EXECUTIVE COMMITTEE OF
THE MULTILATERAL FUND FOR THE
IMPLEMENTATION OF THE MONTREAL PROTOCOL

Forty-seventh Meeting
Montreal, 21-25 November 2005

**STATUS/PROSPECTS OF ARTICLE 5 COUNTRIES IN ACHIEVING COMPLIANCE
WITH THE CONTROL MEASURES OF THE MONTREAL PROTOCOL**

Pre-session documents of the Executive Committee of the Multilateral Fund for the Implementation of the Montreal Protocol are without prejudice to any decision that the Executive Committee might take following issue of the document.

For reasons of economy, this document is printed in a limited number. Delegates are kindly requested to bring their copies to the meeting and not to request additional copies.

EXECUTIVE SUMMARY

- As at 13 October 2005, 120 Article 5 countries reported 2004 data pursuant to Article 7. For 5 Article 5 countries which had not submitted the Article 7 data, their country programme data are used. To address all countries, this analysis uses 2003 data for 18 countries.
- Part I contains a new format for data tables and addresses all Article 5 countries. It concludes that:
 - All countries at risk of not achieving either the CFC freeze and the 50% reduction have projects approved to achieve these control measures. The same applies to the 85% reduction with the exceptions of Somalia and Tunisia for which there are submissions to the 47th Meeting.
 - Actions may be needed to achieve the halon freeze in Kyrgyzstan, Libya, Sierra Leone and Somalia and additionally Romania for the 50% reduction in 2005. All other countries at risk have approved halon banking activities. Projects are being submitted to the 47th Meeting for all countries except Romania and Sierra Leone.
 - All countries at risk of not achieving the methyl bromide freeze, except Fiji and Libya for which projects were submitted to the 47th Meeting, have projects approved to achieve these control measures. Singapore is also at risk but it does not seek Fund assistance. In addition to these countries, Armenia and South Africa are at risk of achieving the 20% reduction but there are issues related to Global Environmental Facility funding.
 - All countries at risk of not achieving the 85% reduction for CTC in 2005 have received support from the Multilateral Fund with the exception of the following countries: Nepal, Sierra Leone and Zimbabwe, and Cyprus who has not sought assistance from the Fund for its phase-out.
 - All countries at risk of not meeting either the methyl chloroform (TCA) freeze or the 30% reduction in 2005 have projects approved or preparation underway to achieve these control measures.
- Implementing agencies indicate that 5 of the 31 Article 5 countries subject to decision XVI/32 addressing Parties required to implement licensing systems, have approved and implemented licensing systems.
- Part II provides information on countries with compliance decisions, countries at risk of non-compliance and countries that may need additional actions including:
 - Cameroon (halon), Fiji (methyl bromide), Marshall Islands (CFCs), Saint Vincent and the Grenadines (CFCs), and Sierra Leone (halon) based on Article 7 data; and
 - Bosnia and Herzegovina (CFC/TCA), Bahrain (methyl bromide), Kyrgyzstan (halons), and Libya (halon/methyl bromide) based on implementation of country programme data.
- Part III specifies that of the 96 Article 5 countries that provided country programme implementation data the Multilateral Fund has addressed all but 12,609.8 ODP tonnes of consumption.
- Section III also discusses additional country programme implementation data pursuant to decision 46/39 and assessments of ODS phase-out programmes.

Introduction

1. This document consists of three parts:
 - Part I is prepared in response to decision 32/76(b) and decision 46/4, which requested the Secretariat to prepare an annual update of the status of compliance of Article 5 countries with the control measures of the Montreal Protocol as contained in Part I of document UNEP/OzL.Pro/ExCom/32/38, including a revised format and data available upon request from future reports on the implementation of country programmes.
 - Part II contains an update of the status of implementation for all Article 5 countries whose latest consumption exceeds current control measures and those that are at risk of being in non-compliance with future control measures.
 - Part III presents data on the implementation of country programmes, including an analysis of the ODS consumption data by sector, a section on new implementation of country programme data that addresses the characteristics of ODS phase-out programmes and qualitative assessment of their performance.
2. The analysis performed and the conclusions derived in this document are without prejudice to the status of compliance determined by the Meeting of the Parties which is the only body empowered to do so.
3. Since data reported pursuant to Article 7 are used exclusively to determine status of compliance on an annual basis, and the current analysis uses a mixture of data reported to the Fund Secretariat on country programme implementation for various compliance periods and assumes that the phase-out from ongoing projects would be implemented, this document does not determine compliance per se, but rather assesses the potential prospects of an Article 5 country achieving compliance with one or more of the Montreal Protocol control measures.

PART I: ANALYSIS OF STATUS OF COMPLIANCE

4. Part I contains a description of the changes made to the format of the data tables, followed by a description of the methodology, and an analysis of the status/prospects of compliance of Article 5 countries for CFCs, halons, methyl bromide, methyl chloroform and carbon tetrachloride.

FORMAT CHANGES

5. At its 46th Meeting, and in response to the Secretariat's request for comments on the format for future status/prospects of compliance reports, the Executive Committee decided to request the Secretariat to reformat the report to focus on actual and potential compliance issues, to address the 85 per cent reduction for CFCs in 2007, and to include a report on all Article 5 countries (decision 46/4).

6. To address this decision, the Secretariat has reformatted the data tables. The data tables are organized by country and continue to include information on the year and source of the latest consumption data and the CFC baseline data. New columns have been added to specify any relevant compliance decision taken as well as any 2004 action plan targets that can be used to determine if the latest consumption data is in compliance with the action plan. Instead of organizing countries by their status of compliance, compliance data is specified in terms of percentages above the control level. For example, if latest consumption is 20 per cent above the freeze baseline, the column entitled “Freeze Compliance” would indicate 20 per cent. Similarly, to ascertain the extent of risk of non-compliance with future controls, the percentage by which latest consumption is above the control measure is specified.

7. To further simplify the data tables, new columns were added to reflect any projects under implementation and remaining activities in the business plan instead of presenting ODS tonnages. The final column in these tables indicates actions taken by the Executive Committee. This column shows the extent to which there are activities that should enable compliance, for example, if there is a total phase-out agreement or total phase-out management plan.

Additional Data Available upon Request

8. The Fund Secretariat will continue to prepare all of the data that was included in previous versions of the status/prospects of compliance. These data are available upon request and are used for analysis purposes by the Secretariat, and provide the information as set out for CFCs in Table 1 below.

Table 1

ADDITIONAL DATA AVAILABLE UPON REQUEST

| Region | Status | Amount needed to meet the freeze | 50% CFC reduction | Amount needed to meet 50% CFC reduction | 85% CFC Reduction | Amount needed to meet 85% CFC reduction | Phase-out approved but not yet implemented (as of October 2005) | Date for completion of approved projects | ODS phase-out in Final 2005 business plan | RMP approved | RMP for LVCs to meet 85% CFC Reduction |
|--------|--------|----------------------------------|-------------------|---|-------------------|---|---|--|---|--------------|--|
| | | | | | | | | | | | |

METHODOLOGY

9. This section presents a description of the methodology used in the analyses of compliance with CFC, halon, methyl bromide, carbon tetrachloride (CTC) and methyl chloroform (TCA) control measures. No projects have been identified that address Annex B-1 substances; the Executive Committee has neither considered nor funded projects that address these substances that are subject to the 80 per cent baseline reduction starting in 2003. The analysis of the status of compliance assumes that the latest reported consumption data has taken account of the phase-out from completed projects approved by the Executive Committee. By December 2004, 218,938 ODP tonnes, including 29,414 ODP tonnes of CFC production, 31,188 ODP tonnes of halon production and 2,638 ODP tonnes of CTC production, had been phased out from completed projects valued at some US \$1.2 billion.

Data

10. 143 Article 5 countries reported data to the Fund and Ozone Secretariats as follows: 120 Article 5 countries reported 2004 data pursuant to Article 7 (as at 8 October 2005); 5 countries reported 2004 data to the Fund Secretariat pursuant to Decision 17/34 on progress on the implementation of the country programmes. For those countries that had not submitted 2004 data, latest consumption data was used. This included the use of 2003 data for 18 countries. The latest reported ODS consumption is assumed not to increase.

11. Data on the status of implementation of all activities and projects approved by the Executive Committee as of the end of 2004 were reported by the bilateral and multilateral implementing agencies in their annual progress reports submitted to the 46th Meeting.

12. Data on potential approvals during the year 2005 were obtained from the Consolidated Business Plan of the Multilateral Fund for the Years 2005-2007.

Production sector

13. An analysis was not performed for the production sector because the Executive Committee has established a specific process for production sector projects. Of the eight Article 5 countries with CFC production facilities, the Governments of Argentina, China, India, Korea DPR, Mexico and Venezuela have agreements in place for scheduled reductions. Brazil indicated that it would phase-out on its own. The remaining countries with CFC production facilities are Republic of Korea and Romania. UNIDO is preparing an ODS production sector phase-out project for Romania that will address CFC, methyl bromide and CTC production. For halon production, China has an agreement in place and India received a one-time grant for the closure of its halon production facilities.

14. Five countries (Brazil, China, India, DPR Korea and Romania) had a CTC production baseline. Projects for the complete phase-out of CTC in the production and consumption sectors in three countries have already been approved by the Executive Committee (China, India and DPR Korea, with a total CTC production baseline of 42,205.5 ODP tonnes) and a project was being submitted to the 47th Meeting for Romania.

15. A methyl bromide production sector project in China was being submitted to the 47th Meeting.

ANALYSIS OF COMPLIANCE FOR CFCs (Annex I)

16. Based on their latest reported consumption data, 139 countries could be considered to be in compliance now. These countries' latest combined consumption of 69,694 ODP tonnes is, in total, some 94,098 ODP tonnes lower than their baseline level of 163,792 ODP tonnes.

17. 96 of these countries are LVCs, 89 of which have received support for RMPs from the Multilateral Fund, including support for 63 LVCs to meet their 85 per cent reductions in 2007.

18. Countries were grouped into three categories: those whose latest consumption exceeds the baseline freeze and those at risk of not meeting future controls because their latest consumption exceeds the 50 per cent reduction or the 85 per cent reduction.

(a) Countries whose latest consumption exceeds the baseline freeze

19. This category consists of 4 LVCs countries. All other countries appear to be in compliance. These countries may need additional actions to achieve compliance based on their latest consumption data.

20. However, three of these countries, Bosnia and Herzegovina, Micronesia and Turkmenistan have been provided with support to enable their compliance as follows:

- Bosnia and Herzegovina has a national ODS phase-out agreement with the Executive Committee and an action plan approved by the Meeting of the Parties that would allow it to complete the phase-out of CFCs prior to 31 December 2007.
- Micronesia has received support through an RMP for total phase-out of CFC in the country.
- Turkmenistan has a phase-out plan funded through the Global Environment Facility when the country was a non-Article 5 country. A phase-out plan for Turkmenistan is under current implementation.

21. An RMP project has been approved for Saint Vincent and the Grenadines. Its level of consumption in 2004 complies with the plan of action adopted in decision XVI/30.

(b) Countries at risk of not achieving the 50 per cent baseline reduction

22. This category consists of 49 countries including 37 LVCs, which may need to achieve additional CFC phase-out amounting to 6,432 ODP tonnes by 2005 in order to comply with the 50 per cent reduction target. Of these 49 countries, 13 countries were to receive projects included in the 2005 business plans.

23. Of the 49 countries, the Executive Committee has approved RMPs for 4 non-LVCs and 31 LVCs, including 31 countries that had already received either an RMP to meet their 50 per cent and 85 per cent reductions or a national phase-out agreement. The Federated States of Micronesia, Palau and Solomon Islands are three of the LVCs that have phase-out agreements with the Executive Committee as part of the Pacific Island Country strategy.

24. There are 5 LVCs that did not have approved RMPs, but have national phase-out agreements. These include: Albania, Armenia, Bosnia and Herzegovina, Ecuador and Turkmenistan.

25. The remaining 9 countries that appear to possibly need additional actions to achieve the 50 per cent reduction are Cyprus, Iran, Korea Republic, Libya, Mexico, Nigeria, Saudi Arabia, United Arab Emirates and Venezuela. However, Iran, Libya, Mexico, Nigeria and Venezuela

have a national CFC phase-out agreement with the Executive Committee containing a phase-out schedule that is consistent with the Montreal Protocol targets and the other countries have not sought Multilateral Fund assistance except Saudi Arabia for whom consideration of funding was deferred until the 48th Meeting (decision 46/26).

(c) Countries at risk of not achieving the 85 per cent baseline reduction

26. This category consists of 117 countries including 79 LVCs, which may need to achieve additional CFC phase-out amounting to 45,929 ODP tonnes by 2007 in order to comply with the 85 per cent reduction target. Of these 117 countries, 36 countries were to receive projects included in the 2005 business plans.

27. Of the 117 countries, the Executive Committee has approved RMPs for 18 non-LVCs and 71 LVCs, including 76 countries that had already received either an RMP to meet their 50 per cent and 85 per cent reductions or had a national phase-out agreement approved. The Federated States of Micronesia, Palau and Solomon Islands are three of the LVCs that have phase-out agreements with the Committee as part of the Pacific Island Country strategy.

28. There are 6 LVCs namely, Albania, Armenia, Bosnia and Herzegovina, Ecuador, Papua New Guinea and Turkmenistan, that did not have approved RMPs, but have approved national phase-out agreements.

29. The remaining 22 countries that appear to possibly need additional actions to achieve the 85 per cent reduction are Argentina, Brazil, Colombia, Cyprus, India, Indonesia, Iran, Korea Republic, Lebanon, Libya, Malaysia, Mexico, Morocco, Nigeria, Philippines, Saudi Arabia, Serbia and Montenegro, Somalia, Thailand, Tunisia, United Arab Emirates and Venezuela. All countries currently eligible for Fund assistance except Somalia and Tunisia have national CFC phase-out agreements with the Executive Committee, containing a phase-out schedule that is consistent with the Montreal Protocol targets. A country programme is to be considered at the 47th Meeting for Somalia, and an ODS phase-out plan is also being submitted to the 47th Meeting for Tunisia that should address the remaining CFC consumption.

ANALYSIS OF COMPLIANCE FOR HALONS (Annex II)

30. Based on their latest consumption data, 65 countries could be considered to be in compliance now. These countries' latest combined consumption of 8,177 ODP tonnes is, in total, some 37,588 ODP tonnes lower than their baseline level of 45,765 ODP tonnes.

31. 74 countries reported no consumption for 1995 to 2004. 2 countries have not reported baseline or latest consumption data.

32. 46 countries have received support for halon banking activities or phase-out agreements including those countries participating in regional halon banks. Halon banking is presumed to be the last funded activity in the halon consumption sector for most countries but there are some halon phase-out activities that are part of multi-sectoral phase-out agreements.

33. Countries were grouped into two categories namely, those whose latest consumption exceeds the baseline freeze and those at risk of not meeting the 2005 control because their latest consumption exceeds the 50 per cent reduction.

(a) Countries whose latest consumption exceeds the baseline freeze

34. This category consists of 4 countries (Kyrgyzstan, Libya, Sierra Leone and Somalia) that may need additional actions to achieve compliance with the freeze target. These countries would need to phase-out a total of 92 ODP tonnes to achieve compliance with the freeze. None of those countries have received support for halon banking from the Multilateral Fund. Libya and Sierra Leone have activities planned for halon in the 2005 business plan while Kyrgyzstan and Somalia do not. Projects are being submitted to the 47th Meeting for all of these countries except Sierra Leone, and the project for Somalia has been withdrawn although the Committee is to consider a country programme for Somalia at the 47th Meeting.

(b) Countries at risk of not achieving the 50 per cent baseline reduction

35. This category consists of 12 countries, including 5 LVCs that may need to achieve additional phase-out amounting to 922 ODP tonnes of halon by 2005 in order to comply with the 50 per cent reduction targets. Republic of Korea is the only country that does not seek Fund assistance. 5 countries have received support for halon activities from the Multilateral Fund, including halon banking (Bosnia and Herzegovina, Mexico, Nigeria, Pakistan and Syria). Of the remaining 7 countries that might not achieve their 50 per cent reduction targets, Kyrgyzstan and Romania had consumption levels below 10 ODP tonnes. The remaining countries reported latest consumption as follows: Georgia (36.2 ODP tonnes), Libya (714.5 ODP tonnes), Sierra Leone (18.45 ODP tonnes) and Somalia (23.37 ODP tonnes).

36. 8 of the 12 countries that may need to achieve additional phase-out to comply with the 50 per cent reduction targets for halon have received Multilateral Fund assistance or planned activities in the 2005 business plans, including Bosnia and Herzegovina, Georgia, Libya, Mexico, Nigeria, Pakistan, Sierra Leone and Syria. Projects for Georgia and Libya were submitted to the 47th Meeting. Of the 4 countries that do not receive assistance, Kyrgyzstan has project submitted to the 47th Meeting and Republic of Korea does not seek Fund assistance. The Executive Committee may wish to consider requesting implementing agencies to consider the possibility of including activities in the future business plans for countries that do not have approved halon banking or planned activities in the 2005 business plans, including for Romania and Somalia if conditions exist for a sustainable activity.

ANALYSIS OF COMPLIANCE FOR METHYL BROMIDE (Annex III)

37. This section presents the analysis for compliance with methyl bromide control measures. It should be noted that all data reported and used in this analysis relate to controlled use only, i.e. exclude quarantine and pre-shipment (QPS).

38. Of the 128 Article 5 countries that have ratified the Copenhagen Amendment, 124 have reported complete baseline data. Of these 124 countries, 42 reported zero both for the baseline and for the latest consumption.

39. 93 Article 5 countries have received support from the Multilateral Fund for methyl bromide activities and/or projects, including projects that will lead to a complete phase-out of methyl bromide in 39 of these countries and partial phase-out in an additional 16.

40. Countries have been grouped into two categories: those whose latest consumption exceeds the baseline freeze, and those at risk for the 2005 control because their latest consumption exceeds the 20 per cent reduction. Annex III specifies those countries that have not ratified the Copenhagen Amendment.

(a) Countries whose latest consumption exceeds the baseline freeze

41. This category consists of 11 countries that may need additional actions to achieve compliance with the freeze target. These countries would need to phase-out a total of 264 ODP tonnes to achieve compliance with the freeze.

42. Of the 11 countries, Bosnia and Herzegovina, Chile, Cote D'Ivoire and Uganda have phase-out agreements or approved projects for a total phase-out of methyl bromide consumption under the Multilateral Fund. Uganda is the only country that has an Action Plan with a total phase-out plan consistent with the Montreal Protocol targets. In addition, Guatemala and Honduras have approved projects for partial phase-out of methyl bromide with an approved Action Plan. Guatemala's consumption (484.2 ODP tonnes) is consistent with the Action Plan requirement (492 ODP tonnes). However, Honduras' consumption for 2004 (340.8 ODP tonnes) is inconsistent with the required level recorded in the Action Plan (306.1 ODP tonnes). This leaves 5 countries that may need additional activities.

43. The Multilateral Fund has provided funding for methyl bromide projects and other activities in 2 out of these 5 countries that may need additional actions. Fiji and Libya had activities for methyl bromide included in the 2005 business plans. Fiji and Libya have methyl bromide investment projects submitted to the 47th Meeting. Tunisia has had a methyl bromide project funded but there are currently no alternatives available for the target use on palm dates with high moisture content. Therefore all countries at risk of not achieving the freeze have received assistance except Armenia (1.02 ODP tonnes) and Singapore (25.57 ODP tonnes). Singapore does not seek Fund assistance and Armenia was recently been reclassified as an Article 5 country.

(b) Countries at risk of not achieving the 20 per cent baseline reduction

44. This category consists of 22 countries, including 10 LVCs that may need to achieve additional phase-out amounting to 1,046 ODP tonnes by 2005 in order to comply with the 20 per cent reduction targets. 18 of the 22 countries have received support for methyl bromide activities from the Multilateral Fund. 11 of these countries (Argentina, Bosnia and Herzegovina, Chile, China, Costa Rica, Cote D'Ivoire, Indonesia, Philippines, Thailand, Uganda and Uruguay) have

phase-out agreements for total phase-out, and 5 countries (Egypt, Guatemala, Honduras, Mexico and Morocco) have projects for partial phase-out to achieve the 20 per cent baseline reduction.

45. The remaining 6 countries need to phase out a total of 168 ODP tonnes to achieve the 20 per cent reduction. Of these countries, Libya and Tunisia have received assistance from the Fund.

46. All the 22 countries that may need to achieve additional phase-out to comply with the 20 per cent reduction targets for methyl bromide, excluding Singapore that does not seek Fund assistance, have received assistance except Armenia, Fiji, and South Africa that have not received support for methyl bromide activities from the Multilateral Fund (or the Global Environment Facility in the case of South Africa) (decision XV/49 of the Fifteenth Meeting of the Parties). However, activities were planned for Fiji in the 2005 business plans, and Fiji has submitted a methyl bromide investment project for consideration at the 47th Meeting.

CARBON TETRACHLORIDE (CTC) (Annex IV)

47. This section presents the analysis of compliance with carbon tetrachloride control measures. It should be noted that all data reported and used in this analysis are those related to controlled use only, i.e., exclude feedstock. Reported CTC consumption was not differentiated into uses such as solvents and process agents.

48. Of the 141 countries with reported baseline data, 82 reported zero both for the baseline and for the latest consumption.

49. The analysis addresses those countries at risk of not meeting the 2005 control measures because their latest consumption exceeds the 85 per cent reduction. Annex IV specifies those that had not ratified the London Amendment.

50. 25 countries might not achieve compliance with the 85 per cent reduction by 2005. These countries would need to phase-out a total of 25,368 ODP tonnes to meet the 85 per cent reduction by 2005. 12 of these 25 countries have reported consumption above 10 ODP tonnes including: China (20,020 ODP tonnes), India (7,459 ODP tonnes), Korea DPR (2,199 ODP tonnes), Iran (2,169 ODP tonnes), Pakistan (752 ODP tonnes), Brazil (222 ODP tonnes), Romania (177 ODP tonnes), Nigeria (167 ODP tonnes), Sri Lanka (27 ODP tonnes), Indonesia (16.5 ODP tonnes), Egypt (12.1 ODP tonnes) and Congo DR (11 ODP tonnes).

51. Of the 25 countries that might not achieve compliance with the 85 per cent reduction targets for carbon tetrachloride by 2005, 19 countries did not have activities planned for them in the 2005 business plans namely, Bahrain, Bangladesh, Chile, Congo DR, Cyprus, Ecuador, Egypt, India, Indonesia, Korea DPR, Mauritius, Nepal, Nigeria, Paraguay, Romania, Sierra Leone, Sri Lanka, Sudan and Uruguay.

52. The Multilateral Fund has provided funding for CTC projects and activities in 20 out of the 25 countries, of which 17 countries had received approved projects for CTC phase-out (Bahrain, Bangladesh, Chile, China, Cuba, Egypt, India, Indonesia, Korea DPR, Mauritius,

Nigeria, Pakistan, Paraguay, Romania, Sri Lanka, Sudan and Uruguay). Brazil, Congo DR and Iran have received project preparation funds for the CTC sector.

53. All countries that have ratified the London Amendment are therefore eligible for Multilateral Fund assistance and have received assistance except: Cyprus, Ecuador, Nepal, Sierra Leone and Zimbabwe. Cyprus is the only country that does not seek Fund assistance.

METHYL CHLOROFORM (TCA) (Annex V)

54. This section presents the analysis for compliance with methyl chloroform control measures.

55. Of the 141 countries that have reported baseline data, 83 reported zero both for the baseline and for the latest consumption.

56. Countries were grouped into two categories: those whose latest consumption exceeds the baseline freeze and those at risk for the 2005 control because their latest consumption exceeds the 30 per cent reduction. Annex V specifies those countries that have not ratified the London Amendment.

(a) Countries whose latest consumption exceeds the baseline freeze

57. This category consists of 3 countries that may need additional activities to achieve compliance with the 2003 freeze target. These countries would need to phase-out a total of 381 ODP tonnes to achieve compliance with the freeze. These countries have received assistance from the Multilateral Fund for TCA phase-out projects, and the amount of phase-out needed to achieve the freeze in 2003 was as follows: Bosnia and Herzegovina (0.89 ODP tonnes); Ecuador (1.49 ODP tonnes) and Iran (378.13 ODP tonnes). Ecuador and Iran have received projects preparation fund for the TCA sector.

(b) Countries at risk of not achieving the 30 per cent baseline reduction

58. This category consists of 6 countries that may need to achieve additional phase-out amounting to 534 ODP tonnes by 2005 in order to comply with the 30 per cent reduction targets. 5 of the 6 countries (Bosnia and Herzegovina, Ecuador, Indonesia, Iran and Nigeria) have received support for TCA phase-out activities from the Multilateral Fund. Three of the 6 countries (Bosnia and Herzegovina, Ecuador and Iran) had projects included in the 2005 business plan. For those countries, the amount of phase-out needed to achieve compliance with the 30 percent reduction by 2005 is as follows: Bosnia and Herzegovina (1.36 ODP tonnes); Ecuador (2.09 ODP tonnes); Indonesia (1.41 ODP tonnes); Iran (380.73 ODP tonnes); Korea Republic (139.71 ODP tonnes); and Nigeria (8.3 ODP tonnes). All countries at risk of not achieving the 30 per cent baseline reduction have received assistance from the Fund except Ecuador and Iran that have received project preparation funds for the TCA sector.

59. All countries that have not ratified the London Amendment could achieve their 30 per cent reduction by 2005 based on their latest reported consumption. Albania and Ethiopia are the only countries that have received assistance from the Multilateral Fund for TCA activities.

PART II: STATUS OF IMPLEMENTATION IN COUNTRIES SUBJECT TO DECISIONS OF THE PARTIES ON COMPLIANCE AND THOSE AT RISK OF NON-COMPLIANCE

[An addendum will be issued for Part II prior to the 47th Meeting of the Executive Committee. Part II will address countries subject to decisions of the Parties on compliance and those countries at risk of non-compliance.]

PART III: DATA ON THE IMPLEMENTATION OF COUNTRY PROGRAMMES

60. Part III consists of data on the implementation of country programmes. Country programme data is submitted to the Fund Secretariat with a due date of 1 May of each year. It contains ODS consumption data including data by sector. It also presents additional information that can be used to assess the prospects of compliance based on characteristics of the country's ODS phase-out programme. Part III includes a section on ODS consumption data by sector as well as sections on the implementation of the new country programme database pursuant to decision 46/39.

ODS CONSUMPTION DATA BY SECTOR

61. ODS consumption data by sector is submitted to the Fund Secretariat annually by Article 5 countries in compliance with decisions from the 11th, 13th, 22nd, 28th, 29th, and 30th Meetings of the Executive Committee.

62. The Secretariat received reports on the implementation of country programmes for the year 2004 from 96 countries as at 15 October 2005. The Secretariat compiled these data into the required format and introduced data from previous reports for those countries that had not reported data for 2004. Therefore, 23 reports from 2003, 2 reports from 2002 and one from 2001 are also included in the data pertaining to 122 Article 5 countries.

63. The database for the country programme data is provided on the Fund Secretariat's web site (www.multilateralfund.org) and Intranet in the spreadsheet programme, Microsoft Excel 97.

64. Although consumption recorded is from different years, and may not necessarily correspond to the data reported pursuant to Article 7 of the Montreal Protocol, the data provide the most recent sectoral assessment by country as well as on a global basis. These data should assist the Article 5 countries concerned, and also the Executive Committee, in their efforts to assess what remains to be phased out on a sectoral basis.

65. Table 3 presents the total remaining ODS consumption to be phased out by sector after taking into account approved but unimplemented projects. It also includes total consumption, phase-out from approved but unimplemented projects, and the percentage by sector of the balance to be phased out.

Table 3
TOTAL REMAINING ODS CONSUMPTION BY SECTOR

| Sector | Total Consumption | Percentage of Total Consumption | Total Approved but not Implemented | Balance | Percentage of Balance to Total Consumption |
|---------------|--------------------------|--|---|------------------|---|
| Aerosol | 2,769.50 | 2.7% | 658.40 | 2,111.10 | 76.2% |
| Foam | 16,738.42 | 16.5% | 11,382.05 | 5,356.37 | 32.0% |
| Solvent | 11,364.08 | 11.2% | 3,050.52 | 8,313.56 | 73.2% |
| Refrigeration | 33,193.33 | 32.8% | 7,498.06 | 25,695.27 | 77.4% |
| Halon | 6,762.68 | 6.7% | 3,102.60 | 3,660.08 | 54.1% |
| Fumigant | 7,165.71 | 7.1% | 2,941.47 | 4,224.24 | 59.0% |
| Process Agent | 22,599.60 | 22.3% | 4,636.00 | 17,963.60 | 79.5% |
| Tobacco | 620.00 | 0.6% | 400.00 | 220.00 | 35.5% |
| Sterilant | 0.00 | 0.0% | 24.30 | -24.30 | N/A |
| Total | 101,213.32 | 100.0% | 33,693.40 | 67,519.92 | 66.7% |

66. The total phase-out approved but not implemented specified in Table 3 does not include the phase-out approved in principle for multi-year agreements, or the phase-out that is expected to result from the implementation of RMPs and halon banking. In addition to the phase-out already being funded, the Executive Committee has approved in principle sectoral and national phase-out projects for which annual tranches are released on the basis of the achievement of scheduled reductions.

67. The phase-out from future annual tranches will address a significant amount of the remaining consumption identified in Table 3. Moreover, RMPs for LVCs also account for all but 15 per cent of the baseline consumption of these countries, but the data in the approved but not implemented projects does not account for all of this tonnage. Also, the approved but unimplemented phase-out in Table 3 does not include some halon consumption for countries that have already received a halon banking project. Therefore, Table 4 presents the remaining consumption by substance that has not yet been addressed by the Executive Committee after taking into account multi-year agreements, RMPs for LVCs, and halon banking.

Table 4

TOTAL REMAINING ODS CONSUMPTION BY SUBSTANCE BASED ON COUNTRY PROGRAMME DATA AFTER TAKING INTO ACCOUNT APPROVALS IN PRINCIPLE ON RMPS FOR LVCS, AND HALON BANKING

| Chemical | Remaining ODS Consumption (ODP Tonnes) |
|-----------------|---|
| CFC | 4,563.78 |
| CTC | 2,443.75 |
| Halons | 813.55 |
| MB | 4,393.90 |
| TCA | 394.77 |
| Total | 12,609.8 |

68. It may be recalled that the assessment at the 46th Meeting indicated that there were 13,526.7 ODP tonnes remaining to be addressed based on the latest country programme data, taking into account approved but not implemented projects. The reduction of 916 ODP tonnes in consumption is due to the approvals at the 46th Meeting and updated consumption data received since the document was issued for consideration at the 46th Meeting.

NEW IMPLEMENTATION OF COUNTRY PROGRAMME DATA

69. As indicated above, country programme data includes not only consumption data by sector but also information that characterizes the ODS phase-out programmes in Article 5 countries.

70. Much of this information is based on the modification to the existing country programme data report adopted by the 46th Meeting pursuant to decision 46/39. The additional information will be included into a database that will be available upon request. The data will be provided from 2006 for the year 2005. Table 5 presents a summary of the additional information to be provided pursuant to decision 46/39 on characteristics of ODS phase-out programmes.

Table 5

| | | | | | | | |

RECOMMENDATIONS

72. The Executive Committee may wish to:

- (a) Note the report on the Status/prospects of Article 5 countries in achieving compliance with the initial and intermediate control measures of the Montreal Protocol as contained in UNEP/OzL.Pro/ExCom/47/6;
- (b) Request bilateral and implementing agencies to include phase-out activities, where appropriate, for eligible consumption in their 2006-2008 business plans for the following countries for which no project preparation has been approved in line with decisions of the Parties and the Executive Committee:
 - (i) For CFCs: Somalia when conditions for sustainable activities exist;
 - (ii) For halon: Romania and Sierra Leone;
 - (iii) For methyl bromide: Armenia and South Africa; and
 - (iv) For CTC: Nepal, Sierra Leone and Zimbabwe.
