EXECUTIVE COMMITTEE OF
THE MULTILATERAL FUND FOR THE
IMPLEMENTATION OF THE MONTREAL PROTOCOL
Forty-second Meeting
Montreal, 29 March - 2 April 2004

BUSINESS PLAN FOR THE YEAR 2004-2006 OF UNEP

COMMENTS AND RECOMMENDATIONS FROM THE FUND SECRETARIAT

1. UNEP prepared its business plan on the basis of Decisions 37/68, 38/66 and 41/93 and is provided as an annex to these comments.

2. This document presents a summary of planned 2004-2006 activities of UNEP, lists UNEP's business plan performance indicators, and provides recommendations for the consideration of the Sub-Committee on Monitoring, Evaluation, and Finance.

Planned 2004-2006 activities of UNEP

3. UNEP's 2004-2006 business plan includes requests for the year 2004 totalling US \$16.08 million (including agency fees). This amount includes:

- US \$7.59 million for the administrative budget of UNEP to deliver 2005 Compliance Assistance Programme (CAP) that will be considered at the last meeting in 2004;
- US \$33,900 for country programme preparation;
- US \$3.11 million for institutional strengthening;
- US \$474,600 for project preparation;
- US \$933,750 for training;
- US \$2.25 million for the implementation of refrigerant management plans; and
- US \$1.69 million for technical assistance.

4. UNEP will submit institutional strengthening requests for 3 countries (Cook Islands, Nauru and Niue) at a cost of US \$75,000 and institutional strengthening renewals for 43 countries at a cost of US \$3.04 million.

5. UNEP's 2004 priorities are to assist countries that are in actual or potential non-compliance, enable compliance with the 2005 and 2007 controls through technical and policy assistance, develop and implement a programme to ensure that countries with zero ODS consumption that have achieved phase-out sustain their zero or reduced consumption levels, provide assistance through the implementation of RMPs and expedite the implementation of approved projects. UNEP has obtained additional funds from Finland to support the ratification of the Montreal Protocol by new Parties and continues to receive additional support from Sweden for the Regional Network for South-East Asia.

6. Nine special initiatives in 2004 are identified in UNEP's business plan. In addition to those mentioned above, UNEP will promote greater South-South/North-South cooperation, support methyl bromide phase-out through Farmer Field Schools, Assist National Ozone Units (NOUs) in improving data reporting, promote ratification of the Amendments to the Protocol,

promote the exchange of information on illegal trade using network meetings, assist NOUs with minimal consumption of CTC, TCA and methyl bromide, and support halon management through CAP's halon officer.

Comments

7. UNEP included activities in its business plan for projects included in the window for accelerated phase-out/maintaining momentum, two planned multi-year agreements (one of which is a window project), some possible overlaps with UNIDO, activities to provide funds for additional services supplementary to the CAP budget, and several RMP activities pursuant to Decision 31/48.

Window projects

8. As shown in the following table, the Window projects included in UNEP's business plan apply either to criteria 3 and 4 of Decision 40/7, i.e., planned activities for LVCs that have received funding pursuant to Decision 31/48 and planned projects for which project preparation has been approved. UNEP also included project preparation for the development of a window project for Chad that has already received an RMP pursuant to Decision 31/48 amounting to US \$23,000.

Criterion	Country	Sector and Sub-Sector	Value (\$000) in 2004	ODP in 2004*	Value (\$000) in 2005	ODP in 2005*	Value (\$000) in 2006	ODP in 2006*
C-3 Window LVC with RMP	Mongolia	Refrigeration Training programme / workshop	81					
C-3 Window LVC with RMP	Sri Lanka	Refrigeration technical assistance / support	469	34.3				
C-3 Window LVC with RMP	Uruguay	Refrigeration Technical assistance / support	170					
C-4 Window with Approved Project Preparation	China	Refrigeration Training programme / workshop	397	32.8				
C-4 Window with Approved Project Preparation	India	Refrigeration training programme / workshop	452	33.1	565	41.3	678	49.6
C-4 Window with Approved Project Preparation	Morocco	Refrigeration Training programme / workshop	79	5.8				
C-4 Window with Approved Project Preparation	Morocco	Refrigeration Training programme / workshop	90	6.6				

9. The Secretariat indicated to agencies that a terminal phase-out management plan might be submitted for countries that had received RMPs pursuant to Decision 31/48 only if Decisions 38/64 and 40/21 were met. This would apply to Mongolia and Sri Lanka where other agencies are involved. Uruguay has already received refrigeration training and Customs training from a Canadian bilateral project and an end user project for UNDP. UNEP indicated that this project would be for the chiller sector pending the outcome of the TEAP report on chillers.

10. UNEP is also planning to submit three projects under criterion 4 of Decision 40/7, projects for which project preparation has been approved. In the case of the project to be

submitted for India, this is a multi-year funding commitment that would be part of the India servicing sector project with other bilateral and implementing agencies. The two activities in Morocco for a refrigeration training programme/workshop would be part of an RMP for Morocco for which UNEP received project preparation funds at the 27th Meeting.

Possible overlaps

11. The Secretariat indicated to UNEP that its methyl bromide technical assistance projects in China and India may overlap with UNIDO's approved methyl bromide phase-out agreement with China, and UNIDO's planned methyl bromide phase-out agreement with India. UNEP indicated that it was in discussions with the relevant parties to resolve the possible overlap.

Planned multi-year projects

12. In addition to UNEP's participation in the multi-year India servicing sector project, UNEP included a planned multi-year agreement for India to provide solvents technical assistance at total cost of US \$565,000 of which US \$113,000 is earmarked for 2004 and US \$226,000 is included for 2005 and another US \$226,000 for 2006. The 3-year phase-out plan indicates that India may need assistance to achieve the 30 per cent reduction in TCA consumption in 2005 to phase-out 36.7 ODP tonnes of TCA. UNEP is the only agency that has indicated activities in the non-CTC solvent sector, however, it should be noted that such multi-year agreements that may require some investment expenditure may not be within UNEP's mandate.

RMPs pursuant to Decision 31/48

13. UNEP is planning to submit RMP activities for 20 countries pursuant to Decision 31/48.

Supplementary CAP activities

14. UNEP has included four activities that would supplement its 2004 CAP programme: US \$339,000 for fumigants globally (farmer field schools), US \$28,000 for a workshop on methyl bromide alternatives in the Caribbean, US \$226,000 for technical assistance for the harmonization of legislation in Africa, and an additional US \$226,000 for public awareness globally.

15. At its 41st Meeting, the Executive Committee took note of the progress report on the implementation of the national farmers' training and establishment of a farmers' field school project and invited UNEP to submit a request for funding for similar activities in three additional countries in 2004, one in each region, at the same level as the project approved at the 27th Meeting (Decision 41/78, para. e). UNEP indicated that it was coordinating with implementing agencies to determine where it could be most effective in providing this type of project. The project approved at the 27th Meeting was approved at a value of US \$60,000. The US \$28,000 for a workshop on methyl bromide alternatives in the Caribbean would address the remaining small consumption in some Caribbean countries that is mostly associated with the use of methyl bromide on golf courses and that may have some transnational ownership issues.

16. UNEP has earmarked US \$226,000 for Africa to address the regional harmonization of legislation related to monitoring of ODS consumption in the South African Development Community (SADC)/South African Customs Union (SACU) region and with the East African Cooperation region (EAC). This project would be similar to the one implemented in central and western Africa, involving the sub-regional monetary customs unions, that was approved at the 32nd Meeting in December 2000 (AFR/SEV/32/TAS/28). UNEP plans to hold two meeting for the existing project in May and June 2004 for central and western Africa. This project is being monitored as a one with implementation delays.

17. The funds for the planned activity in south and east Africa would be used to allow the organization of consultative meetings involving ministers of the environment and finance and trade and customs officials to include ODS issues in existing trade control regulations at the sub-regional level so that it would become mandatory for countries to enact these regulations at the country level. The process will also enable the establishment of sub-regional system to fight ODS smuggling.

18. Pursuant to Decision 35/57, para. a, UNEP has included US \$226,000 (including agency fees) for public awareness, both in 2004 and in 2005.

Expediting project implementation

19. UNEP has provided a section in its business plan on expediting project implementation that follows a section on improving programme operations to better respond to country compliance needs. UNEP provided a detailed list of Country by Country Activities to be implemented by CAP Staff in 2004 in Annex I of its business plan. It specifies by country the name of the special CAP service or approved project, whether or not the activity was a separately approved project or part of the CAP budget by project number or a special CAP service; anticipated CAP missions, whether the activity is in support of the work of other agencies or Secretariats; and, comments from agencies (mostly UNDP and bilateral agencies). It indicates that 418 separate activities are to be addressed including 179 special CAP services and 84 missions.

Performance indicators

20. A summary of UNEP's performance indicators pursuant to Decision 41/93 is provided below in Table 1.

Table 1

PERFORMANCE INDICATORS

Category of performance indicator	Item	Weighting	2004 Target
Approval	Number of annual programmes of multi-year agreements approved vs. those planned, may not be applicable to UNEP	20	Not applicable to UNEP

Category of performance indicator	Item	Weighting	2004 Target
Approval	Number of individual projects/activities (investment projects, RMPs, halon banks, TAS) approved vs. those planned	20	28 countries (i.e. 100%). UNEP believes that a realistic achievement is 17 countries (i.e. 60%).
Implementation	Milestone activities completed (e.g. policy measures, regulatory assistance)/ODS levels achieved for approved multi-year annual tranches vs. those planned, may not be applicable to UNEP	20	Not applicable to UNEP
Implementation	ODP phased-out for individual projects vs. those planned per progress reports, may not be applicable to UNEP	5	21.2 ODP tonnes from the IS project for Algeria (i.e. 100%)
Implementation	Project completion (pursuant to Decision 28/2 for investment projects) and as defined for non-investment projects vs. those planned in progress reports	5	38 projects (i.e. 100%)
Implementation	Percentage of policy/regulatory assistance completed vs. that planned	10	11 projects (i.e. 100%). UNEP believes that a realistic achievement is 9 projects (i.e. 80%)
Administrative	Speed of financial completion vs. that required per progress report completion dates	10	100%
Administrative	Timely submission of project completion reports vs. those agreed	5	Timely submission
Administrative	Timely submission of progress reports and responses unless otherwise agreed	5	Timely submission

21. UNEP agreed to set targets of 100 per cent achievement for two of its performance indicators. However, UNEP's internal review indicated that it might not achieve these targets. UNEP, therefore, provided its own internal targets for these indicators.

22. UNEP's business plan database indicates that that it would phase-out 65 ODP tonnes from approved non-investment activities in 2004.

23. Table 2 provides the targets for performance indicators for UNEP's Compliance Assistance Programme (CAP) pursuant to Decision 41/93.

Table 2

PERFORMANCE INDICATORS FOR UNEP'S COMPLIANCE ASSISTANCE PROGRAMME (CAP)

Indicator	Data	Assessment	2004 Target
Usefulness of the region network/thematic meetings	Average of all ratings by network meeting participants	Average versus maximum rating	Overall average of 3 on a 5-point scale.
Assistance to countries for data reporting for the purpose of establishing baselines	Number of countries with missing data that received specific CAP assistance for data reporting in order to determine compliance baselines. UNEP should give a clear indication of the assistance provided per Decision 40/11(b)(i)	Proportion of countries receiving assistance that subsequently provided data pursuant to Article 7	All 9 countries with missing baselines (as of January 2004) that accept CAP assistance.

Indicator	Data	Assessment	2004 Target
Assistance with Article 7 data reporting	Number of countries reporting data in compliance with Article 7 of the Protocol pursuant to Decision 40/11(b)(ii)	Proportion of countries accepting assistance that achieved compliance	100% of all Article 5 countries that accept CAP assistance will have achieved compliance with Article 7 reporting requirements. UNEP believes that a realistic achievement is 114 countries (i.e. 80%)
Countries in actual or potential non-compliance as per MOP decisions	Number of countries offered assistance under the CAP and number of countries that accepted assistance (after consultations with other implementing and bilateral agencies) and received CAP special assistance outside of network meetings listing the countries and type of assistance	Proportion of countries accepting assistance that achieved compliance	39 countries in non-compliance as per MOP XV that accept CAP assistance will be in compliance. UNEP believes that a realistic achievement is 29 countries (i.e. 75%)
Countries at risk of becoming in non-compliance as per Article 7 data trends	Number of countries offered assistance under the CAP including those countries not yet officially declared in non-compliance but where data indicate as much and number of countries that accepted the offered assistance (after consultations with other implementing and bilateral agencies) and received CAP special assistance outside of network meetings, listing the countries and type of assistance	Number of countries provided special assistance outside of network meetings as a proportion of the number of countries that appeared to be in non-compliance	All countries identified as in risk of non-compliance and that accepted CAP assistance to be provided specific assistance by CAP (outside of network meetings) UNEP believes that a realistic achievement is 80%.
Information clearing-house	(a) Number of newsletter subscriptions (b) Number of discrete visitors (IP addresses) to the web site (c) Number of PDF documents downloaded from web site (d) Number of hard-copy publications disseminated (e) Number of query responses answered; average time for response	Comparison with previous years' data	The following will be based on reported figures in 2003 Progress Report: a. 5% increase in subscriptions compared to 2003. b. 10% increase in visitors compared to 2003. c. 10% increase in downloads compared to 2003. d. 5% increase documents disseminated compared to 2003. 10% increase in queries compared to 2003; 10 working days of receipt of query.

RECOMMENDATIONS

The Executive Committee may wish to:

1. Endorse the 2004-2006 business plan of UNEP, the endorsement not denoting approval of the projects identified in the business plan nor their funding levels with any modifications based on the consideration of the following activities:
 - (a) Planned multi-year solvent sector project in India;
 - (b) Farmer field school budget globally and in the Caribbean;
 - (c) Technical assistance for US \$226,000 in Africa;
2. Approve the performance indicators for UNEP set out in Tables 1 and 2 of the Secretariat's comments as contained in UNEP/OzL.Pro/ExCom/42/9.

I. MULTILATERAL FUND TARGETS

A. MEETING THE OBJECTIVES OF THE MULTILATERAL FUND

1. Development of this Business Plan

In developing this 2004 Business Plan, UNEP used the revised *2003-2010 Phase-out Plan for the Multilateral Fund* (as of December 2003) prepared by the Multilateral Fund Secretariat and country needs articulated to UNEP by National Ozone Units (NOUs) during the course of 2003. The regional Compliance Assistance Programme (CAP) teams played the lead in assisting countries in prioritizing their needs and project proposals through their direct interaction with the Ozone Officers through the Regional Networks of ODS Officers and other regular communication.

Upcoming compliance reduction targets in the years 2005 and 2007 for CFCs, halons, CTC, TCA and methyl bromide are the drivers for the development of this business plan.

Activities in this Business Plan address the objectives and key priorities for future operations of the Multilateral Fund as stipulated in the Strategic Planning documents adopted by the Executive Committee. This Business Plan conforms to the relevant decisions of the Executive Committee, *inter alia*:

- Decision 37/68, which established the model rolling three-year phase-out plan for the Multilateral Fund as a flexible guide for resource planning for the 2003-2005 triennium, taking into account the results generated by the compliance-oriented model reflecting approvals at the 38th meeting;
- Decision 38/66, which urged Article 5 countries and their cooperating implementing agencies to accelerate the pace of implementation during the 2003-2005 time frame;
- Decision 35/57, Proviso D and the related Decision 36/7, which established US \$12.10/kg as the interim figure to account for CFC consumption of non-investment activities in non-low volume-consuming countries (non-LVCs) other than those in national and sectoral phase out plans with LVCs being exempted from that requirement.
- Decision 35/57 (a), which established funding levels for Institutional Strengthening (IS) projects and renewals at a level that is 30 per cent higher than the historically agreed level until 2005 and provides UNEP with US\$ 200,000/year to support public awareness and directs UNEP to provide countries with enhanced direct support on policy and substantive issues through the CAP.
- Decision 35/5, which requests that funds approved annually for the CAP but not spent be returned to the Multilateral Fund for re-programming at the second meeting of the Executive Committee in the year following that for which they had been approved.
- Decision 41/38, which approved the 2004 CAP budget.
- Decision 41/93, which approved performance indicators (including specific ones for CAP) for the evaluation of the performance of the implementing agencies.

This Business Plan also reflects decisions of the 15th Meeting of the Parties related to non-compliance. Additionally, UNEP proposes to play a supportive role to several decisions related to all Parties, through, for example, the Information Clearinghouse.

Several other important sources contributed to this Business Plan: the CAP Advisory Group Meeting (Paris, 11 September 2003) and the Multilateral Fund evaluation reports related to the Regional Networks, the Information Clearinghouse, IS projects and Training.

UNEP has maximised cooperation and eliminated possible overlaps with other Implementing Agencies and bilateral agencies through:

- Participation in the Inter-Agency Coordination Meeting (Montreal, 5-6 February 2004);
- Following written and oral guidance of the Multilateral Fund Secretariat;
- Reviewing available submissions of the other Implementing Agencies and bilateral agencies;
- Direct and informal discussions with the agencies; and
- Sharing UNEP's draft Business Plans Annex I (Country-by-Country Activities to be Implemented by CAP Staff in 2004) with the other agencies for comment.

2. Funding for CAP Activities versus Funding for Country-Specific Projects

In light of UNEP's budget cycle and administrative system, the core budget for the Compliance Assistance Programme (CAP) must be approved prior to the following year (e.g. funds to cover staff salaries must be approved prior to 1 January). Hence, UNEP submitted the 2004 CAP operating budget to the 41st meeting for the Executive Committee's consideration. In Decision 41/38, the Executive Committee approved the CAP core budget¹ in the amount of US\$ 6,757,900, with support costs of US\$ 540,632, as per the basis specified in the decision.

Using these already-approved CAP budget resources (i.e. no additional funds will be requested by UNEP), in 2004 UNEP will provide:

- Special CAP services for specific countries (see next paragraph);
- South-South Assistance;
- Information Clearinghouse.

Annex 1 provides the specific special CAP services to be delivered to different countries in 2004. These services include:

- Helping develop the capacity of new Ozone Officers and supporting recently-established NOUs;
- Assistance with resolving data reporting problems;
- Assistance with understanding the implications of ratification of the ozone treaties and amendments;
- Rapid response to urgent compliance problems, including missions to countries;
- Technical assistance in refrigerant management, methyl bromide and halon sectors, including backstopping support for projects being implemented by other agencies;
- Assistance with the development, review and enforcement of policies and legislation;

¹ UNEP/OzL.Pro/ExCom/41/87, Annex VIII.

- Support for customs officials and initiatives related to prevention of illegal ODS trade;
- Information services and support for national information and awareness initiatives.
- Assistance with implementing previously-approved projects (e.g. IS projects, development of CPs//RMPs and sector strategies, training related to RMP implementation).

In this Business Plan, UNEP is also requesting funding for new projects for specific countries and regions based on their compliance needs. These new projects are detailed in the Database (Annex III). The funding requested for those projects includes only the resources which are directly provided to the countries required for implementation (e.g. local consultants). CAP staff (already funded under the approved 2004 core UNEP budget) will assist with the implementation of the approved new projects by providing the required external technical assistance (e.g. in the field of policy, refrigeration, methyl bromide and halon experts).

3. Planned Activities and the 3-Year Phase-out Plan

Under this Business Plan, UNEP will support the 2004-2006 phase-out plan for the Multilateral Fund primarily through:

- Providing direct technical and policy assistance to countries through the CAP to enable and sustain compliance.
- Assisting LVCs. UNEP expects to remain the agency providing the largest amount of assistance to this category of countries throughout the triennium. This assistance will include Institutional Strengthening, Country Programme (CP) and RMP update, RMP implementation and other non-investment support.
- Supporting development of Refrigerant Management Plans (RMPs), RMP updates, and training related to RMP implementation. For most of the LVCs, the refrigeration sector is the largest ODS consumption sector, and the successful implementation of these RMP activities will largely determine whether or not the countries meet the CFC compliance targets. Accordingly, RMP activities will be essential in the 2004-2005 period.
- Helping Article 5 countries address small consumption of carbon tetrachloride (CTC), trichloroethane (TCA), halons and methyl bromide.

4. Business Plan Vision for the Triennium

In addition to the compliance targets already passed, the critical compliance targets for Article 5 countries during 2004-6 are:

2005	<ul style="list-style-type: none"> ▪ Annex A CFCs reduced by 50% from 1995-97 average level ▪ Halons reduced by 50% from 1995-97 average level ▪ Carbon tetrachloride reduced by 85% from 1998-2000 average level ▪ Methyl chloroform reduced by 30% from 1998-2000 average level ▪ Methyl Bromide reduced by 20% from 1995-1998 average level
2007	<ul style="list-style-type: none"> ▪ Annex A CFCs reduced by 85% from 1995-1997 average level ▪ Annex B CFCs reduced by 85% from 1998-2000 average level

The overall vision of UNEP's Business Plan during this triennium is to:

- Enable countries to achieve and sustain compliance with the control measures of the Montreal Protocol through technical and policy assistance;
- Promote a greater sense of country "ownership" by helping countries integrate the CPs and ODS phase-out strategies into their country's national environmental plans or strategies;
- Support performance-based national and sectoral phase-out plans through policy and legislation development and enforcement, particularly for LVCs.

5. Programme Priorities in 2004

UNEP considers Article 5 countries to be the "clients" for CAP services, and accordingly will strive to increase its client focus to help countries overcome specific compliance challenges in 2004 through the following means:

- Regional Networking and Information Clearinghouse services;
- Targeted compliance assistance services as part of the CAP (detailed in Section II.A.3 and Annex I) and
- On-going and new projects for individual countries/regions (detailed in Section II B and Annex III).

In 2004, UNEP's priorities will be to:

- Assist Article 5 countries that are in actual or potential non-compliance to achieve compliance (see Annex II);
- Enable Article 5 countries to meet the 2005 control measures for CFCs, halons, CTC, TCA, and methyl bromide, and the 2007 control measure for CFCs through technical and policy assistance;
- Develop and implement programme to ensure that those countries that report zero consumption of methyl bromide, CTC, TCA and halons sustain such levels of consumption;
- Provide assistance to LVCs through implementation of RMPs;
- Expedite implementation of already-approved UNEP projects;
- Sustain the phase out already achieved in Article 5 countries through the provision of advisory services, training, support for public awareness, and the provision of a clearinghouse function.

B. RESOURCE ALLOCATION

At their 14th Meeting (25 - 29 November, Rome), the Parties to the Montreal Protocol adopted a budget of US\$ 573 million for the 2003-2005 replenishment of the Multilateral Fund². Taking into account funds approved in principle and other commitments, the resulting allocation for 2004 would be US\$ 257 million available for business planning commitments³.

² Decision XIV/39

³ Multilateral Fund Secretariat, 11 February 2004, Minutes of the Inter-Agency Coordination Meeting.

In addition to the funding provided by the Multilateral Fund, the Governments of Sweden and Finland provide additional resources above and beyond their contributions to enable developing country compliance with the Montreal Protocol. Sweden supports the Regional Network of ODS Officers for South-East Asia and the Pacific (SEAP), and Finland provides assistance to support non-Parties to become Parties. UNEP assists Sweden and Finland with the implementation of those activities.

C. SPECIAL INITIATIVES IN 2004

1. Promote Greater South-South/North-South Cooperation

Increasingly UNEP views direct cooperation between countries as a cost-effective way to meet technical and policy compliance challenges while at the same time strengthening inter- and intra-regional cooperation. UNEP will significantly increase such assistance during 2004 using resources approved by the Executive Committee as part of the 2004 CAP operating budget. UNEP's Regional CAP teams will actively identify needs for such assistance and facilitate the travel of Ozone Officers and experts for targeted missions, with priority being given to countries in actual or potential non-compliance. UNEP will coordinate the South-South missions with the relevant Implementing Agencies and bilateral agencies.

2. Help Countries Maintain Zero Consumption

UNEP will continue to provide direct policy and technical assistance through CAP staff to Article 5 countries to help ensure that those countries that have reported zero consumption of methyl bromide, CTC, TCA and halons sustain such levels of consumption. This assistance will include, *inter alia*, support for policy development and enforcement to prevent future growth of consumption.

3. Support Methyl Bromide Phase Out through Farmer Field Schools

UNEP, in partnership with the Food and Agriculture Organisation (FAO), will continue to support methyl bromide phase out through the Farmer Field School (FFS) programme that trains farmers and extension workers in Article 5 countries on alternatives to methyl bromide. These projects will be closely coordinated with the other Implementing Agencies and bilateral agencies to ensure complementarity. As part of this ongoing initiative, UNEP is submitting a proposal for one FFS project in this Business Plan. UNEP will also work with other Implementing Agencies to incorporate the FFS approach into their methyl bromide work plans.

4. Assist NOUs with Improving/Troubleshooting Data Reporting

Consistent with Meeting of the Parties' Decision XIV/13 and the recommendations of other Implementing Agencies during the Informal Consultative Meeting with Implementing Agencies about CAP, UNEP will provide additional assistance to countries that have not reported data or that have expressed difficulties in reporting annual as well as baseline data. As part of CAP, UNEP will provide direct assistance to NOUs through its regional CAP teams, and information support through the clearinghouse service. In 2004, data reporting assistance is included as two of the newly-approved CAP performance indicators (see Section III). As per Decision 40/11(b), UNEP will offer its assistance to all countries in non-compliance with data reporting obligations

or lacking baselines (UNEP will first consult the NOU and the respective Implementing Agency responsible for the country's IS project to see if such assistance is desired).

5. Promote Ratification of Montreal Protocol and Amendments

Consistent with Meeting of the Parties Decision XIV/1, UNEP will continue to use its regional CAP teams in co-operation with the Ozone Secretariat to identify and work with the remaining 6 developing countries that have not yet ratified, approved or acceded to the Vienna Convention and the Montreal Protocol and its Amendments to do so at the earliest⁴. UNEP will also help explain the implications to countries as regards HCFC supplies resulting for non-Parties to the Copenhagen Amendment (as well as continuing to promote "avoiding the double phase out" by adopting non-HCFC options when possible).

6. Support for New Parties

UNEP will provide extra CAP support and attention to new Parties to the Montreal Protocol to ensure that the capacity of the NOU is built quickly to ensure that it operates effectively. UNEP is also including requests for National Compliance Action Plans for the new Pacific Island Country Parties, i.e. Cook Islands, Nauru and Niue. Additionally, CAP will provide assistance (including but not limited to information services) to new Portuguese-speaking Parties in cooperation with bilateral agencies and other Implementing Agencies.

7. Assist with Monitoring of ODS Trade and Prevention of Illegal Trade

In response to Meeting of the Parties Decision XIV/7, UNEP will encourage Parties to (a) exchange information and intensify joint efforts to improve means of identification of ODS and prevention of illegal ODS traffic (b) make even greater use of the Regional Networks to increase co-operation on illegal trade issues and enforcement activities. UNEP, through the Executive Committee, will report to the 16th Meeting of the Parties on the activities of the regional networks with regard to means of combating illegal trade. UNEP will also continue to work with regional customs institutes to ensure that training on these subjects is integrated into ongoing curricula.

8. Help NOUs Phase out Miniscule ODS Consumption

In 2003, UNEP used the CAP to assist the countries to verify actual consumption levels of CTC, TCA and methyl bromide in countries consuming less than 10 MT per annum. In 2004, UNEP will offer assistance to NOUs in those countries through its regional teams and the information clearing-house to help them reduce this consumption. Among the approaches to be considered would include: using small-group Network meetings involving Implementing Agency experts and/or Solvent Technical Option Committee members, collecting and disseminating targeted information related to the concerned sub-sectors, and facilitating match-making with experts from willing developed and developed countries with expertise in the concerned sub-sectors. If such assistance is not sufficient to eliminate the consumption, UNEP will work with other Implementing and bilateral agencies to identify and develop projects/activities to eliminate this remaining consumption. UNEP will also continue to assist

⁴ As of the 20 January 2004 UNEP Ozone Secretariat *Status of Ratification*, the countries are: Africa - Equatorial Guinea, Eritrea. Asia and the Pacific - Afghanistan, Bhutan, East Timor. West Asia - Iraq.

countries identified in the status report as consuming small amounts but not included in any agency's 3-year business plans for the triennium, to determine the proportion of such consumption that is eligible for phase-out.

9. Support for Halon Management and Halon Banking

Most halon consumption is in high-volume consuming countries, and it is being addressed through sector plans and investment projects and it does not form part of the Fund's *Compliance-oriented ODS Phase Out Model*⁵. However, UNEP believes that there is still a need for support for halon management (even in countries that have reported zero consumption under Article 7), in particular (but not limited to) low-volume halon-consuming countries. There is also need to support halon banking initiatives being implemented by other Implementing Agencies and bilateral agencies. Accordingly, in cooperation with those agencies, UNEP will use the CAP Halon Officer as a "backstopping" technical support for halon management and halon banking projects, in addition to provision of information through the Clearinghouse.

II. PLANNED BUSINESS ACTIVITIES

A. MEASURES TO EXPEDITE IMPLEMENTATION OF APPROVED PROJECTS AND THOSE CRITICAL TO COMPLIANCE

1. Improving Programme Operations to Better Respond to Country Compliance Needs

In 2002, UNEP re-orientated its OzonAction Programme into the Compliance Assistance Programme to better respond to the needs of developing countries during the compliance period. Staff, projects and responsibilities have been devolved to the regions to provide improved and direct support to Article 5 countries. This re-orientation features regional delivery of key services and project support needed by countries to meet specific compliance targets, and location of specialized personnel in the following UNEP Regional Offices to ensure close, regular working contact with the countries:

Office	Location
Regional Office for Africa (ROA)	Nairobi, Kenya
Regional Office for Asia & Pacific (ROAP)	Bangkok, Thailand
Regional Office for Europe (ROE)	Geneva, Switzerland
Regional Office for Latin America & Caribbean (ROLAC)	Mexico City, Mexico
Regional Office for West Asia (ROWA)	Manama, Bahrain

The CAP team includes 25 full-time equivalent professional staff world-wide who provide countries with advisory and support services related to policy, refrigerant management, customs training, combating illegal trade, methyl bromide phase out, halons, and information exchange. These staff also have significant knowledge and experience of their regions. All of the CAP posts have been recruited and the staff are in place providing services to countries⁶. This team is

⁵ Multilateral Fund Secretariat, *Minutes of the Inter-Agency Coordination Meeting*, 11 February 2004.

⁶ Contact details and short biographies are available at www.uneptie.org/ozonaction/aboutus/staff.

a common resource under the Multilateral Fund and can contribute much to national, regional and sectoral phase out plans and programmes. It is also working with other Implementing Agencies and bilateral agencies to support and facilitate their work in the regions.

2. Expediting Implementation of Approved Projects

The timely implementation of already-approved projects is critical to achieve the phase-out objectives of the *2003-2010 Phase-out Plan for the Multilateral Fund*. This is reinforced by Executive Committee Decision 38/66, which urges Article 5 countries and their cooperating implementing agencies to accelerate the pace of implementation during the 2003-2005 timeframes. UNEP management will continue to accord this issue high priority, and expedite the implementation of approved projects through regular monitoring and follow up.

The OzonAction Management Information System (oMIS) operationalised in 2003 affords UNEP a clear overview of the implementation status of all UNEP-managed projects in all regions. In 2003, UNEP also established a bi-monthly Management Brief based on information provided by oMIS that is sent to all CAP staff and Regional Directors. The Brief analyses trends, emphasizes implementation priorities including those identified during Executive Committee meetings and Meetings of the Parties, and highlights critical areas that need immediate attention from CAP staff. This detailed analysis allows for closer management control and ensures rapid reaction to projects with implementation difficulties.

Since adopting this systematic approach (oMIS and Management Briefs) in 2003, project monitoring and implementation has significantly improved. UNEP therefore will continue the practice in 2004 and expects this to assist in expediting implementation of approved projects.

3. CAP Services for Specific Countries in 2004

The need for CAP services in 2004 has been identified by the regional teams through interaction with the countries during the Business Plan preparation process. UNEP has also closely coordinated with Implementing Agencies and bilateral agencies to ensure that there is no duplication of Annex I services and that mutually-reinforcing activities have been included. As a new feature for the 2004 Business Plan, this annex provides a snapshot of what UNEP is doing in each country by including not only CAP services but also individual ongoing projects approved by the Executive Committee, special compliance missions for each country and references to CAP assistance in support of projects being implemented by other Implementing Agencies and bilateral agencies.

As indicated in Annex I, in total UNEP will provide direct assistance through the CAP to 147 developing countries (including all 6 developing country non-Parties and the Palestinian Authority) in 2004. This will comprise 418 CAP services (84 of which are in support of the work of other Implementing Agencies, bilateral agencies and/or the Ozone Secretariat) plus support for approximately 160 on-going approved projects. UNEP anticipates 179 CAP missions to countries in relation to these services.

Beyond these anticipated services, CAP team members will be available at all times to respond to unplanned requests by Article 5 countries for urgent assistance, with priority given to those in actual or potential non-compliance.

4. CAP Logical Framework Analyses and Regional Initiatives

Each regional CAP team and the clearinghouse used the Logical Framework Analysis (LFA) methodology to establish long, medium and short-term objectives for their groups vis-à-vis the compliance needs of Article 5 countries. The LFAs, which are used for internal work planning purposes, are presented in Annex IV.

In response to the changing compliance landscape of Article 5 countries, the special initiatives and focus areas for the Regional CAP teams and Information Clearinghouse in 2004 are:

Regional Office for Africa: - For the Africa region, the ROA CAP team will place special focus on ensuring that new Parties do not remain behind the phase out schedule. This will be done by ensuring that all new Parties that benefited from Multilateral Fund support are able to implement more than 50% of their approved projects by end of 2004. All new Parties in Africa being LVCs, UNEP believes that intensive training of stakeholders and awareness raising combined with immediate implementation of import control will have an impact on the reduction of ODS consumption in the year to follow.

At a different level, the objective of the ROA CAP team is to ensure that countries that already completed phase out activities including training programme are fully aware of the 50% reduction target in 2005 and that measures are put in place for these countries to comply by the end of 2004. This will be achieved through a strong focus on the 50% reduction during the 2004 Region Network meetings and also through visits and working sessions with NOUs in countries where that goal is likely not to be met. Though not directly compliance-related, the ROA CAP team intend to all means available at the regional Office for Africa to ensure that Equatorial Guinea and Eritrea, the last two African countries that have not yet ratified become Parties to the Montreal Protocol.

Regional Office for Asia & the Pacific: Based on the non-compliance decisions of the 15th Meeting of the Parties, ROAP CAP will provide technical and policy assistance to those countries in actual or potential non-compliance to enable them to develop plans of action to ensure a prompt return to compliance, taking into consideration existing phase out strategies being implemented by the other Implementing Agencies.

Achieving compliance is not the same as sustaining compliance. Without the correct policies and legislation in place and without the commitment of all stakeholders, consumption can easily rise. Hence, CAP teams will develop an “early warning system” to inform the Parties of potential non-compliance situations and to assist countries to establish policies, legislation and regulations needed to comply with the control measures.

The ROAP CAP team will provide permanent capacity to backstop the operational activities to be conducted by countries and other Implementing Agencies and help strengthen the expertise

of local experts in each of the sectors. The team will take steps to improve North-South and South-South cooperation to add value to the work already going on in the region. The team will provide complementarity to the work of other agencies.

Recognizing that illegal trade could undermine the phase-out efforts undertaken by the countries in the region, the ROAP CAP team will address issues of illegal trade through awareness, information exchange, sub-regional cooperation and training.

Regional Office for Europe: Countries with economies in transition (CEITs) operating under Article 5 are distributed throughout the Pan-European region. They are surrounded by both CEITs operating under Article 2 and the developed countries members of the European Union. A blend of expertise and experience in all aspects of ODS phase-out is accumulated in the developed countries and some Article 5 countries in advanced stages of the implementation of the Montreal Protocol. This specific situation determines the focus of work of the CEECA Regional Network and services to be provided by the CAP team. The priority for the year 2004 will be to promote and enhance the regional cooperation, both within Article 5 group of countries and with Article 2 neighbours. Such cooperation will be crucial to tackle problems of common concern, in particular illegal trade. Collaboration with European Ministerial processes, including “Environment for Europe”, and various regional and sub-regional initiatives and organizations, such as the Balkans Stability Pact and the Central European Initiative, will be promoted with a view to raising the political profile and awareness of the Montreal Protocol objectives. The CAP team will facilitate direct country-to-country assistance to those countries facing immediate and long-term compliance challenges through exchange of experience with Network countries, establishment of contact groups and involvement of local experts. The CAP will complement, support and backstop the work of the other Implementing Agencies in the region in areas of its comparative advantage and expertise.

Regional Office for Latin America & the Caribbean: The implementation of Montreal Protocol should be driven collectively and mutually by national authorities, private sectors, NGO’s and other stakeholders given that all have important and critical roles and responsibilities in meeting and sustaining compliance. In this regard, sectorial institutional capacity building activities are focused on government officers, users of ODS and civil societies. Further, there are training and capacity building initiatives targeting the specific needs of countries and in particular those in non-compliance or having the potential of becoming into non compliance. In keeping with the theme of Sustainable Capacity Building, further initiatives will be taken to the strengthening of North-South and South-South Cooperation both interregional and intraregional, and preventing illegal trade of ODS and ODS-dependent technologies at the sub regional level.

Recognizing that this region comprises LVCs, non-LVCs and ODS-producing countries, many at different stages of implementation of the Montreal Protocol, the ROLAC CAP team will provide quality services and products aimed at strengthening and building capacities of targeted stakeholders in the countries, enabling them to comply with the provisions of the Montreal Protocol in a sustainable manner. With ODS trade restricted through national quota systems, a major effort will be directed at balancing the supply and demand side aspects of ODS phase-out strategies. All national policies and activities (i.e. legislation, enforcement, training, or awareness rising) will be synergized and improved with enhanced regional cooperation to

prevent illegal trade which will be crucial for a sustained compliance. Recognizing also, that there is a strong NGO presence in a number of countries in the region, the CAP team will leverage NGO expertise to assist the country strategies in the phase out. Due to physical proximity of some countries in the region to Antarctica, media awareness can be used as good tools for the protection of the ozone layer. The presence of experts from industry and governments will be used to promote local participation in phase out activities.

Regional Office for West Asia: The ROWA CAP team will assist with monitoring of ODS trade and prevention of illegal trade by using existing capacities in the region through coordination with regional organizations such as the Gulf Cooperation Council (GCC), League of Arab States (LAS), Regional Intelligence Liaison Office (RILO), and regional representative of the World Customs Organisation (WCO) for the North Africa, Near and Middle East to include ODS in the agendas of 2004 customs fora and exploring ways of monitoring trade of transit and deterring illegal ODS trade.

The team will also promote the use of hydrocarbons in the refrigeration and air conditioning (RAC) sector as an available alternative in the region. CAP will assist in the implementation of a comprehensive action plan for using the natural hydrocarbon resources in the region as a suitable alternative for ODS in the RAC sector. If this happens, it will help NOUs in the region to expedite the implementation of their strategies in phasing out the ODSs.

ROWA CAP will promote the formulation of unified regulations as a tool for enhancing the national legislations in the region. The CAP team will assist with the enactment of unified regulations for all GCC countries as some of them have to follow long procedures in order to enact their national legislation.

ROWA CAP will continue to assist countries and bilaterals in establishing a comprehensive regional strategy for halon management. In consultation with NOUs and relevant stakeholders, ROWA CAP concluded that some countries in the region will have difficulties in cutting their consumption of ODSs by 50% by January 2005. The lack of communication between NOUs and private sector on one side, and between countries on the other side, accounts for the absence of proper management in this ODS. Feedback from NOUs indicates that countries in the region assign importance to having a comprehensive regional strategy to organize the flow of available halons in the region between countries and to be in compliance with the obligations of Montreal Protocol.

Information Clearinghouse: UNEP Paris, in cooperation with the Regional CAP teams, Implementing Agencies and bilateral agencies, will continue its work to outreach the *Communication Strategy for Global Compliance with the Montreal Protocol* to NOUs and work with them to help ensure that the development of regional awareness projects and national awareness campaigns take place in the context of the strategy. In 2004, the UNEP clearinghouse will develop a guidance document based on the *Communication Strategy* to assist NOUs with taking a structured approach to information, education and communication (IEC) activities at the national level. The clearinghouse staff will also participate in small group Network meetings being organized by regional CAP teams to develop regional IEC strategies. As

required by Decision 41/99, in 2004 UNEP will make its second report to the 44th Executive Committee on results and progress made in implementing the strategy.

In 2004, the clearinghouse will offer prioritized information assistance to countries currently in potential or declared non-compliance, in cooperation with the Regional CAP teams, Implementing Agencies and bilateral agencies.

UNEP Paris will continue to work in cooperation with the Multilateral Fund Secretariat to harmonise information and outreach activities, and support the objectives of the Fund's *Information Strategy*. This will include promoting the "corporate image" of the Multilateral Fund as agreed with the Secretariat and the dissemination of information about the success stories/activities of other Implementing Agencies and bilateral agencies.

In addition to its ongoing core clearinghouse services (e.g. providing web sites, support for Ozone Day celebrations, conducting events and outreach activities, the OzonAction Newsletter, E-news services, query response including publication dissemination, production of CD-ROMs, development of printed outreach materials), in 2004, the clearinghouse will also:

- Initiate and/or develop on-line training initiative related to refrigeration servicing and customs training.
- Develop an electronic inventory of IEC products developed by NOUs and a contacts database of organizations with IEC expertise to promote sharing of ideas and resources between NOUs.
- Continue encouraging NOUs to mobilize resources for IEC (financial, human and intellectual) from multiple sources, and collect and disseminate examples from developed and developing countries.

B. PROGRAMME DEVELOPMENT

As indicated in Annex III to this Business Plan (Database), in the 2004-2006 period UNEP proposes project assistance for 99 Article 5 countries (of which 85 are classified as LVCs, 14 are non-LVCs, and 32 have been declared in non-compliance or potential non-compliance by the 15th Meeting of the Parties). This assistance comprises 329 ongoing and new projects valued at US\$ 42 million (including programme support costs) provided through the following types of non-investment projects:

- Preparation and updates of CPs/RMPs to help countries prepare, adopt and implement national compliance planning.
- Training related to RMP implementation in the areas of policy, customs and refrigeration technician training.
- Other training in specific technical and policy areas.
- Technical and policy assistance in specific areas: the CAP, implementation of non-investment components of National Compliance Assistance Plans (NCAPs), technical assistance and policy development related to methyl bromide alternatives, and regional and national awareness raising activities.

For the projects being proposed by UNEP for funding in 2004-6, the funding goes directly to countries with CAP staff providing the human resources required for implementation of the projects. The funding for such services provided by CAP staff is not requested in these projects.

In addition to the planned activities indicated in the database, UNEP anticipates that the 6 remaining non-Parties to the Montreal Protocol (see footnote 4 above) will become Parties during this triennium and that they will request assistance with CP/RMP formulation, IS projects and possibly other non-investment activities (particularly training related to RMP implementation). Accordingly, these may be potential additional Business Plan activities that UNEP will submit to the Executive Committee for individual consideration as and when the Parties approach UNEP for assistance.

III. PERFORMANCE INDICATORS

As per Decision 41/93, UNEP will use the following indicators in 2004:

A. APPROVAL INDICATORS

Item	Weighting	Target
Number of annual programmes of multi-year agreements approved vs. those planned, may not be applicable to UNEP	20	Not applicable to UNEP
Number of individual projects/activities (investment projects, RMPs, halon banks, TAS) approved vs. those planned	20	28 countries (i.e. 100%). UNEP believes that a realistic achievement is 17 countries (i.e. 60%).

B. IMPLEMENTATION INDICATORS

Item	Weighting	Target
Milestone activities completed (e.g. policy measures, regulatory assistance)/ODS levels achieved for approved multi-year annual tranches, may not be applicable to UNEP	20	Not applicable to UNEP
ODP phased-out for individual projects vs. those planned per progress reports, may not be applicable to UNEP	5	21.2 ODP tonnes from the IS project for Algeria (i.e. 100%)
Project completion (pursuant to decision 28/2 for investment projects) and as defined for non-investment projects vs. those planned in progress reports	5	38 projects (i.e. 100%)
Percentage of policy/regulatory assistance completed vs. that planned	10	11 projects (i.e. 100%). UNEP believes that a realistic achievement is 9 projects (i.e. 80%)

C. ADMINISTRATIVE INDICATORS

Item	Weighting	Target
Speed of financial completion vs. that required per progress report completion dates	10	100%
Timely submission of project completion reports vs. those agreed	5	Timely submission
Timely submission of progress reports and responses unless otherwise agreed	5	Timely submission

D. CAP INDICATORS

Indicator	Data	Assessment	Target
Usefulness of the regional network/thematic meetings	Average of all ratings by network meeting participants	Average versus maximum rating	Overall average of 3 on a 5-point scale.
Assistance to countries for data reporting for the purpose of establishing baselines	Number of countries with missing data that received specific CAP assistance for data reporting in order to determine compliance baselines. UNEP should give a clear indication of the assistance provided per Decision 40/11(b)(i)	Proportion of countries receiving assistance that subsequently provided data pursuant to Article 7	All 9 countries with missing baselines (as of January 2004) that accept CAP assistance.
Assistance with Article 7 data reporting	Number of countries reporting data in compliance with Article 7 of the Protocol pursuant to Decision 40/11(b)(ii)	Proportion of countries accepting assistance that achieved compliance	100% of all Article 5 countries that accept CAP assistance will have achieved compliance with Article 7 reporting requirements. UNEP believes that a realistic achievement is 114 countries (i.e. 80%)
Countries in actual or potential non-compliance as per MOP decisions	Number of countries offered assistance under the CAP and number of countries that accepted assistance (after consultations with other implementing and bilateral agencies) and received CAP special assistance outside of Network meetings listing the countries and type of assistance	Proportion of countries accepting assistance that achieved compliance	39 countries in non-compliance as per MOP XV that accept CAP assistance will be in compliance. UNEP believes that a realistic achievement is 29 countries (i.e. 75%)
Countries at risk of becoming in non-compliance as per Article 7 data trends	Number of countries offered assistance under the CAP including those countries not yet officially declared in non-compliance but where data indicate as much and number of countries that accepted the offered assistance (after consultations with the other implementing and bilateral agencies) and received CAP special	Number of countries provided special assistance outside of Network meetings as a proportion of the number of countries that appeared to be in non-compliance.	All countries identified as in risk of non-compliance and that accepted CAP assistance to be provided specific assistance by CAP (outside of network meetings) UNEP believes that a realistic achievement is 80%.

Indicator	Data	Assessment	Target
	assistance outside of network meetings, listing the countries and type of assistance.		
Information clearing-house	(a) Number of newsletter subscriptions (b) Number of discrete visitors (IP addresses) to the web site (c) Number of PDF documents downloaded from website (d) Number of hardcopy publications disseminated (e) Number of query responses responded to; Average time for response	Comparison with previous years' data.	The following will be based on reported figures in 2003 Progress Report: (a) 5% increase in subscriptions compared to 2003. (b) 10% increase in visitors compared to 2003. (c) 10% increase in downloads compared to 2003. (d) 5% increase documents disseminated compared to 2003. (e) 10% increase in queries compared to 2003; 10 working days of receipt of query.

IV. POLICY ISSUES

None.

V. ADMINISTRATIVE AND FINANCIAL MATTERS

None.

Annex I: Country-by-Country Activities to be Implemented by CAP Staff in 2004

Country	Name of service/project	CAP assistance with ongoing approved projects	Special CAP compliance service	Anticipated CAP missions	CAP support for work of other IAs, Secretariats & bilateral agencies	Comments from other agencies
Afghanistan (non-Party)	Assistance with ratification of the Ozone Treaties and Amendments		X			
Afghanistan (non-Party)	High level mission of Regional Director/Branch Head		X	X		
Albania	Joint mission with UNIDO to assist in compliance issues		X	X	X	
Albania	National ODS phase-out plan: training of customs officers in monitoring of ODS	ALB/PHA/39/TRA/06		X		
Albania	National ODS phase-out plan: training of trainers in good practices of refrigeration	ALB/PHA/39/TRA/07		X		
Albania	Establishment of the Ozone Unit (second year)	ALB/SEV/38/INS/04				
Algeria	Renewal of institutional strengthening project (Phase 3)	ALG/SEV/37/INS/54				
Algeria	Assistance with search for alternatives to methyl bromide		X	X	X	
Algeria	Assistance in CTC and TCA phase out		X			
Algeria	Advice on ratification of pending Amendments (Montreal, Beijing)		X			
Angola	Advise country on ratification of all Amendments to Protocol		X		X	
Antigua and Barbuda	Training and Capacity building of New Assistant of Ozone Officer		X			
Antigua and Barbuda	Follow up on ODS data reporting. (Art 7)		X			
Antigua and Barbuda	Mission to monitor IS project implementation.		X	X		
Antigua and Barbuda	Assistance with ratification of Beijing Amendment.		X			
Antigua and Barbuda	Technical assistance and training for managing the IS and TPMP		X		X	
Antigua and Barbuda	Technical assistance, including awareness generation in the servicing and end-user sectors.		X			
Antigua and Barbuda	Renewal of institutional strengthening project	ANT/SEV/38/INS/07				
Argentina	Mission to support training and public awareness activities		X	X		
Argentina	Technical assistance, including awareness generation in the servicing and end-user sectors.		X			
Armenia	Technical assistance for the finalisation and implementation of the Country Programme in cooperation with UNDP; joint mission with UNDP		X	X	X	
Armenia	Policy and technical support to NOU and ODS Officer		X			
Armenia	Assistance in developing legislation and licensing system		X			
Armenia	Assistance in developing and implementing national awareness strategy for ODS phase out		X	X		
Bahamas	Extension of institutional strengthening project: phase 2 (one year)	BHA/SEV/39/INS/09				
Bahamas	Policy assistance with licensing system based on discussions with the country and the World Bank.		X	X	X	
Bahamas	Mission to monitor IS project implementation.		X	X		
Bahamas	In cooperation with World Bank and Ozone Secretariat' providing Technical Assistance for the management of Action Plan to return to compliance.		X	X	X	
Bahamas	Training and Capacity building of New Assistant of Ozone Officer		X			
Bahamas	Follow up on ODS data reporting (Art 7)		X			
Bahamas	Mission for assistance with ratification of Montreal and Beijing Amendments and ODS legislation approval		X	X		
Bahamas	Technical assistance especially on what to do with contaminated controlled substances that are not reusable and obsolete equipment.		X			
Bahamas	Continued awareness generation in the servicing and end-user sectors		X			
Bahamas	Technical assistance for CTC phase out by means of the NOO's participation in a thematic workshop about alternatives to solvents sector		X			
Bahrain	Follow-up on legislation implementation for the 2005 cut-off		X			
Bahrain	Ratification: Continue close cooperation with GCC Secretariat & other relevant organisations to assist in ratification of Beijing amendment		X			
Bahrain	Compliance: Close support in reviewing Article 7 reporting		X			
Bahrain	Halon Management: Coordination with GTZ and country's stake-holders in expediting the operation of the mobile R&R center for Halon		X		X	
Bahrain	Provide necessary policy and technical support to the new ODS Officer.		X			
Bahrain	Provide necessary support to implement IS / Phase 3	BAH/SEV/41/INS/				
Bangladesh	Provide technical and policy assistance to the NCAP being implemented by UNDP.		X		X	
Bangladesh	Assist Ozone Secretariat in following up on the action plan for compliance pursuant to MOP Decision XIV/29		X		X	
Bangladesh	Mission for follow up of action plan and implementation of non-investment component of NCAP		X	X		
Barbados	Mission for RMP launching and encouraging political sector with the continued development and implementation of ODS legislation.		X	X		
Barbados	Mission to monitor IS and RMP project implementation.		X	X		
Barbados	Technical assistance and training for managing the IS.		X			
Barbados	Assistance in the formulation of a Refrigeration Industry Association.		X			
Barbados	Technical assistance for preparation of IS renewal reports.		X			
Barbados	Advise on RMP project document to be submitted to 42nd Ex.Com.		X			
Barbados	Technical assistance and follow up for RMP project implementation (when approved).		X			
Barbados	Technical assistance, including awareness generation in the servicing and end-user sectors.		X			
Barbados	Follow up on ODS data reporting (Art 7)		X			
Barbados	Workshop training to phosphine application as an alternative to methyl bromide		X			
Barbados	Training and Capacity building of New Ozone Officer		X			
Belize	Mission to monitor IS and RMP project implementation.		X	X		
Belize	Assistance with ratification of Montreal and Beijing Amendments		X			

Country	Name of service/project	CAP assistance with ongoing approved projects	Special CAP compliance service	Anticipated CAP missions	CAP support for work of other IAs, Secretariats & bilateral agencies	Comments from other agencies
Belize	Assistance for monitoring results of RMP implementation.		X			
Belize	Technical assistance and follow up for implementation of the RMP Phase II (when approved).		X			
Belize	Technical assistance, including awareness generation in the servicing and end-user sectors.		X			
Belize	Extension of institutional strengthening project	BZE/SEV/40/INS/07				
Belize	RMP update	BZE/REF/41/PRP/		X		
Benin	Assist in completing RMP activities and preparation of RMP review.		X	X		
Benin	Renewal of institutional strengthening project	BEN/SEV/40/INS/14				
Bhutan (non-Party)	Assistance with ratification of the Ozone Treaties and Amendments		X		X	
Bolivia	Follow up on ODS data reporting (Art 7)		X			
Bolivia	Mission for assistance with ratification of Beijing Amendment and ODS legislation enforcement coordinated with Environment Canada/UNDP.		X	X	X	
Bolivia	Mission to monitor IS project implementation.		X	X		
Bolivia	Assist Ozone Secretariat to follow up the Action Plan to return to compliance submitted in pursuance of XIV MOP Decisions.		X			
Bolivia	Technical assistance, including awareness generation in the servicing and end-user sectors.		X			
Bolivia	Extension of the institutional strengthening project	BOL/SEV/40/INS/24				
Bolivia	Technical assistance for CTC phase out by means of the NOO's participation in a thematic workshop about alternatives to solvents sector		X			
Bosnia and Herzegovina	Technical assistance in methyl bromide issues in cooperation with UNIDO		X		X	
Bosnia and Herzegovina	Support to the implementation of NPOP of UNIDO		X		X	
Botswana	Assist in setting up ODS related regulations, including licensing system.		X	X	X	
Botswana	IS renewal Phase 2	BOT/SEV/41/INS/				
Brazil	Assistance with ratification of Montreal and Beijing Amendment .		X			
Brazil	Policy and technical assistance, including public awareness generation and building capacity for Government Officers		X			Brazil is being assisted by UNDP through its IS project and its National Phase Out Plan. As a result, UNDP understands that any additional CAP assistance on this area would be provided upon request of the country, covered through CAP funding and in coordination with UNDP to avoid overlaps or work duplication.
Brunei Darussalam	Mission for RMP implementation and monitoring		X	X		
Burkina Faso	Assist NOU in implementing activities to involve the army the police and environmental inspectors in the phase out Programme		X	X		
Burkina Faso	Renewal of institutional strengthening project (phase 5)	BKF/SEV/38/INS/15				
Burundi	Assist the country in enforcing ODS regulations		X	X		
Burundi	Renewal of institutional strengthening project (Phase II)	BDI/SEV/37/INS/11				
Burundi	RMP refrigeration	BDI/REF/41/TRA/		X		
Burundi	RMP customs	BDI/REF/41/TAS/		X		
Cambodia	Provide technical and policy assistance related to NCAP implementation		X			
Cambodia	Mission in the areas of training/policy assistance and customs training		X	X		
Cambodia	Mission for refrigeration servicing training.		X	X		
Cambodia	Establishment of the Ozone Unit	KAM/SEV/36/INS/03				
Cambodia	IS Phase 1 (2 years)	KAM/SEV/41/INS				
Cambodia	RMP customs	KAM/REF/41/TAS				
Cambodia	RMP monitoring	KAM/REF/41/TAS				
Cambodia	RMP refrigeration	KAM/REF/41/TRA				
Cameroon	Assist the country in implementation of RMP and enforcing ODS regulations, as well as meeting the freeze requirement in methyl bromide and Halon consumption		X	X		
Cameroon	Policy and technical assistance	CMR/SEV/37/TAS/17		X		
Cameroon	IS renewal Phase 4 (1 year)	CMR/SEV/41/INS/				
Cape Verde	Advice and assistance during the preparation and to speed up the implementation of CP/RMP in order to meet the freeze requirements.		X	X	X	
Cape Verde	Establishment of the Ozone Unit	CBI/SEV/36/INS/02				
Central African Republic	Assistance in implementation of delayed RMP activities and prepare the review of RMP.		X	X		

Country	Name of service/project	CAP assistance with ongoing approved projects	Special CAP compliance service	Anticipated CAP missions	CAP support for work of other IAs, Secretariats & bilateral agencies	Comments from other agencies
Central African Republic	Extension of institutional strengthening project	CAF/SEV/38/INS/12				
Chad	Assistance in preparation of RMP review in line with needs.		X	X		
Chile	High level mission to promote licensing system and other ODS legislation approval coordinated with Environment Canada and Ozone Secretariat.		X	X	X	
Chile	Mission to monitor RMP project implementation.		X	X		
Chile	Technical and policy assistance for methy bromide phase-out		X			Chile is being assisted by UNDP through an MBR Phase Out project. The World Bank's 2004 BP includes a project that will complement UNDP's ongoing phase-out project. As a result, UNDP understands that any additional CAP assistance on this area would be provided upon request of the country, covered through CAP funding and in coordination with UNDP to avoid overlaps or work duplication.
Chile	Technical assistance, including awareness generation in the servicing and end-user sectors.		X			
Chile	Implementation of the RMP: enabling a control and regulatory network	CHI/REF/35/TAS/146				
Chile	Implementation of the RMP: end-users and public awareness programme	CHI/REF/35/TAS/148				
Chile	Implementation of the RMP: monitoring, evaluation and reporting of the activities in the RMP	CHI/REF/35/TAS/149				
China	Technical Assistance, including policy assistance in implementing the methyl bromide strategy with UNIDO		X	X	X	
China	Participation in Ozone day celebrations		X			
China	China delegation to visit Bangkok office to review the progress of the implementation of policy training strategy		X			
China	Policy training for local authorities (second tranche) - 2 workshops	CPR/SEV/37/TRA/392	X		X	
Colombia	Technical assistance especially on what to do with contaminated controlled substances that are not reusable and obsolete equipment.		X			
Colombia	Training Programme for custom officers	COL/REF/35/TRA/52	X			
Colombia	Continued awareness generation in the servicing and end-user sectors		X			Colombia is being assisted by UNDP through its IS project and its National Phase Out Plan. As a result, UNDP understands that any additional CAP assistance on this area would be provided upon request of the country, covered through CAP funding and in coordination with UNDP to avoid overlaps or work duplication.
Colombia	Policy assistance to prevent ODS illegal trade		X			
Colombia	Assistance with ratification of Beijing Amendment.		X			
Comoros	Assistance in completing RPM activities and report to ExCom		X	X		
Comoros	Extension of institutional strengthening project (phase 3)	COI/SEV/39/INS/09				
Congo	Assistance in harmonising regulations with CEMAC countries, and advise NOU in implementation of activities under RMP review		X	X		
Congo	Extension of institutional strengthening project (phase 3)	PRC/SEV/39/INS/10				
Congo, Democratic Republic of	Assistance in implementation of RMP		X	X		
Congo, Democratic Republic of	Assistance in CTC phase out		X			
Congo, Democratic Republic of	Advice on meeting freeze requirement for methyl bromide and halons		X			
Cook Islands	Assistance with preparation of National Compliance Action Plan (via SPREP and NZ) and with implementation of 15th MOP Decision XV/16		X		X	
Costa Rica	Assistance with ratification of Montreal and Beijing Amendments.		X			
Costa Rica	Technical assistance, including awareness generation in the servicing and end-user sectors.		X			Costa Rica is being assisted by UNDP through its IS project and its Refrigerant Management Plan. As a result, UNDP understands that any additional CAP assistance on this area would be provided upon request of the country, covered through CAP funding and in coordination with UNDP to avoid overlaps or work duplication.
Côte d'Ivoire	Assistance in preparation of RMP review and implementation of additional activities.		X	X		
Croatia	Renewal of institutional strengthening projects (Phase III)	CRO/SEV/36/INS/17				
Croatia	IS renewal Phase 4	CRO/41/SEV/INS/				

Country	Name of service/project	CAP assistance with ongoing approved projects	Special CAP compliance service	Anticipated CAP missions	CAP support for work of other IAs, Secretariats & bilateral agencies	Comments from other agencies
Cuba	Supporting the sub-regional Meeting adding institutional component to the International Conference on Alternatives to methyl bromide		X	X		
Cuba	Technical assistance to identify ways for phasing out CFC at the end-user sector.		X			
Cyprus	Encourage participation in Network meetings and sharing experiences with other network countries		X			
Djibouti	Assist in country in expediting implementation of RMP activities.		X	X		
Djibouti	Implementation of the RMP: customs training	DJI/REF/37/TRA/04		X		
Djibouti	Implementation of the RMP: training in good practices of refrigeration	DJI/REF/37/TRA/05		X		
Djibouti	Implementation of the RMP: assistance to establish legislation	DJI/REF/37/TRA/08		X		
Djibouti	Establishment of the Ozone Unit (institutional strengthening)	DJI/SEV/37/INS/06				
Dominica	Training and Capacity Building of New Ozone Officers.		X			
Dominica	Assist in the development and implementation of ODS legislation.		X			
Dominica	Mission to provide policy support for Montreal Protocol implementation.		X	X		
Dominica	Mission for the promotion of Good Practices in Refrigeration Servicing and for assistance in the formulation of a Refrigeration Industry Association.		X	X		
Dominica	Assistance in the preparation of the Action Plan to return to compliance (when required by MOP).		X			
Dominica	Technical assistance for preparation of IS renewal reports.		X			
Dominica	Assistance with ratification of the Copenhagen, Montreal and Beijing Amendments.		X			
Dominica	Assistance for RMP update and monitoring results of RMP implementation.		X			
Dominica	Technical assistance and follow up for implementation of the RMP Phase II (when approved).		X			
Dominica	Technical assistance, including awareness generation in the servicing and end-user sectors.		X			
Dominica	Follow up on ODS data reporting (Art 7)		X			
Dominica	Training and Capacity Building of New Ozone Officers		X			
Dominican Republic	Follow up on ODS data reporting (Art 7)		X			
Dominican Republic	Technical Assistance to review ODS legislation and measures to control imports and prevent illegal trade, in coordination with UNDP.		X		X	
Dominican Republic	Mission to monitor progress implementation of project "Policy and Technical Assistance".	DOM/SEV/37/TAS/31	X	X		
Dominican Republic	Assistance with ratification of Montreal and Beijing Amendments.		X			
Dominican Republic	Technical assistance, including awareness generation in the servicing sectors.		X			Dominican Republic is being assisted by UNDP through its Servicing Sector Plan and by UNEP through its IS. As a result, UNDP understands that any additional CAP assistance on the servicing sector would be provided in coordination with UNDP to avoid overlaps or work duplication.
Dominican Republic	Policy and technical assistance	DOM/SEV/37/TAS/31				
Dominican Republic	Extension of institutional strengthening project (phase 3)	DOM/SEV/39/INS/34				
DR Congo	RMP customs	DRC/REF/41/TAS		X		
DR Congo	RMP refrigeration	DRC/REF/41/TRA		X		
DR Congo	RMP monitoring	DRC/REF/41/TAS				
East Timor (non-Party)	Assistance with ratification of the Ozone Treaties and Amendments		X			
East Timor (non-Party)	Country Visit by Regional Director/Branch Head		X	X		
Ecuador	Assistance with ratification of Montreal and Beijing Amendments.		X			
Ecuador	Technical assistance, including awareness generation in the servicing sectors.		X			
Ecuador	Encourage participation in Network meetings and sharing experiences with other network countries.		X			
Egypt	Encourage the country to fully participate in all network activities.		X			
El Salvador	Country mission to provide assistance with methyl bromide monitoring and training to support the phase out as consumption is less than 10 tonnes.		X	X		
El Salvador	Assistance with ratification of Beijing Amendment.		X			
El Salvador	Technical assistance, including awareness generation in the servicing sectors.		X			El Salvador is being assisted by UNDP through its Refrigerant Management Plan. As a result, UNDP understands that any additional CAP assistance on the service sector would be provided upon request of the country, covered through CAP funding and in coordination with UNDP to avoid overlaps or work duplication.
El Salvador	Renewal of institutional strengthening project	ELS/SEV/38/INS/12				

Country	Name of service/project	CAP assistance with ongoing approved projects	Special CAP compliance service	Anticipated CAP missions	CAP support for work of other IAs, Secretariats & bilateral agencies	Comments from other agencies
Equatorial Guinea (Non-Party)	Advise government on implication of being non-party and guide in ratification process enlisting support of ROA Director.		X	X		
Eritrea (Non-Party)	Advise government on implication of being non-party and actively involve RD in this process.		X	X		
Ethiopia	Assistance in setting and enforcement of ODS regulations and completing RMP		X	X	X	
Ethiopia	Extension of institutional strengthening project for a one year period (phase 3)	ETH/SEV/39/INS/11				
Ethiopia	Assistance in CTC and TCA phase out		X			
Ethiopia	IS renewal Phase 4	ETH/SEV/41/INS/				
Fiji	Monitoring results of RMP implementation		X			
Fiji	Assistance with methyl bromide phase out as consumption less than 10 tonnes		X			
Fiji	One methyl bromide mission as Fiji is in potential non-compliance, and assistance with QPS/non-QPS definitions		X			
Fiji	Preparation of NCAP		X			
Fiji	Renewal of institutional strengthening project (Phase III)	FIJ/SEV/37/INS/08				
Gabon	Advise NOU on co-ordination and enforcement of quotas system as well as harmonising regulation within CEMAC system.		X	X		
Gabon	Renewal of institutional strengthening project (Phase III)	GAB/SEV/37/INS/10				
Gabon	RMP refrigeration	GAB/REF/41/TRA/		X		
Gabon	RMP customs	GAB/REF/41/TAS/		X		
Gambia	Advice and assistance on ratification of Amendments (Copenhagen, Montreal, Beijing)		X	X		
Gambia	IS renewal Phase 3	GAM/SEV/41/INS/				
Georgia	Advice on ratification of Beijing Amendment		X			
Georgia	Extension of institutional strengthening project (phase 3)	GEO/SEV/39/INS/14				
Ghana	Advise country on keeping momentum with phase out-schedule		X			
Grenada	Mission for encouraging political sector with the continued development and implementation of ODS legislation.		X	X		
Grenada	Mission to provide policy support for Montreal Protocol implementation.		X	X		
Grenada	Mission for the promotion of Good Practices in Refrigeration Servicing and for assistance in the formulation of a Refrigeration Industry Association.		X	X		
Grenada	Follow up on ODS data reporting (Art 7)		X			
Grenada	Assistance in the preparation of the Action plan to return to compliance (when required by MOP).		X			
Grenada	Technical assistance and training for managing the IS.		X			
Grenada	Assistance for RMP update and monitoring results of RMP implementation.		X			
Grenada	Technical assistance, including awareness generation in the servicing sectors.		X			
Grenada	Training and Capacity Building of New Ozone Officer		X			
Guatemala	Mission to provide policy assistance in implementing the methyl bromide strategy in coordination with UNIDO.		X	X	X	
Guatemala	Mission to monitor IS and RMP project implementation.		X	X		
Guatemala	Assist Ozone Secretariat in following up of the action plan to return to compliance submitted in pursuance of XIV MOP Decisions.		X			
Guatemala	Technical assistance, including awareness generation in the servicing sectors.		X			
Guatemala	Implementation of the RMP: customs training programme	GUA/REF/35/TRA/27				
Guatemala	Implementation of the RMP: establishment of licensing system	GUA/REF/35/TAS/23				
Guatemala	Implementation of the RMP: establishment and enforcement of legislation	GUA/REF/35/TAS/26				
Guatemala	Implementation of the RMP: monitoring the activities in the RMP	GUA/REF/35/TAS/25				
Guatemala	Implementation of the RMP: alternatives to the use of CFC-12 in the refrigeration sector	GUA/REF/35/TAS/24				
Guatemala	Renewal of the institutional strengthening project	GUA/SEV/35/INS/28				
Guatemala	Follow up on ODS data reporting (Art 7)		X			
Guinea	Assist NOU in revision and implementation of new RMP activities		X	X		
Guinea	Preparation of an RMP update in coordination with UNDP	GUI/REF/39/PRP/09		X	X	
Guinea	IS renewal Phase 4	GUI/SEV/41/INS/				
Guinea-Bissau	Assistance in implementation of RMP activities and in expediting establishment of legislation		X	X		
Guinea-Bissau	Formulation of the country programme/RMP (in coordination with UNDP on the RMP)	GBS/SEV/39/PRP/03		X	X	
Guinea-Bissau	Establishment of ozone unit	GBS/SEV/39/INS/01				
Guyana	Training and capacity building of new Ozone Officers		X			
Guyana	Follow up on ODS data reporting. (Art 7)		X			
Guyana	Mission to monitor IS and RMP project implementation.		X	X		
Guyana	Technical assistance for managing the IS.		X			
Guyana	Assistance with ratification of Beijing Amendment.		X			
Guyana	Technical assistance, including awareness generation in the servicing sectors.		X			
Guyana	Encourage participation in Network meetings and sharing experiences with other network countries.		X			
Guyana	Implementation of the RMP: assistance for implementation of additional activities in the RMP	GUY/REF/35/TAS/10		X		
Haiti	Training and Capacity Building of New Ozone Officers.		X			

Country	Name of service/project	CAP assistance with ongoing approved projects	Special CAP compliance service	Anticipated CAP missions	CAP support for work of other IAs, Secretariats & bilateral agencies	Comments from other agencies
Haiti	Assistance with developing a licensing system and strengthening country consultation process on possible illegal trade with bordering country.		X			
Haiti	Mission for encouraging political sector with approval and implementation of ODS legislation.		X	X		
Haiti	Mission to monitor IS and RMP project implementation.		X	X		
Haiti	Assistance with ODS data reporting as per 40 ExCom and follow up to Article 7 report		X			
Haiti	Assistance in the preparation of the action plan to return to compliance (when required by MOP) and in expediting establishment of legislation		X			
Haiti	Assistance with ratification of Beijing Amendment.		X			
Haiti	Technical assistance, including awareness generation in the servicing sectors.		X			
Haiti	Workshop on Good Practices in Refrigeration		X			
Haiti	Implementation of the refrigerant management plan: train the technicians on good practices in refrigeration	HAI/REF/39/TRA/05				
Haiti	Implementation of the refrigerant management plan: training for customs officers	HAI/REF/39/TRA/07		X		
Haiti	Establishment of the Ozone Unit	HAI/SEV/38/INS/03				
Haiti	Technical assistance for TCA phase out by means of the NOO's participation in a thematic workshop about alternatives to solvents sector		X			
Honduras	Mission to provide policy assistance in implementing the methyl bromide strategy in coordination with UNIDO.		X	X	X	
Honduras	Mission to monitor IS and RMP project implementation.		X	X		
Honduras	Assist Ozone Secretariat in following up of the Action Plan to return to compliance (when required by MOP).		X		X	
Honduras	Assistance with ratification of Montreal and Beijing Amendments.		X			
Honduras	Assistance for monitoring results of RMP implementation.		X			
Honduras	Technical assistance, including awareness generation in the servicing sectors.		X			
Honduras	Extension of institutional strengthening project	HON/SEV/40/INS/11				
Honduras	RMP update in coordination with UNDP	HON/REF/41/PRP/		X	X	
Honduras	Follow up on ODS data reporting (Art 7)		X			
India	Technical Assistance to manage the PMU under the CFC production phase out project		X		X	
India	Technical assistance, including awareness generation in the servicing sectors		X		X	
India	Implementation of the policy training strategy		X			
India	Technical assistance on methyl bromide issues		X		X	
India	Participate in two supervision missions of the WB		X	X	X	
India	One servicing sector mission (technician training related)		X	X		
India	One awareness generation mission for servicing sector		X	X		
India	One methyl bromide mission jointly with UNIDO		X	X	X	
India	Finalise implementation strategy for the policy training project		X			
Indonesia	Policy assistance with improvement to existing licensing system based on discussions with the country and the World Bank		X		X	
Iran	Policy assistance with implementing the newly established licensing system		X			
Iran	Implement the policy component of the approved CFC NPP being coordinated by GTZ		X		X	
Iran	Participation in initiation mission for the Enforcement Unit		X	X		
Iran	Participation in awareness generation workshop as part of NPP		X			
Iran	Preparation of country programme update	IRA/SEV/36/CPG/145			X	
Iraq (non-Party)	Assistance with ratification of the Ozone Treaties and amendments		X	X		
Iraq (non-Party)	Assistance with preparation of Country Programme.		X	X		
Iraq (non-Party)	Assistance with establishment of NOU.		X	X		
Jamaica	Training and Capacity Building of New Assistant of the Ozone Officer.		X			
Jamaica	Technical assistance for CTC phase out by means of the NOO's participation in a thematic workshop about alternatives to solvents sector		X			
Jamaica	Workshop training to phosphine application as an alternative to methyl bromide		X	X		
Jamaica	Technical assistance, including awareness generation in the servicing sectors.		X			Jamaica has TPMP with the Government of Canada and UNDP. As a result, UNDP requests that any additional services to be provided should be first coordinated through these agencies.
Jamaica	Extension of institutional strengthening project	JAM/SEV/40/INS/19				
Jordan	Policies: (Country expected to comply smoothly with 2005 cut-off)		X			
Jordan	Ratification: (Country ratified all amendments)		X			
Jordan	Compliance: Follow-up in Article 7 and other reporting (Country expected to submit their report on time as usual)		X			
Jordan	Halon Management: Coordination with the World Bank in following up implementation of the National Halon Bank.		X	X	X	
Jordan	Coordination with the UNIDO in following-up implementation of RMP		X		X	
Jordan	Possible visit for the Chillers Replacement plan by RMP Officer.		X	X		

Country	Name of service/project	CAP assistance with ongoing approved projects	Special CAP compliance service	Anticipated CAP missions	CAP support for work of other IAs, Secretariats & bilateral agencies	Comments from other agencies

ANNEX IV: LOGICAL FRAMEWORK ANALYSES (LFAs) FOR CAP

LOGICAL FRAMEWORK ANALYSIS FOR ROA

Objectives	Activities	Expected Results	Performance Indicator	Assumptions/ Risks
LONG TERM OBJECTIVE FOR AFRICA REGION				
Assist countries in the region meet the various levels of freeze and further reductions in ODS consumption.	Provide countries with regular updates on the various compliance requirements and each country's status towards these requirements.	Countries in the Africa region should be in compliance with the phase out requirements as per the schedules set by the Montreal Protocol	Number of countries in compliance.	<ul style="list-style-type: none"> ▪ Frequent change of ODS Officers in some countries. ▪ Import of obsolete equipment from Article 2 countries.
CAP OBJECTIVES FOR THE YEAR 2004				
Assist African countries in Enforcing control measures to regulate the import and use of ODS and ODS-based equipment	<ul style="list-style-type: none"> ▪ Review the status of regulations in the Africa region, ▪ Facilitate exchange of experience between NOU on development and enforcement of ODS regulations and related policy measures, ▪ Assist countries in implementing training programmes for enforcement officers at national and sub-regional levels. 	Specific ODS related regulations in place and mechanisms in place for their enforcement by appropriate government bodies.	Number of countries with ODS related regulations being enforced by end of 2004,	Resistance to enactment and enforcement of ODS regulation by market forces (cost of alternatives, cost of non-ODS equipment, international and regional trade agreements).
Assist countries in non-compliance or in danger of being in non-compliance with setting up mechanisms for compiling reliable data on ODS import and consumption	<ul style="list-style-type: none"> ▪ Review country profile on a regular basis for all countries in the region. ▪ Liaison with NOU and visit in countries in non-compliance to discuss reasons of non compliance and ways of return to compliance. ▪ Regular liaison with Ozone 	Countries return to compliance	Number of countries in compliance with phase-out schedule.	Countries that became parties recently find it difficult to meet compliance requirement immediately.

Objectives	Activities	Expected Results	Performance Indicator	Assumptions/ Risks
	<p>Secretariat on data reports from countries in the region</p>			
<p>Assist African countries in expediting phase-out activities in line with the compliance requirements.</p>	<ul style="list-style-type: none"> ▪ Complete the process for RMP preparation/review for new parties. ▪ Expedite the process for implementation of training activities (including administrative procedures and scheduling of workshops). 	<p>All training activities approved in 2003 to be completed by end of 2004</p>	<p>Number technicians and enforcement officers trained in 2004.</p>	<p>Limited capacities of newly formed NOU to follow a speedy process.</p>
<p>Encourage and assist parties to ratify the various amendments to the Montreal Protocol</p>	<ul style="list-style-type: none"> ▪ Various fora will be used to sensitize decision-makers, including meetings of the African Ministerial Conference on the Environment (AMCEN, and fora of the New Partnership for Africa's Development (NEPAD). ▪ Visit to some countries with the support of the Regional Director. 	<p>Many African countries would have ratified the amendments to the Protocol</p>	<p>Number of country that ratify amendment to Montreal Protocol during the year.</p>	<p>Frequent changes in country's administration and lack of follow-up of ratification process.</p>
<p>Encourage and assist non-parties to ratify the Vienna Convention the Montreal Protocol and its amendments (Equatorial Guinea, Eritrea).</p>	<p>Various fora will be used to sensitize decision-makers, including AMCEN meetings visit to some countries with the support of the Regional Director.</p>	<p>All remaining African non-Parties to have ratified the protocol by end of 2004.</p>	<p>Number of African countries Parties to the Protocol</p>	<p>Frequent changes in country's administration and lack of follow-up of ratification process.</p>

LOGICAL FRAMEWORK ANALYSIS FOR ROAP

	Narrative Summary (NS)	Verifiable Indicators (VI)	Means of Verification (MOV)	Important Assumptions
Development Objective	Strengthen the capacity of network countries' governments for sustained phase out of the consumption and production of ozone depleting substances as early as possible, with each country's compliance with the upcoming obligations prescribed in the Montreal Protocol and its Amendments (e.g. freeze of halons and methyl bromide starting 2002, 50% reduction in CFC consumption and 20 percent reduction in MB consumption by 2005)	Consumption and production of ozone depleting substances by the Network member countries should not be higher than the limits set in the Montreal Protocol and its Amendments.	Annual reports on ODS imports, exports, and consumption and production provided by Network members to UNEP and the Ozone Secretariat.	Montreal Protocol targets will not be relaxed and so will continue to be a driving force for ODS phase out efforts globally; developed countries will continue to support ODS phase out efforts in Article 5 countries, both through the Multilateral Fund mechanism and bilaterally; funds will be available to undertake investment projects; Governments will remain Parties to the Montreal Protocol and in compliance with its provisions.
CAP Objective	<ol style="list-style-type: none"> 1. Facilitate better demand – supply management (since 2 largest producers are in the region) at the national level. 2. Assist in the development and monitoring of the implementation of appropriate and timely policies, strategies, programmes, and projects to control and reduce the use of ODSs (e.g. in Small and Medium Enterprises (SMEs), in refrigeration and air-conditioning servicing sector, methyl bromide sector etc.). 3. Harmonise all national policy activities especially legislation, enforcement, training, or awareness raising to promote early compliance with the Montreal Protocol and prevent illegal trade. 4. To encourage countries that have newly ratified the Montreal Protocol and its amendments to put in place national phase out plans for compliance. 5. To continue to encourage the ratification of the remaining countries who have not yet ratified the Protocol and its Amendments 6. To get all approved projects implemented on 	<ol style="list-style-type: none"> 1. Network countries implement effective export – import licensing and quota systems. 2. Network countries implement ODS phase out activities that are achievable, efficient, and well adapted to the conditions in the Network countries. 3. Art. 7 reporting shows consumption and production below the MP control measures, reports submitted by countries under Decision XIV/7 show increase in activities to combat 	Country reports presented by ODS Officers at the network meetings. Appropriate rules and regulations issued by Network countries.	Governments adopt the recommended strategies and programmes and issue relevant regulations to support the initiatives; other government agencies will implement programmes devised jointly with ODS Units.

	Narrative Summary (NS)	Verifiable Indicators (VI)	Means of Verification (MOV)	Important Assumptions
	time	4. illegal trade Countries report to the Ozone Secretariat conform Decision XIV/7 para 7 of the 14th MOP		
Results	<ol style="list-style-type: none"> 1. Improved capabilities and technical skills of ODS Officers to effectively implement their currently ongoing ODS phase out programmes, and design new areas of work depending on their remaining needs to fully meet compliance. 2. Strengthened capacities of the national stakeholders in addressing issues of meeting their obligations to the national phase out targets set. 3. Increased high level political commitment to the Montreal Protocol process through ratification of the remaining amendments, and a national commitment to Protocol targets. 4. All network member countries report their Article 7 data, and all countries are in compliance/returning compliance, more countries ratified the amendments/Protocol 5. Project being implemented on time 	<ol style="list-style-type: none"> 1) Number of appropriate and timely ODS phase out initiatives recommended and/or undertaken by the National ODS Units and attributable to the project; 2) Extent to which experience achieved through the network is used in the adoption and adjustment of ODS phase out strategies by network counties 	<ol style="list-style-type: none"> 1) Country reports presented by ODS Officers at the network meetings 3) Ratification Status from the Ozone Secretariat 4) Number of countries reported Article 7 data 5) Number of countries ratified Amendments/Protocol 6) Number of countries being in compliance 7) Number of projects being implemented as per schedule 	<p>ODS Network member developing countries will continue active programmes to phase out ODS, as well as provide staff and funds to national ODS Units; other government departments will continue to plan ODS phase out projects with the ODS Officers and their staffs.</p>
Activities	<ol style="list-style-type: none"> 1) Maintain regular contact with the countries and maintain an up-to-date database on demand – supply and compliance status. 2) Prepare up-to-date country profiles to facilitate tracking of country accomplishments. 3) Facilitate understanding on the implications of ratification to the Protocol, and its amendments for remaining non-Parties in the region 	<ol style="list-style-type: none"> 1) Participation and recommendation made by ODS Officers; 2) Number of workshops and results of the evaluation done after 	<ol style="list-style-type: none"> 1) Report of the Meeting; 2) Mission reports; 3) Country reports presented by ODS Officers at the network meetings 4) Country profiles 	<p>ODS officers will participate in meetings; ODS Units will cooperate on specific ODS phase out projects and activities organized during the project; countries will cooperate in sharing information and experiences.</p>

	Narrative Summary (NS)	Verifiable Indicators (VI)	Means of Verification (MOV)	Important Assumptions
	<p>(Afghanistan, Bhutan, Timor Leste); Assist remaining countries to ratify some amendments.</p> <p>4) Assist countries in potential non-compliance to meet their obligations, and to ensure that activities are sustained for the upcoming control measures:</p> <ul style="list-style-type: none"> • CFCs freeze and 50% reductions (Bangladesh, Cambodia) • Halons freeze and 50% reductions (Iran, Pakistan, Thailand, Vietnam) • Methyl chloroform freeze (India, Iran) • Carbon tetrachloride 85% reductions (India) • Methyl bromide freeze and 20% reductions (China, Malaysia, Philippines, Thailand) <p>5) Assist countries on maintaining a credible database of consumption (Cambodia, Indonesia, Lao PDR, Maldives, Nepal)</p> <p>6) Improve country awareness and monitoring capacity of illegal trade through the customs-ozone officer's network and sharing of trade information between producing countries (India and China) and importing countries in the region.</p> <p>7) Prepare and organize network meetings in the reoriented context emphasizing on compliance sessions.</p> <p>8) Analyse existing regulations and recommend options to improve ODS import and monitoring systems, including customs control and provide support for the formulation and implementation of ODS regulations (Bangladesh, Brunei, Cambodia, China, DPR Korea, Iran, Indonesia, Mongolia, Pakistan, Philippines, Thailand).</p> <p>9) Provide permanent capacity to backstop the operational activities to be conducted by</p>	<p>completing each workshop</p> <p>3) Number of follow-up activities</p> <p>4) Information papers on specific technical and policy issues for use by NOUs</p> <p>5) Country visits</p>		

	Narrative Summary (NS)	Verifiable Indicators (VI)	Means of Verification (MOV)	Important Assumptions
	<p>countries and other IAs and help strengthen the expertise of local experts in each of the sectors.</p> <p>10) Assist in the formulation of RMP (Brunei, Myanmar).</p> <p>11) Promote North-South and South-South cooperation.</p> <p>12) Provide assistance to LVCs, specifically with the formulation and implementation of the RMPs and accelerating the implementation of the delayed projects and Implement approved projects according to schedule.</p> <p>13) Identify technical and economic considerations in alternatives to HCFCs and encourage the development of HCFC phase-out strategy.</p> <p>14) Prepare and disseminate information notes on critical regional specific technical and policy issues.</p> <p>15) Promote query response, information exchange at the regional level.</p>			
Inputs	<p>1) CAP team (RNC SA, RNC SEAP, PO (Policy and Enforcement), PO (Methyl Bromide), PO (RMP Implementation) and administrative assistants for the period Jan 2004 - Dec 2004;</p> <p>1) Funding for Network activities (for CAP team and administrative assistants, meetings, travel, communications, cost of participants' travel) from MLF and Sida;</p> <p>2) Participation of ODS officers in Network activities; in kind contributions from Network member countries;</p> <p>3) Assistance from bilateral donors and cooperation from other implementing agencies;</p> <p>4) High level, administrative, technical, managerial support from UNEP;</p> <p>5) Local transportation, and use of common office equipment (photocopier, fax machine, local telephone, office supplies) from UNEP.</p>			

LOGICAL FRAMEWORK ANALYSIS FOR ROLAC

	Narrative Summary (NS)	Verifiable Indicators (VI)	Means of Verification (MOV)	Important Assumptions
Development Objective	Strengthening and building capacities of 33 network countries' governments, to enable them a sustained phase out of consumption of ozone depleting substances as early as possible, and achieving each country's compliance with the upcoming obligations prescribed in the Montreal Protocol and its Amendments.	Consumption of ozone depleting substances by the Network member countries are in line (or even lower in the Caribbean) with the limits set in the Montreal Protocol and its Amendments.	Annual reports on ODS imports, exports, and consumption provided by Network members to the Ozone Secretariat.	<ul style="list-style-type: none"> ▪ Montreal Protocol targets will not be relaxed and so will continue to be a driving force for ODS phase out efforts globally. ▪ Developed countries will continue to support ODS phase out efforts in Article 5 countries, both through the Multilateral Fund mechanism and bilaterally. ▪ Funds will be available to undertake investment projects. ▪ Governments will remain Parties to the Montreal Protocol and in compliance with its provisions.
CAP Objective	<ul style="list-style-type: none"> ▪ To promote appropriate policies, strategies, programmes, and projects to control and reduce the use of ODSs. ▪ To recommend the emphasis of making efforts at balancing the supply and demand side aspects of ODS phase-out strategies. All national policies and activities, be it legislation, enforcement, training, or awareness raising will need to be synergised and improved to not only aim at compliance with the Montreal Protocol, but also to prevent and/or follow-up with the expected increase in illegal trade. ▪ To promote the possibility of regional cooperation to accelerate phase out in the Caribbean ▪ To support regional public awareness 	<ul style="list-style-type: none"> ▪ Network countries implement ODS phase out activities that are achievable, efficient, and well adapted to the conditions in the Network countries. ▪ Yearly figures on production/consumption ▪ Standard mass media impact indicators ▪ Ozone issues included in high level Fora agendas. 	<ul style="list-style-type: none"> ▪ OS database ▪ Number of enforceable licensing systems <ul style="list-style-type: none"> ▪ Number of people informed according to target audience. ▪ Number of ozone issues included in yearly high level Fora agendas 	<ul style="list-style-type: none"> ▪ Government adopt the recommended strategies and programmes and issue relevant regulations to support the initiatives. ▪ Other government agencies will implement programmes devised jointly with ODS Units. ▪ Production projects approved in the upcoming years

LOGICAL FRAMEWORK ANALYSIS FOR THE INFORMATION CLEARINGHOUSE

{PRIVATE}Objectives	Expected Results	Performance Indicators	Assumptions
MID-TERM PURPOSE (2004-2006)	MEDIUM-TERM RESULTS (OUTCOMES)		
Provide information to support decision-making by NOUs and other stakeholders with regard to compliance with the 2005 and 2007 phase out targets	NOUs and other stakeholders have improved knowledge required to make timely decisions related to the phase out targets for CFCs, halons, carbon tetrachloride, methyl chloroform, methyl bromide.	<ul style="list-style-type: none"> ▪ Number of countries in this category that have received and used clearinghouse services that are in compliance with a specific target at the end of the each year. ▪ Written and oral feedback about clearinghouse services collected from NOUs through various mechanisms. 	<ul style="list-style-type: none"> ▪ NOUs will seek/accept UNEP’s assistance if they have information needs. ▪ Information can be developed and disseminated quickly enough to respond to time-sensitive needs of NOUs.
Provide information to assist NOUs in developing countries that are in actual or potential non-compliance	NOUs in those countries have improved knowledge of issues needed to help their country return to, or remain in, compliance.	<ul style="list-style-type: none"> ▪ Number of countries in this category that have received and used clearinghouse services targeted at this issue that are in compliance at the end of the each year. ▪ Written and oral feedback about how the clearinghouse services have supported compliance collected from NOUs through various mechanisms. 	<ul style="list-style-type: none"> ▪ NOUs will seek/accept UNEP’s assistance if they have information needs. ▪ Information can be developed and disseminated quickly enough to respond to time-sensitive needs of NOUs.
Provide information to NOUs to help prevent growth in consumption of new ODS	Low or zero consumption levels of the new substances in developing countries.	<ul style="list-style-type: none"> ▪ Consumption levels for these substances in developing countries that have received clearinghouse services related to this issue. ▪ Written and oral feedback about clearinghouse services collected from NOUs through various mechanisms. 	<ul style="list-style-type: none"> ▪ Developing countries collect and report data about these substances. ▪ Useful information about these substances exists and is available to the clearinghouse to disseminate.
SPECIAL ACTIVITIES (2004)	SHORT-TERM RESULTS (OUTPUTS)		
Continue implementing recommendations from Clearinghouse Evaluation (Decision 36/2): <ul style="list-style-type: none"> ▪ Develop and distribute more information adapted to regional and national needs. 	<ul style="list-style-type: none"> ▪ NOUs and other stakeholders better informed about regional issues related to Montreal Protocol implementation. ▪ More effective use of UNEP-developed information by non-English speaking NOUs. ▪ Managers of SMEs better prepared to 	<ul style="list-style-type: none"> ▪ Type and quality of services devised to exchange regional information. ▪ Number and type of translated items. ▪ Number and nature of other activities undertaken to support SMEs. ▪ Feedback from NOUs about benefits of 	<ul style="list-style-type: none"> ▪ Adequate resources required for implementation of some of the recommendations (e.g. translation) will be provided by the Multilateral Fund. ▪ Technical and cost considerations

{PRIVATE}Objectives	Expected Results	Performance Indicators	Assumptions
<ul style="list-style-type: none"> ▪ Provide information in languages other than English. ▪ Provide SMEs with information. ▪ Further improve facilities for information exchange between NOUs. ▪ Review approach used for development of technical documents. ▪ Increase transparency with regard to cost-effectiveness and results achieved. ▪ Consolidate databases. 	<p>convert to non-ODS alternatives.</p> <ul style="list-style-type: none"> ▪ Increased sharing of experiences and information between NOUs. ▪ More cost-effective and timely development of technical publications. ▪ NOUs and others have a better understanding of resources and outputs related to information services provided by UNEP. ▪ More effective internal operation of the clearinghouse. 	<p>the specific service provided.</p> <ul style="list-style-type: none"> ▪ Report describing the new methodology and experiences with it in 2003. ▪ Number of hits on the feedback pages of the web site, plus any comments received. ▪ Report describing the database consolidation and experiences with it in 2003. 	<p>permit the consolidation of databases.</p>
<p>Support implementation of Communication Strategy for Global Compliance with the Montreal Protocol (Decision 39/77):</p> <ul style="list-style-type: none"> ▪ Dissemination of guidance for NOUs on designing structured, compliance-oriented IEC activities. ▪ Development of regional awareness projects and national awareness campaigns in the context of the strategy ▪ Report to 44th Executive Committee meeting on results and progress made in implementing the strategy. 	<ul style="list-style-type: none"> ▪ NOUs informed about structured approach to IEC. ▪ Well-designed and effective regional awareness projects and national awareness campaigns. ▪ Executive Committee updated and informed about progress achieved. 	<ul style="list-style-type: none"> ▪ The percentage of NOUs that undertake public awareness activities during the year who use UNEP information. ▪ Extent to which regional awareness projects and national awareness campaign design reflects the Communication Strategy. ▪ Number and nature of other activities undertaken or initiated by UNEP or others in 2003 in the context of the Communication Strategy. 	<p>NOUs and others will develop structured and compliance-oriented national IEC activities.</p>
<p>Support the Multilateral Fund Secretariat initiative related to the Framework for an Information Strategy for the Multilateral Fund (Decision 38/76)</p>	<p>Provision of information and ideas to support the implementation of the Information Strategy.</p>	<p>Feedback from the Multilateral Fund Secretariat, Implementing Agencies and bilateral agencies about how UNEP is helping to promote the “corporate image” of the Multilateral Fund system.</p>	
<p>Provide information support for Portuguese-speaking new Article 5 Parties to the Montreal Protocol (in cooperation with bilateral agencies and Implementing Agencies)</p>	<ul style="list-style-type: none"> ▪ Ozone Officers and key stakeholders in those countries are well-informed about key Montreal Protocol requirements and issues. ▪ Existing Portuguese-language information materials translated by other agencies and 	<ul style="list-style-type: none"> ▪ Feedback from the Ozone Officers about the quality of services provided. 	

{PRIVATE}Objectives	Expected Results	Performance Indicators	Assumptions
	countries will be shared with the Article 5 countries.		
Offer prioritised information services to countries in potential or actual non-compliance.	NOUs and other stakeholders will have the information and contacts needed to support their return to compliance.	<ul style="list-style-type: none"> ▪ Written and oral feedback about this service collected from NOUs through various mechanisms. 	
Initiate on-line training activities in the refrigeration servicing sector and/or customs	<ul style="list-style-type: none"> ▪ Establishment of a relationship with centre(s) of excellence in information technology to support the on-line training initiative ▪ A plan for development of the training modules. ▪ 1 draft module online. 	<ul style="list-style-type: none"> ▪ Successful piloting of draft module. 	
Provide information to NOUs and other stakeholders related to other key issues	<p>NOUs and other stakeholders receive information about the following issues:</p> <ul style="list-style-type: none"> ▪ Elimination of low volume consumption of TCA, CTC or methyl bromide; ▪ Halon management/banking; ▪ Mobile air conditioning (including linkages between ozone and climate issues); ▪ Alternative refrigeration for the food and beverage sector (including linkages between ozone and climate issues) ▪ ODS destruction facilities. ▪ Support for customs officers and Ozone Officers on identifying ODS-containing chemicals. 	<ul style="list-style-type: none"> ▪ One information product (e.g. web module, feature in OzonAction Newsletter, information paper, etc.) related to each of these items (target = 1 product per issue area). ▪ Written and oral feedback about this service collected from NOUs through various mechanisms. 	NOUs will use the information provided by UNEP.
STANDARD ACTIVITIES (2003)	SHORT-TERM RESULTS (OUTPUTS)		
Provide information and support services to other CAP team members to support their work with NOUs	<ul style="list-style-type: none"> ▪ Proper functioning of the OzonAction Management Information System (oMIS) and further development reflecting articulated needs of CAP team. ▪ CAP team members assisted with 	<ul style="list-style-type: none"> ▪ Average documents dispatch time for CAP staff requests (target = 10 working days within receipt of order). ▪ Feedback from CAP team about quality and timeliness of services provided. 	

{PRIVATE}Objectives	Expected Results	Performance Indicators	Assumptions
	research/information retrieval. <ul style="list-style-type: none"> ▪ Timely shipments of documents to support training and other events organised by CAP team members. ▪ Assistance with regional and national awareness activities. 		
OzonAction Newsletter	NOUs and other stakeholders are well informed about key developments related to the implementation of the Montreal Protocol on a regular basis.	<ul style="list-style-type: none"> ▪ Number of newsletters produced (target = 3 issues in 6 languages). ▪ Satisfactory results of User Survey. ▪ Written and oral feedback about this service collected from NOUs through various mechanisms. ▪ Number of new subscriptions requested/added during year. ▪ Annual circulation statistics. 	Implementing Agencies and Secretariats will provide articles and photographs in a timely manner.
OzonAction CD-ROM	NOUs and other stakeholders have a compact, easy-to-use CD-ROM reference system to support the implementation of the Montreal Protocol.	<ul style="list-style-type: none"> ▪ CD-ROMs produced (target = 1) ▪ Written and oral feedback about this service collected from NOUs through various mechanisms. 	Information needed from external sources will be available in PDF or other suitable electronic format for inclusion in the CD-ROM.
Disseminate priority information through electronic media such as web sites, streaming video, e-conferences, email discussion forums or chat rooms	<ul style="list-style-type: none"> ▪ NOUs and other stakeholders are able to access electronic documents, news items, videos and other key information on a 24/7 basis. ▪ NOUs and other stakeholders are able to participate in on-line discussion sessions with experts. 	<ul style="list-style-type: none"> ▪ Number of updates (target =12 monthly updates) ▪ Standard monthly statistics provided by web statistical software (unique visits, page views, number of PDF documents downloaded, etc.). ▪ Percentage of NOUs who have reliable Internet access, and the percentage of UNEP material available only through the web site. ▪ Written and oral feedback about this service collected from NOUs through various mechanisms. 	<ul style="list-style-type: none"> ▪ Potential users have the inclination to obtain information from Internet as opposed to preference for other media (e.g. hardcopy). ▪ Potential users are aware that UNEP offers this service and will seek it out. ▪ Potential users have easy and affordable Internet access.
Provide latest ozone protection news to NOUs and other stakeholders via “direct	NOUs and other stakeholders are better informed about the latest developments in	<ul style="list-style-type: none"> ▪ Number of issues of (target =OzoNews: 50 issues, RUMBA: 6 issues, CLIO3: 6 	<ul style="list-style-type: none"> ▪ Persons subscribing to this service do not obtain the same news from

{PRIVATE}Objectives	Expected Results	Performance Indicators	Assumptions
delivery” email news services	ozone protection in three categories (general news, methyl bromide alternatives, inter-relationship between ozone protection and climate change).	issues) <ul style="list-style-type: none"> ▪ Number and type of new subscription requests. ▪ Replication of news contained in this news service by other agencies. ▪ Written and oral feedback about the utility of this service collected through regular subscriber surveys. 	other sources. <ul style="list-style-type: none"> ▪ News that UNEP obtains from other sources is both accurate and up-to-date.
Disseminate existing hard-copy publications	NOUs and other stakeholders are better informed about specific issues based on documents provided by UNEP.	<ul style="list-style-type: none"> ▪ Average documents dispatch time (target = 10 working days within receipt of order). ▪ Annual statistics about dissemination (number of documents dispatched, types of recipients, etc.). 	UNEP will have sufficient resources to reprint and update existing publications/videos if stocks are depleted. Persons who order publications will read and use them.
Collection and analysis of feedback about clearinghouse services	Improved design of future clearinghouse services in response to comments and suggestions made.	<ul style="list-style-type: none"> ▪ Annual summary report of collected feedback.(target = 1 report) ▪ Extent and nature of the feedback provided. ▪ Response to feedback reflected in the subsequent year’s Business Plan. 	NOUs and others will have the time and inclination to provide feedback to UNEP about clearinghouse services they receive.
Technical and policy query response service to support compliance	Questions sent by NOUs and others answered with quality responses in a timely manner.	<ul style="list-style-type: none"> ▪ Annual statistics about average query response time (target = responses sent within 10 working days of receipt of query) ▪ Annual statistics about number of queries received. ▪ Feedback about this service from query requesters collected through the standard survey form attached to each query.
