumption data received from the implementing agencies.

IV. CONSOLIDATION

22. Upon completing the above process for data verification, the Secretariat consolidated the submissions from the implementing agencies using the revised format. The consolidation is included in Annex I to this document. The Secretariat wishes however, to note the following on the consolidated data:

- (a) The column on the total baseline consumption is the verified data from the Ozone Secretariat; and the column on the total latest consumption contains either the verified data from the Ozone Secretariat, or the latest consumption data submitted by Article 5 countries in their reports on implementation of country programme.
- (b) The column on the total approved but not implemented is the verified data from the consolidated progress reports of the implementing agencies as of 31 December 1999.
- (c) For the following countries the latest consumption data submitted by the implementing agencies represents data from 1997, and there is no more recent data either from the Ozone Secretariat or from the reports on the implementation of the country programme: Bolivia, Botswana, Libya, Mozambique, Saint Kitts and Nevis and Seycelles.
- (d) There are a number of countries where the sector distribution data submitted by the implementing agencies does not match either the total baseline data, or the latest consumption data from the Ozone Secretariat. Nonetheless, the data was consolidated in order to provide (albeit inaccurate) an indication on the use of the remaining ODS consumption in the country.

*Source of latest consumption data is either from Ozone Secretariat or Report on Implementation of Country Programme

**Only latest consumption data (1999) has been received. Source of consolidated data is still from Implementing Agencies for the year 1998.

***Data includes 20.7 ODP tonnes from the sector of Sterilant.

****Data includes 670 ODP tonnes from Multiple Sector.

Annex II(b)

Note from UNEP Data Submission

The data for the countries which are in the process of preparation of the country program has not been included as this is being compiled by the countries. The countries in this list include

- | | |
|---------------------|--------------------|
| 1. Kiribati | 5. Solomon Islands |
| 2. Laos PDR | 6. Suriname |
| 3. Liberia | 7. Tuvalu |
| 4. Marshall Islands | 8. Vanuatu |

The following countries are yet to report data completely and hence, we have categorised them under countries for which data is not available. We are still following up with these countries for the information sought.

- | | |
|-----------------------------|-----------------------|
| 1. Burundi | 8. Dominican Republic |
| 2. Chad | 9. Gabon |
| 3. Central African republic | 10. Guinea |
| 4. Comoros | 11. Niger |
| 5. Congo | 12. Saint Kitts |
| 6. Congo DR | |
| 7. Ivory Coast | |

ANNEX II(b)
UNEP BASELINE CONSUMPTION ANALYSIS
