EXECUTIVE COMMITTEE OF THE MULTILATERAL FUND FOR THE IMPLEMENTATION OF THE MONTREAL PROTOCOL Forty-fifth Meeting Montreal, 4-8 April 2005

BUSINESS PLAN FOR THE YEARS 2005-2007 OF UNDP

For reasons of economy, this document is printed in a limited number. Delegates are kindly requested to bring their copies to the meeting and not to request additional copies.

COMMENTS AND RECOMMENDATIONS FROM THE FUND SECRETARIAT

1. UNDP prepared its business plan on the basis of decisions 37/68, 38/66 and 41/93. The plan is provided as an annex to this document.

2. This document presents a summary of planned 2005-2007 activities of UNDP, covering ODS phase-out during the triennium, general comments, UNDP's business plan performance indicators, and provides recommendations on these for the consideration of the Executive Committee.

Planned activities 2005-2007

3. The business plan is a rolling three-year business plan since three years of activities are included, although there is less certainty with regard to 2006 and 2007 activities except for the ongoing multi-year agreements.

Planned activities for 2005

4. The total value of projects planned for submission in 2005 by UNDP is US \$37.4 million that will lead to the phase-out of 4,396 ODP tonnes. The plan includes:

- 13 ongoing multi-year performance based agreements for sector and substance phase-out amounting to US \$28.06 million that represents an ODS phase-out when implemented of 3,915 ODP tonnes;
- 2 new multi-year performance based agreements amounting to funding of US \$755,500 in 2005 (US \$2.32 million in total) with an associated ODS phase-out in 2005 of 106 ODP tonnes (349 ODP tonnes in total);
- 8 individual investment projects that will be submitted in 2005 with a value of US \$1.04 million and associated ODS phase-out of 69 ODP tonnes;
- 12 refrigerant management plan projects at a cost of US \$1.92 million;
- Project preparation amounting to US \$585,710;
- 29 non-investment projects amounting to US \$5.04 million including 9 institutional strengthening projects at a cost of US \$2.25 million, 19 technical assistance projects at a cost of US \$2.29 million and one demonstration project at a cost of US \$500,000.

Planned activities for 2006

5. UNDP plans to submit projects valued at US \$19.35 million in 2006 with an associated phase-out of 1,792 ODP tonnes. This includes US \$11.29 million for ongoing multi-year agreements.

Planned activities for 2007

6. UNDP plans to submit projects valued at US \$22.28 million in 2007 with an associated phase-out of 1,517 ODP tonnes. This includes US \$3.67 million for ongoing multi-year agreements.

Core unit

7. In addition to those above, UNDP included US \$1.5 million for 2005 and US \$1.85 million for 2006 and 2007.

ODP phase-out during 2005-2007

8. During the 2005-2007 triennium, UNDP plans to phase out 13,978 ODP tonnes from ongoing projects and multi-year agreements. Additionally, UNDP indicated that 939 ODP tonnes would be phased out through projects to be submitted for approval during the triennium.

9. Section 5 of UNDP's business plan addressed measures to expedite the implementation of approved projects. The section includes a description of UNDP's efforts to strengthen the network of UNDP staff and experts in the field. to implement multi-year agreements, provide assistance for countries in non-compliance, provide support for the verification of Article 7 data, and to sustain the implementation of RMPs.

10. UNDP noted that it had out-posted one staff member each to the Africa and Asia and Pacific regions. It also plans to add a short term position for the Latin America region. UNDP will continue to use its network of country officers/resident representatives to enable ongoing contact with senior government officials in resolving programming issues and encouraging the development and adoption of legislative matters.

Comments

11. UNDP included several CTC and TCA activities for LVCs and non-LVCs in its 2005 business plan. UNDP is planning to provide project preparation and investment projects for CTC, TCA or both for Bolivia, Congo DR, Cuba, Guatemala, Paraguay, and Uruguay. The investment projects would phase-out 5-11 ODP tonnes when implemented. Additional solvent projects were included for Brazil, Kenya and Zimbabwe for which project preparation has already been approved. These activities may be discussed in the context of the Committee's consideration of the issue of CTC/TCA/Methyl Bromide activities in LVCs based on the contact group's anticipated meeting and the consideration of the issue in the Consolidated Business Plan (UNEP/OzL.Pro/ExCom/45/5).

12. Two years' tranches of funding are being requested for Brazil and China in UNDP's 2005 business plan. Two years of annual tranche funding are being requested for Brazil because the 2004 tranche had been postponed. In the case of the solvent sector in China, UNDP indicated that China is requesting that its 2006 tranche should be paid in December 2005 instead of at the March/April 2006 meeting as indicated in the agreement.

13. UNDP included US \$5.85 million for 30 LVC countries for post-2007 RMPs. These activities are either part of the 2006 or 2007 business plans. The Executive Committee's consideration of the Review of requirements for further assistance for the post-2007 period in LVC (follow-up to decision 31/48 and 43/37) (UNEP/OzL.Pro/ExCom/45/46) may have an impact on the value of these activities in future years.

HCFC activities

14. As indicated in the Consolidated Business Plan, UNDP has included HCFC survey projects in its 2005 business plan, eight multi-year HCFC projects and four HCFC investment projects in the plans for 2006/2007. The total volume of ODS phase-out from these projects represents about 29 per cent of those countries' 2003 HCFC consumption. UNDP indicated that the all of the countries had agreed to include these projects in UNDP's business plan.

15. Due to the large volume of phase-out compared to 2003 consumption, UNDP was asked if participating countries had agreed to limit their future consumption to the 2003 level minus the phase-out from these HCFC projects. UNDP indicated that the countries would need to first consider the results of the surveys to make such decisions related to HCFC conversion. UNDP believes that its surveys would enable Governments to consider the feasibility of starting the HCFC conversion sooner rather than later, at least for enterprises ready to do so.

16. UNDP indicated that some of the manufacturing enterprises are willing to move ahead with the conversion including those that had never received assistance from the Multilateral Fund and would not be excluded for assistance under decision 17/7 that limits funding to those enterprises in operation prior to 25 July 1995. UNDP is of the view that there were a substantial number of enterprises which would be eligible for conversion under the current rules of the Fund. It indicated that it was not UNDP's intent to develop either a sector plan or national phase-out plan for HCFCs but rather to consider the submission of some individual or umbrella projects.

17. These activities may be discussed in the context of the Committee's consideration of the issue raised in the Consolidated Business Plan.

Chiller Projects

18. UNDP also included a chiller demonstration project for Brazil in its 2005 business plan at the amount of US \$500,000. Brazil does not have remaining funding eligibility for chiller projects since its national CFC phase-out plan includes the tonnage for chillers. This activity may be discussed in the context of the Committee's consideration of the issue of ODS phase-out activities in the chiller sector pursuant to decision 44/61 and of the issue raised in the Consolidated Business Plan.

ODS destruction projects

19. UNDP included ODS destruction projects in Brazil and Mexico in its 2007 business plan. This activity may be discussed in the context of the Committee's consideration of the issue raised in the Consolidated Business Plan.

Administrative costs

20. UNDP is anticipating a core unit cost of US \$1.85 million for the years 2006 and 2007. The Secretariat asked UNDP to indicate the basis for the increase in the core unit cost. UNDP indicated that since decision 38/68 established the level of core unit funding at US \$1.5 million per year per agency for the 2003-2005 triennium, UNDP is expecting that the Executive Committee's consideration of this matter might result in an increase based on, inter alia, 3 years of inflation.

21. UNDP has also included US 635,000 each for the years 2005, 2006 and 2007 to provide additional support to RMPs. This activity was considered by the 44th Meeting as a project for Supplementary Oversight Service (SOS) for RMP activities. The Committee decided to examine this activity in the context of the 2005 review of assistance needed in the post-2007 period called for in decision 31/48 and of the review of the administrative cost regime and core unit costs called for in decision 38/68. The former issue is for consideration at the 45^{th} Meeting, while the discussion on administrative costs is expected at the 46^{th} Meeting pursuant to decision 44/7(d).

Potential project overlaps

22. There remains a potential overlap concerning planned UNDP and UNIDO CTC and TCA phase-out activities in Congo DR. Both agencies received letters requesting their assistance, but the issue has not been resolved. Agencies expect to resolve the issue for announcement at the 45^{th} Meeting.

Performance indicators

23. A summary of UNDP's performance indicators pursuant to decision 41/93 is provided below in Table 1.

Table 1

PERFORMANCE INDICATORS

Item	UNDP 2005
Number of annual programmes of multi-year agreements approved vs. those planned	15 (2 new)
Number of individual projects/activities (investment projects, RMPs, halon banks,	49 (ins-9, inv-8, dem-1,
TAS) approved vs. those planned	rmp-12 & tas-19)
Milestone activities completed (e.g. policy measures, regulatory assistance)/ODS levels	15
achieved for approved multi-year annual tranches vs. those planned	
ODS phased-out for individual projects vs. those planned per progress reports	3,302 ODP tonnes
Project completion (pursuant to decision 28/2 for investment projects) and as defined	41 (inv-18, ins-8, tas-13
for non-investment projects vs. those planned in progress reports	& tra-2)
Percentage of policy/regulatory assistance completed vs. that planned	N/a
Speed of financial completion vs. that required per progress report completion dates	On-time
Timely submission of project completion reports vs. those agreed	On-time
Timely submission of progress reports and responses unless otherwise agreed	On-time

RECOMMENDATIONS

The Fund Secretariat recommends that the Executive Committee consider:

- 1. Endorsing the 2005-2007 business plan of UNDP, as contained in UNEP/OzL.Pro/ExCom/45/7, while noting that endorsement did not denote approval of the projects identified therein nor their funding levels with any modifications based on the consideration of the following activities:
 - (a) HCFC activities;
 - (b) Chiller demonstration projects and project preparation for chiller projects;
 - (c) ODS destruction projects;
 - (d) Additional support for RMP activities (Supplementary Oversight Service—SOS); and
 - (e) CTC and TCA activities in Congo DR.
- 2. Approving the performance indicators for UNDP set out in Table 1 of the Fund Secretariat's comments as contained in UNEP/OzL.Pro/ExCom/45/7.

45th Meeting of the Executive Committee of the Multilateral Fund for the Implementation of the Montreal Protocol (4 - 8 April 2005)

UNDP 2005 BUSINESS PLAN NARRATIVE

A. MULTILATERAL FUND TARGETS

1. Introduction

Over the course of 2005, UNDP will prepare 2 national and sector phase-out plans, 12 activities addressing needs in the refrigeration servicing sub-sector, 28 individual projects, and 12 requests for extension of institutional strengthening projects. In addition, UNDP will continue to implement 23 approved multi-year agreements, will undertake 29 project preparation activities and will receive its yearly core unit funding. The total value of UNDP's 2005 Business Plan including support costs is US\$ 38.9 million.

2. **Resource allocation**

ТҮРЕ	2005 Value (US \$000)	2006 Value (US \$000)	2007 Value (US \$000)	After 2007 (US \$000)
Planned / Individual Total (Excel Table, Category 3)	3,826.6	635.2	13,685.2	11,500.0
Planned / Servicing Total (Excel Table, Category 5)	1,924.3	4,199.3	2,339.3	2,578.1
Planned / Multi-Year Total (Excel Table, Category 4)	755.5	648.0	430.0	488.6
Project Preparation (Excel Table, Category 6)	585.7	0.0	0.0	0.0
Sub-Total Planned Activities	7,092.1	5,482.5	16,454.5	14,566.7
Approved Multi-Year Agreement (Excel Table, Category 1)	28,054.7	11,289.1	3,667.8	4,578.2
Institutional Strengthening (Excel Table, Category 2)	2,249.5	2,580.2	2,156.2	7,316.6
Total	30,304.2	13,869.3	5,824.0	11,894.8
Core Unit Support Total	1,500.0	1,850.0	1,850.0	5,850.0
Grand Total	38,896.3	21,201.8	24,128.5	32,311.5

TABLE 1 – UNDP 2005-2007 Resource Allocations *

* Differences in breakdown figures may be due to rounding.

** The Excel Table refers to UNDP's business plan tables that are submitted along with this narrative.

3. Geographical distribution

In 2005, UNDP will again cover all regions, with new activities in 49 countries (including on-going multi-year investment activities, non-investment activities and project preparation). Of the 49 countries, 11 are in Africa, 16 in Asia/Pacific, 19 in Latin America and the Caribbean, and 2 in the European/CIS region. There is also 1 global project.

4. **Programme Expansion**

a. Background

UNDP's 2005-2007 Business Plan has been developed by drawing upon the analysis provided by the Multilateral Fund's strategic planning framework, through communication with countries that have expressed an interest in working with UNDP to address their compliance and other needs, as well as through negotiation and discussion with the MLF Secretariat and other Implementing Agencies during and post the Inter-Agency meeting held 2-3 February 2005 in Montreal.

<u>Countries Contacted.</u> In preparing the 2005 Business Plan, UNDP communicated with each of the countries that figure in the plan. Correspondence indicating an interest in working with UNDP was received from each of these countries. UNDP's 2005 Business Plan also includes a number of countries that had expressed a written interest (letters received in 2004) in working with UNDP and had figured in our 2004 Business Plan, but for whom no projects were submitted during that year or, for whom projects were considered but deferred until a later date.

<u>Coordination with other bilateral and implementing agencies.</u> As it has done in the past, during 2005 UNDP will continue to collaborate with both bilateral and other implementing agencies. Collaborative arrangements in programming will continue with the Government Canada, the Government of Japan and the Government of Germany, as well as with UNEP. The bulk of such partnerships will continue to focus on provision of assistance to LVCs.

b. ODP Impact on 3-year Phase-out Plan

CHEMICAL	ODP in 2005*	ODP in 2006*	ODP in 2007*	TOTAL 2005-07
CFC in non-LVC	3,934	1,443	867	6,244
CFC in LVC	82	152	141	374
Methyl Bromide	143	112	-	255
Halons	19	-	-	19
CTC	94	29	-	123
TCA	123	56	56	236
HCFC	-	-	453	453
Grand Total (ODP T)	4,396	1,792	1,517	7,704

TABLE 2 - Impact upon Project Approval (phase-out in ODP T)

* Tonnage based on date of project approvals

In the table above, the ODP amount listed in a given year corresponds to the US\$ amount that is approved in that same year. This is even the case for the approved/multi-year category, where the overall costeffectiveness was applied to each individual tranche. If the ODP impact were calculated at the time of project completion rather than at the time of approval, the table would look as on the next page. The figures are not only different than above because of different timing, but also because they include ongoing individual projects that will be completed over the next few years. As these projects have been approved before 2005, the ODP of such projects are zero in the above table (ODP at date of approval), but will add a considerable amount in the table below (ODP at date of completion).

CHEMICAL	ODP in 2005*	ODP in 2006*	ODP in 2007*	SUBTOTAL ODP (2005-2007)	ODP post- 2007*
CFC in non-LVC	5,462	4,521	2,567	12,550	2,940
CFC in LVC	230	191	143	564	432
Methyl Bromide	87	271	25	383	231
Halon	1,050	-	16	1,066	3
CTC	7	29	60	96	58
TCA	78	85	95	258	254
HCFC	-	-	-	-	828
Grand Total (ODP T)	6,913	5,097	2,906	14,917	4,746

TABLE 3 – Impact upon project completion (phase-out in ODP T)

* Tonnage based on date of project completion

c. Project preparation

A comprehensive overview of the project preparation funds to be requested at 45th meeting of the Executive Committee is contained in the Work Programme submitted by UNDP to this meeting.

The information below presents a comprehensive overview of the total project preparation funds to be requested by UNDP during 2005. There are 28 such requests amounting to a grand total of US \$585,710, including support costs:

a) <u>Planned, Individual PRP new requests</u>: Separate from the requests for preparatory funding in the refrigeration servicing sub-sector for 2005, UNDP has included 11 new planned individual activity requests for preparatory funding in 11 countries, amounting to US \$247,190 (including support costs);

b) <u>Planned, Multi-Year PRP new request</u>: 1 planned multi-year activity request for preparatory funding amounting to US \$24,180 (including support costs), is requested in 2005 for Zimbabwe (MeBr); and,

c) <u>Planned, servicing sub-sector PRP new requests</u>: A total of 16 requests with a value of US \$314,340 in PRP will be requested over 2005 for preparatory activities in the refrigeration servicing sub-sector. In regard to RMP Update/TPMP developments, requests for preparatory funding will be made over the course of 2005 when the necessary progress report on ongoing and completed RMP activities has been made available. Some of the resulting programmes resulting from these preparatory activities will be presented in 2006, and may depend on decisions that will be taken by the Executive Committee when it will re-open the discussion on decision 31/48.

d. Non-investment projects

In 2005, UNDP will develop 20 individual non-investment projects with a total value of US \$2.785 million. Information including projected completion dates are provided in the following table.

COUNTRY	Category	Туре	Chemical/ Substance	Sector and Sub-Sector	Planned Date of Completion	Value (\$000) in 2005
Brazil	Non-LVC	DEM	CFC	Chillers Demonstration Project	Dec-06	500.0
Congo DR	Non-LVC	TAS	CTC	CTC Sectoral phaseout plan	Dec-07	80.0
Cuba	Non-LVC	TAS	CTC	Solvent Sectoral Project	Dec-07	75.0
Global	LVC	TAS	CFC	Addln Support for RMP in LVCs	Dec-06	635.2
Kenya	LVC	TAS	TCA	Solvent Sectoral phaseout plan	Dec-07	100.0
Nicaragua	LVC	TAS	CFC	Aerosol Inhalant drug products	Dec-06	70.0
Uruguay	LVC	TAS	CTC	Solvent Technical Assistance	Dec-07	60.0
Zimbabwe	Non-LVC	TAS	CTC	Solvent Technical Assistance	Dec-07	100.0
Argentina	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	75.0
Brazil	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	200.0
Colombia	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	75.0
India	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	200.0
Indonesia	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	125.0
Iran	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	75.0
Lebanon	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	50.0
Malaysia	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	100.0
Mexico	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	125.0
Sri Lanka	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	40.0
Syria	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	50.0
Venezuela	Non-LVC	TAS	HCFC	HCFC Survey	Dec-06	50.0
TOTAL						2,785.2

TABLE 4 - Individual Non-Investment projects

As can be seen from the above table, the 20 non-investment projects include:

- ◆ 5 solvents projects and 1 MDI project, most of which are carry-overs from last year.
- ✤ 1 request for additional support to implement RMP components in LVCs. This request was already submitted last year as "Supplementary Oversight Services" or SOS. Discussions will continue about this proposal in the context of discussions by the Executive Committee in 2005 when it will re-open the discussion on decision 31/48.
- ✤ 1 Demonstration Project in the chillers subsector for Brazil in response to decision 16/13 of the Meeting of the Parties, requesting the Executive Committee to considering funding demonstration projects in the chillers sector to help demonstrate the value of replacement of CFC-based chillers, as well as to increase awareness of users of the impending phase-out and options that may be available for dealing with their chillers.
- 12 requests from countries to carry out HCFC surveys. The survey will help countries to identify HCFCs applications and look into alternatives available. The HCFC survey will also facilitate national stakeholder consultations allowing a better understanding of the situation in the country related to HCFC supply and demand and identify potential barriers to adoption of alternative technologies so countries can make informed decisions. It is hoped that with the HCFC surveys, countries will be able to identify the various HCFC uses, obtain a breakdown of manufacturing and servicing uses, examine alternative technologies available, compare prices and hold stakeholders consultations. The surveys will also allow the Governments to look into the feasibility of starting

the HCFC conversion sooner rather than later, and identify enterprises ready to move ahead with the conversion.

Note: While not in the 2005 business plan, UNDP has included programmes for Brazil and Mexico for future years which relate to the destruction of CFC. The proposals are to identify sites where collection of used CFCs can be performed in a cost-effective way (waste, reclaim centres, dumps or other industrial sites) and recommend ways on how these quantities can be destroyed.

In addition, UNDP will prepare 14 non-investment Institutional Strengthening projects in 2005, as indicated in the shaded area of the table below. The total value of IS renewal programming in 2005 is US \$2,240 million, with attendant overall ODP value of 161 ODP T.

Country	Category	US \$000	ODP
Iran (50%)	Non-LVC	93.30	7.17
Costa Rica	LVC	151.05	-
Cuba	Non-LVC	160.25	12.00
Pakistan	Non-LVC	241.30	18.55
Nigeria	Non-LVC	279.50	22.00
Indonesia	Non-LVC	291.59	22.40
Colombia	Non-LVC	296.27	22.78
Argentina	Non-LVC	334.98	25.75
India	Non-LVC	401.22	30.85
		2,249.46	161.50

TABLE 5 – Non-Investment Institutional Strengthening requests

Note 2: ODP must only be considered for non-LVC's for which a cost-effectiveness of US\$ 12.1 /kg is applied.

5. MEASURES TO EXPEDITE IMPLEMENTATION OF APPROVED PROJECTS AND THOSE CRITICAL TO COMPLIANCE

Table 6 below indicates the amount that will be phased out from approved, ongoing individual projects.

TABLE 6 – Phase-out from Approved Ongoing Individual projects (ODF						
Category	Ongoing Individual in 2005	Ongoing Individual in 2006	Ongoing Individual in 2007	SUBTOTAL 2005-07	ODP post- 2007*	
CFC in non-LVC countries	230	191	61	482	58	
CFC in LVC countries	1,933	791	0	2,575	0	
Methyl Bromide	1,050	0	0	1,050	0	
Halons	17	76	9	102	14	
CTC	0	0	0	0	0	
TCA	0	0	0	0	0	
Non-Investment	72	3	64	139	0	
Grand Total	3,302	1061	134	4,497	72	

TABLE 6 – Phase-out from Approved Ongoing Individual projects (O	ODP tonnes)
--	---------------------

The total amount for 2004-2006 reported in the same table last year was 7,020 ODP tonnes. As such, the amount of tonnes to be phased out in individual ongoing projects went down with 2,523 ODP tonnes.

In accordance with decisions 35/4, para 111(b) and 36/9, para 43(c), UNDP will continue to make efforts to expedite the implementation of approved projects and especially for those that are critical to compliance. UNDP's Montreal Protocol Unit (MPU) has adjusted the way it operates so as to better assist countries to comply with the MP control measures in accordance with the strategic direction provided by the Multilateral Fund during this triennium. The efforts will continue in 2005 as highlighted below:

Strengthening the Network of UNDP staff and Experts in the Field

- UNDP will continue to work with national consultants/ national associations/ partners at the country level so as to better address the needs of countries and speed up response time at the field level.
- Monitoring and evaluation of multi-year performance-based phase-out projects with agreements will continue to be conducted in close cooperation with national experts and government focal points. UNDP believes that enhanced field presence will allow for more direct supervision of activities that in turn, will encourage maintenance of momentum and quicker identification and resolution of any technical and/or policy-related issues that may surface.
- However, UNDP encounters difficulties for LVCs in which RMP components are being implemented as the level of support cost does not allow for a sufficient level of monitoring at the UNDP country office level and/or at the level of consultancy components to ensure smooth implementation. UNDP believes for those programmes field presence is critical to provide early warning related to compliance.
- UNDP intends to continue to expedite implementation by calling upon its vast network of Country Offices. Resident Representatives are in constant contact with senior government officials and the engagement of high-level UNDP officials, on-the-ground, can be extremely valuable and influential in heightening awareness on the impact of activities, resolving programming issues, and/or providing support in encouraging development and adoption of legislative and regulatory mechanisms. UNDP will be happy to facilitate through the Resident Coordinator system any assistance requested by other agencies as done in the case of UNEP and UNIDO's request last year in Albania.
- UNDP has shifted most of the daily management of its approved national and sectoral plans to implementation according to the National Execution (NEX) modality. This execution modality also serves to enhance the role of national experts and national institutions, thereby building national capacity.
- UNDP MP Unit will continue with 2 senior professional level staff members out posted in supervisory roles in Asia and in Africa. In 2005, UNDP envisages to have one additional limited duration supervisory position for Latin America, out posted at the UNDP Regional Center in Panama.
- Following the re-structuring of UNDP/BDP's Finance and Operations Unit in 2004, MPU has recruited a Finance Officer. This recruited staff member will ensure adequate management of financial reporting and follow-up on requirements related to the implementation of national and sectoral phase-out plans, and maintains close contacts with Secretariat and Treasurer.

Management and Supervision of National/Sector Plans

Performance Based National and Sector Plans have been approved for UNDP in the following countries and sectors:

Nr	Country	Chemical	Sector
1	Argentina	MeBr	Fumigant Methyl bromide
2	Bangladesh	CFC	Phaseout plan CFC phase out plan
3	Bangladesh	CTC	Phaseout plan CTC phase out plan
4	Brazil	CFC	Phaseout plan CFC phase out plan

Nr	Country	Chemical	Sector
5	China	CFC	Solvent Sectoral phaseout plan
6	China	CTC	Solvent Sectoral phaseout plan
7	China	TCA	Solvent Sectoral phaseout plan
8	Colombia	CFC	CFC phase out plan
9	Colombia	HAL	Halons phase out plan
10	Costa Rica	MeBr	Fumigant Methyl bromide
11	Cuba	CFC	Refrigeration Phaseout Plan
12	India	CFC	Foam Multiple-subsectors
13	India	CFC	Refrigeration Domestic/commercial
14	India	CFC	Refrigeration Servicing
15	Indonesia	CFC	Refrigeration Domestic/commercial
16	Indonesia	CFC	Refrigeration Refrigerant management plan

21	Nigeria	CFC	Phaseout plan CFC phase out plan
22	Panama	CFC	Phaseout plan CFC phase out plan
23	Trinidad & Tobago	CFC	Phaseout plan CFC phase out plan

- UNDP will continue to assist the countries in which it is implementing national and sectoral phaseout plans to establish and maintain the infrastructure for the National Implementation and Monitoring/ Management Units approved under the national/sector Plans. Government staff, as well as UNDP staff, will work closely and will operate under MLF and UNDP guidelines related to procurement of goods, data verification requirements, proper financial management and auditing, as well as required reporting on the progress of the Plans.
- The financial databases set-up by the Monitoring and Implementation Units are being, and will be, developed in order to ensure compatibility with UNDP's project management system so as to facilitate handling and retrieval of technical and financial information and ensure accuracy of reporting.
- National ODS legislative and regulatory frameworks are assessed and, if deemed inadequate to support and sustain the target reductions contained in a performance-base agreement, are presented to the relevant Government authorities with suggested revisions. Monitoring of CFC imports and distribution will continue to be strengthened as a mechanism to prevent enterprises (who have converted) from making future purchases of CFCs. UNDP will also continue to assist countries put in place, or strengthen, verification mechanisms, both from a top-down approach ensuring that appropriate licensing systems are in place, as well as a bottom-up approach supporting enhancement of government registries that detail purchasers of CFCs, as well as enterprises that have been assisted by the Fund.
- As far as meeting agreed targets, UNDP and Government staff will continue to work in partnership to establish the mechanisms for preparation of projects to be funded under the Plans (in accordance with MLF guidelines, independent technical reviews etc.), as well as to monitor their implementation (procurement of equipment/materials, list of equipment to be destroyed, technology selection regulations, etc.). Reports on progress, key to measuring success of implementation and phase-out, as well as identifying challenges, are the result of a collaborative effort between National Management teams and UNDP.

UNDP believes that the aforementioned measures will be key in assisting countries to expedite implementation, as well as allow for a more comprehensive assessment of additional needs at the country-level, thereby more effectively supporting the compliance-driven model. Specific ODP related information on on-going UNDP projects, on a country-by-country basis, has been provided as part of the BP tables. The measures above are intended to be extended to all programming, on-going and planned, so as to maintain momentum, accelerate implementation where required, improve supervision, as well as financial accountability, at the field level.

UNDP efforts in countries addressed by the Implementation Committee and by the MOP

UNDP is working to assist a number of countries address their compliance commitments, following issues raised by the Implementation Committee in 2003. These include countries where UNDP manages the Institutional Strengthening programmes, as well as countries where UNDP is playing a significant role in a particular sector. In addition to the measures mentioned above, the following efforts are being put in place:

- **Belize** Was found to be in non-compliance with CFC in the past. The 33rd meeting of the Implementation Committee noted with appreciation that Belize had met its benchmarks for 2003. In addition, the Executive Committee has approved the RMP-Update at its 44th meeting for Belize.
- **Bolivia** Country has reported back in compliance with CFC control measures. During 2005 UNDP will continue implementation of the Terminal Umbrella Project in Commercial Refrigeration approved in 2004.
- **Bangladesh** With a consumption of 0.892 ODP tonnes in 2003, Bangladesh appeared to be in potential non-compliance with the control measures for Methyl Chloroform. UNDP is currently implementing a National Phase Out Plan in Bangladesh that includes activities to assist the country phase out Methyl Chloroform. UNDP will assist the country to prepare explanation to the Implementation Committee on the excess of consumption on this substance.
- **Cameroon**. With UNDP's assistance through its regional Africa Halon Project, the country has completed a survey on its installed capacity and has put in place a recycling strategy. In 2005, the country will complete a service contract with the recently commissioned halon bank, and control mechanisms will be initiated.
- Congo MBR- PR Congo is participating in the UNDP-managed Regional Africa MB project that aims to provide assistance to low-volume African consumers of MB. PR Congo is one of 5 countries that must achieve a 20% phase-out by 2005 under the terms of the project. The project is under implementation. A comprehensive national sectoral survey has been completed in PR Congo and MB uses have been identified. A two-track implementation approach technical assistance and regulatory support has been adopted. A technical mission was organized in October 2004, and a subsequent regulatory mission, undertaken by a regional pesticides regulatory expert, will be undertaken in early 2005. As a result of project activities, PR Congo is working to meet its 20% reduction target and thereby achieve its 2005 compliance objective.
- Chile UNDP manages an ongoing project that targets elimination of MeBr in the tree nursery and tree replant sectors. The country nevertheless has experienced a non-compliance problem as a result of an inability to put in place a comprehensive regulatory framework for consumption in the sector. As a result of Decision 43/13, the Government has been working in collaboration with the World Bank, who is proposing as part of its 2005 BP a project to address all remaining uses of MB that will complement UNDP's project, and UNDP to finalise a strategic workplan to demonstrate how it proposes to return to compliance. During 2005, UNDP will continue working with the Government and the World Bank to encourage the adoption of a harmonized comprehensive regulatory framework necessary to ensure a sustainable elimination of MeBr. With regards to the non-compliance on Annex B, Group I and Annex B. Group III, UNDP is assisting Chile to implement a solvent sector phase out

plan. While the project started slowly in 2004, a workplan has been agreed and the technical assistance required is going to be provided during 2005.

- **Cape Verde** Cape Verde faces non-compliance with regard to base year and baseline data reporting. UNDP in partnership with UNEP worked in the in the preparation of the CP/RMP, which was approved at the 45th Executive Committee Meeting. UNDP will implement the investment components of the CP/RMP to help the country achieve compliance.
- **Guinea Bissau** Guinea Bissau faces non-compliance with regard to base year and baseline data reporting. UNDP is working in partnership with UNEP in the implementation of the CP/RMP. UNDP will implement the investment components of the CP/RMP.
- India India faces non-compliance with regard to base year and baseline data reporting in the MeBr sector. India has just ratified the Copenhagen Amendment and a data survey is underway. As soon as the MeBr consumption data is known, it will be communicated to the Ozone Secretariat. In this sector, the country is receiving assistance from UNIDO.
- Lebanon MBR Further to submission of a request for change is baseline data to the Ozone Secretariat by the Government of Lebanon in April 2001, acknowledged by the Ozone Secretariat, the Government did not note the requirement to complement the request with submission of revised A7 data reporting forms for the years in question (1995 - 2000). Since approval of two terminal phase-out investment projects in the MB sector in July 2001, the Government has been working to eliminate its MB consumption against the reduction schedule contained in the Agreed Conditions that governs the projects, a reduction schedule that was based on the revised baseline data that the Government believed had been accepted by the Ozone Secretariat in 2001. Upon reviewing Lebanon's submission of 2002 A7 data, the Ozone Secretariat noted that the country was in potential non-compliance, given that the 2001 request for change in baseline data had not been officially recorded in the Ozone Secretariat's database and advised Lebanon that, in accordance with Decision XV/19, 'Methodology for submission of requests for revision of baseline data', an updated request for change in baseline data had to be submitted to the Implementation Committee. In 2004, UNDP worked with the Government of Lebanon, with support provided by UNEP's CAP programme, to prepare the Government's submission to the Implementation Committee. The Government of Lebanon presented its case to the 32^{nd} Meeting of the Implementation Committee and was asked to return to the 33^{nd} meeting with additional survey data that had been compiled during preparation of the investment projects. Upon submission of this additional information, the Government's request for change in MB baseline data was accepted by the 33rd Meeting of the Implementation Committee.
- **Maldives** Was found to be in non-compliance with CFC in the past. The 33rd meeting of the Implementation Committee noted with appreciation that Maldives had met its benchmarks for 2003. In addition, the RMP activities are presently ongoing.
- Malaysia In finalizing an ongoing MB demonstration project and securing approval for implementation of a terminal project for all remaining uses in the same sector (approved ExCom 41), UNDP was able to work with the Government of Malaysia to analyse and correctly interpret the MB data that the country had been reporting. It was discovered that recent reporting included QPS uses, as these can be confusing to separate for non-QPS use. UNDP continues to assist Malaysia in clarifying and reporting the reasons for this data discrepancy, as called for by Decision 41/16.
- **Mozambique** At the time of approval of UNDP's regional Africa project Mozambique's Methyl Bromide consumption was negligible. Recently however, consumption has resumed following stabilization post the severe floods, specifically in the tobacco production sector. In order to assist Mozambique, UNDP is providing policy and consumption survey assistance through its regional Africa MB project and, through liaison with a large-scale MeBr elimination project in Malawi, will sponsor a study tour for Mozambique to tobacco growers in Malawi that have phased-out consumption.

- **Nepal** At the 44th Executive Committee Meeting a UNEP/UNDP joint RMP update was approved to Nepal to comply with control measures on CFC until 2007. Implementation of this project will start in 2005.
- **Nigeria** UNDP notes the discrepancy in consumption data in the halon sector however, GTZ, who is working with the country in this sector, will no doubt be able to help the country come back into compliance.

In addition, gaps exist in data reporting for the following: Annex A (1986), Annex B (1989) and Annex C (1989). UNDP will assist the country in addressing these discrepancies and in reporting them to the Ozone Secretariat.

- **Pakistan** UNDP notes the discrepancy in consumption data in the halon sector and will endeavour, through its management of the IS project, to lend support to UNIDO, the agency working with the country in this sector.
- Saint Vincent and the Grenadines CFC UNDP included in its Business Plan 2005 assistance to Saint Vincent and the Grenadines to implement the investment components of its Refrigerant Management Plan. These components will be part of the RMP update being prepared by UNEP (lead agency for this project).
- Sao Tome Sao Tome faces non-compliance with regards to base year and baseline data reporting. UNDP worked in partnership with UNEP in the preparation of the CP/RMP, which was approved at the 44th Executive Committee Meeting. In 2005 UNDP will start implementation of the investment components of the CP/RMP in order to assist the country achieve compliance with the Montreal Protocol control measures.

UNDP efforts to support verification of Article 7 data (Decision 41/16)

As mandated by Decision 41/16, prior to submission of projects contained in the 2005 Business Plan, UNDP will work with the National Ozone Units in partner countries to verify the consistency of Article 7, country programme implementation and project phase-out data presented. Ensuring accuracy of data at the outset will facilitate verification of phase-out achievements in the long-term.

<u>UNDP efforts to sustain implementation of RMPs in countries where UNDP has received funds for implementation of RMPs and/or its components</u>

UNDP has implemented, and continues to implement, many activities in the refrigeration servicing sector. These include: early MLF domestic and MAC sector recovery and recycling projects, full RMPs approved prior to Decision 31/48, recovery and recycling RMP components, both pre and post-Decision 31/48 and more recently, end-user incentive programmes. UNDP has collaborated actively with UNEP during RMP implementation, with UNEP managing non-investment components of UNDP-led RMPs, and UNDP managing investment components of UNEP-led RMPs.

Over the course of 2005 UNDP and UNEP will again collaborate in the formulation and/or revision and update of new refrigeration servicing activities as part of RMPs in a number of countries where consumption resides primarily in this sector. These include: Bahrain, Bhutan, Congo DR, Dominica, Fiji, Grenada, Guinea-Conakry, Mali, Nicaragua, St Kitts & Nevis, St Vincent & Grenadines, Turkmenistan. In line with the objectives of the strategic planning framework, efforts will focus on allowing countries to meet the 2005 50% reduction target and lay the groundwork required for achievement of the 85% reduction called for in 2007. In order to reinforce sustainability of efforts, UNDP plans, in cooperation with UNEP, to:

• address, during RMP revisions, additional conversion needs (both investment and non-investment) and identify barriers to sustain RMP activities specific to each country/region; and,

• enhance harmonization of policy and technology transfer activities by inviting UNEP/CAP regional staff to participate in UNDP missions to ensure legislation/licensing systems in place, as well as to assess their effectiveness. Such an enhanced collaborative approach will allow for the provision of precise and targeted guidance required to sustain and/or accelerate implementation.

UNDP efforts to related to Licensing Systems

Most of the countries in non-compliance with the licensing system requirement have their institutional strengthening project implemented by UNEP, for example, Bhutan, Cape Verde, Djibouti, Guinea Bissau, Haiti, and Sierra Leone. While the assistance in this regard would therefore come from UNEP – also through their CAP funding – UNDP may occasionally also provide complementary guidance/assistance through the implementation of its RMP components that are being implemented in these countries. As for Kenya and Iran where UNDP does have the institutional strengthening project, special efforts will be made to assist the Government in the area of licensing systems.

6. PERFORMANCE INDICATORS

UNDP 2005 Investment Project Performance Indicator Targets:

Decision 41/93 of the Executive Committee approved the following indicators to allow for the evaluation of performance of implementing agencies, with the weightings indicated in the table below. UNDP has added a column containing the "2005 targets" for those indicators. Some of these targets can be extracted from UNDP's 2005 business plan to be approved at the 45th ExCom meeting in April 2005.

Category of performance indicator	Item	Weight	UNDP's target for 2005	Rermark
Approval	Number of annual programmes of multi-year agreements approved vs. those planned.	20	15	(See Table 7, page 7 \rightarrow 13 reports plus 2 planned MYA)
Approval	Number of individual projects/activities (DEM, INV, RMPs, TAS, TRA) approved vs. those planned	20	49	(See Appendix I, table 1 plus 9 INS)
Implementation	Milestone activities completed (e.g. policy measures, regulatory assistance)/ODS levels achieved for approved multi-year annual tranches vs. those planned	20	15	(See Table 7, page 7 \rightarrow 13 reports plus 2 new ones assuming one milestone per plan)
Implementation*	ODP phased-out for individual projects vs. those planned per progress reports	5	3,302	(See Appendix I, table 2)
Implementation*	Project completion (pursuant to Decision 28/2 for investment projects) and as defined for non-investment projects vs. those planned in progress reports	5	41	(See Appendix I, table 3, but revised as per MLFS)
Implementation	Percentage of policy/regulatory assistance completed vs. that planned	10	N/A***	
Administrative	Speed of financial completion vs. that required per progress report completion dates	10	On time	(See Appendix I, table 4)
Administrative*	Timely submission of project completion reports vs. those agreed	5	On time	
Administrative*	Timely submission of progress reports and responses unless otherwise agreed	5	On time	

* Existing performance indicator

** Tbd = to be determined

*** Not applicable since there are no specific policy projects.

N.B. APPENDIX I contains four tables that show how the calculations in the table above were made.

N.B. Some of the 2005 target indicators may change when the 2004 progress report will be issued in May 2005.

N.B. Some of the 2005 target indicators may depend on policy discussions that will be held at the 45th meeting of the Executive Committee which may result in some of the proposed activities to be withdrawn. In such cases, UNDP will ask at the meeting to be allowed to change the relevant indicator(s) as well.
