COMITÉ EJECUTIVO DEL FONDO MULTILATERAL  
PARA LA APLICACIÓN DEL  
PROTOCOLO DE MONTREAL  
Cuadragésima Segunda Reunión  
Montreal, 29 de marzo al 2 de abril de 2004

**PLAN ADMINISTRATIVO DE LA ONUDI PARA 2004-2006**

## COMENTARIOS Y RECOMENDACIONES DE LA SECRETARÍA DEL FONDO

1. La ONUDI preparó su plan administrativo con base en las Decisiones 37/68, 38/66 y 41/93, el cual se proporciona como anexo a estos comentarios.

2. En este documento se presenta un resumen de las actividades de la ONUDI proyectadas para 2004, el cual cubre la eliminación de SAO durante el trienio, los comentarios generales y los indicadores de desempeño de su plan administrativo, y se ofrece recomendaciones en torno a ellas para la consideración del Comité Ejecutivo.

### Actividades proyectadas para 2004-2006

3. El plan administrativo es un plan progresivo de tres años, ya que se incluyen tres años de actividades aunque hay menos certidumbre en relación con las actividades de 2005 y 2006, a excepción de los acuerdos plurianuales en curso.

### Actividades proyectadas para 2004

4. El valor total de los proyectos programados para su presentación por la ONUDI en 2004 es 46,17 millones \$EUA, lo cual conducirá a la eliminación de 10 800 toneladas PAO. El plan comprende:

- 16 acuerdos plurianuales, que se basan en el desempeño, para la eliminación sectorial y de sustancias por un monto de 24,36 millones \$EUA, lo cual representa, al ponerlos en ejecución, una eliminación de SAO de 6 628 toneladas PAO;
- 13 nuevos acuerdos plurianuales basados en el desempeño por un monto de financiación de 15,41 millones \$EUA en 2004 (54,67 millones \$EUA en total) con una eliminación correspondiente de SAO para 2004 de 3 631 toneladas PAO (11 854 toneladas PAO en total). Uno de los 13 nuevos acuerdos plurianuales es un proyecto ventana. Otro acuerdo plurianual que se tiene proyectado es para la eliminación de la producción de bromuro de metilo en China, con un costo total de 13 975 000 \$EUA, de los cuales 1,6 millones \$EUA se tienen planeados para el primer tramo de 2004.
- 11 proyectos de inversión individuales que se presentarán en 2004 por un valor 4,56 millones \$EUA, incluidos 3 proyectos que generarán una eliminación definitiva en el sector o de la sustancia;
- Preparación de proyectos por un monto de 225 750 \$EUA; y
- 612 127 \$EUA para dos proyectos ajenos a la inversión y cinco proyectos de fortalecimiento institucional por un monto de 1,02 millones \$EUA.

5. El valor total de los proyectos programados para su presentación en 2004 por la ONUDI que dimanaban del plan de eliminación trienal es 43,28 millones \$EUA, lo cual llevará a la eliminación de 10 446 toneladas PAO, y 2,89 millones \$EUA para proyectos de eliminación acelerada y/o para mantener el impulso de conformidad con la Decisión 40/7, lo cual llevará a la eliminación de 354 toneladas PAO en 2004, como se ilustra en la siguiente tabla:

<b>Criterio</b>	<b>País</b>	<b>Sector y subsector</b>	<b>Valor (\$000) en 2004</b>	<b>PAO en 2004</b>	<b>Valor (\$000) en 2005</b>	<b>PAO en 2005</b>	<b>Valor (\$000) en 2006</b>	<b>PAO en 2006</b>
C3, países de bajo consumo con ventana y planes de gestión de refrigerantes	Camerún	Refrigeración, doméstica / comercial	860	80,0	0	0,0	0	0,0
Preparación de proyecto para ventana	China	Preparación de planes de gestión de refrigerantes	54		0		0	
C5, ventana con preparación de proyecto aprobada	China	Plan de gestión de refrigerantes	1 075	200,0	1 075	200,0	1 075	200,0
Preparación de proyecto para ventana	China	Inhalador de dosis medida, preparación de proyecto	75		0		0	
C5, bajo nivel de consumo residual	China	Inhalador de dosis medida, plan de eliminación	0	0,0	2 150	51,6	5 375	129,0
C5, bajo nivel de consumo residual	Cuba	Fumigantes, eliminación definitiva	323	24,0	0	0,0	0	0,0
C5, bajo nivel de consumo residual	Marruecos	Refrigeración, doméstica / comercial	506	50,0	0	0,0	0	0,0
C5, bajo nivel de consumo residual	Siria	Plan de eliminación de SAO	0		645	137,1	0	
<b>Total:</b>			<b>2 893</b>	<b>354</b>	<b>3 870</b>	<b>388,7</b>	<b>6 450</b>	<b>329</b>

6. Si bien Camerún ha recibido un plan de gestión de refrigerantes de conformidad con la Decisión 31/48 y se ha comprometido a cumplir con su 85% de reducción en el sector de servicio y mantenimiento, la ONUDI ha identificado un proyecto de refrigeración doméstica / comercial que reuniría los requisitos como proyecto ventana. Este proyecto debe considerarse en el contexto del criterio 3 de la Decisión 40/7, países de bajo consumo de SAO con planes de gestión de refrigerantes en consonancia con la Decisión 31/48.

7. La ONUDI también tiene pensado presentar cinco proyectos bajo el criterio 5 de la Decisión 40/7, países con bajo nivel de consumo residual. Aunque Japón ha recibido fondos para el desarrollo de un proyecto para el sector de servicio y mantenimiento para China, la ONUDI no. Sin embargo, ésta planea cooperar con Japón en el proyecto para el sector de servicio y mantenimiento. La ONUDI también ha incluido en su plan administrativo de 2004 la preparación de proyectos por un monto de 54 000 \$EUA para participar en la preparación del plan de gestión de refrigerantes. En forma semejante, en el plan administrativo de la ONUDI, se incluye un plan de eliminación para inhaladores de dosis medida como proyecto ventana, junto con la preparación de proyectos. El plan de eliminación definitiva de Cuba se considera como proyecto ventana ya que este país ha recibido financiación para permitirle cumplir con las medidas de

control de 2005 para bromuro de metilo. Los proyectos en Marruecos y Siria también se consideran proyectos ventana ya que no se identificaron, para estos países, necesidades de eliminación en el plan de eliminación trienal.

#### Actividades proyectadas para 2005

8. La ONUDI planea presentar proyectos por un valor de 39,53 millones \$EUA en 2005 con una eliminación correspondiente de 10 498 toneladas PAO. Esto incluye 12,2 millones \$EUA para acuerdos plurianuales en curso.

9. El valor total de los proyectos programados para su presentación por la ONUDI en 2005 que dimanen del plan de eliminación trienal es 35,66 millones \$EUA, lo cual conducirá a la eliminación de 10 110 toneladas PAO, y 3,87 millones \$EUA para proyectos de eliminación acelerada y/o para mantener el impulso que llevarán a la eliminación de 389 toneladas PAO. La ONUDI tiene planeado presentar un proyecto de cierre de producción en 2005 para CFC, CTC y bromuro de metilo en Rumania con un costo total de 2,15 millones \$EUA, de los cuales 1,613 millones \$EUA se solicitarían en 2005.

#### Actividades proyectadas para 2006

10. La ONUDI planea presentar proyectos por un valor de 43,18 millones \$EUA en 2006 con una eliminación correspondiente de 8 476 toneladas PAO. Esto comprende 16,59 millones \$EUA para acuerdos plurianuales en curso.

11. El valor total de los proyectos programados para su presentación por la ONUDI en 2006 que dimanen del plan de eliminación trienal es 36,73 millones \$EUA, lo cual llevará a la eliminación de 8 147 toneladas PAO, y 6,45 millones \$EUA para proyectos con compromisos a futuro para acelerar la eliminación y/o mantener el impulso, lo cual conducirá a la eliminación de 329 toneladas PAO.

#### Unidad principal

12. Además de los montos anteriores, la ONUDI incluyó 1,5 millones \$EUA anuales para los costos de las unidades principales para 2004-2006.

#### **Eliminación en PAO durante 2004-2006**

13. Durante 2004 y 2005, la ONUDI planea eliminar 19 898 toneladas PAO con sus proyectos en curso y los acuerdos plurianuales aprobados. Además, la ONUDI señaló que se eliminarían 8 275 toneladas PAO en 2006.

14. La ONUDI ofreció una sección en su plan administrativo, apoyada por un anexo descriptivo organizado por país, dedicada a acelerar la ejecución de proyectos. Apuntó que, entre

otras cosas, estaba: proporcionando personal profesional adicional a las oficinas de campo, dando, en forma regular, instrucciones a los directores de las oficinas regionales y de país de la ONUDI, coordinándose con las dependencias nacionales del ozono para resolver cuellos de botella, reclutando oficiales subalternos para prestar asistencia a los gerentes de proyecto de la ONUDI, reuniéndose con los proveedores para apresurar la entrega, simplificando los procedimientos internos relacionados con los proyectos del Fondo y prestando asistencia a los gobiernos para poner en marcha sistemas legislativos y de otorgamiento de licencias. La ONUDI también proporcionó información en el texto de su plan administrativo al hacer referencia a sus esfuerzos por proporcionar asistencia para el cumplimiento a los países que operan al abrigo del Artículo 5.

### **Comentarios**

15. Existen varios proyectos para los cuales otros organismos pueden haber planeado actividades que se superponen a las de la ONUDI. Ésta ha abordado cada uno de estos posibles traslapes al indicar que tenía cartas de los gobiernos en las que se facultaba a la ONUDI para que incluyera estos proyectos en su plan administrativo, si bien otros organismos no han proporcionado estas cartas. En el caso de los proyectos para los enfriadores que el Banco Mundial tiene programados para Argentina y México, la ONUDI está preparando proyectos de eliminación para el sector de refrigeración que incluyen el consumo de todos los otros sectores. El Banco también ha propuesto un proyecto de inhaladores de dosis medida para Argentina que podría parecer que ya ha sido planteado por la ONUDI. El plan administrativo del Banco Mundial incluye un proyecto de eliminación de bromuro de metilo en Vietnam, pero la ONUDI tiene una petición de Vietnam de que prepare ese proyecto con base en los resultados de su proyecto de demostración. Alemania también ha incluido un proyecto de bromuro de metilo en Siria, pero la ONUDI ya ha aprobado un proyecto de eliminación de bromuro de metilo para su ejecución en ese país. El PNUMA tiene proyectos de capacitación para bromuro de metilo en China e India, países en los que ONUDI tiene programado planes de eliminación sectoriales, con la primera fase aprobada para China. La ONUDI expresó que no estaba enterada de la participación del PNUMA en estos planes.

16. Se ha pedido a Alemania, al PNUMA y al Banco Mundial que se ocupen de estas superposiciones.

### **Indicadores de desempeño**

17. En la siguiente Tabla 1, se proporcionan los indicadores de desempeño de la ONUDI de conformidad con la Decisión 41/93.

Tabla 1

**INDICADORES DE DESEMPEÑO**

<b>Categoría del indicador de desempeño</b>	<b>Partida</b>	<b>Peso</b>	<b>Meta para 2004</b>
Aprobación	Cantidad de programas anuales de acuerdos plurianuales aprobados contra la proyectada; es posible que no se aplique al PNUMA	20	16 aprobados + 14 nuevos
Aprobación	Cantidad de proyectos individuales / actividades (proyectos de inversión, planes de gestión de refrigerantes, bancos de halones, asistencia técnica) aprobada contra la proyectada	20	7
Ejecución	Actividades de los hitos terminadas (p.ej., medidas en materia de políticas, asistencia en materia de reglamentos) / niveles de SAO logrados para los tramos anuales aprobados contra lo proyectado	20	16
Ejecución	Eliminación en PAO de proyectos individuales contra la proyectada según los informes sobre la marcha de las actividades	5	5 018
Ejecución	Terminación de proyectos (de conformidad con la Decisión 28/2 para proyectos de inversión) y según se define para proyectos ajenos a la inversión contra lo proyectado en los informes sobre la marcha de las actividades	5	70
Ejecución	Asistencia en materia de políticas / reglamentos concluida contra lo proyectado	10	4
Administrativa	Rapidez de la conclusión financiera contra la que se requiere de conformidad con las fechas de terminación del informe sobre la marcha de las actividades	10	12 meses
Administrativa	Presentación oportuna de los informes de terminación de proyectos contra lo acordado	5	A tiempo
Administrativa	Presentación oportuna de los informes sobre la marcha de las actividades y de las respuestas, a menos que se haya acordado otra cosa	5	A tiempo

18. La base de datos del plan administrativo de la ONUDI revela que ésta eliminaría 6 674 toneladas PAO de las actividades en curso y aprobadas durante 2004. La ONUDI señaló una meta de 5,018 toneladas PAO como indicador de desempeño para la cantidad en PAO que debe eliminarse.

**RECOMENDACIONES**

El Comité Ejecutivo puede juzgar oportuno:

1. Avalar el plan administrativo de la ONUDI para los años 2004-2006, según se presenta en el documento UNEP/OzL.Pro/ExCom/42/10.
2. Aprobar los indicadores de desempeño para la ONUDI que se establecen en las tablas 1 y 2 de los comentarios de la Secretaría del Fondo, según se presentan en el documento UNEP/OzL.Pro/ExCom/42/10, al tiempo que establezca un objetivo de eliminación de 6 674 toneladas PAO correspondiente a 2004 para los proyectos de inversión.

-----

**UNIDO**  
**BUSINESS PLAN 2004**

UNITED NATIONS INDUSTRIAL DEVELOPMENT  
ORGANIZATION

## EXECUTIVE SUMMARY

The 2004 Business Plan of UNIDO together with the forecast for 2005 and 2006 represents the Three-year Rolling Business Plan of Montreal Protocol activities of the Organization. It was prepared based on the previous three year rolling business plan, taking into consideration the approvals and experience of the previous year (2003), the requests received from Article 5 countries and the decisions taken and priorities established by the Executive Committee. It also reflects the discussions held in Montreal, during the Inter-agency Coordination Meeting, whereby an analysis of the compliance situation (reduction targets) provided valuable information on certain Article 5 countries in dire need of assistance. It is largely inspired from the model prepared by the Secretariat of the Multilateral Fund.

In 2004 UNIDO plans prepare and submit for approval to the Executive Committee one national ODS Phase-out Plan, six CFC Phase-out Plans, five terminal umbrella projects, two RMPs, five Methyl Bromide Phase-out Plans and two technical assistance projects in the fumigants sector, three solvent sector phase-out plans, and two halon banking projects. The amount foreseen for these new activities is **US\$ 17,812,680** including support costs and excluding forward commitments. The impact of the planned year 2004 approvals is at the level of **3,818** ODP tonnes. In addition, UNIDO is planning to submit four activities under the funding window for an amount of **US\$ 2,763,013** phasing out **354** ODP tonnes.

Extensions for five institutional strengthening projects (Bosnia & Herzegovina, Macedonia, Romania, Serbia & Montenegro and Syria) are also included in the Business Plan with a total budget of **US\$ 1,015,769**. Funds for project preparation will be requested for an amount of **US\$ 225,750**.

The forward commitments amount to a total of **US\$ 24,355,525** for 2004 for the following activities:

- ODS Phase-out Plan for Albania and Bosnia & Herzegovina
- Refrigerant management plan for Algeria
- Phase-out of CFCs in the tobacco fluffing sector for China
- Phase-out plans in the fumigant sector for Lebanon, Morocco, Syria and Turkey
- Terminal CFC Phase-out Management Plan for Croatia
- CFC Phase-out Plan in Iran
- Production closure plans for DPRK and Mexico
- Refrigeration sector Phase-out Plan and CTC Phase-out Plan for DPRK
- RMP and Solvent Sector Phase-out Plan for Pakistan

Finally, in accordance with decisions 38/68 and 41/94 from the Executive Committee US\$ **1,500,000** have been allocated for funding of the core unit at UNIDO.

The total amount, including forward commitments, new investment and non-investment activities, and funding of core unit is **US\$ 44,909,724** (including support costs, excluding window projects) with an impact of **10,446 ODP** tonnes.

This Business Plan, after careful review of all the data available on Article 5 countries, and particularly the compliance model prepared by the Secretariat is aimed at addressing the need of twenty-five Article 5 countries for compliance with their consumption and production reduction obligations with regard to CFCs (in 2005 and 2007), CTC and TCA (in 2005) and methyl bromide (in 2005).

As per decision 38/66 of the Executive Committee, UNIDO prepared a realistic forecast of activities for 2005 and 2006, while noting that part of these activities derive from multi-year agreements, national and sectoral phase-out plans approved in prior years and also from new activities planned for approval in 2004.

For the second and third year of the Three-year Rolling Business Plan, **US\$ 40,384,303** worth of projects was included for the year 2005 with a planned phase-out of **10,498 ODP** tonnes and **US\$ 44,681,265** worth of projects were earmarked for 2006 with an impact of **8,476 ODP** tonnes.

## **A. MULTILATERAL FUND TARGETS**

### **1. CONTEXT**

Building on the experience of the implementation of the first year of the Three-year Rolling Business Plan approved for the period 2003-2005 and the various communications between the Secretariat and the Implementing Agencies, an inter-agency coordination meeting was held in Montreal in February 2004. During this meeting, it was agreed that the current Business Plan should be prepared based on requests received from ozone offices in Article 5 countries and the analysis of the most recent compliance model compiled by the Multilateral Fund Secretariat in January 2004 reflecting the status of compliance of the Article 5 countries. This analysis made an attempt to identify a group of countries in need of immediate assistance in order to comply with the various phase-out schedules (CFCs, Halons, CTC, Methyl Bromide, etc.).

The Multilateral Fund Secretariat and the Implementing Agencies have jointly reviewed the government requests. Furthermore, additional activities were also included wherever the model showed compliance assistance needs not yet addressed. Agencies also agreed to alert Ozone Officers to clarify eventual data discrepancies in their countries to ensure proper coverage of the effective requirements. The distribution of work between the Multilateral Implementing Agencies was agreed upon to avoid overlaps of efforts and activities.

This Business Plan was prepared taking into account the aforementioned elements and also the following decisions of the ExCom: 38/66, 38/67 on three year business planning; 38/68 and 41/94 on administrative support costs and agency shares; 40/7 on funding window; 41/14 on consideration of projects in 2004 originating from the Business Plan 2003; 41/61, 41/64 and 41/69 on individual projects; as well as 41/93 on performance indicators.

During the preparation of the Business Plan we had to take into consideration our experience and information collected in several countries which shows that part of the eligible for funding remaining consumption cannot be addressed only by investment activities. During the preparation of projects, the remaining data discrepancies, if any, will be clarified. The current Business Plan, however, reflects only those phase-out targets, which according to our present information can be realistically addressed through investment activities.

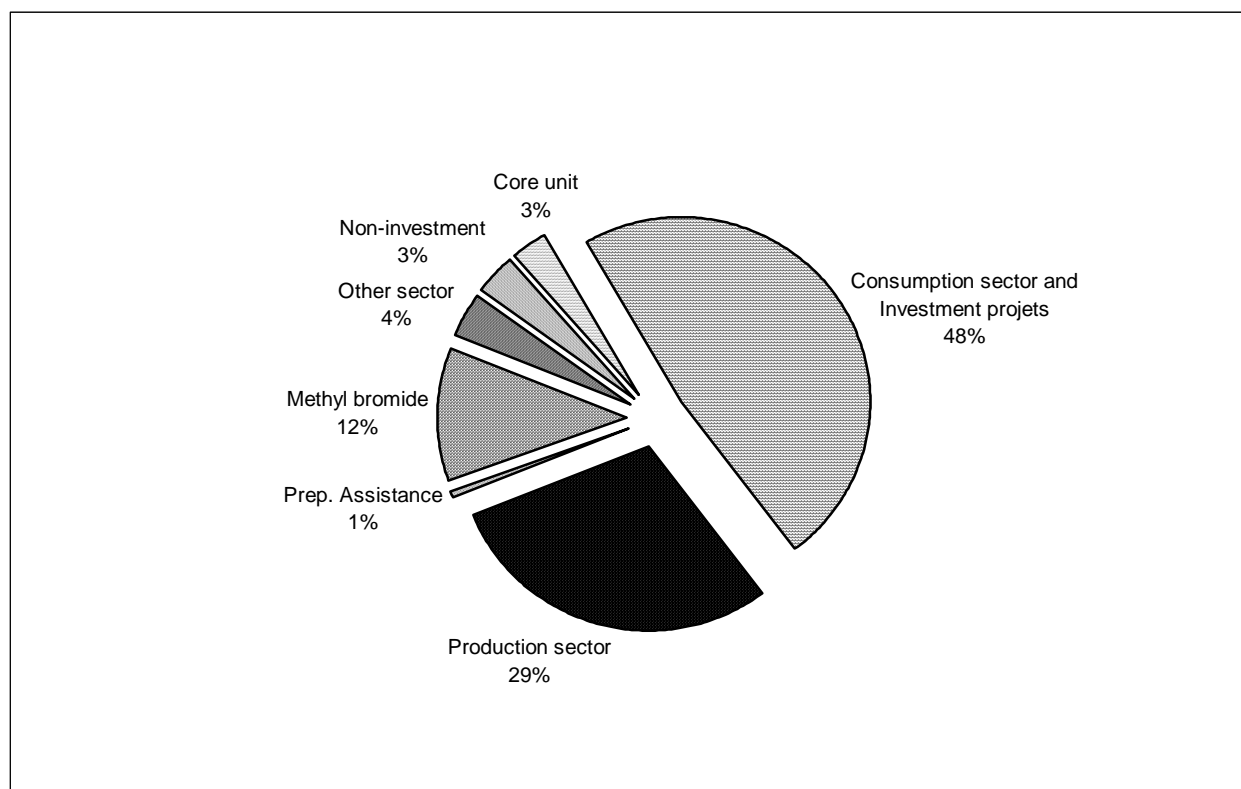

## 2. RESOURCE ALLOCATION

In 2004, UNIDO will prepare one national ODS phase-out plan, six national CFC phase-out plans, five phase-out plans in the fumigants sector, three solvent sector phase-out plans, two halon banking projects, five extensions of institutional strengthening projects and other activities amounting to US\$ 19,054,199. The forward commitments of programmes already approved in principle amounts to US\$ 24,355,525. These activities plus the core unit funding of US\$ 1,500,000 and the value of the window projects of US\$ 2,763,013, would give a total of US\$ 47,672,737 allocation for the year 2004.

**Table 1. Resource allocation**

Position	Type/sector	US\$ (incl. support cost)*	Share of Business Plan allocation
(a)	Consumption sector (investment projects) including forward commitments	22,971,969	48.2%
(b)	Production sector including forward commitments	13,885,385	29.1%
(c)	Preparation of investment projects	225,750	0.5%
(d)	Methyl bromide projects	5,526,738	11.6%
(e)	Other sector (Tobacco fluffing project)	1,935,000	4.1%
(f)	Non-investment projects	1,627,895	3.4%
(g)	Funding of core unit representing	1,500,000	3.1%
	Total	47,672,737	100%

The details of the 3-year rolling Business Plan are spelled out in the database, Annex 1 and Table 2.

**Chart 1. Resource Distribution**

The contribution of UNIDO's Business Plan to the implementation of the 3-year Phase-out Plan of the Multilateral Fund is demonstrated in the following two tables:

**Table 2. ODS Phase-out Impact of Planned New Activities and Forward Commitments**

Phase-out in ODP tonnes	New Activities				Forward Commitments			
	2004	2005	2006	Total	2004	2005	2006	Total

### **3. ASSISTANCE TO COUNTRIES IN NON-COMPLIANCE**

As mentioned earlier, UNIDO focused its Business Plan around the compliance situation of countries assisted by the Organization. In this respect, special attention was paid to countries facing non-compliance, where the following activities are planned:

#### **Bosnia & Herzegovina**

Bosnia & Herzegovina has been in non-compliance with its CFC and methyl bromide obligations. The Government presented its Action Plan to the Implementation Committee, which was approved under Decision XV/30 of the Meeting of the Parties. UNIDO is planning its activities as described below to comply with the above Decision.

#### **a) Phase-out of CFCs**

There are five ongoing individual investment projects in this country; one foam project will phase out 33 ODP tonnes of CFCs in 2004. In addition, three refrigeration projects will be completed in 2004 phasing out in total 59.5 ODP tonnes of CFC and 0.6 ODP tonnes of TCA. All these projects are well advanced.

There is a delay on one foam project (Inga) due to difficulties of the counterpart. The equipment has already been purchased but not yet installed. The phase-out of 21 tonnes of CFC is foreseen for 2005.

A national ODS phase-out plan was approved on the 41<sup>st</sup> meeting. As per Agreement, no phase-out is planned to result from this project in 2004, however in 2005 17.9 tonnes of CFC and 1.1 tonnes of TCA will be phased out. This will allow the country to return to compliance with regard to its CFC consumption according to the Action Plan approved.

#### **b) Phase out of Methyl Bromide**

The methyl bromide phase-out plan approved also on the 41<sup>st</sup> meeting will assist the country to phase-out 6.2 ODP tonnes of methyl bromide in 2005 and 5.6 ODP tonnes in 2006 in the tobacco seedling, vegetables and flower sectors. This will allow the country to return to compliance with regard to its methyl bromide consumption according to the Action Plan approved.

## **Botswana**

Botswana has been in non-compliance with its methyl bromide obligations. The Government presented its Action Plan to the Implementation Committee, which was approved under Decision XV/31 of the Meeting of the Parties.

A demonstration project has been undertaken on the use of methyl bromide alternatives in the cultivation of tomatoes and cucurbits. The report is under completion and the final workshop will be organized in the first half of 2004, thus completing the project. UNIDO is continuing to work directly with the major consumers of methyl bromide in the country to achieve the required reduction by 2005. In addition, the Government will implement an import licensing system for methyl bromide.

## **Cameroon**

Cameroon has not been in compliance with its methyl bromide obligations. The Parties have requested the Government to submit an Action Plan (Decision XV/32) with time specific benchmarks in order to return to compliance with respect to methyl bromide consumption. A demonstration project has been undertaken on the use of methyl bromide alternatives in the cultivation of tomatoes and cucurbits. The final workshop and report will be concluded in 2004, thus completing the project.

Furthermore, the Ozone Office is carrying out a methyl bromide survey to identify the sectors using methyl bromide. It is already clear that methyl bromide is no longer used in the tobacco sector, and it is assumed that the main consumption is in the storage and/or QPS. Based on the results of the survey, UNIDO will assist Cameroon in establishing a plan to return to compliance. This Action Plan will be submitted to the next Implementation Committee.

## **Guatemala**

Guatemala has been in non-compliance with its CFC and methyl bromide obligations. The Government presented its Action Plan to the Implementation Committee, which was approved under Decision XV/34 of the Meeting of the Parties. UNIDO is active in the country in the methyl bromide sector only. Thus, we are concentrating our activities to comply with the above Decision regarding methyl bromide.

The implementation of the methyl bromide phase-out project has started, necessary agreements were signed and first tranche of equipment was purchased. 388 ODP tonnes are expected to be phased out in 2004 and 80 ODP tonnes in 2005 as a result of the start up of the equipment and

introduction of the new technology. With these activities, Guatemala will return to compliance with regard to methyl bromide consumption in 2005, and achieve a reduction of 20 per cent.

### **Honduras**

Honduras has been in non-compliance with its methyl bromide obligations. The Government presented its Action Plan to the Implementation Committee, which was approved under Decision XV/35 of the Meeting of the Parties. UNIDO is planning to comply with the above Decision regarding methyl bromide through the following activities.

The implementation of the first tranche of the methyl bromide phase-out plan has started, agreements with the farmers were signed and first tranche of equipment has been purchased and delivered. With the start up of the equipment and introduction of the new technology 213 ODP tonnes are expected to be eliminated by 2005, as foreseen in the Action Plan approved by the Parties.

### **India**

India has incomplete data reporting on methyl bromide. UNIDO is working with the Government of India to review the sector and to carry out reporting to enable establishment of the baseline. In case the methyl bromide is used in eligible sectors, an investment project will be initiated.

### **Pakistan**

The 15<sup>th</sup> Meeting of the Parties in its Decision XV/22 noted that Pakistan did not meet its freeze obligation with regard to halon consumption under. The Government was requested to prepare an Action Plan ensuring return to compliance.

UNIDO submitted the Halon Sector Phase-out Plan for Pakistan to the 41<sup>st</sup> meeting of the ExCom. The Sector Plan was approved and it will be completed in 2006 phasing out the consumption of 24.2 ODP tonnes of halons, which will ensure return of Pakistan to compliance.

### **Qatar**

Qatar has been in non-compliance with its CFC and halon freeze obligations. The 15<sup>th</sup> Meeting of the Parties through its Decision XV/41 requested Qatar to submit an Action Plan ensuring return to compliance.

UNIDO is assisting Qatar in the field of phasing out the consumption of CFCs. The RMP was approved on the 34<sup>th</sup> Meeting of the ExCom. The planned activities are under way, several training courses have been conducted, and the purchase of equipment is planned after completion of the training. The project is expected to be completed in 2005 with an ODP phase-out of 13 tonnes. This project will assist Qatar to return to compliance.

### **Uganda**

Uganda could not meet its freeze targets for CFCs and methyl bromide. The 15<sup>th</sup> Meeting of the Parties dealt with the issue of non-compliance and through its Decision XV/43 it accepted a new baseline as well as a phase-out schedule for methyl bromide submitted by the Government.

UNIDO is assisting Uganda to phase out methyl bromide through a sectoral methyl bromide phase-out plan approved at the 34<sup>th</sup> meeting of the ExCom. The ExCom recently approved the Government's request on change of technology originally planned in this project. Thus, the project is expected to be completed by 2005 with a total phase-out of 12 ODP tonnes. This will enable Uganda to return to compliance with its methyl bromide obligations.

### **Uruguay**

Uruguay has been in non-compliance with its methyl bromide freeze obligations. The 15<sup>th</sup> Meeting of the Parties accepted the Action Plan submitted by the Government, which will enable Uruguay to return to compliance with its methyl bromide obligations (Decision XV/44).

Uruguay is assisted by UNIDO through a sectoral methyl bromide phase-out plan approved at the 34<sup>th</sup> meeting of the ExCom. The project is expected to be completed in 2005 with a phase-out of 11 ODP tonnes, while 5 tonnes have already been eliminated in 2002, and 8 tonnes in 2003.

#### 4. PROGRAM EXPANSION

In the years 2004 to 2006 UNIDO aims to enhance its assistance to Article 5 countries by strengthening its project portfolio through new approvals. The budget of activities and their impact included in the 2004-2006 Rolling Business Plan are shown in the graph below and compared to the historical data on UNIDO's project approvals:

##### Approval History

The main objective of this Business Plan is to assist Article 5 countries in meeting their obligations under the Montreal Protocol, by suggesting phase-out projects as well as technical assistance activities. It is expected that tonnages to be eliminated through forward commitments, ongoing and planned activities will at least meet the forthcoming targets of 2005 for CFCs, halons, CTC, TCA and Methyl Bromide and of 2007 for CFCs.

In 2004, UNIDO will prepare 27 new activities for an amount of US\$ 18,038,430 (excluding window and institutional strengthening projects) and will continue 17 activities as

forward commitments for an amount of US\$ 24,355,525. The ODS phase-out impact of these activities is 10,446 ODP tonnes.

The analysis of the activities of our Business Plan reveals the following main trends:

- There is a significant increase in the share of national ODS phase-out plans as well as sectoral phase-out plans within the project portfolio of UNIDO;
- The refrigeration sector including the service sector is still the predominant area of interventions;
- The rapid decrease of need for assistance in the foam and aerosol sectors is continued;
- No major change is observed in the demand for activities the methyl bromide sector;
- UNIDO continues to provide assistance in the ODS production sector through the preparation of two projects.

In 2004, UNIDO will continue to cover all the regions (Latin America and the Caribbean, Africa, Asia and Pacific, Europe) with planned activities in various sectors for twenty-five (25) countries (including non-investment activities, project preparation and window projects).

## **Africa**

In Africa, 6 activities in six (6) countries, with a value of US\$3,114,699 will be submitted in 2004. Among these, one (1) national phase-out plan and four (4) sectoral plans will be prepared.

The following project are planned to be prepared and submitted in 2004:

### Algeria

A Terminal Umbrella Project in the commercial refrigeration sector will address the total phase-out of 80 ODP tonnes remaining eligible CFC consumption in the sector. This will help the country to comply with the 2007 CFC control measures.

### Cote D'Ivoire

The country needs immediate assistance to achieve the 20% reduction of methyl bromide consumption in 2005. A fumigant phase-out plan will be prepared to eliminate the use of 8.5 tonnes of methyl bromide and ensure compliance of the country with its MP obligations in this sector.

An update of the RMP is also planned in cooperation with UNEP.

### Egypt

The country needs assistance to achieve its 85% CFC reduction targets (515 ODP tonnes) and CTC (32.8 ODP tonnes) as well as to phase out of 7.8 ODP tonnes of TCA. UNIDO will provide assistance to the country through the formulation and implementation of an ODS phase out plan addressing all the remaining eligible ODS consumption of Egypt

### Libya

The country will be assisted to comply with the 2005 halon consumption compliance target. A halon phase-out plan for the phase-out of 54.4 tonnes will be prepared by UNIDO.

### Nigeria

In order to achieve the 85% reduction of CTC consumption in 2005 a Solvent Sector Phase-out plan will be formulated and implemented to eliminate the use of 129.8 tonnes of CTC.

### Sudan

The country needs assistance to achieve the 2005/2007 CFC reduction targets. A CFC phase-out plan will address this need and assist Sudan to eliminate 250 tonnes of ODP tonnes of CFC.

### ***Funding Window***

#### Cameroon

Since the country does not need any further assistance for the 2005/2007 CFC reduction targets. However, in order to maintain momentum, UNIDO included a refrigeration investment project for the phase-out 80 tonnes under the Funding Window for accelerated phase-out.

#### Morocco

An investment project for elimination of 50 tonnes in the domestic and commercial refrigeration is planned to complete the phase-out efforts of the country.

## **Asia**

In Asia, nine (9) activities in eight (8) countries, with a value of US\$4,766,613 are planned for 2004. This includes the extension of one institutional strengthening project in Syria. In addition, four project preparation activities are planned totalling US\$ 188,125.

### China

A Methyl Bromide Production and Consumption Phase-out Plan will be formulated, which will address the elimination of 1,800 ODP tonnes.

There will be further activities in China, which will be part of the Funding Window, since China does not require assistance to meet its 2005 and 2007 CFC reduction obligations. These activities, however, are essential due to the plans of the country to complete its huge ODS elimination programme in an accelerated fashion.

### India

The country may need immediate assistance to achieve the 20% reduction of MBR in 2005. Phase-out plan in fumigants sector will be designed as soon as the necessary consumption data will be available and the baseline is established.

### Indonesia

The country needs assistance to eliminate the use TCA and CFC-113. This will be addressed through a Solvents phase-out plan, which will eliminate 100 ODP tonnes of these two substances.

### Iran

The country needs immediate assistance to achieve the 85% reduction of CTC consumption in 2005. UNIDO is working with the Government and UNEP to clarify the data discrepancy in this sector. In line with the relevant decision of the forthcoming meeting of the Implementation Committee a Solvents Sector Phase-out Plan will be prepared to enable Iran to meet its compliance obligations.

A new Methyl Bromide project will assist Iran to phase-out 35 ODP tonnes in the fumigants sector.

### Lebanon

The country needs assistance achieve the 2007 CFC reduction targets. As part of an ODS Phase-out Plan being prepared by UNDP, UNIDO will address the needs of the refrigeration manufacturing to eliminate 60 tonnes.

### Oman

A technical assistance project will be initiated, which would enable final phase-out of Methyl Bromide in Oman.

### Syria

The ODS phase-out related activities in the country would be assisted through the extension in 2004 of the ongoing institutional strengthening project.

### Yemen

A CFC phase-out plan to eliminate 145 tonnes of ODS. The country needs assistance to achieve the 2005/2007 CFC reduction targets. (As per model: 126.6 needed for 2005/2007)

### ***Funding Window***

#### China

There is a plan to address the needs of the refrigeration service sector in the framework of an RMP designed for the remaining eligible CFC consumption of the service sector. The elimination of the total CFC consumption in the sector will require substantial government contribution.

The MDI sector is the last one using CFCs in the country. Investment activities in this sector are planned for the later years of this Three-year Rolling Business Plan. Due to the advanced stage of the Chinese ODS elimination programme this sector could receive assistance only through the Funding Window.

#### Syria

A ODS phase-out plan will be prepared by UNIDO in the year 2005 to assist the country to maintain momentum and to finalise its ODS phase-out programme.

### Vietnam

A successful demonstration project was completed recently and the country is now in a position to meet its 2005 Methyl Bromide obligations. A Methyl Bromide Consumption Phase-out Plan will be formulated by UNIDO in 2005 to phase out the remaining eligible Methyl Bromide consumption in Viet Nam.

### **Europe**

In Europe, seven (7) activities in five (5) countries, with a value of US\$1,394,769 are planned for 2004.

### Bosnia and Herzegovina

The country will be assisted to comply with its 2005 halon consumption compliance target. With this aim a halon phase-out plan for the phase-out of 4 ODP tonnes will be prepared by UNIDO.

An extension of the Institutional Strengthening project will be made in 2004 to support the ODS programme of the country.

### Croatia

In order to achieve the 85% reduction of CTC consumption in 2005 a Solvent Sector Phase-out plan will be formulated and implemented to eliminate the use of 4 ODP tonnes of CTC.

### Macedonia

An extension of the Institutional Strengthening project will be requested to enable the country to maintain and develop its ODS phase-out programme.

### Romania

An extension of the Institutional Strengthening project will help the Ozone Office in their awareness and project management programme and especially in the support of the preparation of the CFC, CTC and Methyl Bromide production closure project and the national CFC phase-out plan planned for submission in 2005.

### Serbia and Montenegro

An extension of the Institutional Strengthening project will be requested in 2004.

## **Latin America and the Caribbean**

In Latin America and the Caribbean, four (4) activities in three (3) countries, with a value of US\$9,396,493 are foreseen for the year 2004.

### Argentina

The country needs assistance to achieve the 2005/2007 CFC reduction targets. A CFC phase-out plan will be prepared and implemented by UNIDO to eliminate the remaining 2,119 ODP tonnes of CFCs in the refrigeration and aerosol sectors.

### Mexico

The country needs assistance to achieve the 2005/2007 CFC reduction targets. A CFC phase-out plan prepared by UNIDO is under approval to eliminate the remaining 1,675 ODP tonnes of CFC consumption predominantly in the refrigeration sector.

A Methyl Bromide technical assistance project to eliminate the use of 59 tonnes will be prepared by UNIDO. This will help the country to achieve its 20% reduction target in 2005.

### Venezuela

The country needs assistance to achieve the 2005/2007 CFC reduction targets. A CFC phase-out plan will be prepared by UNIDO to eliminate 1,883 ODP tonnes of CFC consumption mainly in the refrigeration-servicing sector.

### ***Funding window***

### Cuba

A Methyl Bromide Production and Consumption terminal Phase-out Plan will be formulated, which will address the elimination of the remaining eligible 24 ODP tonnes Methyl Bromide consumption.

**Chart 4. Phase-out targets by regions (planned activities)**

**Chart 5. Regional distributions of funds allocated (planned activities)**

## **5. NON-INVESTMENT PROJECTS**

In 2004, UNIDO is planning the extension of the institutional strengthening projects in Bosnia & Herzegovina, Macedonia, Romania, Serbia & Montenegro and Syria for a value of US\$ 1,015,769. Furthermore, two technical assistance projects are foreseen in the methyl bromide sector for Mexico and Oman for a value of US\$ 613,000 (including support costs).

**B. PERFORMANCE INDICATORS**

<b>Performance Indicator</b>	<b>Item</b>	<b>Target 2004</b>
Approval	Number of annual programmes of multi-year agreements approved	16 approved + 14 new ones
Approval	Number of individual projects/activities (investment projects, RMPs, halon banks, TAS) approved	7
Implementation	Milestone activities completed (e.g. policy measures, regulatory assistance)/ODS levels achieved for approved multi-year annual tranches	16
Implementation	ODP phased out for individual projects	5,018
Implementation	Project completion (pursuant to Decision 28/2 for investment projects) and as defined for non-investment projects	70
Implementation	Policy/regulatory assistance completed	4
Administrative	Speed of financial completion	12 months
Administrative	Timely submission of project completion reports	On time
Administrative	Timely submission of progress reports and responses unless otherwise agreed	On time

## C. BILATERAL COOPERATION

The following activities are being jointly implemented with Bilateral Agencies:

Bilateral Agency	Country	Sector	ODP [tonnes]	Budget (without support cost) [US\$]	Status
Canada	Indonesia	Methyl Bromide (commodities)	37.8	350,000	Ongoing
France	Morocco	Fumigants (cut flowers & banana)	61	1,006,652	Ongoing
Germany	Egypt	RMP		279,300	Ongoing
Italy	Romania	Fumigants (horticulture)	93.9	630,517	Ongoing
Italy	Serbia and Montenegro	Domestic refrigeration	94.9	1,683,135	Ongoing
Italy	China	Dom. Ref.	181	1,950,000	Ongoing
Japan	China	Compressors	75	2,250,000	Ongoing
Japan	Indonesia	Foam	18.2	142,506	Ongoing
Japan	Indonesia	Foam	22.8	117,889	Ongoing

In addition to that, UNIDO is planning joint activities with Spain in Mexico, with Australia, Germany and Japan in China, and with Sweden in Serbia & Montenegro and Romania.

## D. INITIATIVES TO SPEED-UP IMPLEMENTATION

### a. Investment Projects

The status of ongoing projects is described in Annex I. The success and timely implementation of these activities are crucial in the current compliance period.

In order to expedite completion of projects approved so far, UNIDO has taken some initiatives such as:

- UNIDO is strengthening its field representation. The field offices will receive additional professional staff, and in some offices local staff was recruited to follow up MP projects.

- Directors of UNIDO regional and country offices are regularly briefed and more and more involved in the implementation process and they are following up the progress of the programmes;
- Cooperation with the national ozone offices has been strengthened during recent years and the staff of the ozone office together with UNIDO's national and international consultants and project managers are regularly following up the implementation process and taking effective actions on critical issues, e.g. resolving bottlenecks in site preparation, customs clearance, installation, commissioning and safety certification, monitoring of CFC-related equipment.
- Recruitment of junior professionals to assist project managers at Headquarters.
- Frequent meetings with suppliers to review and speed up delivery and installation of equipment.
- UNIDO streamlined internal procedures related to the implementation of Montreal Protocol activities.
- The experience accumulated in the implementation of earlier projects resulted in enhanced efficiency.

**b. Refrigerant Management Plans**

For efficient implementation of refrigerant management plans, UNIDO is assisting governments in putting in place proper legislation as well as licensing system for CFCs imports. Training sessions for good practises in refrigeration servicing, for customs officers as well as in recovery and recycling have been organized. However, we believe that the final success of refrigerant management plans lies in the hands of governments by ensuring a good follow-up and sustainability of CFCs and in enforcing the legislation on CFC imports as well as equipment containing CFCs.

## **Annex I**

### **COUNTRY-BY-COUNTRY IMPLEMENTATION OF APPROVED ACTIVITIES**

#### **Albania**

##### *Phase-out of ODS*

In 2003 an ODS phase-out plan was approved for the country. The implementation of the plan started as planned and the activities foreseen for 2003 were implemented, awareness workshop on methyl bromide and training activities under RMP were initiated. They will result in a phase-out of 6.8 ODP tonnes of CFCs in 2004. It is foreseen to phase-out 25 ODP tonnes in 2005. The phase-out schedule stipulated in the Agreement will ensure implementation of the decisions of the Implementation Committee regarding the compliance situation of Albania.

#### **Algeria**

##### *Phase-out of CFCs*

There were two individual investment projects under implementation in 2003. One project in the refrigeration sector was completed and phased out 27.3 ODP tonnes in 2003. The second refrigeration project is expected to be completed in 2004 with an ODP phase-out of 18.6 tonnes.

In addition, RMP activities are underway and have already resulted in a phase-out of 45 ODP tonnes of CFCs in 2003. According to the RMP, phase-out of 65 ODP tonnes in 2004, 90 ODP tonnes in 2005 and 45 ODP tonnes of CFCs in 2006 will be eliminated.

No difficulties regarding implementation of approved projects are expected in this country and the planned phase-out of 83.6 ODP tonnes of CFC is likely to be achieved in 2004.

#### **Argentina**

##### *Phase-out of CFCs*

There were two foam projects under implementation by UNIDO in this country. Both projects were completed and phased out 82.6 ODP tonnes.

### *Phase-out of Methyl-Bromide*

The project in the vegetables and cut flowers production sector is proceeding according to schedule. The application of the new alternative technology has started and proved to be successful. 99.2 ODP tonnes were phased out in 2003, as planned, and it is planned to phase-out 106.6 ODP tonnes in 2004, thus totalling phase-out of 331 ODP tonnes of methyl bromide through end 2004.

### *Solvent Sector*

The plan for phase-out of ODS in the solvent sector was approved in December 2003 (41<sup>st</sup> ExCom). The first site visit was undertaken and the schedule of activities was agreed upon. The Government, the counterparts and UNIDO are taking efforts to expedite implementation of the sector plan and ensure compliance with Argentina's MP obligations for CTC and TCA. It is planned to finalize the CTC phase-out activities in 2004 achieving a reduction of CTC consumption amounting to 30.5 ODP tonnes. The phase-out of TCA will amount to 4 tonnes in 2004 and the same amounts are planned for 2005 and 2006. The remaining TCA consumption of 8 tonnes and CFC 113 consumption of 5.5 tonnes is planned to be phased out after 2006.

## **Bosnia & Herzegovina**

### *Phase-out of CFCs*

There are five ongoing individual investment projects in this country, one foam project will phase out 33 ODP tonnes of CFCs in 2004. In addition, three refrigeration projects will be completed in 2004 phasing out in total 59.5 ODP tonnes of CFC and 0.6 ODP tonnes of TCA. All these projects are well advanced.

There is a delay on one foam project (Inga) due to difficulties of the counterpart. The equipment has already been purchased but not yet installed. The phase-out of 21 tonnes of CFC is foreseen for 2005.

### *ODS Phase-out Plan*

A national ODS phase-out plan was approved on the 41<sup>st</sup> meeting. As per Agreement, no phase-out is planned to result from this project in 2004, however in 2005 17.9 tonnes of CFC and 1.1 tonnes of TCA will be phased out.

### *Methyl Bromide*

The methyl bromide phase-out plan approved also on the 41<sup>st</sup> meeting will assist the country to phase-out 6.2 ODP tonnes of methyl bromide in 2005 and 5.6 ODP tonnes in 2006 in the tobacco seedling, vegetables and flower sectors.

### **Botswana**

#### *Phase-out of Methyl-Bromide*

A demonstration project has been undertaken on the use of methyl bromide alternatives in the cultivation of tomatoes and cucurbits. The report is under completion and the final workshop will be organized in the first half of 2004, thus completing the project.

### **Brazil**

#### *Phase-out of CFCs*

Five refrigeration projects were completed in 2003 phasing out in total 13 ODP tonnes of CFCs. One project was delayed due to difficulties of the counterpart in obtaining a new site of the equipment. This project will be completed in 2004 with two other ongoing refrigeration projects and one foam project. The total phase-out in 2004 will achieve 196.1 OPD tonnes. All projects are well advanced and equipment is on the site.

### **Cameroon**

#### *Phase-out of CFCs*

The Refrigerant Management Plan approved at the 38<sup>th</sup> meeting of the ExCom is proceeding as planned. The training of custom officers and trainers were completed and training of technicians started. Procurement of recovery and recycling equipment is in progress. With these activities 46 ODP tonnes of CFCs are expected to be phased out in 2004. In 2005 the planned CFC phase out amounts to 36 OPD tonnes and in 2006 30.6 ODP tonnes. There has been no delay in the implementation of this project.

### *Phase-out of Methyl-Bromide*

A demonstration project has been undertaken on the use of methyl bromide alternatives in the cultivation of tomatoes and cucurbits. The final workshop and report will be finalized in 2004, thus completing the project.

## **China**

### *Phase-out of CFCs*

In 2003 our work in China was somewhat hindered by the outbreak of SARS. The implementation of several projects was delayed, thus the total target of 2,908 ODP tonnes CFC phase-out could not be reached. The total phase-out by individual projects in 2003 amounted to 2,778.4 ODP tonnes. The delayed projects are, however, in a well advanced stage and they will be completed within the first half of 2004.

In addition, a phase-out of 180 ODP tonnes of CFCs was achieved in the tobacco sector in 2003.

In the year 2004 it is planned to phase-out a total of 1,567.1 ODP tonnes of CFCs through the completion of two refrigeration and four umbrella foam projects. In addition 140 ODP tonnes of CFC will be phased out as a first result of the domestic implementation sector plan and 200 ODP tonnes by the implementation of the 2004 phase of the tobacco, fluffing sector plan.

Thus, UNIDO's work in China will assist the Government to phase-out in total 1,907.1 ODP tonnes of CFC in the year 2004. In 2005 the implementation of the polystyrene foam umbrella project will be completed phasing out 359 ODP tonnes of CFCs. The implementation of the domestic refrigeration sector plan will be continued with a phase out of 169 ODP tonnes of CFCs in 2005 and 609 ODP tonnes of CFCs in 2006 in line with the agreement. The tobacco fluffing sector plan is also being implemented as scheduled and will bring additional 200 tonnes of phase-out in 2005, 150 ODP tonnes in 2006 and an additional 150 ODP tonnes after 2006.

## **Croatia**

Since the first part of the RMP was completed earlier, no additional CFC phase-out was achieved during 2003. A terminal phase-out management plan of CFCs was approved in 2003 and being implemented in cooperation with Sweden. The first phase-out under this plan will occur in 2005 amounting to 33 ODP tonnes and additional phase-out of 65 ODP tonnes is expected for the period after 2006.

*Phase-out of Methyl Bromide*

The project is progressing on schedule, 6.2 ODP tonnes have already been phased out in 2002 and an additional 3.2 ODP tonnes were phased out in 2003. The remaining 6.8 ODP tonnes will be phased out ahead of schedule already by 2004.

No implementation difficulties are experienced in this country.

**Democratic People's Republic of Korea**

*Production sector closure*

In the production sector 500 ODP tonnes of TCA and CFC-113 production capacity were phased out already in 2002. In 2003, 1,250 ODP tonnes of CFC-11 and CFC-12 production was closed, whereas in 2005 the CTC production facility closure will phase out 2,530 ODP tonnes.

*Phase-out of CFC*

Refrigeration sector phase-out plan for Korea was approved in 2003. The activities have started as planned. Equipment for the manufacturing sector are already under procurement. UNIDO will make every effort to complete the project in 2005 to ensure compliance of DPRK with its Montreal Protocol obligations for CFCs.

*Phase-out of CTC*

There are five ongoing CTC projects, which are in various phases of implementation. Both the Government and UNIDO put serious efforts to speed up the project activities and complete all five projects by end 2004, thus phasing out 565.8 ODP tonnes.

The CTC sectoral phase-out plan was approved at the 41<sup>st</sup> ExCom meeting which will help Korea to comply with the 85% reduction target. The UNIDO delegation already visited Korea in January and agreed on the allocation of resources between the process agent, solvent and fumigation sectors to ensure most efficient use of resources. UNIDO will carry out procurement from Headquarters and will try to find most suitable contractors to ensure timely supply of equipment due to the pressing phase-out schedule. Full support is provided by the Government.

## **Dominican Republic**

### *Phase-out of Methyl Bromide*

The methyl bromide phase-out is being implemented successfully. 40 ODP tonnes of methyl bromide were phased out in 2003. 60 ODP tonnes will be phased out in 2005 and 41 ODP tonnes in 2006.

## **Egypt**

### *Phase-out of CFC*

UNIDO is implementing the training of refrigeration technicians' component of the RMP approved for GTZ. Three training centers were established and additional four are being established. The equipment for them has already been delivered. The training of the trainers programme was completed and the training of technicians will be implemented during 2004. In the second half of 2004 the recovery and recycling scheme can also start since the price of CFC-12 has already reached the price of HFC134a.

### *Phase-out of Methyl Bromide*

Egypt has not been in compliance with its methyl bromide obligations. The Executive Committee approved a National Methyl Bromide Phase-out Plan, which is being implemented by UNIDO to enable compliance with the 20 per cent reduction target in 2005.

185.6 ODP tonnes will be phased out in 2005 as a result of the national phase-out plan for methyl bromide in horticulture and commodities fumigation.

## **Georgia**

### *Phase-out of Methyl Bromide*

The ongoing methyl bromide project will phase out 6 ODP tonnes of methyl bromide in 2006. The project is proceeding as planned.

## **Guatemala**

### *Phase-out of Methyl Bromide*

The implementation of the phase-out project has started, necessary agreements were signed and first tranche of equipment was purchased. 388 ODP tonnes are expected to be phased out in 2004 and 80 ODP tonnes in 2005. With these activities, Guatemala will return to compliance with regard to methyl bromide consumption in 2005, and achieve a reduction of 20 per cent.

## **Honduras**

### *Phase-out of CFCs*

The RMP was completed in 2003. All recovery and recycling equipment have been delivered. More than 100 technicians have been trained. The project will result in a phase-out of 14.2 ODP tonnes already in 2004. This will be confirmed by the ongoing monitoring activities.

### *Phase-out of Methyl Bromide*

The implementation of the first tranche of the methyl bromide phase-out plan has started, agreements with the farmers were signed and first tranche of equipment has been purchased and delivered. 213 ODP tonnes are expected to be eliminated by 2005.

## **India**

### *Phase-out of CFCs*

One umbrella project for three enterprises in the refrigeration sector is expected to be completed in first half of 2004 phasing out 25.9 ODP tonnes in two companies, the project for one company was already completed in 2003 with a phase-out of 1.36 ODP tonnes.

The refrigeration sector phase-out plan was approved on the 38th ExCom meeting with UNDP as the lead implementing agency. UNIDO is implementing the transportation refrigeration portion of this sector plan and is planning to phase out 40 ODP tonnes in 2004, and 67 ODP tonnes in 2005. The actual implementation of the project has started recently, since it took a longer time to agree with the Government on the implementation modalities. The agreement was signed end 2003.

A solvent project was also completed phasing out 18.9 ODP tonnes of CFC-113 and 0.8 ODP tonnes of CTC in 2003.

### *Phase-out of CTC*

6 projects in the solvent and process agent sector were completed in 2003 phasing out 162.6 ODP tonnes of CTC. One process agent project planned for completion in 2003 will be completed only in 2004 with an impact of 34.1 ODP tonnes. The activities under this project are also proceeding. The equipment was procured.

There are additional four projects in the process agent sector, which are to be completed in 2004 with a total phase-out of 249.3 ODP tonnes of CTC. The equipment purchases and other activities are proceeding well. Thus, it is expected that the implementation of UNIDO's projects will help the Government of India to meet its CTC obligations with a phase-out of 283.4 tonnes in 2004.

## **Indonesia**

### *Phase-out of CFCs*

One integral skin project was completed in 2003. The phase-out is 18.4 ODP tonnes. There are additional six projects in the foam sector under implementation. Four of these will be completed in 2004 phasing out 103.1 ODP tonnes, and the remaining two projects will be completed in 2005 phasing out 102 ODP tonnes of CFCs. All projects are in advanced implementation stage, in some projects the equipment has already been delivered, in others the equipment is under procurement. No difficulties in the implementation of these projects are foreseen in Indonesia.

## **Iran**

### *Phase-out of CFCs*

Two refrigeration projects and three projects in the foam sector were completed in 2003 phasing out 19.7 and 320 ODP tonnes, respectively. The cumulative phase-out of 339.7 tonnes of CFCs is below our target of 603.9 ODP tonnes. This is due to the political turmoil in the region that hindered suppliers to visit the country.

In 2004, UNIDO is planning to finalize all projects delayed from 2003 and complete additional projects. The completion of 19 refrigeration projects and three foam projects will phase out 484.7 ODP tonnes of CFCs.

In 2005, a phase-out of 164.7 ODP tonnes will be achieved as a result of the implementation of two foam projects.

A National CFC Phase-out Plan was approved at the 41<sup>st</sup> Meeting of the ExCom in December 2003. The project implementation has already started and meetings were held with the lead implementing agency GTZ in Vienna and subsequently in Iran with the participation of all implementing agencies involved. The implementation modalities and actions to be taken were agreed upon and it is expected that UNIDO will finalize the activities planned for 2004 which will reduce the CFC consumption of the country by 274.1 ODP tonnes of CFCs in the refrigeration manufacturing, refrigeration servicing and solvent sectors.

#### *Phase-out of Methyl Bromide*

Training of operators was completed and the total phase-out of 12.4 ODP tonnes is planned to take place in the first half of 2004.

### **Jordan**

#### *Phase-out of CFCs*

In Jordan, the originally planned 76.8 ODP tonnes CFC phase-out in the refrigeration sector could not be completed due to the political turmoil in the region that affected travels to the country. The projects, however, advanced well and will be completed in the first half of 2004. In total, four refrigeration projects are planned for completion achieving a phase-out of 95.9 ODP tonnes of CFCs. Three of these projects are in the manufacturing sector and 19.1 tonnes of ODP phase-out is expected as a result of training and investment activities under the RMP. The commercial refrigeration manufacturing part of the National ODS Phase-out Plan is being implemented by UNIDO and it is expected to phase out 41 ODP tonnes in the year 2005.

#### *Phase-out of TCA*

Out of the two projects approved in the sector, one was completed in 2003 and phased out of 6.4 ODP tonnes. The second project is expected to be completed in 2005 bringing an additional phase-out of 45 ODP tonnes.

Currently, we do not experience any implementation difficulties in this country.

## **Kuwait**

### *Phase-out of CFCs*

RMP was approved in 2002, the implementation is ongoing. We plan to phase out 64 ODP tonnes in 2005 provided legislation and price related issues will evolve in the future years as planned. In this respect, we rely on the active role of UNEP.

## **Lebanon**

### *Phase-out of CFCs*

An umbrella refrigeration project was planned to be completed in 2003, however, due to the crisis in the region, the implementation was hindered and the project will be completed in the first half of 2004 yielding a phase-out of 18.8 ODP tonnes.

### *Phase-out of Methyl Bromide*

The project is progressing according to schedule, 6 ODP tonnes have already been phased out in 2002, and 10.1 ODP tonnes in 2003. It is planned to phase out 14.2 ODP tonnes in 2004, 11.1 ODP tonnes in 2005 and 9 ODP tonnes in future years.

Currently, we do not experience any implementation difficulties in this country.

## **Libya**

### *Phase-out of CFCs*

The refrigeration project planned for 2003 for a phase-out of 53.4 ODP tonnes could not be completed due to travel difficulties. The project will be completed during the first half of 2004.

The activities under the recently approved National CFC Phase-out Plan have started, a UNIDO missions was already fielded, and it is planned to phase out 150.5 tonnes of CFC in the year 2004 to ensure compliance of Libya with the obligations of the Government vis-à-vis the Implementation Committee.

## **Malaysia**

### *Phase-out of CFCs*

The two foam UNIDO projects were completed in 2003 bringing an ODP phase-out of 27 tonnes.

## **Macedonia**

### *Phase-out of CFCs*

UNIDO planned to complete one aerosol project in 2003. The equipment was delivered, however, installation was delayed due to delay of counterpart inputs. The project will be completed in 2004 yielding in a phase-out of 25 ODP tonnes.

### *Phase-out of Methyl bromide*

In 2004, the project is proceeding well, after a partial phase-out in earlier years, 4.4 ODP tonnes were phased out in 2003. The remaining 7.8 ODP tonnes will be phased out in 2006.

## **Mexico**

### *Phase-out of Methyl Bromide*

The demonstration project was completed in 2003. The investment project is under approval by the Government.

### *CFC Production Sector*

The CFC production closure project was approved at the 40<sup>th</sup> Meeting of the ExCom, the conditions of the agreement regarding the first year production targets were achieved, the production of the company was audited, and the release of the second tranche was requested. The project runs smoothly and it is expected that Mexico will cease production of CFCs in the first half of 2005, and the total production for the years 2004 and 2005 will not exceed 22,000 ODP tonnes.

## **Mali**

### *Phase-out of Methyl Bromide*

An awareness workshop in order to prevent re-introduction of methyl bromide in the country was organized in March 2003.

## **Morocco**

### *Phase-out of CFCs*

Three projects in the commercial refrigeration sector were completed in 2003 phasing out 31.4 ODP tonnes as planned.

### *Phase-out of Methyl Bromide*

The phase-out project for sole fumigation in the tomato sector is experiencing delays, the obligations under the Agreement have not yet been achieved, UNIDO is continuing negotiations with the Government and the Association of the Growers.

In the strawberry sector, however, the project is proceeding well, and 20.4 ODP tonnes were phased out in 2003, and an additional 42.2 ODP tonnes and 33.4 ODP tonnes will be phased out in 2004 and 2005, respectively.

## **Nigeria**

### *Phase-out of CFCs*

Six (6) commercial refrigeration projects were completed in 2003 with a phase-out of 105.8 ODP tonnes. There are two more stand-alone UNIDO refrigeration projects in the country, they will be completed in 2004 phasing out 19.3 ODP tonnes.

The National CFC-Phase-out Plan is being implemented in cooperation with UNDP as the lead implementing agency. It is expected that a phase-out of 100.9 ODP tonnes will be achieved in 2005 in the refrigeration manufacturing and aerosol sectors.

## **Oman**

### *Phase-out of CFCs*

The first activities under the RMP were implemented, a training course was held and some equipment was ordered. The phase-out of 13 ODP tonnes is planned for 2005.

## **Pakistan**

### *Phase-out of CFCs*

Three projects in the refrigeration sector that experienced serious delays due to the difficult situation in the country were successfully completed in 2003 bringing an ODP phase-out of 147.4 tonnes. In 2004, another domestic refrigeration project will be completed with a phase-out target of 12.9 ODP tonnes of CFCs.

In addition, 1.3 ODP tonnes of CFC-113 will be phased out in 2005 as part of a stand-alone solvent project.

### *Phase-out of CTC and TCA*

One process agent and one solvent project will be completed in 2004, with a phase-out of 90 ODP tonnes.

The National CTC Phase-out Plan was approved at the 41<sup>st</sup> meeting of the ExCom, UNIDO fielded a mission and focuses on speedy implementation of the project to enable compliance of Pakistan with its Montreal Protocol obligations. It is planned to phase out 100 ODP tonnes of CTC in 2004.

An additional phase-out of 68.3 ODP tonnes of CTC and 1.1 ODP tonnes of TCA are planned for 2005.

### *Phase out of Halons*

The Halon Sector Phase-out Plan was approved at the 41<sup>st</sup> meeting of the ExCom, and it will be completed in 2006 phasing out the consumption of 24.2 ODP tonnes of halons.

## **Qatar**

### *Phase-out of CFCs*

RMP activities are under way, several training courses have been conducted, the purchase of equipment is planned after completion of the training. The project is expected to be completed in 2005 with an ODP phase-out of 13 tonnes.

## **Romania**

### *Phase-out of CTC*

A terminal umbrella phase-out project for the solvent sector was approved by the 41<sup>st</sup> ExCom, the project will yield in a phase-out of 11.1 ODP tonnes in 2004.

## **Senegal**

### *Phase-out of CFCs*

RMP activities were completed in 2003 and a phase-out of 5 ODP tonnes was achieved.

## **Serbia and Montenegro**

### *Phase-out of CFCs*

One refrigeration project for phasing out 59.6 ODP tonnes at seven enterprises was completed in 2003 ahead of schedule. Two stand alone foam projects will be completed in 2004 to phase out 109.4 ODP tonnes of CFC. An additional two projects in the refrigeration sector will phase out 12.9 ODP tonnes in 2005.

### *Phase-out of Halons*

The halon bank management programme is experiencing some delay, the equipment was purchased, training was held, however, the final completion of the project will occur only at the end of 2004 instead of the planned completion date January 2004. The project impact is 370 ODP tonnes of halon.

## **Sudan**

### *Phase-out of CFCs*

All activities under the RMP were completed and the phase-out of 50 ODP tonnes is to be confirmed by the ongoing monitoring activity.

## **Syria**

### *Phase-out of CFCs*

One foam project was completed in 2003 with an ODP phase-out of 33.7 tonnes.

Additional two foam projects and one refrigeration project are planned to be completed in 2004 phasing out 128.7 ODP tonnes. Four aerosol projects with a total CFC phase-out of 73.1 tonnes will be completed in 2004. These projects were planned to be completed already in 2003, however, due to difficulties in the region the finalization of projects will occur in the first half of this year only. Thus, the total phase-out of CFCs in Syria through UNIDO projects will be at the level of 201.6 ODP tonnes in 2004 and 16 ODP tonnes in 2005.

### *Phase-out of Methyl Bromide*

The Methyl Bromide project started with a delay, however, currently it is proceeding well. The methyl bromide phase-out of 5 ODP tonnes planned for 2002 was achieved in 2003. It is expected that 29.8 ODP tonnes will be phased out in 2004.

## **Tunisia**

### *Phase-out of CFCs*

The aerosol project will be completed in 2004 with an ODP phase-out of 29.8 tonnes; the commissioning of the installation of equipment was carried out in January 2004. The delay was caused by the contractor who was not able to install the equipment by the date required.

## **Turkey**

### *Phase-out of CFCs*

Two individual foam projects were completed in 2003 phasing out 52.8 ODP tonnes.

The second stand alone foam project will be completed in 2004 phasing out 95 ODP tonnes. The equipment has already been delivered.

*Phase-out of Methyl Bromide*

The Methyl Bromide project is underway, 29.2 ODP tonnes were phased out in 2003. In 2004 and 2005, a phase-out of 58 and 89 ODP tonnes will be phased out respectively.. The projects in Turkey are proceeding smoothly according to the schedule. In 2006, further 58 ODP tonnes of methyl bromide will be phased out.

**Uganda**

*Phase-out of Methyl Bromide*

The project is expected to be completed by 2005 with a total phase-out of 12 ODP tonnes. The ExCom approved the change of technology on this project.

**Uruguay**

*Phase-out of Methyl Bromide*

The project is expected to be completed in 2005 with a phase-out of 11 ODP tonnes, while 5 tonnes have already been eliminated in 2002, and 8 tonnes in 2003.

**Venezuela**

*Phase-out of CFCs*

One umbrella and one stand-alone foam project were completed in 2003 and one foam project was cancelled. The total 2003 phase-out amounted to 99.7 ODP tonnes.

The umbrella refrigeration project planned for completion in 2003 experienced delays since two of the companies covered by this project are having financial and technical difficulties. In general, there have been delays in the implementation of projects in the country due to the tense political and economic situation. In 2004, one foam project will be also completed, and thus the phase-out of CFCs will reach 64.3 ODP tonnes. The last umbrella foam project will phase out 135.5 ODP tonnes in 2005.

## **Vietnam**

### *Phase-out of Methyl Bromide*

A demonstration project was completed in 2003.

## **Yemen**

### *Phase-out of CFCs*

Two refrigeration projects with a phase-out of 13.4 ODP tonnes of CFCs were completed in 2003.

There are two aerosol projects that will be completed in early 2004 phasing out 179.3 ODP tonnes. The implementation of these projects was delayed due to regional problems, so the deadline of completion slipped from 2003 to first half of 2004.

## **Zimbabwe**

### *Phase-out of Methyl Bromide*

In 2003, a phase-out of 39.6 ODP tonnes was achieved and in 2004 51.4 ODP tonnes will be phased out.
