COMITÉ EXÉCUTIF  
DU FONDS MULTILATÉRAL AUX FINS  
D'APPLICATION DU PROTOCOLE DE MONTRÉAL  
Quarante-cinquième réunion  
Montréal, 4 – 8 avril 2005

**PLAN D'ACTIVITÉS DE L'ONUDI POUR 2005-2007**

## **OBSERVATIONS ET RECOMMANDATIONS DU SECRÉTARIAT DU FONDS**

1. L'ONUDI a préparé son plan d'activités, qui est joint en annexe à ces observations, d'après les décisions 37/68, 38/66 et 41/93.

2. Le présent document contient un résumé des activités prévues par l'ONUDI pour 2005-2007, incluant les données sur l'élimination de SAO pendant la période triennale, les indicateurs d'efficacité du plan d'activités de l'ONUDI, des observations générales, et il soumet des recommandations à l'examen du Comité exécutif.

### **Activités prévues pour 2005-2007**

3. Ce plan d'activités est un plan d'activités triennal à horizon mobile puisqu'il inclut les trois années d'activités quoique le degré de certitude soit moindre pour les activités de 2006 et 2007, sauf dans le cas des ententes pluriannuelles.

#### Activités prévues pour 2005

4. L'ONUDI prévoit déposer en 2005 des projets d'une valeur totale de 43,3 million \$US, conduisant à l'élimination de 10 026 tonnes PAO. Ce plan comprend :

- Vingt ententes pluriannuelles, basées sur la performance, pour l'élimination de secteurs et de substances au coût total de 24,52 millions \$US et qui, une fois mises en place, entraîneront l'élimination de 7 200 tonnes PAO.
- Douze nouvelles ententes pluriannuelles, basées sur la performance, représentant un financement de 8,27 millions \$US en 2005 (43,84 millions \$US au total) et qui entraîneront l'élimination de 984 tonnes PAO de SAO en 2005 (3 813 tonnes PAO au total).
- Douze projets d'investissement individuels seront présentés en 2005, pour une valeur de 7,57 millions \$US, incluant six projets qui entraîneront l'élimination totale d'un secteur ou d'une substance.
- La préparation de projets pour un montant de 613 275 \$US.
- Vingt-six projets ne portant pas sur des investissements, pour une valeur de 2,32 millions \$US, incluant quatre projets de renforcement des institutions d'une valeur de 768 572 \$US, un projet d'assistance technique d'une valeur de 430 000 \$US et vingt et un projets de formation d'une valeur de 1,12 million \$US.

#### Activités prévues pour 2006

5. L'ONUDI prévoit déposer en 2006 des projets évalués à 40,28 millions \$US conduisant à l'élimination de 8 467 tonnes PAO. Ce montant inclut 22,99 millions \$US pour les ententes pluriannuelles en cours.

Activités prévues pour 2007

6. L'ONUDI prévoit déposer en 2007 des projets évalués à 19,43 millions \$US conduisant à l'élimination de 2 696 tonnes PAO. Ce montant inclut 5,54 millions \$US pour les ententes pluriannuelles en cours.

Coûts de base

7. En plus des coûts, l'ONUDI a inclus la somme de 1,5 million \$US par année pour les coûts de base, pour la période de 2005-2007.

**Élimination des SAO pendant la période 2005-2007**

8. L'ONUDI prévoit éliminer 24 428 tonnes PAO dans le cadre de projets en cours et d'ententes pluriannuelles approuvées au cours de la période 2005-2007. De plus, l'ONUDI a annoncé l'élimination de 2 494 tonnes PAO grâce aux projets proposés pour approbation au cours de la période triennale.

9. Le plan d'activités de l'ONUDI contient une section, avec annexe descriptive par pays à l'appui, sur l'accélération de la mise en œuvre des projets, plus particulièrement les efforts liés à la durabilité des plans de gestion des frigorigènes. Le plan d'activités de l'ONUDI comprend aussi un texte d'information sur ses efforts pour offrir une assistance pour la conformité aux pays visés à l'article 5.

**Observations**

10. Le plan d'activités de l'ONUDI comprend des projets pour le secteur de la production de la Chine et de la Roumanie. L'ONUDI prévoit déposer en 2006 un plan d'élimination pluriannuel de la production de bromure de méthyle évalué à 7,5 millions \$US afin d'éliminer 776 tonnes PAO. Elle prévoit aussi proposer un projet de cessation de la production de CFC/bromure de méthyle/tétrachlorure de carbone en Roumanie dans le cadre de son plan d'activités de 2005. L'ONUDI a affecté la somme de 2,2 millions \$US au projet dans son plan d'activités, dont 1,3 million \$US demandés en 2005. Une fois réalisé, le projet mènerait à l'élimination de 400 tonnes PAO.

11. Le plan d'activités de l'ONUDI pour 2005 comprend un accord pluriannuel d'élimination pour les inhalateurs à doseur d'une valeur de 12,9 millions \$US qui se traduira par l'élimination de 369 tonnes PAO de CFC lorsqu'il sera mené à terme. L'ONUDI prévoit demander la somme de 538 000 \$US en 2005 pour la première tranche de ce projet.

12. Le plan d'activités de l'ONUDI pour 2005 comprend plusieurs activités sur le CTC et le TCA dans des pays à faible volume de consommation et des pays qui ne sont pas à faible volume de consommation. L'ONUDI prévoit proposer des activités de préparation de projets et des projets d'investissement pour le CTC en République démocratique du Congo et au Zimbabwe, et des activités de préparation de projet pour la Serbie-Monténégro. Il comprend également des projets sur les solvants et les agents de transformation, et des ateliers de formation et de sensibilisation sur le CTC, le TCA ou les deux au Burundi, en Croatie, en Éthiopie, en Maurice,

au Maroc, en Oman, en République Dominicaine, en Tunisie, au Yémen et en Zambie. Le plan d'activités de 2005 prévoit des plans pour le secteur des solvants pour l'Iran et la Roumanie, tandis que le plan d'activités pour 2006 prévoit une proposition de plan d'élimination des agents de transformation pour la République populaire démocratique de Corée. Les discussions sur ces activités pourront être abordées selon l'examen de la question des activités sur le CTC/TCA/bromure de méthyle dans les pays à faible volume de consommation fondé sur la réunion anticipée du groupe de contact et l'examen de la question dans le plan d'activités général (UNEP/OzL.Pro/ExCom/45/5).

13. Le plan d'activités du PNUD pour 2005 comprend deux tranches de financement annuelles demandées pour la République populaire démocratique de Corée. La tranche annuelle de 2004 n'a pas été demandée, de sorte que l'ONUDI demande les tranches de 2004 et de 2005 en 2005.

#### Projets sur les refroidisseurs

14. Le plan d'activités de l'ONUDI pour 2005 comprend un projet de démonstration pour les refroidisseurs d'une valeur de 438 000 \$US. La Macédoine est encore admissible à un appui financier pour des activités portant sur les CFC mais elle n'a pas rapporté de consommation de CFC-11. L'ONUDI a indiqué que la Macédoine a emmagasiné le CFC-11 qu'elle utilise actuellement pour les refroidisseurs. Les discussions sur le sujet pourront être abordées selon l'examen du Comité exécutif des activités d'élimination des SAO dans le secteur des refroidisseurs en vertu de la décision 44/61 et de la question soulevée dans le plan d'activités général.

#### Banque de halons en Arménie

15. Le plan d'activités de l'ONUDI comprend la préparation d'un projet de banque de halons en Arménie. L'Arménie n'a pas rapporté de consommation de halons depuis 1989 et a une valeur de référence de zéro tonne PAO. L'ONUDI a indiqué que le projet du Fonds mondial de l'environnement « Arménie : Programme d'élimination des substances qui appauvrissent la couche d'ozone » n'a pas tenu compte des halons. L'ONUDI compte établir l'historique de la consommation de halons dans le cadre de la préparation d'un projet, en précisant qu'aucune étude sur la consommation de halons n'avait encore été effectuée au pays à ce jour.

#### Plans d'élimination des SAO et des inhalateurs à doseur en Égypte

16. L'ONUDI prévoit également proposer un plan d'élimination des inhalateurs à doseur de 4,8 millions \$US pour l'Égypte en 2006. Cependant, il faut préciser que l'ONUDI prévoit déposer un plan d'élimination pluriannuel des SAO pour l'Égypte en 2005. La valeur totale du plan d'élimination des SAO inscrit au plan d'activités de l'ONUDI est de 4,4 millions \$US, dont 1,1 million \$US qui seraient demandés en 2005. Le plan d'élimination des inhalateurs à doseur qui sera proposé après le plan d'élimination des SAO pourrait ne pas être admissible, selon le niveau d'admissibilité restant.

Projet de bromochlorométhane en Turquie

17. Le plan d'activités de l'ONUDI pour 2006 comprend le financement d'une préparation de projet et un projet d'investissement sur le bromochlorométhane en Turquie. Ce projet serait le premier projet de bromochlorométhane proposé au Comité exécutif aux fins d'examen. L'utilisation du bromochlorométhane qui fait l'objet du projet n'a pas encore été étudiée par le groupe de l'évaluation technique et économique, de sorte que cette activité pourrait ne pas être admissible.

Chevauchements possibles de projets

18. Il y a un chevauchement possible des activités de CTC et de TCA prévues par le PNUD et l'ONUDI en République démocratique du Congo. Les deux agences ont reçu une lettre demandant leur assistance mais la question n'a pas encore été réglée. La France, l'ONUDI et le PNUE prévoient tous des activités de plan de gestion de l'élimination finale en Côte d'Ivoire. Le Secrétariat a demandé au PNUE d'assurer la coordination. Les agences prévoient régler la question et faire part des résultats à la 45<sup>e</sup> Réunion.

**Indicateurs d'efficacité**

19. La tableau 1, ci-dessous, présente un sommaire des indicateurs d'efficacité de l'ONUDI en vertu de la décision 41/93.

Tableau 1**INDICATEURS D'EFFICACITÉ**

<b>Élément</b>	<b>Objectif de 2005</b>
Nombre de programmes annuels approuvés pour des ententes pluriannuelles par rapport au nombre planifié	25
Nombre de projets/activités individuels (projets d'investissement, plans de gestion des frigorigènes, banques de halons, assistance technique) approuvé par rapport au nombre planifié	30
Activités reliées aux objectifs achevées (p. ex., mesures politiques, assistance pour la réglementation)/ niveaux de SAO atteints par les tranches annuelles approuvées de projets pluriannuels par rapport au nombre planifié	16
Quantités de SAO éliminées dans les projets individuels par rapport à celles planifiées dans les rapports périodiques	1 350 tonnes PAO
Achèvement des projets (conformément à la décision 28/2 pour les projets d'investissement) et selon la définition pour les projets ne portant pas sur des investissements par rapport aux achèvements prévus dans les rapports périodiques	35
Pourcentage d'assistance dans les politiques/la réglementation réalisée par rapport aux prévisions	4
Rapidité d'achèvement du volet financier par rapport aux dates d'achèvement prévues dans le rapport périodique	12 mois
Remise des rapports d'achèvement des projets dans les délais prescrits par rapport au nombre convenu	Dans les délais
Remise des rapports périodiques et des réponses dans les délais prescrits à moins de stipulation contraire	Dans les délais

20. Le tableau du plan d'activités de l'ONUDI révèle que l'ONUDI demandera une tranche de financement annuelle pour vingt accords approuvés et 12 nouveaux accords en 2005, pour un total de 32 tranches annuelles proposées en 2005. L'ONUDI a établi un objectif de 25 tranches annuelles à proposer en 2005, ce qui signifie que l'ONUDI s'attend à ne pas présenter 20 pour cent des tranches annuelles prévues. L'ONUDI aurait dû fixer un objectif de 32 programmes annuels approuvés afin d'assurer la conséquence par rapport aux autres agences et de tenir compte de quatre nouveaux accords à proposer en 2005.

21. Le tableau du plan d'activités de l'ONUDI révèle également que l'ONUDI éliminera 2 495,7 tonnes PAO dans le cadre de projets approuvés et en cours en 2005. L'ONUDI s'était fixé un objectif de 1 350 tonnes PAO pour l'indicateur du volume de SAO à éliminer. Cet objectif aurait dû être de 2 495,7 afin d'assurer la conséquence par rapport aux autres agences.

22. L'ONUDI a précisé que ses objectifs avaient été établis en supposant la réalisation de moins de 100 pour cent de son plan d'activités car les objectifs réalistes doivent tenir compte de facteurs externes (politiques, économiques et naturels) qui influencent l'approbation des projets et leur mise en œuvre. L'ONUDI a modifié ses objectifs à partir d'une estimation réaliste.

23. Dans son examen des indicateurs d'efficacité des plans d'activités de 2004, le Comité exécutif a convenu que les indicateurs d'efficacité étaient conformes aux données proposées dans les plans d'activités plutôt qu'aux objectifs inférieurs établis par les agences. Le Comité exécutif pourrait souhaiter prendre des mesures semblables pour l'ONUDI.

## RECOMMANDATIONS

Le Comité exécutif pourrait souhaiter :

1. Approuver le plan d'activités de 2005-2007 de l'ONUDI présenté dans le document UNEP/OzL.Pro/ExCom/45/9 tout en prenant note que l'approbation du plan n'entraîne pas l'approbation des projets qu'il contient ni de leurs niveaux de financement, et des modifications apportées après l'examen des questions suivantes :
  - a) Projets de démonstration et préparation de projets pour les refroidisseurs.
  - b) Préparation d'un projet de banque de halons en Arménie.
  - c) Plan d'élimination des inhalateurs à doseur en Égypte dans le cadre d'un plan d'élimination des SAO prévue pour l'Égypte.
  - d) Projet de bromochlorométhane en Turquie.
  - e) Activités liées au tétrachlorure de carbone et au TCA en République démocratique du Congo.

2. Approuver les indicateurs d'efficacité de l'ONUDI présentés dans le tableau 1 des observations du Secrétariat dans le document UNEP/OzL.Pro/ExCom/45/9 tout en établissant des objectifs de 32 programmes annuels approuvés et de 2 495,7 tonnes PAO éliminées dans le cadre de projets individuels en 2005.

**UNIDO**  
**BUSINESS PLAN 2005**

UNITED NATIONS INDUSTRIAL DEVELOPMENT  
ORGANIZATION

## EXECUTIVE SUMMARY

The 2005 Business Plan of UNIDO together with the forecast for 2006 and 2007 represents the Three-year Rolling Business Plan of Montreal Protocol activities of the Organization. It was prepared based on the previous three year rolling business plan, taking into consideration the approvals and experience of previous years, the requests received from Article 5 countries and the decisions taken and priorities established by the Executive Committee. It also reflects the discussions held in Montreal during the Inter-agency Coordination Meeting, whereby an analysis of the compliance situation (reduction targets) provided valuable information on certain Article 5 countries in direct need of assistance. It is largely inspired from the model prepared by the Secretariat of the Multilateral Fund.

In 2005, UNIDO plans to prepare and submit for approval to the Executive Committee thirteen (13) national and sectoral ODS Phase-out Plans as well as other investment projects. The amount foreseen for these new activities is **US\$ 15,843,243** including support costs and excluding forward commitments. The impact of the planned 2005 approvals is at the level of **2,826 ODP tonnes**.

Extensions for institutional strengthening projects for four countries and technical assistance activities for more than 15 countries are also included in the Business Plan with a total budget of **US\$ 1,890,223**. Funds for project preparation will be requested for an amount of **US\$ 612,750**.

The forward commitments amount to a total of **US\$ 24,520,467** for 2005.

Finally, in accordance with decisions 38/68, 41/94 and 44/7 from the Executive Committee **US\$ 1,500,000** have been allocated for funding of the core unit at UNIDO.

The total amount, including forward commitments, new investment and non-investment activities, and funding of core unit is **US\$ 44,798,257** (including support costs) with an impact of **10,026 ODP tonnes**.

In the 2005 Business Plan, after careful review of all the ODS consumption data available for Article 5 countries, and based on the compliance model recently updated by the Secretariat, priority was given to Article 5 countries in need of immediate assistance to achieve their consumption and production reduction obligations particularly in 2005 and 2007. In addition, several activities have been included to maintain momentum and to accelerate phase-out.

As per decision 38/66 of the Executive Committee, UNIDO prepared a realistic forecast of activities for 2006 and 2007, while noting that part of these activities derive from multi-year

agreements, national and sectoral phase-out plans approved in prior years and also from new activities planned for approval in 2005.

For the second and third year of the Three-year Rolling Business Plan, **US\$ 41,780,596** worth of projects was included for the year 2006 with a planned phase-out of **8,466.5 ODP** tonnes and **US\$ 20,930,472** worth of projects were earmarked for 2007 with an impact of **2,696 ODP** tonnes.

## **A. MULTILATERAL FUND TARGETS**

### **1. CONTEXT**

UNIDO prepared its 3-year rolling business plan for 2005 to 2007 based on the 3-year phase-out plan/compliance-oriented model and the status/prospects of compliance data tables prepared by the Multilateral Fund Secretariat, as well as the Government requests received from Article 5 countries. An interagency coordination meeting was held on the 2<sup>nd</sup> and 3<sup>rd</sup> of February. Considering the business plans received by all implementing agencies and the compliance-oriented model, the Secretariat identified the countries that are in need of immediate assistance in order to comply with the various phase-out schedules (CFCs, Halons, CTC, Methyl Bromide and methyl chloroform) for which no activities were included in the business plans of implementing agencies and pointed out cases where a duplication of activities occurred among the various implementing agencies.

This Business Plan was prepared taking into account the elements indicated above and the following decisions of the ExCom: 43/3 requesting the inclusion of countries with unfunded eligible consumption that are in non-compliance or at risk of non-compliance for the 2005 and 2007 control measures, 44/5 requesting the inclusion in the business plan of countries to achieve the 2005 CTC and TCA phase-out targets, 44/4 requesting the possible inclusion in the business plans activities for the following countries by substance: Halons: Libya; CTC: Islamic Republic of Iran; 38/68 and 41/94 on administrative support costs and agency shares; 41/14 on consideration of projects in 2004 originating from the Business Plan 2003; 41/61, 41/64 and 41/69 on individual projects; as well as 41/93 on performance indicators.

During the preparation of the Business Plan, we had to take into consideration our experience and information collected in several countries which shows that part of the eligible for funding remaining consumption cannot be addressed only by investment activities. During the preparation of projects, the remaining data discrepancies, if any, will be clarified. The current Business Plan, however, reflects only those phase-out targets, which according to our present information, can be realistically addressed through investment activities.

## 2. RESOURCE ALLOCATION

In 2005, UNIDO will prepare three national ODS phase-out plans (Algeria, Egypt, Syria), one national CFC phase-out plan (Romania), one TPMP (Macedonia), one MDI phase-out plan (China), four phase-out plans in the fumigants sector (Brazil, Iran, Libya, Zimbabwe), two solvent sector phase-out plans (Iran, India), three halon projects (Georgia, Libya, Morocco), one production sector phase-out plan (Romania), one chiller demonstration project (Macedonia), four extensions of institutional strengthening projects (Mexico, Oman, Romania and Syria), three fumigation awareness raising activities to urge countries to ratify the Copenhagen Amendment (Angola, Cambodia and Central African Republic), awareness raising activities for seventeen countries with low consumption of MeBr, CTC and TCA, and other investment activities to phase out CFCs and methyl bromide activities amounting to US\$ 18,956,516. The forward commitments of programmes already approved in principle amount to US\$ 24,520,467. These activities plus the core unit funding of US\$ 1,500,000 would give a total of US\$ 44,798,257 allocation for the year 2005.

**Table 1. Resource allocation**

Position	Type/sector	US\$ (incl. support cost)*	Share of Business Plan allocation
(a)	Consumption sector (investment projects) including forward commitments	27,430,351	61.2%
(b)	Production sector including forward commitments	6,103,188	13.6%
(c)	Preparation of investment projects	613,275	1.4%
(d)	Methyl bromide projects including forward commitments	5,432,671	12.1%
(e)	Other sector (Tobacco fluffing project)	1,827,500	4.1%
(f)	Non-investment projects (INS & TRA)	1,891,272	4.2%
(g)	Funding of core unit representing	1,500,000	3.3%
	Total	44,798,257	100%

The details of the 3-year rolling Business Plan are spelled out in the database, Annex 1 and Table 2.

**Chart 1. Resource Distribution**

The contribution of UNIDO's Business Plan to the implementation of the 3-year Phase-out Plan of the Multilateral Fund is demonstrated in the following two tables:

**Table 2. ODS Phase-out Impact of Planned New Activities and Forward Commitments**

Phase-out in ODP tonnes	New Activities				Forward Commitments			
	2005	2006	2007	Total	2005	2006	2007	Total

\*: More than one substance

### **3. ASSISTANCE TO COUNTRIES IN NON-COMPLIANCE**

UNIDO's Business Plan focuses on the compliance needs of Article 5 countries assisted by the Organization. In this respect, special attention was paid to countries in non-compliance, and those who are in potential non-compliance in achieving their obligations toward the Montreal Protocol. The following activities are planned in these countries:

#### **Albania**

Albania has been in non-compliance with its CFC obligations. The Government presented its plan of action to the Implementation Committee. The plan of action was recommended by the Implementation Committee and approved by the Meeting of the Parties under decision XV/26. As per decision XV/26, Albania, the next CFC reduction milestones for Albania are 61.2 ODP tonnes in 2004 and 36.2 ODP tonnes in 2005.

UNIDO is implementing a national ODS phase-out plan. The plan includes a solvent and a recovery and recycling component. The project had small delays relating to the understaffing of the national ozone unit and the rule requiring payment of VAT on project-related equipment. The problems were resolved during the middle of 2004.

It is to be pointed out that Albania reduced its CFC consumption to 35.0 ODP tonnes as reported in its data for 2003.

#### **Bosnia and Herzegovina**

Bosnia and Herzegovina has been in non-compliance with both its CFC and methyl bromide obligations. The plan of action was recommended by the Implementation Committee approved by the Meeting of the Parties under Decision XV/30 of the Meeting of the Parties.

As per its plan of action, the next CFC reduction milestones for Bosnia and Herzegovina are 167 ODP tonnes in 2004 and 102.1 ODP tonnes in 2005, while those of methyl bromide are 5.61 ODP tonnes in 2005 and 2006.

Bosnia and Herzegovina reported annual data for methyl chloroform (TCA) for 2003, which is above their requirement for a freeze in consumption. The country is presumed to be in non-compliance with the control measures and, therefore, Bosnia and Herzegovina was requested as per decision XVI/20 to submit to the Implementation Committee for consideration at its next meeting explanations for their excess consumption, together with plans of action with time-specific benchmarks to ensure a prompt return to compliance.

In view of decision XVI/32 reminding Bosnia and Herzegovina of its obligation to establish a licensing and quota system, the country is expecting to put in place the required legislation by the middle of 2005.

**a) Phase-out of CFCs**

There are four ongoing individual investment projects in Bosnia and Herzegovina; two of which are foam projects that will phase out 54 ODP tonnes of CFCs by July 2005. In addition, two refrigeration projects will be completed in June 2005 phasing out in total 39.14 ODP tonnes of CFC.

A national ODS phase-out plan was approved on the 41<sup>st</sup> meeting. As per the agreement between Bosnia and Herzegovina and the ExCom, no phase-out is planned to result from this project in 2004, however in 2005, 17.9 tonnes of CFC and 1.1 tonnes of TCA will be phased out. This will allow the country to return to compliance with regard to its CFC consumption according to the action plan approved.

**b) Phase-out of Methyl Bromide**

UNIDO is implementing a methyl bromide investment project, which is going on track. The project will enable the country to phase out 6.2 ODP tonnes of methyl bromide in 2005 and 5.6 ODP tonnes in 2006 in the tobacco seedling, vegetables and flower sectors. This will allow the country to return into compliance with regard to its methyl bromide consumption in accordance with its plan of action.

**c) Phase-out of CTC and TCA**

One company uses 0.63 ODP of TCA for cleaning of heat exchangers. The use of TCA at this company will be phased out by the middle of 2005. UNIDO is also implementing the second tranche of the CTC/methyl chloroform phase-out plan, which will help to phase out the consumption of TCA in due course.

## **Botswana**

Botswana has been in non-compliance with its methyl bromide obligations. The Government presented its action plan to the Implementation Committee, which was approved under Decision XV/31 of the Meeting of the Parties. The next milestones for the phase-out of methyl bromide in Botswana are 0.2 ODP tonnes in 2004 and 0 ODP tonnes in 2005.

The demonstration project implemented by UNIDO was completed in December 2004 and the consumption of methyl bromide in 2005 is expected to be zero.

## **Guatemala**

Guatemala has been in non-compliance with its CFC and methyl bromide obligations. The Government presented its action plan to the Implementation Committee, which was approved under Decision XV/34 of the Meeting of the Parties. UNIDO is active in the country in the methyl bromide sector only. Thus, we are concentrating our activities on complying with the above Decision regarding methyl bromide. The next milestones for Guatemala are to reduce the methyl bromide consumption to 492 ODP tonnes by 2004 and 360 ODP tonnes in 2005.

The implementation of the methyl bromide phase-out project has started, necessary agreements were signed and first tranche of equipment was purchased. 296.6 ODP tonnes were phased out in 2004 and 80 ODP tonnes are expected to be phased out in 2005. With the start up of equipment and the introduction of the new technology, Guatemala will return to compliance with regard to methyl bromide consumption in 2005, and achieve a reduction of 20 per cent.

## **Honduras**

Honduras has been in non-compliance with its methyl bromide obligations. The Government presented its action plan to the Implementation Committee, which was approved under Decision XV/35 of the Meeting of the Parties. The next methyl bromide reduction milestones for Honduras are 306.1 ODPT in 2004 and 207.5 ODPT in 2005.

UNIDO is assisting Honduras in implementing a methyl bromide phase-out project in the melon, banana and tobacco seedling sectors. The first phase of the project will be completed in December 2005 in lines with decision 42/14.

## **Iran**

Iran reported annual data for methyl chloroform (TCA) for 2003, which is above their requirement for a freeze in consumption. The country is presumed to be in non-compliance with

the control measures and, therefore, Iran was requested as per decision XVI/20 to submit to the Implementation Committee for consideration at its next meeting explanations for their excess consumption, together with plans of action with time-specific benchmarks to ensure a prompt return to compliance.

It is noted, however, that the Islamic Republic of Iran has submitted a request for a change in its baseline data for methyl chloroform that will be considered by the Implementation Committee at its next meeting. In this respect, UNIDO is assisting Iran in developing a CTC/TCA phase-out project.

### **Libyan Arab Jamahiriya**

The Libyan Arab Jamahiriya has reported annual data for halons for 2003, which is above its requirements for those substances. As a consequence, for 2003, the Libyan Arab Jamahiriya was in non-compliance with its obligations under Article 2B of the Montreal Protocol.

The Meeting of the Parties requested the Libyan Arab Jamahiriya, as a matter of urgency, to submit a plan of action with time-specific benchmarks to ensure a prompt return to compliance. UNIDO included in the business plan a halon-banking project for Libya which will be submitted to the July or November sessions of the ExCom.

In 2003, Libya reported a consumption of 704.1 ODP tonnes of CFCs, which puts it in compliance with its action plan approved under decision XV/36 where the benchmark for 2003 is 710 ODP tonnes. Based on the measures taken by the Government of Libya and the progress made in the implementation of the national phase-out plan, Libya is expected to continue being in compliance in 2004. With regard to the licensing and quota system, it is to be noted that a draft ODS regulation was formulated. The legislation is currently in the process of being enacted by the Government.

### **Nigeria**

The next CFC phase-out milestones for Nigeria are 3200 ODPT in 2004 and 1800 ODPT in 2005. UNIDO is assisting Nigeria to implement the National CFC Phase-out Plan (refrigeration manufacturing, aerosol and solvent components). The ongoing tranches of the NPPs are expected to be completed in 2005 phasing out around 210 ODP tonnes of CFCs.

It is to be mentioned that the 2003 reported consumption of CFC in Nigeria is 2662.4 ODPT.

### **Pakistan**

Pakistan has been in non-compliance with regard to its Halon consumption in 2003. Pakistan was, therefore, requested to prepare a plan of action with time-specific benchmarks, which was

recommended by the Implementation Committee and approved at the 16<sup>th</sup> Meeting of the Parties. In its plan of action, the halon consumption in Pakistan should not exceed 14.2 ODPT in 2004 and 7.1 ODPT in 2005. UNIDO is assisting Pakistan in implementing its halon banking project, which should help to bring back the country into compliance. Pakistan has also introduced a licensing and quota system to ensure getting back into compliance.

### **Uganda**

The plan of action for the phase-out of methyl bromide in Uganda was approved by the Decision XV/43 of the Parties. The next methyl bromide phase-out milestones are 24 ODP tonnes in 2004 and 6 ODP tonnes in 2005.

UNIDO is assisting Uganda in phasing out methyl bromide through a sectoral methyl bromide phase-out plan. The project is expected to be completed by 2005, thus enabling Uganda to return to compliance with its methyl bromide obligations.

### **Uruguay**

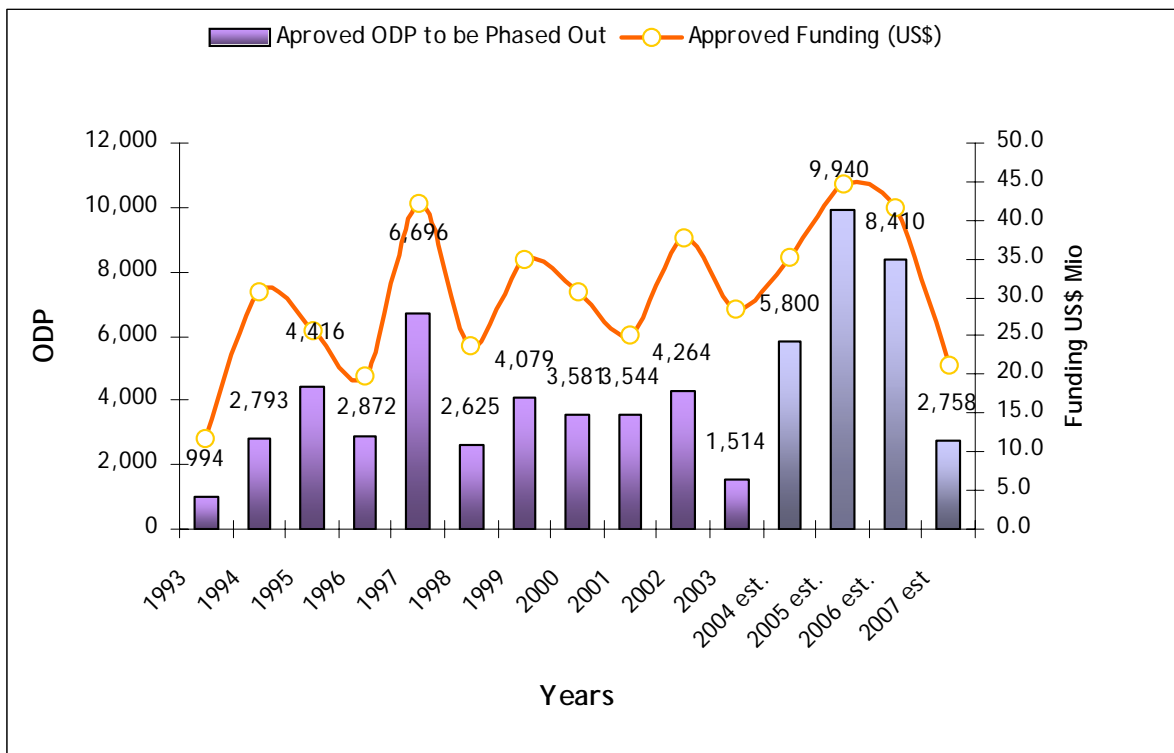

The plan of action for the phase-out of methyl bromide in Uruguay was approved by the Decision XV/44 of the Parties. The next methyl bromide phase-out milestones are 4 ODP tonnes in 2004 and 0 ODP in 2005.

UNIDO is assisting Uruguay in phasing out methyl bromide through a sectoral methyl bromide phase-out plan. The project is expected to be completed by 2005, thus enabling Uruguay to return to compliance with its methyl bromide obligations.

#### 4. PROGRAM EXPANSION

In the years 2005 to 2007, UNIDO aims to enhance its assistance to Article 5 countries by strengthening its project portfolio through new approvals. The budget of activities and their impact included in the 2005-2007 Rolling Business Plan are shown in the graph below and compared to the historical data on UNIDO’s project approvals:

##### Approval History

The main objective of this Business Plan is to assist Article 5 countries in meeting their obligations under the Montreal Protocol, by suggesting phase-out projects as well as technical assistance activities. It is expected that tonnages to be eliminated through forward commitments, ongoing and planned activities will at least meet the forthcoming targets of 2005 for CFCs, halons, CTC, TCA and Methyl Bromide and of 2007 for CFCs.

In 2005, UNIDO will prepare 65 new activities for an amount of US\$ 20,457,000 and will continue 20 activities as forward commitments for an amount of US\$ 24,520,467. The ODS phase-out impact of these activities is 10,025.9 ODP tonnes.

The analysis of the activities of our Business Plan reveals the following main trends:

- There is a significant increase in the share of national ODS phase-out plans as well as sectoral phase-out plans within the project portfolio of UNIDO;
- The refrigeration sector including the service sector is still the predominant area of interventions;
- The rapid decrease of need for assistance in the foam and aerosol sectors is continued;
- No major change is observed in the demand for activities in the methyl bromide sector.

In 2005, UNIDO will continue to cover all the regions (Latin America and the Caribbean, Africa, Asia and Pacific, Europe) with planned activities in various sectors for forty-one (41) countries (including non-investment activities and project preparation).

### **Africa**

In Africa, 24 activities in sixteen (16) countries, with a value of US\$ 5,488,300 will be submitted in 2005. Among these, two (2) ODS phase-out plans, two (2) halon phase-out plans and two (2) methyl bromide phase-out plans.

The following projects are planned to be prepared and submitted in 2005:

#### Algeria

An ODS Phase-out Plan will address the total phase-out of the remaining eligible TCA, CTC and CFC consumption. This will help the country to comply with the 2007 and 2010 control measures. An investment project in grain fumigation will be submitted, too.

#### Angola

The country needs assistance in raising awareness for ratification of the Copenhagen Amendment.

### Burundi

Training and Awareness workshop in the TCA sector will raise awareness and provide technical assistance to the country.

### Cameroon

The country will be assisted with a terminal umbrella project in the refrigeration sector to phase out 40 ODP tonnes.

### Central African Republic

The country needs assistance in raising awareness for ratification of the Copenhagen Amendment.

### Congo DR

Preparation of an investment project in the solvent sector for the elimination of the remaining consumption.

### Cote d'Ivoire

An investment project in the aerosol sector is planned to eliminate 42 ODP tonnes of CFCs.

### Egypt

The country needs assistance to achieve its CFC reduction targets under the Montreal Protocol. UNIDO will provide assistance to the country through the formulation and implementation of an ODS phase-out plan addressing all the remaining eligible ODS consumption of Egypt. In addition, project preparation funding will be requested to address the MDI sector.

### Ethiopia

Training & Awareness workshop in the CTC and TCA sectors will raise awareness and provide technical assistance to the country.

### Libya

Two project preparation activities are planned in the methyl bromide and halon sectors. Phase-out plans in the same sectors are to be submitted in 2005, too.

### Madagascar

Training & Awareness workshop in the Methyl Bromide sector will raise awareness and provide technical assistance to the country.

### Morocco

An investment project for the elimination of 20 ODP tonnes in the halon sector is planned. Training & Awareness workshop in the CTC and TCA sectors will raise awareness and provide technical assistance to the country.

### Tunisia

Training & Awareness workshop in the CTC and TCA sectors will raise awareness and provide technical assistance to the country.

### Zambia

Training & Awareness workshop in the CTC and TCA sectors will raise awareness and provide technical assistance to the country.

### Zimbabwe

UNIDO will provide assistance in preparing and submitting a methyl bromide phase-out plan in tobacco seedlings. In addition, project preparation funding will be requested to address the solvent sector (CTC).

## **Asia**

In Asia, nineteen (19) activities in twelve (12) countries, with a value of US\$ 8,891,307 are planned for 2005.

### Bahrain

Training & Awareness workshop in the CTC and TCA sectors will raise awareness and provide technical assistance to the country.

### Cambodia

The country needs assistance in raising awareness for ratification of the Copenhagen Amendment.

### China

Project preparation for a Methyl Bromide Production Phase-out Plan will be requested in 2005.

There will be further activities in China addressing the MDI sector; and the reapplication of a cancelled refrigeration project will also be submitted.

### India

The Government of India decided to involve UNIDO in the already approved multi-year CTC phase-out plan, and the 2005 tranche will be transferred from the World Bank to UNIDO for the elimination of 761 ODP tonnes.

### Iran

The country needs immediate assistance to achieve the 2005 reduction schedule of CTC and TCA consumption. In line with the relevant decision of the forthcoming meeting of the Implementation Committee, a Solvents Sector Phase-out Plan will be prepared to enable Iran to meet its compliance obligations. In addition, a methyl bromide phase-out plan is planned to be submitted in 2005.

### Kuwait

In 2005, UNIDO will prepare a project to address the halon sector.

### Myanmar

The Government of Myanmar requested UNIDO to phase out CFCs in the refrigeration-servicing sector. UNIDO will address the recovery and recycling component of the RMP.

### Oman

In 2005, an awareness workshop is included for Oman to address the low level of CTC consumption in the country. In addition, extension of the institutional strengthening project will be requested.

### Pakistan

In 2005, an awareness workshop is included for Pakistan to address the low level of methyl bromide consumption in the country.

### Syria

UNIDO received a request from the National Ozone Unit to prepare a CFC phase-out plan. Since the remaining unaddressed methyl bromide consumption amounts to 8 ODP tonnes, UNIDO was requested to include the total methyl bromide phase-out in the above mentioned phase-out plan as well. In addition, extension of the institutional strengthening project will be requested.

### Yemen

In 2005, an awareness workshop is included for Yemen to address the low level of TCA consumption in the country to enable Yemen to remain in compliance. Moreover, project preparation will also be requested to prepare a terminal umbrella project in the refrigeration sector. This investment project is also foreseen for 2005.

## **Europe**

In Europe, fifteen (15) activities in seven (7) countries, with a value of US\$ 2,779,709 are planned for 2005.

### Armenia

Two project preparation activities will be undertaken in the methyl bromide and halon sectors in 2005.

### Croatia

In 2005, an awareness workshop is included for Croatia to address the low level of CTC consumption in the country.

### Georgia

Investment activities in the halon and methyl bromide sectors are foreseen for 2005 to address the remaining methyl bromide and halon consumption in the country.

### Macedonia

A Terminal Phase-out Management Plan, one project preparation activity and a demonstration project in the chillers sector are planned for 2005.

### Moldova

In 2005, an awareness workshop is included for Moldova to address the low level of methyl bromide consumption in the country to enable Moldova to remain in compliance.

### Romania

An extension of the Institutional Strengthening project will be requested in 2005. In addition, project preparation activities are foreseen to prepare the production sector phase-out plan, which is also planned to be submitted in 2005. Finally, a CFC Phase-out Plan will also be submitted and will be jointly implemented with Sweden.

### Serbia and Montenegro

Serbia and Montenegro has recently ratified the Copenhagen Amendment. In order to assist the country in complying with the methyl bromide control measures, a project preparation activity is foreseen in 2005, which will be followed by an investment project in 2006. In addition, a project will be prepared in the solvent sector focusing on CTC.

## **Latin America and the Caribbean**

In Latin America and the Caribbean, seven (7) activities in six (6) countries, with a value of US\$ 1,618,475 are foreseen for the year 2005.

### Brazil

In 2005, a multi-year accelerated sectoral phase-out of methyl bromide activity is foreseen for Brazil.

### Dominican Republic

As requested by the Government of the Dominican Republic, UNIDO included training and awareness raising activities to assist the country to remain in compliance with the control measures related to CTC and TCA.

### El Salvador

UNIDO will assist the country with an awareness workshop and training activity in the methyl bromide sector.

### Mexico

An extension of the Institutional Strengthening project will be requested in 2005.

### Nicaragua

In 2005, an awareness workshop is included for Nicaragua to address the low level of methyl bromide consumption in the country to enable Nicaragua to remain in compliance.

### Venezuela

The country needs assistance to address the low levels of TCA and methyl bromide consumption in the country. UNIDO will assist with two awareness workshop and training activities to phase out the above substances.

## 5. NON-INVESTMENT PROJECTS

In 2005, UNIDO is planning the extension of the institutional strengthening projects in Mexico, Oman, Romania and Syria. In addition, one demonstration project in the chillers sector is foreseen for Macedonia.

Moreover, UNIDO included three awareness-raising activities in the methyl bromide sector for two countries, which have not yet ratified the Copenhagen Amendment (Angola, Cambodia and Central African Republic). The object of these activities is to raise awareness of methyl bromide alternatives and to convince these countries to ratify the Copenhagen Amendment as soon as possible.

Furthermore, following the discussions of the latest IA Coordination Meeting held in Montreal early February 2005, for several countries with low actual and/or low baseline consumption of CTC, TCA and methyl bromide, awareness raising activities have also been included. Based on Government requests received, the following countries have been included in UNIDO's Business Plan:

Bahrain, Dominican Republic, Ethiopia, Morocco, Tunisia and Zambia for low actual and/or baseline consumption of CTC and TCA.

Croatia and Oman for low actual and/or baseline consumption of CTC.

Burundi, Mauritius, Venezuela and Yemen for low actual and/or baseline consumption of TCA.

Finally, El Salvador, Madagascar, Moldova, Nicaragua, Pakistan and Venezuela for low actual and/or baseline consumption of methyl bromide.

The total cost of all non-investment activities mentioned above amount to US\$ 1,891,272.

**B. PERFORMANCE INDICATORS**

<b>Performance Indicator</b>	<b>Item</b>	<b>Target 2005</b>
Approval	Number of annual programmes of multi-year agreements approved	25
Approval	Number of individual projects/activities (investment projects, RMPs, halon banks, TAS) approved	30
Implementation	Milestone activities completed (e.g. policy measures, regulatory assistance)/ODS levels achieved for approved multi-year annual tranches	16
Implementation	ODP phased out for individual projects	1,350
Implementation	Project completion (pursuant to Decision 28/2 for investment projects) and as defined for non-investment projects	33
Implementation	Policy/regulatory assistance completed	4
Administrative	Speed of financial completion	12 months after operational completion
Administrative	Timely submission of project completion reports	On time
Administrative	Timely submission of progress reports and responses unless otherwise agreed	On time

## C. BILATERAL COOPERATION

The following Bilateral activities are implemented by UNIDO:

Bilateral Agency	Country	Sector	ODP [tonnes]	Budget (without support cost) [US\$]	Status
France	Morocco	Fumigants (cut flowers & banana)	61	1,006,652	Ongoing
Germany	Egypt	RMP	0	279,300	Ongoing
Italy	China	Methyl Bromide (consumption)	534	4,000,000	Ongoing
Italy	Romania	Fumigants (horticulture)	93.9	630,517	Ongoing
Italy	Serbia and Montenegro	Domestic refrigeration	94.9	1,683,135	Ongoing
Italy	China	Dom. Ref.	181	1,950,000	Ongoing
Japan	China	Refrigeration Servicing	0	4,000,000	Ongoing
Japan	China	Compressors	75	2,250,000	Completed
Japan	Indonesia	Foam	18.2	142,506	Ongoing
Japan	Indonesia	Foam	22.8	117,889	Ongoing
Spain	Mexico	Methyl Bromide	107.2	707,965	Ongoing

In addition, UNIDO is jointly implementing projects with Sweden in Croatia and Serbia & Montenegro. In 2005, UNIDO is planning joint activities with Sweden in Romania. In addition, conversations are ongoing with the Governments of Canada, Italy and Spain for future cooperation.

## D. INITIATIVES TO SPEED-UP IMPLEMENTATION

### a. Investment Projects

The status of ongoing projects is described in Annex I. The success and timely implementation of these activities are crucial in the current compliance period.

In order to expedite completion of projects approved so far, UNIDO has taken some initiatives such as:

- UNIDO is strengthening its field representation. The field offices will receive additional professional staff, and in some offices local staff was recruited to follow up MP projects. In other countries UNIDO desks will be opened this year in the offices of the UN resident coordinators.
- Directors of UNIDO regional and country offices are regularly briefed and involved in the implementation process and they are following up the progress of the programmes;
- Cooperation with the national ozone offices has been strengthened during recent years and the staff of the ozone office together with UNIDO's national and international consultants and project managers are regularly following up the implementation process. They are taking effective actions on critical issues, e.g. resolving bottlenecks in site preparation, customs clearance, installation, commissioning and safety certification, monitoring of CFC-related equipment.
- Recruitment of 2-3 junior professionals to assist project managers at Headquarters is underway.
- Frequent meetings with suppliers to review and speed up delivery and installation of equipment.
- UNIDO streamlined internal procedures related to the implementation of Montreal Protocol activities.
- The experience accumulated in the implementation of earlier projects resulted in enhanced efficiency.
- Regular meetings are convened 2-4 times annually with the ozone offices on the implementation of national and/or sectoral phase-out plans.

**b. Refrigerant Management Plans**

For efficient implementation of refrigerant management plans, UNIDO is assisting governments in putting in place relevant legislation as well as a licensing and quota system for the control of CFC imports. Training sessions for good practices in refrigeration servicing and the empowerment of customs officers have been organized. The training institutes in the countries have been strengthened through the knowledge transferred in the training on good refrigerant management exercise. The institutes have introduced the new training programme

into their ongoing curriculum. State of the art recovery and recycling equipment have been provided to the centres and refrigerant identification instruments have been provided to the ports. This together with the recovery and recycling scheme launched in many countries, will substantially control the emissions of CFCs from the refrigeration servicing sectors. However, an RMP without the necessary enforcement and monitoring from the national ozone unit will not be efficient. Therefore, the Government has to ensure that proper enforcement and monitoring measures are in place.

**Annex I****COUNTRY-BY-COUNTRY IMPLEMENTATION OF  
APPROVED ACTIVITIES****Albania***Phase-out of ODS*

The national ODS phase-out plan (NPP) is implemented together with UNEP. There were serious delays in project implementation due to non-arrival of training equipment and since taxes are imposed on any equipment, which arrives in Albania. The 2003 Article 7 consumption of Albania is lower than it is stipulated in its action plan. Awareness workshop on methyl bromide was undertaken in 2004. Equipment has been ordered for the only remaining company using solvents. Management unit is in place and implementation of the investment part of the RMP component will start in 2005. The second tranche of the NPP will be requested in 2005. The phase-out schedule stipulated in the Agreement will ensure implementation of the decisions of the Implementation Committee regarding the compliance situation of Albania.

**Algeria***Phase-out of CFCs*

One umbrella project in the refrigeration sector was completed in 2004 with an ODP phase-out of 18.6 tonnes. In addition, the terminal umbrella project in the commercial refrigeration sector was approved by the Executive Committee at its 44<sup>th</sup> meeting. The project is expected to be completed in 2007 leading to a phase-out of 72.8 ODP tonnes.

The activities of the RMP are proceeding as scheduled. The RMP phased out 110 ODP tonnes in 2003 and 2004 by completion of the training of custom officers and the training of trainers exercises. A further phase-out of 90 ODP tonnes in 2005 and 45 ODP tonnes of CFCs in 2006 is expected after completing the recovery and recycling activities.

**Argentina***Phase-out of CFCs*

A national CFC phase-out plan was approved at the 42<sup>nd</sup> ExCom Meeting and the first funding tranche was released. Implementation modalities were discussed and agreed upon. Training of national experts and key-stakeholders responsible for the implementation of the plan were successfully trained. Specification of the equipment for the manufacturing sector was prepared.

In addition, 3,000 refrigeration service technicians were trained. The second tranche will be submitted in 2005. Bidding and equipment delivery is planned for the next tranche.

#### *Phase-out of Methyl-Bromide*

The project in the vegetables and cut flowers production sector has successfully phased out 106.6 ODP tonnes in 2004 and thus achieved the total phase-out of 331 ODP tonnes. The project which is planned to be completed during the year 2005, has advanced according to the established plan on cut flowers and ornamentals. However, in the strawberry sector due to agro-climatological problems, the availability of only one chemical alternative on the market and the difficulties caused by the discussion on the CUEs, the Government of Argentina is requesting to postpone the elimination of the remaining consumption used by the sector till 2009 (30 per cent) and 2015 the rest.

#### *Solvent Sector*

The plan for phase-out of ODS in the solvent sector was approved in December 2003 (41<sup>st</sup> ExCom). In 2004, a workshop for small-scale industries was conducted. For CTC consumers, an ODS-free solution was found to phase out the entire CTC consumption in Argentina. During the year 2004, partial phase-out of 16 ODP tonnes of CTC and 4 ODP tonnes of TCA was achieved. The Government, the counterparts and UNIDO are taking efforts to expedite implementation of the sector plan and ensure compliance with Argentina's MP obligations for CTC and TCA. In 2005, phase-out of TCA from the cleaning operation of the textile industries is foreseen, equipment will be purchased and delivered. In addition, partial phase-out is planned from the cleaning applications of electrical appliances (CFC-113 and TCA).

### **Bosnia & Herzegovina**

#### *Phase-out of CFCs and TCA*

There are four ongoing individual investment projects in this country, two foam projects, one refrigeration project and one combined refrigeration project, including TCA. Partial phase-out amounting to 3.6 ODP tonnes of the latter project occurred in 2004. All the above projects are well advanced. They are planned to be completed in 2005 and will phase out 93.1 ODP tonnes of ODSs in 2005.

#### *ODS Phase-out Plan*

The second tranche of the national ODS phase-out plan was approved at the 44<sup>th</sup> ExCom Meeting. First stage of investment activities for foam and refrigeration subcomponents of the project has been initiated. Foaming machines are being shipped and installation is foreseen in 2005. Disbursement of US\$19,019 will be withheld until TCA consumption targets are met as

approved by the ExCom. As per Agreement, 17.9 tonnes of CFC and 1.1 tonnes of TCA will be phased out in 2005.

### *Methyl Bromide*

The methyl bromide phase-out plan approved on the 41<sup>st</sup> meeting will assist the country to phase out 6.2 ODP tonnes of methyl bromide in 2005 and 5.6 ODP tonnes in 2006 in the tobacco seedling, vegetables and flower sectors. The project implementation is well advanced. Walk-in tunnels, trays, pH and conductivity meters have been delivered, sowing machines were installed. Training of trainers took place. In 2005, installation of the tunnels, training of tobacco producers and purchase of micro-tunnels are foreseen.

### *Halons*

At the 42<sup>nd</sup> ExCom Meeting, a technical assistance project was approved to phase out the entire halon consumption in the country. Implementation modalities have been agreed upon, national consultant was recruited. In 2005, awareness workshop(s) on halon management will be organized.

## **Botswana**

### *Phase-out of Methyl-Bromide*

The project was completed in December 2004. All activities envisaged in the project were carried out. In addition, the project assisted the Government of Botswana in making an agreement with the main methyl bromide consumer in the country. This agreement has been fully implemented.

## **Cameroon**

### *Phase-out of CFCs*

The implementation of the Refrigerant Management Plan approved at the 38<sup>th</sup> meeting of the ExCom is taking place as planned. The training of technicians is in progress. The first batch of recovery and recycling equipment was installed. By completion of these activities, the project achieved a phase-out of 46 ODP tonnes of CFCs in 2004. In 2005, the project is expected to phase out another 36 ODP tonnes and a further 30.6 ODP tonnes in 2006. There are no delays in project implementation. The national ozone unit has started with the setup of a monitoring scheme. UNIDO is planning to prepare a terminal umbrella project for Cameroon in the commercial refrigeration sector leading to a phase-out of 42 ODP tonnes of CFCs.

### *Phase-out of Methyl-Bromide*

The project was completed in December 2004. All activities envisaged in the project were carried out. The project was conceived for a demonstration project in the tobacco sector. Based on the above activities, it could be concluded that the tobacco sector in Cameroon does not consume methyl bromide. The project assisted the Government in the identification of methyl bromide consumption in other sectors too.

## **China**

### *Phase-out of CFCs*

UNIDO's work in China assisted the Government in phasing out 1,567.1 ODP tonnes of CFC in the year 2004. In the year 2005, four projects in domestic refrigeration manufacturing and servicing and one umbrella project in the polystyrene foam sector are ongoing. In addition, 200 ODP tonnes will be phased out during the first half of 2005 as a result of the implementation of the sector plan in tobacco fluffing.

The implementation of the polystyrene foam umbrella project will be completed with a phase-out of the remaining 59 ODP tonnes of CFCs. The project is in a well-advanced stage and will also be completed within the first half of 2005.

The implementation of the domestic refrigeration sector plan will be continued with a phase-out of 813 ODP tonnes of CFCs in the year 2005 in line with the signed agreement. The equipment for Jiaxin Deer and Hisense (Snow Flake) included in the first group of enterprises is ordered and partially installed.

For the refrigeration servicing sector plan approved at the 44<sup>th</sup> ExCom, the annual work plan was revised and submitted to the ExCom, as requested by the Government of China. The issue of reopening the Bole domestic refrigeration plant cancelled as per Dec. 39/14, was submitted to the 45<sup>th</sup> ExCom.

### *Phase-out of Methyl Bromide*

A phase-out of 389 ODP tonnes of methyl bromide will be achieved in the methyl bromide sector till the end of 2006. Mission to Beijing took place and a working agreement with SEPA was signed.

**Cote d'Ivoire***Phase-out of Methyl Bromide*

Phase-out of methyl bromide in the commodities and storage fumigation sectors was approved at the 42<sup>nd</sup> Meeting. Due to internal political difficulties occurred in the end of 2004, equipment was delivered only in January 2005. First training is planned for the first semester of 2005. The phase-out target is going to be achieved as scheduled.

**Croatia***Phase-out of CFCs*

A terminal phase-out management plan of CFCs was approved in 2003 and being implemented in cooperation with Sweden. The second tranche of the project was approved in 2004. Equipment for reclamation centres were purchased and delivered. In addition, a contract for the improvement of the vocational centre has also been finalized. In 2005, targeted information services will be finalized and information pamphlets will be produced and distributed. A coordination meeting is planned for the first quarter of 2005 to agree on the 2005 work plan. The third tranche will be requested at the 46<sup>th</sup> ExCom Meeting.

The first phase-out under this plan will occur in 2005 amounting to 33 ODP tonnes and additional phase-out of 65 ODP tonnes is expected for the period after 2006.

*Phase-out of Methyl Bromide*

The project is progressing ahead of schedule, 6.8 ODP tonnes were eliminated in 2004, accordingly, a total phase-out of 16.2 ODP tonnes was achieved. The project is planned to be completed by the end of 2005, more than one year before project completion per proposal.

**Cuba***Phase-out of Methyl Bromide*

At the 44<sup>th</sup> ExCom Meeting, a total phase-out project in soil, substrate, storage and structure fumigation was approved. The impact of the project is 24.1 ODP tonnes. A plan of activities for 2005 has been agreed upon with the Government. For the year 2005, it is envisaged to establish three small centres for the production of grafted plants for the horticulture sector.

## **Democratic People's Republic of Korea**

### *Production sector closure*

In the production sector 500 ODP tonnes of TCA and CFC-113 production capacity were phased out already in 2002. In 2003, 1,250 ODP tonnes of CFC-11 and CFC-12 production was closed, whereas in 2005 the CTC production facility closure will phase out 2,530 ODP tonnes.

### *Phase-out of CFCs*

A refrigeration sector phase-out plan for Korea was approved in 2003. The activities of the 1st tranche were completed and the project is progressing with the 2nd tranche. Refrigeration equipment was installed and commissioned. Foaming equipment was delivered end of 2004 and will be installed and commissioned in March 2005. The design of the prototype for the compressor is in process. UNIDO will make every effort to complete the project end 2005 to ensure compliance of DPRK with its Montreal Protocol obligations for CFCs. For the RMP, project tools were delivered and two recovery and recycling centres have been established with purchased equipment.

### *Phase-out of CTC*

There is only one ongoing CTC project. The major equipment for this project was procured in 2004 and it is now on the way to the project site. Both the Government and UNIDO put serious efforts to speed up the project activities and complete the project by June 2005, thus phasing out 59.8 ODP tonnes.

The CTC sectoral phase-out plan was approved at the 41<sup>st</sup> ExCom Meeting to assist Korea in complying with the 85 per cent reduction target. UNIDO completed and evaluated the international bidding for the solvent part of the project (US\$1,200,000) and the equipment is now being manufactured. The terms of reference for the process agent part (US\$2,200,000) are prepared and evaluated.

## **Dominican Republic**

### *Phase-out of Methyl Bromide*

The project is being implemented as planned. An agreement has been arrived at with the melon farm for the elimination of the use of methyl bromide. During 2005, additional agreements will be prepared with the flowers sector, which is the second consumer group of methyl bromide.

There was no phase-out scheduled for the year 2004. 60 ODP tonnes will be phased out in 2005 and 41 ODP tonnes in 2006.

## **Egypt**

### *Phase-out of Solvents (CFC, CTC and TCA)*

The terminal solvent sector umbrella project was approved at the 44<sup>th</sup> meeting of the ExCom. UNIDO fielded a mission and focuses on speedy implementation of the project to enable compliance of Egypt with its Montreal Protocol obligations. It is planned to phase out 41 ODP tonnes of CFC, CTC and TCA in 2005.

### *Phase-out of Methyl Bromide*

Egypt reported compliance with its methyl bromide obligations. 219 ODP tonnes were phased out in 2004 and 190.2 ODP tonnes are planned to be phased out in 2005 as a result of the national phase-out plan for methyl bromide in horticulture and commodities fumigation.

## **Georgia**

### *Phase-out of Methyl Bromide*

The first phase of the project which concentrated on the establishment of small trials on alternatives to methyl bromide and dissemination of the alternatives among farmers, has been completed. During 2005, it is foreseen, as part of the second phase of the technical assistance project, to start with training and direct assistance to the farmers on the adoption of the alternatives. This ongoing project will phase out 6 ODP tonnes of methyl bromide in 2006.

## **Guatemala**

### *Phase-out of Methyl Bromide*

Further to the information outlined in the section on assistance to countries in non-compliance, UNIDO would like to reiterate that the implementation of the project is proceeding as scheduled and that the methyl bromide sector plan under implementation will help to bring back the country into compliance. The areas treated with methyl bromide alternatives have been considerably increased during the crop season 2004/2005. The import quotas for the year 2005 will be agreed upon among farmers, Ozone Office Guatemala and UNIDO by end of May 2005. A detailed report will be submitted to the Meeting of the Executive Committee in December 2005.

**Honduras***Phase-out of Methyl Bromide*

Similar to the project in Guatemala, the implementation of the project is proceeding as scheduled. The methyl bromide sector plan under implementation will help to bring back the country into compliance. The areas treated with alternatives to methyl bromide have been considerably increased during the crop season 2004/2005. 213 ODP tonnes are expected to be eliminated by 2005. A detailed report will be submitted to the Meeting of the Executive Committee in December 2005.

**India***Phase-out of CFCs*

The refrigeration sector phase-out plan was approved on the 38th ExCom meeting with UNDP as the lead implementing agency. UNIDO is implementing the transportation refrigeration portion of this sector plan. The second tranche of the project was released by the 41<sup>st</sup> ExCom. The final list of eligible enterprises approved by the Government, was only received at the end of 2004. The written confirmation on the implementation modalities of each enterprise is awaited. Upon receipt of these confirmations, procurement of equipment will start. The project impact of 107 ODP tonnes will be phased out by the end of 2005.

*Phase-out of Solvents (CFC and CTC)*

Four projects in the process agent sector were completed in 2004 phasing out 229.5 ODP tonnes of CTC. There are two projects in the cleaning solvent sector which are to be completed in 2005 with a total phase-out of 69.9 ODP tonnes of CTC. The equipment is purchased and other activities are proceeding well. The project is expected to be completed in the first quarter of 2005.

**Indonesia***Phase-out of CFCs*

There are three projects in the foam sector under implementation. All projects are in advanced implementation stage. Most of the machines are on-site and part of them have already been installed. The equipment for Sindari are being shipped. All the above projects will be completed in 2005, phasing out 150 ODP tonnes of CFCs.

### *Phase-out of Methyl Bromide*

At the 44<sup>th</sup> ExCom Meeting, a phase-out project in grain storage was approved for UNIDO. The impact of the project is 37.8 ODP tonnes. The terms of reference for equipment and services purchase will be set in the first semester of 2005, training activities and equipment delivery will start in the second semester. The phase-out target for 2005 is 7 ODP tonnes.

### *Phase-out of Solvents (CTC, TCA and CFC)*

At the 44<sup>th</sup> ExCom Meeting, a terminal ODS phase-out plan was approved. UNIDO is in charge of the total phase-out in the solvents sector. The project is aiming at eliminating 5.6 ODP tonnes of TCA, 16.5 ODP tonnes of CTC and 78 ODP tonnes of CFC, out of which 57 ODP tonnes of CFC, 3 ODP tonnes of TCA and 16.5 ODP tonnes of CTC will be phased out in 2005. Total phase-out will be achieved beginning 2007. Implementation modalities have been agreed upon and agreement is under preparation. Equipment specification for the degreasing equipment for shoe soles is prepared and bidding will be initiated for three companies.

## **Iran**

### *Phase-out of CFCs*

In 2004, UNIDO completed many of the individual investment projects. Currently, there are four foam projects and one refrigeration project under implementation by UNIDO. Further, UNIDO is implementing the RMP and the refrigeration sector plan as part of the national phase-out plan for CFCs approved with GTZ as the lead implementing agency. The refrigeration project and two of the foam projects have experienced some delays. UNIDO is expecting to complete all these projects in 2005, thus leading to a phase-out of 345 ODP tonnes.

A National CFC Phase-out Plan was approved at the 41<sup>st</sup> Meeting of the ExCom in December 2003. The project implementation is proceeding smoothly. The first training courses “Train the trainers” for custom officers and refrigeration maintenance technicians were conducted. Equipment for the refrigeration companies was installed. The detailed progress of the project is indicated in the report submitted to the 45<sup>th</sup> ExCom for the release of the subsequent tranche.

### *Phase-out of Methyl Bromide*

The project will be completed in 2005 as reported. The project is assisting seven fumigation chambers in order to improve the efficiency of the alternative selected (phosphine).

**Jordan***Phase-out of CFCs*

The commercial refrigeration manufacturing part of the National ODS Phase-out Plan approved with the World Bank as the lead implementing agency is being implemented by UNIDO. The project includes a few refrigeration-manufacturing companies and a recovery and recycling component. ODS-free equipment has been installed at the refrigeration manufacturing companies and recovery and recycling equipment has been delivered. The project is expected to be completed in the year 2005 leading to a phase-out of 41 ODP tonnes.

*Phase-out of TCA*

One project in the solvent sector is currently under implementation by UNIDO. The delivery of equipment for the conversion of the factory is in progress. The project is expected to be completed in 2005 bringing an additional phase-out of 45 ODP tonnes.

Currently, there are no implementation difficulties in this country.

**Kuwait***Phase-out of CFCs*

UNIDO is responsible for the implementation of the recovery and recycling component of the RMP for Kuwait. 64 ODP tonnes are planned to be phased out in 2005 provided legislation and price-related issues will evolve in the future years as planned. In this respect, we rely on the active role of UNEP. On the other hand, UNIDO has purchased the first batch of recovery and recycling equipment and identified a recovery and recycling centre in consultation with the Government.

**Lebanon***Phase-out of Methyl Bromide*

The project reorientation was approved at the 43<sup>rd</sup> ExCom Meeting in July 2004. The new alternative technologies, solarization plus chemicals, were first applied in September 2004, shortly behind schedule (July–August), but just in time for the 2004/2005-crop season. The 2004 phase-out target was achieved as scheduled. The new alternatives will be applied at larger scale in July 2005. The project team is working to optimize alternatives efficiency and cost.

## **Libya**

### *Phase-out of CFCs*

The refrigeration project was completed in 2004 leading to a phase-out of 53.4 ODP tonnes.

Progress is being made in the implementation of the National CFC Phase-out Plan, equipment for the refrigeration manufacturing companies were partly installed and 10 foaming companies are currently under conversion. A partial phase-out of 150.4 ODP tonnes was achieved in 2004 and it is planned to phase out 124 ODP tonnes of CFC in the year 2005.

## **Macedonia**

### *Phase-out of CFCs*

The project is facing difficulties because the company stopped aerosol production. The project is maybe subject to cancellation. The status of the company will be clarified in the first quarter of 2005.

## **Mexico**

### *Phase-out of Methyl Bromide*

The technical assistance project with a total impact of 36.9 ODP tonnes, will enable Mexico to comply with the 2005 20 per cent methyl bromide reduction target. The project started immediately after its approval at the 42<sup>nd</sup> Meeting. A bidding was organized to recruit a national institution in Mexico to assist UNIDO and the Government of Mexico in the provision of direct assistance to farmers on alternatives to the use of methyl bromide. UNIDO is still negotiating the contract conditions. Partial phase-out of 10 ODP tonnes was achieved in 2004.

### *CFC Consumption Sector*

A national CFC phase-out plan was approved in 2004. The reduction schedule for 2004 contained in the agreement was achieved. The achievements of the 2004 work programme together with the 2005 annual plan were submitted to the 45<sup>th</sup> ExCom.

### *CFC Production Sector*

The CFC production closure project was approved at the 40<sup>th</sup> Meeting of the ExCom, the conditions of the agreement regarding the first and second year production targets were achieved, the production of the company was audited, and the second tranche was released in 2004. The project runs smoothly and it is expected that Mexico will cease production of CFCs in the first half of 2005, and the total production for the years 2003 to 2005 will not exceed 22,000 ODP tonnes. The third tranche was submitted to the 45<sup>th</sup> ExCom Meeting.

## **Morocco**

### *Phase-out of CFCs*

A terminal umbrella project in the commercial refrigeration sector was approved by the Executive Committee at its 43<sup>rd</sup> meeting. The implementation of the project is on time. Equipment has been purchased and delivery is in progress. The project is expected to be completed in 2006 leading to a phase-out of 18.4 ODP tonnes.

### *Phase-out of Methyl Bromide*

The reorientation of the phase-out project for soil fumigation in the tomato sector was approved at the 44<sup>th</sup> ExCom Meeting in December 2004. An agreement was reached with the Tomato Association and terms of reference for equipment and services purchase were drafted at the end of December 2004. Equipment procurement will start in the first trimester of 2005. Installation is expected to be completed by December 2005.

In the strawberry sector, the strawberry farmers adopted the alternative of metham sodium during 2004, which allowed a reduction of more than 34 ODP tonnes as agreed in the project document for 2004. The amount eliminated in that sector is more than 30 per cent compared to the baseline.

## **Nigeria**

### *Phase-out of CFCs*

The national CFC phase-out plan is being implemented in cooperation with UNDP as the lead implementing agency. It is expected that a phase-out of 100.9 ODP tonnes will be achieved in 2005 in the refrigeration manufacturing and aerosol sectors. In 2004, foaming machines and refrigerating equipment were delivered in the refrigeration sector. Partial phase-out of 34.6 ODP tonnes was achieved. The project will be completed as planned by the end of June 2005.

The new layout of the two project sites under the aerosol part of the above project will be finalized shortly. Equipment is being manufactured and delivery is planned for July 2005. The project is planned to be completed in 2005.

#### *Phase-out of Solvents*

A terminal ODS phase-out umbrella project was approved at the 43<sup>rd</sup> ExCom Meeting to phase out 166.7 ODP tonnes of CTC and 31.3 ODP tonnes of TCA. In 2005, 143.8 ODP tonnes of CTC and 8.3 ODP tonnes of TCA are planned to be eliminated under this project. In 2004, implementation modalities were agreed upon. Development of new formulations to replace CTC and TCA started. Equipment will be delivered to several cleaning shops during 2005. The implementation is going smoothly.

### **Oman**

#### *Phase-out of CFCs*

The RMP is at the final stages of implementation. Both the training of custom officers and the training on good refrigerant management practices have been completed. Recovery and recycling centres have been identified. The recovery and recycling equipment were delivered and will be distributed to the servicing workshops during 2005. The phase-out of 13 ODP tonnes is planned for 2005.

### **Pakistan**

#### *Phase-out of CFCs*

Activities in the first tranche of the refrigerant management plan progressed as reported to the 44<sup>th</sup> ExCom Meeting. At the same time, the second tranche was released and, among others, training of technicians and purchase of recovery and recycling equipment are foreseen in 2005.

In addition, 1.3 ODP tonnes of CFC-113 will be phased out in 2005 as part of a stand-alone solvent project.

#### *Phase-out of Solvents and Process Agents (CFC, CTC and TCA)*

There are three ongoing solvent projects and one process agent project. All of them are in an advanced stage of implementation. They are planned to be completed in 2005.

The National CTC Phase-out Plan was approved at the 41<sup>st</sup> Meeting of the ExCom. In 2004, the works were progressing according to the work plan as agreed by the Government of Pakistan. The following activities were undertaken in 2004: bidding for cleaning equipment, establishment of project implementation team, public awareness workshops, purchase of equipment and licensing of the solvents importers were introduced by the Government of Pakistan as well. The second tranche of the project was approved by the 44<sup>th</sup> ExCom. In 2005, 14 sets of cleaning machines are expected to be delivered to the site. After delivery, installation is foreseen. Phase-out will occur as per agreement.

#### *Phase-out of Halons*

The Halon Sector Phase-out Plan was approved at the 41<sup>st</sup> meeting of the ExCom. Halon awareness and management workshop was carried out. Halon recovery and recycling centre is planned to be established and put into operation by the end of June 2005. The full ban on halon import will be introduced six months later. The project will be completed in 2006 phasing out the consumption of 24.2 ODP tonnes of halons.

### **Qatar**

#### *Phase-out of CFCs*

Similar to Oman, the RMP in Qatar is at the final stages of implementation. Both the training of custom officers and the training on good refrigerant management practices have been completed. One recovery and recycling centre has already been established. The recovery and recycling equipment were delivered and will be distributed to the servicing workshops during 2005. The phase-out of 13 ODP tonnes is planned for 2005.

### **Romania**

#### *Phase-out of CTC*

The terminal umbrella phase-out project in the solvent sector approved by the 41<sup>st</sup> ExCom, will be completed by June 2005. The equipment is already delivered and installed. The project will phase out 11.1 ODP tonnes.

#### *Phase-out of CFCs*

The project on the phase-out of CFC-12 in the manufacture of pharmaceutical aerosols was approved at the 44<sup>th</sup> meeting of the ExCom. The project will be completed in 2007 phasing out the consumption of 46.5 ODP tonnes in the aerosol sector.

## **Serbia and Montenegro**

### *Phase-out of CFCs*

There are two individual ongoing projects in the country under UNIDO's implementation. Equipment for the foam project were delivered and preparatory works for the installation are ongoing. Installation and commissioning is foreseen for 2005 and phase-out of 75 ODP tonnes of CFC-11 will be achieved by the end of 2005. The refrigeration project is close to completion. Moulds for newly designed compressors were prepared. The project will be completed by mid-2005, phasing out 2 ODP tonnes of CFC-12.

A national CFC phase-out plan was approved by the 43<sup>rd</sup> ExCom Meeting. The project is implemented in cooperation with the Government of Sweden. Implementation modalities have been agreed upon and implementation has started. The new formulation of medical aerosols with HAP showed good results, the formulation is being tested on its stability. It is expected to certify the new formulation by November 2005. Procurement of equipment will start as soon as the counterpart decides on the location of the new installation.

## **Sudan**

### *Phase-out of CFC and CTC*

A national CFC and CTC phase-out plan was approved at the 44<sup>th</sup> ExCom Meeting. Implementation modalities were agreed upon and implementation has started. In 2005, the manufacturing sector in aerosols, foams and refrigeration will be addressed. In addition, the service sector programme will start with the establishment of training and recovery centres in the West and South area of Sudan. Phase-out will occur as stipulated in the agreement.

## **Syria**

### *Phase-out of CFCs*

There is only one remaining foam project and one refrigeration project under UNIDO's implementation. Equipment were delivered, civil construction works were finished and equipment are being installed. Both projects are planned to be completed in 2005 phasing out 67.4 ODP tonnes.

*Phase-out of Methyl Bromide*

The first series of training was completed in 2004. The first set of equipment was purchased during the last trimester of 2004 and will be delivered by the end of the first trimester of 2005. The second series of training will start in second trimester of 2005 as soon as all equipment are delivered.

**Turkey***Phase-out of Solvents*

A terminal umbrella project for phasing out remaining ozone-depleting solvents was approved by the 41<sup>st</sup> ExCom Meeting. Equipment for phase-out of CTC have already been purchased and installed. Partial phase-out of CTC and TCA amounting to 20 ODP tonnes was achieved. Stain removing equipment is being purchased and will be delivered to the site in 2005. Total phase-out of TCA will occur in 2005.

*Phase-out of Methyl Bromide*

The project is going on smoothly. Project activities in 2004 mainly focused on training and awareness in cooperation with leading farmers. By the end of the first trimester of 2005, a number of equipment and materials will be delivered to reach a larger number of farmers. Training is going on, focusing on a small group of homogeneous producers. The phase-out target will be achieved as scheduled.

**Uganda***Phase-out of Methyl Bromide*

After the revision approved by the Executive Committee, the project has advanced as planned. The project has fielded a machine for the application of methan sodium. Training on the identification and use of substrates started in 2004. Training on the use of machines will start during the first semester of 2005. The project is expected to be completed in 2006.

## **Uruguay**

### *Phase-out of Methyl Bromide*

The project is implemented as planned. One region of the country (Bella Union) is free of methyl bromide. The project is concentrating on another important region (Salto), where some farmers are facing difficulties in adopting the alternatives. Through the project, training support is provided. In addition, identification of as many viable alternative chemicals as possible is envisaged. The project is expected to be completed in 2005 and to phase out a further 9 ODP tonnes.

## **Venezuela**

### *Phase-out of CFCs*

The only remaining umbrella refrigeration project addressing seven companies, was partially completed in 2004. 20.9 ODP tonnes of CFCs were phased out at five enterprises. The situation of the remaining two companies will be clarified in the first half of 2005. For the last umbrella foam project, equipment was delivered to the site and installation is ongoing. The project will be completed in 2005 and will phase out 135.5 ODP tonnes.

A national CFC phase-out plan was approved in 2004. A detailed implementation plan was prepared and agreed upon. Core personnel were successfully trained. The national implementation structure was established and equipment for the remaining manufacturing enterprises was ordered. In 2005, the second tranche of the project will be requested. The training centres and recycling centres will be re-established and training of technicians will start. Part of the recovery and recycling equipment will be delivered. Phase-out will occur as stipulated in the agreement.

## **Zimbabwe**

### *Phase-out of Methyl Bromide*

The project is close to completion. All equipment are in the field. Training has been provided to all flower growers. In 2005, final training will be provided and project completion is foreseen.
