EXECUTIVE COMMITTEE OF
THE MULTILATERAL FUND FOR THE
IMPLEMENTATION OF THE MONTREAL PROTOCOL

Forty-ninth Meeting
Montreal, 10-14 July 2006

**STATUS/PROSPECTS OF ARTICLE 5 COUNTRIES IN ACHIEVING COMPLIANCE
WITH THE CONTROL MEASURES OF THE MONTREAL PROTOCOL**

EXECUTIVE SUMMARY

- As of 26 May 2006, 42 Article 5 countries reported 2005 data pursuant to Article 7. For 37 Article 5 countries that have not submitted the Article 7 data, their country programme (CP) data are used, plus 2004 data for 63 countries and 2003 data for one country.
- Part I contains a new format for data tables and addresses all Article 5 countries. It concludes that:
 - All countries that are at risk of not meeting the CFC freeze and the 50 per cent reduction have projects approved to achieve these targets. The same applies to the 85 per cent reduction, with the exception of Somalia and Tunisia. In Somalia further actions depend upon domestic circumstances. An ODS phase-out project for Tunisia was submitted to the 49th Meeting of the Executive Committee.
 - Actions may be needed to achieve the halon freeze in Sierra Leone and Somalia, and in Romania for the 50 per cent reduction in 2005. Activities are planned for Romania and Sierra Leone in the 2006 business plan and for Somalia when conditions permit. All other countries at risk have approved halon banking activities.
 - All countries that are at risk of not meeting the methyl bromide freeze and the 20 per cent reduction have projects approved to achieve these control measures, with the exception of Tunisia that is exempted as per decision XV/12. Tunisia has an approved project preparation for use once an alternative to high-moisture content dates is identified. Singapore is also at risk but it does not seek Fund assistance. In addition to these countries, South Africa is at risk of not achieving the 20 per cent reduction but there are issues related to Global Environmental Facility funding.
 - All countries that are at risk of not meeting the 85 per cent reduction for CTC in 2005 have projects to achieve this control measure approved and in business plans, with the exception of Bolivia and Macedonia.
 - All countries at risk of not meeting either the methyl chloroform (TCA) freeze or the 30 per cent reduction in 2005 have projects that have been approved or are in business plans to achieve these control measures, with the exception of Croatia and Zimbabwe.
- CP data indicate potential non-compliance with the:
 - 50% CFC reduction for Cape Verde, Djibouti, Dominica, Niger, and Paraguay;
 - 20% methyl bromide reduction for Fiji, Guatemala, Uganda, and Uruguay;
 - 85% CTC reduction for Bolivia, Macedonia, Mauritius, Mexico and Zimbabwe; and
 - 30% TCA reduction for Chile, Croatia and Zimbabwe.
- Part II provides information on countries with compliance decisions, on countries at risk of non-compliance, and on countries that may need additional activities to achieve compliance.
- Part III specifies that in the 67 Article 5 countries that provided CP implementation data (96 Article 5 countries had provided data by this time last year), the Multilateral Fund has addressed all but 10,495.1 ODP tonnes of consumption.
- Part III also addresses the information in the new CP format on, inter alia, the functioning of the licensing system and RMPs; the existence of quota systems (annual amounts) and importer registration; the number of recycling machines and ODS recovered and reused; the number of customs officers and refrigeration technicians trained; and, the costs of some ODS and alternatives.

Introduction

1. This document consists of three parts:
 - (a) Part I has been prepared in response to decisions 32/76(b) and 46/4, which requested that the Secretariat prepare an annual update of the status of compliance of Article 5 countries that are subject to the Montreal Protocol control measures.
 - (b) Part II contains an update of the status of implementation of projects for all Article 5 countries whose most recently reported consumption levels exceed targets specified in current control measures, and those that are at risk of being in non-compliance with future control measures.
 - (c) Part III presents data on the implementation of country programmes, including an analysis of the ODS consumption data by sector. It also contains a section on new implementation of CP data that addresses the characteristics of ODS phase-out programmes and a qualitative assessment of their performance.
2. The analysis performed and the conclusions reached in this document are without prejudice to the status of compliance determined by the Meeting of the Parties, which is the only body empowered to assess such status.
3. Data reported pursuant to Article 7 are used exclusively to determine status of compliance on an annual basis. The analysis in this document uses a mix of data reported to the Fund Secretariat on CP implementation for various compliance periods and assumes that the phase-out from ongoing projects will be implemented. Therefore, this document does not determine compliance *per se*. Rather, it assesses the prospects of an Article 5 country for achieving compliance with one or more of the Montreal Protocol control measures.

PART I: ANALYSIS OF STATUS/PROSPECTS OF COMPLIANCE BASED ON LATEST AVAILABLE DATA

4. This section presents the results of the analysis of the status of compliance with control measures up to and including the 2005 controls for the CFC, halon, methyl bromide, carbon tetrachloride (CTC) and methyl chloroform (TCA) control measures.¹ The analysis of the status of compliance assumes that the latest reported consumption data has taken into account the phase-out from completed projects approved by the Executive Committee. By December 2005, 246,449 ODP tonnes, including 38,806 ODP tonnes of CFC production, 31,188 ODP tonnes of halon production and 9,295 ODP tonnes of CTC production, had been phased out from completed projects valued at some US \$1.36 billion of the total amount approved of about US \$1.98 billion. A detailed description of the methodology used in the analyses is provided in

¹ No projects have been identified that address Annex B-1 substances; the Executive Committee has neither considered nor funded projects that address these substances that are subject to the 80 per cent baseline reduction starting in 2003.

UNEP/OzL.Pro/ExCom/37/18, which was presented at the 37th Meeting of the Executive Committee.

5. Forty-two Article 5 countries reported 2005 data pursuant to Article 7 (as of 26 May 2006). An additional 37 countries reported 2005 data to the Fund Secretariat only on progress on the implementation of the country programmes (decision 17/34). For those countries that had not submitted 2005 data, latest consumption data was used. This included the use of 2003 data for one country and the use of 2004 data for 63 countries. It is assumed that the latest reported levels of ODS consumption have not increased. However, it should be noted that some of these 64 countries might not be in compliance.

6. Data on the status of implementation of all activities and projects approved by the Executive Committee as at the end of 2005 were reported by the bilateral and multilateral implementing agencies in their annual progress reports submitted to the 49th Meeting of the Executive Committee. Data on potential approvals during 2006 were obtained from the Consolidated Business Plan of the Multilateral Fund for the Years 2006-2008.

7. The Fund Secretariat will continue to prepare all of the data that was included in previous versions of the status of, and prospects for, compliance. These data are available upon request. They have been used for analysis purposes by the Secretariat. Table 1 indicates the additional categories of data that are available for CFCs.

Table 1

ADDITIONAL DATA AVAILABLE UPON REQUEST

Region	Status	Amount needed to meet the freeze	50% CFC reduction	Amount needed to meet 50% CFC reduction	85% CFC Reduction	Amount needed to meet 85% CFC reduction	Phase-out approved but not yet implemented (as of October 2005)	Date for completion of approved projects	ODS phase-out in Final 2005 business plan	RMP approved	RMP for LVCs to meet 85% CFC Reduction

PRODUCTION SECTOR

8. An analysis has not been performed for the production sector because the Executive Committee has established a specific process for production sector projects. Of the eight Article 7 countries with CFC production facilities, the Governments of Argentina, China, India, DPR Korea, Mexico, Romania and Venezuela have agreements in place for scheduled reductions. Brazil indicated that it has phased out its production facility on its own. For halon production, China has an agreement in place and India received a one-time grant for the closure of its halon production facilities.

9. Five countries (Brazil, China, India, DPR Korea and Romania) have a CTC production baseline. Projects for the complete phase-out of CTC in the production and consumption sectors in four countries have already been approved by the Executive Committee (China, DPR Korea,

India, and Romania). A CTC solvent sector project in Brazil is in UNDP's business plan for 2006.

10. Methyl bromide phase-out projects were approved for China and Romania—which are the only two Article 5 countries with methyl bromide production facilities.

CONSUMPTION SECTOR

11. A detailed analysis of the extent to which countries that appear to be in non-compliance and those at risk of non-compliance is found in Annex I with detailed information for each country by substance. Annex I also indicates whether such countries have received all of the assistance expected to be provided for them by the Executive Committee. This section presents a summary of the results of the detailed analysis.

CFCs

12. A summary of the status of countries with respect to compliance for CFCs is presented in Table 2. Based on their latest reported consumption data, 139 countries now appear to be in compliance, but 63 have not yet reported 2005 data. In addition to presenting the type of data reported and those countries that appear to be in compliance, for the purposes of Table 2 countries at risk of non-compliance have been grouped into three categories: those whose latest consumption exceeds the baseline freeze; those in actual non-compliance or at risk of not meeting the 2005 reduction step because their latest consumption exceeds the 50 per cent baseline reduction target; and those at risk of not meeting future controls because their latest consumption exceeds the 85 per cent baseline reduction target.

Table 2

CFC CONTROL MEASURES: SUMMARY OF COMPLIANCE, NON-COMPLIANCE OR AT RISK OF NON-COMPLIANCE

Data	Countries in compliance	Countries whose latest consumption exceeds the baseline freeze	Countries in actual non-compliance or at risk of not meeting the 2005 reduction step because their latest consumption exceeds the 50 per cent baseline reduction	Countries at risk of not meeting future controls because their latest consumption exceeds the 85 per cent baseline reduction target
Latest Consumption	139 Countries	Bosnia and Herzegovina, Federated States of Micronesia, Saint Vincent and the Grenadines, Turkmenistan (based on 2004 data)	32 Countries	107 Countries (101 taking into account Action Plans)
2005 Data (A-7 or CP)	79 Countries	0	5 Countries (Cape Verde, Djibouti, Dominica, Niger and Paraguay)	54 Countries (48 taking into account Action Plans)

Halons

13. A summary of the status of countries with respect to compliance for halons is presented in Table 3. Based on their latest consumption data, 64 countries now appear to be in compliance. Seventy-five countries have reported no consumption of halons between 1995 and 2004, one country has reported imprecise levels of consumption and one has reported neither baseline nor latest consumption data. Fifty countries have received support for halon banking activities or phase-out agreements. This includes those countries participating in regional halon banks. In addition to presenting the type of data reported and identifying those countries that appear to be in compliance, for the purposes of Table 3 countries have been grouped into the following two categories covering countries at risk of non-compliance: those whose latest consumption exceeds the baseline freeze, and those in actual non-compliance or at risk of not meeting the 2005 control because their latest consumption exceeds the 50 per cent reduction target.

Table 3

HALON CONTROL MEASURES: SUMMARY OF COMPLIANCE, NON-COMPLIANCE OR AT RISK OF NON-COMPLIANCE

Data	Countries in compliance	Countries whose latest consumption exceeds the baseline freeze for halons	Countries at risk of not achieving the 50 per cent baseline reduction for halons
Latest Consumption	139 Countries (64 Countries without 0 baselines and/or 0 consumption)	Libya, Sierra Leone and Somalia (based on 2004 data)	Bosnia and Herzegovina, Libya, Nigeria, Pakistan, Romania, Sierra Leone and Somalia (based on 2004 data)
2005 Data (A-7 or CP)	78 Countries (36 Countries without 0 baselines and/or 0 consumption)	0	0

Methyl bromide

14. Table 4 presents a summary of countries' compliance with methyl bromide control measures (excluding quarantine and pre-shipment). Of the 130 Article 5 countries that have ratified the Copenhagen Amendment, 126 have reported complete baseline data. Of these 126 countries, 46 reported zero for both the baseline consumption and the latest consumption. Ninety-six Article 5 countries have received support from the Multilateral Fund for methyl bromide activities and/or projects. In addition to presenting the type of data reported and identifying those countries that appear to be in compliance, for the purposes of Table 4 countries have been grouped into the following two categories covering countries at risk of non-compliance: those whose latest consumption exceeds the baseline freeze, and those that might be in non-compliance or at risk with the 2005 control because their latest consumption exceeds the 20 per cent reduction.

Table 4

**METHYL BROMIDE CONTROL MEASURES: SUMMARY OF COMPLIANCE, NON-COMPLIANCE
OR AT RISK OF NON-COMPLIANCE**

Data	Countries in compliance	Countries whose latest consumption exceeds the MB baseline freeze	Countries at risk of not achieving the 20 per cent MB baseline reduction
Latest Consumption	130 Countries (77 Countries without 0 baselines and/or 0 consumption)	Bosnia and Herzegovina, Fiji, Guatemala, Libya, Singapore, Tunisia and Uruguay	10 Countries (Bosnia and Herzegovina, Fiji, Guatemala, Indonesia, Libya, Singapore, South Africa, Tunisia, Uganda and Uruguay) (9 countries taking into account Actions Plans)
2005 Data (A-7 or CP)	73 countries (49 Countries without 0 baselines and/or 0 consumption)	Fiji, Guatemala and Uruguay	4 Countries (Fiji, Guatemala, Uganda and Uruguay) (3 countries taking into account Actions Plans)

Carbon tetrachloride

15. Table 5 presents a summary of countries' compliance with carbon tetrachloride control measures. The data summarised excludes feedstock and does not differentiate by specific end use, such as solvents and process agents. Of the 141 countries with reported baseline data, 81 reported zero both for the baseline and the latest consumption. In addition to presenting the type of data reported and identifying those countries that appear to be in compliance, for the purposes of Table 5 countries are highlighted where they might be in non-compliance or at risk of not meeting the 2005 control measures because their latest consumption exceeds the 85 per cent reduction.

Table 5

**CARBON TETRACHLORIDE CONTROL MEASURES: SUMMARY OF COMPLIANCE, NON-COMPLIANCE
OR AT RISK OF NON-COMPLIANCE**

Data	Countries in compliance	Countries that might be in non-compliance or at risk of not meeting the 2005 control measures because their latest consumption exceeds the 85 per cent reduction
Latest Consumption	125 Countries (44 Countries without 0 baselines and/or 0 consumption)	16 Countries (Bahrain, Bangladesh, Bolivia, India, Indonesia, Iran, Korea DPR, Nigeria, Macedonia, Mauritius, Mexico, Pakistan, Romania, Tunisia, Sierra Leone and Zimbabwe)
2005 Data (A-7 or CP)	72 Countries (31 Countries without 0 baselines and/or 0 consumption)	5 Countries (Bolivia, Macedonia, Mauritius, Mexico and Zimbabwe)

Methyl chloroform

16. Table 6 presents a summary of countries' compliance with methyl chloroform control measures. Of the 141 countries that have reported baseline data, 83 reported zero both for the baseline and the latest consumption. In addition to presenting the type of data reported and identifying those countries that appear to be in compliance, for the purposes of Table 6 countries have been grouped into the following two categories covering countries at risk of non-compliance: those whose latest consumption exceeds the baseline freeze, and those that might be in non-compliance or at risk of not meeting the 2005 control measures because their latest consumption exceeds the 30 per cent reduction target.

Table 6

METHYL CHLOROFORM CONTROL MEASURES: SUMMARY OF COMPLIANCE, NON-COMPLIANCE OR AT RISK OF NON-COMPLIANCE

Data	Countries in compliance	Countries whose latest TCA consumption exceeds the baseline freeze	Countries that could be in non-compliance or at risk of not achieving the 30 per cent TCA baseline reduction
Latest Consumption	137 Countries (54 Countries without 0 baselines and/or 0 consumption)	Bosnia and Herzegovina, Croatia, Iran and Zimbabwe	8 Countries (Bosnia and Herzegovina, Chile, Croatia, Indonesia, Iran, Republic of Korea, Nigeria and Zimbabwe)
2005 Data (A-7 or CP)	75 Countries (31 Countries without 0 baselines and/or 0 consumption)	Croatia and Zimbabwe	Chile, Croatia and Zimbabwe

PART II: STATUS OF IMPLEMENTATION IN COUNTRIES SUBJECT TO DECISIONS OF THE PARTIES ON COMPLIANCE AND THOSE AT RISK OF NON-COMPLIANCE

17. Annex II presents information on countries subject to decisions of the Parties on compliance and those at risk of non-compliance based on latest data, either provided to the Ozone Secretariat pursuant to Article 7 of the Montreal Protocol, or provided to the Fund Secretariat through reporting on the implementation of country programme (CP) data. Annex II is arranged by country, decisions of the Parties, recommendations of the 35th Meeting of the Implementation Committee and the related issues. Issues include regulatory matters (licensing and quotas systems and bans on equipment importation), data reporting, compliance with the control measures by substance, exceeding levels allowed by control measures/Action Plan, based on 2005 data. The annex also provides any required action from decisions and recommendations, with associated due dates.

18. Annex II includes a column entitled "Comments" that provides information from CP data reports submitted by National Ozone Units; inputs from multilateral and bilateral implementing agencies; information on cases of deviation from the Protocol's consumption and production

reduction schedules and data-reporting requirements (UNEP/OzL.Pro/ImpCom/36/3); and data from 2005 progress reports on the issue.

19. CP data includes information by sector. For those countries that used the new reporting format, information is provided on the functioning of the licensing system and the tonnage represented by the import quotas that were issued as well as on the existence of a quota system and/or if importer registration were required. The number of customs officers trained and the number of those who were trained to be trainers is also provided. Information is also provided on the progress of the RMP and the functioning of the recovery and recycling equipment, the amount of ODS recovered and reused, and the number of refrigeration technicians trained, (including as trainers) and certified. The new format also indicates the number of end users that have had their ODS-using equipment retrofitted, and it provides the country's forecast of compliance with future control measures.

20. Table 7 identifies the countries that appear to have exceeded a control measure or a consumption level in an Action Plan agreed by the Parties with respect to 2005. The table also specifies the source of the data, namely that reported pursuant to Article 7 (A7) or from country programme data (CP).

Table 7

COUNTRIES WHERE 2005 CONSUMPTION DATA EXCEEDS CONTROL MEASURES OR ACTION PLAN TARGETS

CFC						
Country	Baseline	50% CFC Reduction	Latest Consumption	2005 Action Plan	Year of Latest Consumption	Source
Cape Verde	2.26	1.13	1.72	N/A	2005	CP
Djibouti	21.02	10.51	12.12	N/A	2005	CP

Zimbabwe	0.003	0.002	0.04	N/A	2005	A7

PART III: DATA ON THE IMPLEMENTATION OF COUNTRY PROGRAMMES

21. Part III consists of data on the implementation of country programmes. CP data is submitted to the Fund Secretariat by 1 May of each year. It contains ODS consumption data including data by sector. It also presents additional information that can be used to assess the prospects of compliance based on characteristics of a country's ODS phase-out programme, through the new country programme database pursuant to decision 46/39.

ODS CONSUMPTION DATA BY SECTOR

22. ODS consumption data by sector is submitted to the Fund Secretariat annually by Article 5 countries as a result of decisions from the 11th, 13th, 22nd, 28th, 29th, 30th and 46th Meetings of the Executive Committee. The Secretariat had received reports on the implementation of country programmes for the year 2005 from 67 countries of 136 required to report as of 26 May 2006.

23. The Secretariat compiled these data into the required format and included data from previous CP reports for those countries for which no data was reported for 2005. Therefore, 43 reports from 2004, 12 reports from 2003, two reports from 2002 and one report from 2001 are also included.

24. The database for the CP data is provided on the Fund Secretariat's web site (www.multilateralfund.org) in the spreadsheet programme, Microsoft Excel 2002.

25. Although the consumption levels recorded are from different years and may not necessarily correspond to the data reported pursuant to Article 7 of the Montreal Protocol, the data provide the most recent sectoral assessment by country as well as on a global basis. These data should assist both the Article 5 countries concerned and the Executive Committee in their efforts to assess what remains to be phased out on a sectoral basis.

26. Table 8 presents the total remaining ODS consumption to be phased out by sector, taking into account projects that have been approved but are as yet unimplemented. It also includes total consumption phase-out from approved but not yet completed projects, and the percentage (by sector) of the balance to be phased out.

Table 8

TOTAL REMAINING ODS CONSUMPTION BY SECTOR

Sector	Total Latest Consumption	Percentage of Total Latest Consumption	Total Phase-out Approved but not Completed	Balance	Percentage of Balance to Total Latest Consumption
Aerosol	2,546.73	3.59%	560.30	1,986.43	78.00%
Foam	12,600.67	17.75%	6,685.70	5,914.97	46.94%
Fumigant	5,023.73	7.08%	2,596.87	2,426.86	48.31%
Halon	3,973.53	5.60%	9,707.10	-5,733.57	N/A
Lab Use	11.23	0.02%	0.00	11.23	100.00%
MDI	1.89	0.003%	0.00	1.89	100.00%
Process Agent	6,515.16	9.18%	4,560.00	1,955.16	30.01%
Refrigeration	29,098.20	40.98%	7,222.41	21,875.79	75.18%
Solvent	10,767.65	15.17%	1,887.05	8,880.60	82.47%
Sterilant	0.00	0.00%	9.70	-9.70	N/A
Tobacco	463.05	0.65%	350.00	113.05	24.41%
Total	71,001.84	100.00%	33,579.13	37,422.71	52.71%

27. The total phase-out approved but not implemented specified in Table 8 does not include the phase-out approved in principle for multi-year agreements, or the phase-out that is expected to result from the implementation of RMPs and halon banking. In addition to the phase-out already being funded, the Executive Committee has approved in principle sectoral and national phase-out projects for which annual tranches are released on the basis of the achievement of scheduled reductions.

28. The phase-out from future annual tranches will address a significant amount of the remaining consumption identified in Table 8. Moreover, RMPs for LVCs account for 85 per cent of the baseline consumption of these countries, but the data in the projects that have been approved but are not implemented do not account for all of this tonnage. Also, the approved but unimplemented phase-out in Table 8 does not include some halon consumption for countries that have already received a halon banking project. Therefore, Table 9 presents the remaining consumption, by substance, that has not yet been addressed by the Executive Committee after taking into account multi-year agreements, RMPs for LVCs, and halon banking.

Table 9

TOTAL REMAINING ODS CONSUMPTION BY SUBSTANCE BASED ON COUNTRY PROGRAMME DATA AFTER TAKING INTO ACCOUNT THE PHASE-OUT REPRESENTED BY RMPs FOR LVCS, HALON BANKING, TOTAL PHASE-OUT PROJECTS, AND MULTI-YEAR AGREEMENTS THAT ARE APPROVED IN PRINCIPLE

Chemical	Remaining ODS Consumption (ODP Tonnes)
CFC	4,282.34
CTC	2,268.96
Halons	60.48
MB	3,491.35
TCA	391.88
Total	10,495.01

29. It may be recalled that the assessment at the 47th Meeting of the Executive Committee indicated that there were 12,609.8 ODP tonnes remaining to be addressed based on the latest CP data, taking into account approved but not implemented projects. The reduction of 2,114.8 ODP tonnes in consumption is due to the approvals at the 47th and 48th Meetings of the Executive Committee and updated consumption data received since the document was issued for consideration at the 47th Meeting.

HCFC data

30. Table 10 presents the amount of HCFC consumption based on the latest data available. It shows that there are 241,911 metric tonnes (16,551 ODP tonnes) of HCFC consumption consisting primarily of HCFC-22 (58.1% of the total) and HCFC-141b (38.9% of the total).

Table 10

AMOUNT OF HCFC LATEST CONSUMPTION DATA BY CHEMICAL

Chemical	Metric Tonnes	ODP Tonnes	Percent of Total
HCFC-123	1,014	20	0.1%
HCFC-124	546	22	0.1%
HCFC-141b	58,497	6,435	38.9%
HCFC-142	244	17	0.1%
HCFC-142b	6,386	415	2.5%
HCFC-22	174,908	9,620	58.1%
HCFC-225	316	22	0.1%
Total	241,911	16,551	100.0%

PROSPECTS OF COMPLIANCE BASED ON CHARACTERISTICS OF NATIONAL PHASE-OUT PROGRAMMES

31. The new CP reporting format adopted in decision 46/39 provides an opportunity for national ozone units to assess the prospects of compliance from both a quantitative and qualitative perspective. Forty-seven of the 67 countries that provided 2005 data used the new format for reporting CP data. Seven of the countries that reported using the new format did not report any of the new data required by the new format. Due to the limited amount of data and the lack of completeness, these overall statistics may not be representative of all Article 5 countries.

Data completeness

32. This is the first year of use of the new format and from the analysis there appears to be some data anomalies. Data that seemed anomalous were not used in the summary presented in this section. In some cases, it appeared that there was confusion as to when data should be reported cumulatively (e.g., in the case of persons trained), when the data should be reported annually (e.g., import and export quotas), and when it should represent the number of quotas issued or amount of quotas in metric tonnes.

33. Moreover, most of the data provided in the new format was incomplete for the three main sections: qualitative, quantitative and regulatory. Only one country, Bolivia, provided all the information for all three sections. Nine out of 47 countries provided full information on the quantitative data, and 21 of the 47 countries provided full information on the regulatory section. Only seven countries provided information for the qualitative section while another 23 provided

full information for the qualitative section excluding the assessment of the performance of implementing agencies. Therefore, additional assistance from the implementing agencies and instruction on how to complete the form is necessary. The Executive Committee may wish to consider requesting the implementing agencies to provide this assistance and request UNEP's Compliance Assistance Programme to include agenda items on how to complete the new form during future regional network meetings.

Summary of data and information provided in the new format

34. Thirty-four of the 42 reporting countries with RMPs indicated progress in the implementation of their RMPs.

35. A total of 1,815 recovery machines in operation and 524 recycling machines were funded with resources from the Multilateral Fund in those countries reporting data. Of the 35 countries reporting operational recovery and recycling systems, 46 per cent of the countries described the operations as not functioning so well; 43 per cent reported operations as satisfactory; and 11 per cent reported these systems as operating very well. A total of 846 ODP tonnes of CFC-12 was recovered of which 775 ODP tonnes was reused. Of this, 730 ODP tonnes were from Brazil alone. No CFC-11 was reported to have been recovered but it was not clear if this was for one year or for several years.

36. 24,416 refrigeration servicing technicians were trained, 18,423 were certified and 1,328 refrigeration technician trainers were trained. As mentioned above, it was not clear to what extent this data reflected annual amounts or cumulated amounts.

37. Of the 40 countries reporting operational licensing systems, 17.5 per cent of these countries described these systems as not functioning so well; 32.5 per cent described the systems as operating satisfactorily; and 50 per cent described the systems as operating very well. Thirty-six (77 per cent) of the 47 countries using the new format reported that they had quota systems in place. Forty-three (91 per cent) of the 47 reporting countries indicated that importer registration was required.

38. A total of 18,319 metric tonnes of import quotas were issued in 2005 along with 157 metric tonnes of exports. It is possible that some of these data are cumulative data instead of annual. 6,434 customs officers were reported as having been trained, but in this case it was again not clear to what extent countries had reported annual data instead of cumulative. The new CP format also provides information on the costs of ODS and the substitute HFC-134a as summarized in Table 11.

Table 11**AVERAGE PRICE OF ODS AND SUBSTITUTES**

ODS	Average Price/ kilogram (US\$)	Range (US\$)	Data Excluded from the Calculation of the Average
CFC-11	7.13	2.00-11.41	\$18.00 in Mexico and \$0.42 in El Salvador
CFC-12	10.25	4.00-23.50	\$3 for Nepal, \$3.50 for Brazil, \$38 for Cape Verde, \$68 for Turkey, \$272.73 for Jamaica, and \$320 for the Philippines
CFC-113	11.97	10.00-15.90	\$329.12 for Ecuador
CFC-114	9.24		Only one entry
CFC-115	9.24		Only one entry
Halon 1211	N/p		
Halon 1301	N/p		
Methyl Bromide	N/p		
CTC	N/p		
HCFC-141b	N/p		
HCFC-22	5.49	1.83-15.00	\$0.24 for Brazil, \$48.00 for Turkey, \$60.30 for Jamaica, and \$130 for the Philippines
HFC-134a	13.28	4.87-25.74	\$42.40 for Madagascar, \$106 for Turkey, \$196.18 for Jamaica, and \$465 for the Philippines
R-502	13.6	5.60-20.00	\$29 for Mauritania and \$40 for Madagascar

39. Based on the world-wide averages taken from the data of 47 Article 5 countries, the average prices of substitutes such as HFC-134a and R-502 are more expensive than CFC-11 and CFC-12. HCFC-22 is, however, much less expensive.

RECOMMENDATIONS

40. The Executive Committee may wish to:

- (a) Note the report on the status/prospects of Article 5 countries in achieving compliance with the initial and intermediate control measures of the Montreal Protocol as contained in UNEP/OzL.Pro/ExCom/49/6;
- (b) Request bilateral and implementing agencies to include phase-out activities, where appropriate, for eligible consumption in their 2007-2009 business plans for the following countries:
 - (i) CFCs and halon: Somalia (if conditions permit);
 - (ii) CTC: Bolivia and Macedonia; and
 - (iii) TCA: Croatia and Zimbabwe;

- (c) Request bilateral and multilateral implementing agencies to assist Article 5 countries to fully complete the data/information required in the new reporting format for CP data; and
- (d) Request UNEP to include, as an agenda item in its network meetings taking place prior to May 2007, a discussion on completing the new reporting format for CP data.

Annex I

DETAILED ANALYSIS OF THE STATUS OF IMPLEMENTATION IN COUNTRIES SUBJECT TO DECISIONS OF THE PARTIES ON COMPLIANCE AND THOSE AT RISK OF NON-COMPLIANCE

1. Annex I presents the detailed analysis of the status of implementation in countries subject to decisions of the Parties on compliance and those at risk of non-compliance. The data tables in Appendixes I-V indicate whether a country has received a total phase-out agreement for a specific controlled substance. The CFC analysis (Appendix I) shows further whether a low-volume consuming countries (LVCs) has received a Refrigerant Management Plan (RMP) or a RMP update since the 31st Meeting of the Executive Committee, which should be sufficient to ensure a country's compliance at least up to and including the 85 per cent reduction target in 2007 (decision 31/48(h)). The analysis of halons (Appendix II) indicates whether a halon banking activity has been approved. Halon banking guidelines require that regulations facilitating production and import bans are established within six months of the establishment of a reclamation centre (decision 18/22). Decision 35/57 presumes that halon banking should be the last project approved for the halon sector. The methyl bromide analysis (Appendix III) indicates further whether a country has received funding for a phase-out to meet the 2005 control measure.

ANALYSIS OF COMPLIANCE FOR CFCs (Appendix I)

2. Based on their latest reported consumption data, 139 countries could now be considered to be in compliance, but 63 have not yet reported 2005 data. The latest reported consumption for these countries combined is 56,965 ODP tonnes. This is some 107,057 ODP tonnes lower than their combined baseline level of 164,022 ODP tonnes. Ninety-five of these countries are LVCs of which 89 have received support for RMPs from the Multilateral Fund. This includes support for 63 LVCs to meet their 85 per cent reductions by 2007.

3. Countries have been grouped into three categories: (a) those whose latest consumption exceeds the baseline freeze; (b) those in actual non-compliance or at risk of not meeting the 2005 reduction step because their latest consumption exceeds the 50 per cent baseline reduction target; and (c) those at risk of not meeting future controls because their latest consumption exceeds the 85 per cent baseline reduction target.

(a) Countries whose latest consumption exceeds the CFC baseline freeze

4. This category consists of the following four LVC countries: Bosnia and Herzegovina, The Federated States of Micronesia, Saint Vincent and the Grenadines and Turkmenistan. All other countries appear to be in compliance.

5. The four countries whose latest consumption exceeds the baseline freeze have each been provided with support to enable their compliance, as follows:

- Bosnia and Herzegovina has a national ODS phase-out agreement with the Executive Committee and an Action Plan approved by the Meeting of the Parties that would allow it to complete the phase-out of CFCs prior to 31 December 2007.
- The Federated States of Micronesia has received support through a regional phase-out plan (PIC strategy) for total phase-out of CFCs in the country.
- Saint Vincent and the Grenadines has a terminal phase-out management plan agreement with the Executive Committee and an Action Plan approved by the Meeting of the Parties that would allow it to complete the phase-out of CFCs prior to 1 January 2010.
- Turkmenistan has a phase-out plan that was funded through the Global Environment Facility (GEF) when the country was still a non-Article 5 country, which is currently being implemented.

(b) Countries at risk of not achieving the 50 per cent CFC baseline reduction

6. This category consists of 32 countries. These countries may be in non-compliance with the control measures. It includes 25 LVCs, which may need to achieve additional CFC phase-out amounting to 2,658 ODP tonnes by 2005 in order to comply with the 50 per cent reduction target. Of the 32 countries in this category, 10 have projects included in the 2006 business plans.

7. Of the 32 countries, the Executive Committee has approved RMPs for one non-LVC and 23 LVCs. These 24 countries had already received either a RMP to meet their 50 per cent and 85 per cent reductions or a national phase-out agreement. The Federated States of Micronesia, Palau and Solomon Islands are three of the LVCs that have phase-out agreements with the Executive Committee as part of the Pacific Island Country strategy.

8. There are two LVCs that did not have approved RMPs, but do have national phase-out agreements. These countries are: Bosnia and Herzegovina and Turkmenistan.

9. The remaining six countries that appear to possibly need additional activities to achieve the 50 per cent reduction are Iran, Korea Republic, Libya, Nigeria, Saudi Arabia and the United Arab Emirates. However, Iran, Libya and Nigeria each have a national CFC phase-out agreement with the Executive Committee, which contain a phase-out schedule that is consistent with the Montreal Protocol targets. Neither the Republic of Korea nor the United Arab Emirates have sought Multilateral Fund assistance. Saudi Arabia has sought assistance from the Multilateral Fund and the request for project preparation of a country programme/national phase-out plan is being submitted to the 49th Meeting of the Executive Committee.

(c) Countries at risk of not achieving the 85 per cent baseline reduction

10. This category consists of 107 countries including 73 LVCs, which may need to achieve additional CFC phase-out amounting to 34,126 ODP tonnes by 2007 in order to comply with the 85 per cent reduction target. Of these 107 countries, 52 were to receive projects in the 2006 business plans.

11. Of the 107 countries, the Executive Committee has approved RMPs for 17 non-LVCs and 66 LVCs, including 76 countries that had already received either an RMP to meet their 50 per cent and 85 per cent reductions or had a national phase-out agreement approved. The Federated States of Micronesia, Marshall Islands, Palau and Solomon Islands are four of the LVCs that have phase-out agreements with the Executive Committee as part of the Pacific Island Country strategy.

12. There are six LVCs that have approved national phase-out agreements. These countries are: Albania, Armenia, Bosnia and Herzegovina, Ecuador, Papua New Guinea and Turkmenistan. For Armenia and Turkmenistan, funding has been approved by the GEF.

13. The remaining 18 countries that may require additional actions to achieve the 85 per cent reduction are Argentina, Colombia, India, Indonesia, Iran, Korea Republic, Lebanon, Libya, Malaysia, Mexico, Nigeria, Philippines, Saudi Arabia, Somalia, Thailand, Tunisia, United Arab Emirates and Venezuela. With the exception of Somalia and Tunisia, all countries currently eligible for Fund assistance have national CFC phase-out agreements with the Executive Committee, which contain a phase-out schedule that is consistent with the targets in the Montreal Protocol. For Tunisia, an ODS phase-out plan that should address the remaining CFC consumption is being submitted to the 49th Meeting of the Executive Committee.

ANALYSIS OF COMPLIANCE FOR HALONS (Appendix II)

14. Based on their latest consumption data, 64 countries could now be considered to be in compliance. The latest combined consumption for these countries is 4,591 ODP tonnes. This is some 41,142 ODP tonnes lower than their combined baseline level of 45,733 ODP tonnes.

15. Seventy-five countries have reported no consumption of halons between 1995 and 2004. One country has reported imprecise levels of consumption and one has reported neither baseline nor latest consumption data.

16. Fifty countries have received support for halon banking activities or phase-out agreements. This includes those countries participating in regional halon banks. Halon banking is presumed to be the last funded activity in the halon consumption sector for most countries but there are some halon phase-out activities that are part of multi-sectoral phase-out agreements.

17. Countries have been grouped into the following two categories: (a) those whose latest consumption exceeds the baseline freeze; and (b) those in actual non-compliance or at risk of not meeting the 2005 control because their latest consumption exceeds the 50 per cent reduction target.

(a) Countries whose latest consumption exceeds the baseline freeze for halons

18. This category consists of three countries (Libya, Sierra Leone and Somalia) that may require additional actions to achieve compliance with the freeze on halons. These countries would need to phase-out a total of 90 ODP tonnes to meet the freeze target. Libya is the only country in this group that has received support for halon banking from the Multilateral Fund.

Sierra Leone has one activity planned for halon in the 2006 business plan of the Fund while Somalia does not.

(b) Countries at risk of not achieving the 50 per cent baseline reduction for halons

19. This category consists of seven countries, including three LVCs that may need to phase-out additional halons amounting to 433 ODP tonnes by 2005 in order to comply with the 50 per cent reduction targets. Four countries (Bosnia and Herzegovina, Libya, Nigeria and Pakistan) have received support from the Multilateral Fund for halon activities, including halon banking. Of the remaining three countries that might not achieve their 50 per cent reduction targets, Romania had consumption levels below 10 ODP tonnes. The remaining countries reported latest consumption in 2004 as follows: Sierra Leone (18.45 ODP tonnes) and Somalia (23.37 ODP tonnes).

20. Six of the seven countries that may need to phase-out additional amounts of halon to comply with the 50 per cent reduction targets have received Multilateral Fund assistance or have planned activities in the 2006 business plans, including Bosnia and Herzegovina, Libya, Nigeria, Pakistan, Romania and Sierra Leone. The Executive Committee may wish to consider requesting implementing agencies to consider the possibility of including activities in the future business plans for countries that do not have approved halon banking or planned activities in the 2006 business plans, including Somalia (once conditions exist for a sustainable activity).

ANALYSIS OF COMPLIANCE FOR METHYL BROMIDE (Appendix III)

21. This section presents the analysis for compliance with methyl bromide control measures. It should be noted that all data reported and used in this analysis relate to controlled use only, which means that the data excludes quarantine and pre-shipment (QPS). Of the 130 Article 5 countries that have ratified the Copenhagen Amendment, 126 have reported complete baseline data. Of these 126 countries, 46 reported zero for both the baseline consumption and the latest consumption.

22. Ninety-six Article 5 countries have received support from the Multilateral Fund for methyl bromide activities and/or projects. This includes projects that will lead to a complete phase-out of methyl bromide in 47 of these countries, partial phase-out in an additional 15 of these countries, and other forms of assistance received by 34 of these countries.

23. Countries have been grouped into the following two categories: (a) those whose latest consumption exceeds the baseline freeze; and (b) those that could be in non-compliance or at risk with the 2005 control because their latest consumption exceeds the 20 per cent reduction. Appendix III identifies those countries that have not ratified the Copenhagen Amendment.

(a) Countries whose latest consumption exceeds the MB baseline freeze

24. This category consists of seven countries that may require additional actions to achieve compliance with the freeze target. These countries are: Bosnia and Herzegovina, Fiji, Libya, Uruguay, Guatemala, Tunisia and Singapore. These countries would need to phase-out a total of

151 ODP tonnes to achieve compliance with the freeze. With the exception of Singapore (16.9 ODP tonnes), all countries at risk of not achieving the freeze have received assistance from the Multilateral Fund.

25. Of the seven countries, Bosnia and Herzegovina, Fiji, Libya and Uruguay have phase-out agreements or approved projects under the Multilateral Fund that amount to a total phase-out of methyl bromide consumption. However, Fiji and Uruguay have reported consumption that is not consistent with the Action Plan requirements.

26. Guatemala has approved projects for partial phase-out of methyl bromide with an approved Action Plan. Guatemala's consumption (522.8 ODP tonnes) is not consistent with the Action Plan requirement (360 ODP tonnes).

27. Tunisia and Singapore may require additional activities. The Multilateral Fund has provided funding for methyl bromide projects and other activities in Tunisia. Additional action may be required as there are currently no alternatives available the target use on palm dates with high moisture content in the case of Tunisia. Singapore does not seek Fund assistance.

(b) Countries at risk of not achieving the 20 per cent MB baseline reduction

28. This category consists of the following 10 countries: Bosnia and Herzegovina, Fiji, Indonesia, Libya, Uganda, Uruguay, Guatemala, Tunisia, Singapore, and South Africa. This list includes six LVCs. These countries may need to meet additional combined reduction amounting to 381 ODP tonnes by 2005 in order to comply with the 20 per cent reduction targets. Eight of the 10 countries have received support for methyl bromide activities from the Multilateral Fund. Six of these eight countries (Bosnia and Herzegovina, Fiji, Indonesia, Libya, Uganda and Uruguay) have phase-out agreements for total phase-out, and one country (Guatemala) has a project for partial phase-out to achieve the 20 per cent baseline reduction. Also, Uganda's 2005 consumption equals that required by the Action Plan (decision XV/43).

29. The remaining three countries need to phase out a total of 136 ODP tonnes to achieve the 20 per cent reduction. Of these countries, Tunisia has received assistance from the Fund.

30. Eight of the 10 countries that may need to make further reductions to comply with the 20 per cent reduction targets for methyl bromide have received assistance from the Multilateral Fund. South Africa has not received support for methyl bromide activities from the Multilateral Fund (decision XV/49 of the Fifteenth Meeting of the Parties) and has only received project preparation funding from the GEF. Singapore does not seek Fund assistance.

CARBON TETRACHLORIDE (CTC) (Appendix IV)

31. This section presents the analysis of compliance with carbon tetrachloride control measures. All data reported and used in this analysis are those related to controlled use only, which excludes feedstock. Reported CTC consumption was not differentiated by specific end use, such as solvents and process agents.

32. Of the 141 countries with reported baseline data, 81 reported zero both for the baseline and the latest consumption.

33. The analysis addresses those countries that might be in non-compliance or at risk of not meeting the 2005 control measures because their latest consumption exceeds the 85 per cent reduction. Appendix IV notes those that have not ratified the London Amendment.

34. Sixteen countries might not achieve compliance with the 85 per cent reduction by 2005. These countries would need to phase-out a total of 10,946 ODP tonnes to meet the 85 per cent reduction by 2005. Eight of these 16 countries have reported consumption above 10 ODP tonnes including: India (7,459 ODP tonnes), Korea DPR (2,199 ODP tonnes), Iran (2,169 ODP tonnes), Pakistan (752 ODP tonnes), Romania (177 ODP tonnes), Nigeria (167 ODP tonnes), Mexico (68 ODP tonnes) and Indonesia (16.5 ODP tonnes).

35. Sixteen countries might not achieve compliance with the 85 per cent reduction targets for carbon tetrachloride by 2005.

36. The Multilateral Fund has provided funding for CTC projects and activities in 10 out of the 16 countries. Of these, nine countries have received approved projects for CTC phase-out (Bahrain, Bangladesh, India, Indonesia, Korea DPR, Nigeria, Pakistan, Romania and Tunisia). Iran, Mexico and Sierra Leone have received project preparation funds for the CTC sector. All countries that have ratified the London Amendment and are eligible for Multilateral Fund assistance have received assistance except for Bolivia and Macedonia.

METHYL CHLOROFORM (TCA) (Appendix V)

37. This section presents the analysis for compliance with methyl chloroform control measures. Of the 141 countries that have reported baseline data, 83 reported zero both for the baseline and the latest consumption.

38. Countries have been grouped into two categories: (a) those whose latest consumption exceeds the baseline freeze; and (b) those that could be in non-compliance or at risk of not meeting the 2005 control measures because their latest consumption exceeds the 30 per cent reduction target. Appendix V specifies those countries that have not ratified the London Amendment.

(a) Countries whose latest TCA consumption exceeds the baseline freeze

39. This category consists of the following four countries that may require additional activities to achieve compliance with the 2003 freeze target: Bosnia and Herzegovina, Croatia, Iran and Zimbabwe. These countries would need to phase-out a total of 379 ODP tonnes to achieve compliance with the freeze. The level of TCA phase-out needed to achieve the freeze in 2003 was as follows: Bosnia and Herzegovina (0.89 ODP tonnes); Croatia (0.0003 ODP tonnes), Iran (378.13 ODP tonnes) and Zimbabwe (0.03 ODP tonnes). Bosnia and Herzegovina has received assistance from the Multilateral Fund for complete phase-out of TCA and Iran has received funding for project preparation in the TCA sector.

(b) Countries that could be in non-compliance or at risk of not achieving the 30 per cent TCA baseline reduction

40. This category consists of the following eight countries that have ratified the Copenhagen Amendment and may need to achieve additional phase-out amounting to 461 ODP tonnes by 2005 in order to comply with the 30 per cent reduction targets: Bosnia and Herzegovina, Chile, Croatia, Indonesia, Iran, Republic of Korea, Nigeria and Zimbabwe. For these countries, the amount of TCA phase-out needed to achieve compliance with the 30 percent reduction by 2005 is as follows: Bosnia and Herzegovina (1.36 ODP tonnes); Chile (0.71 ODP tonnes); Croatia (0.0003 ODP tonnes); Indonesia (1.41 ODP tonnes); Iran (380.73 ODP tonnes); Republic of Korea (68.71 ODP tonnes); Nigeria (8.3 ODP tonnes); and Zimbabwe (0.03 ODP tonnes). All countries at risk of not achieving the 30 per cent baseline reduction have received assistance from the Multilateral Fund except for Croatia, Republic of Korea and Zimbabwe. Five of the countries (Bosnia and Herzegovina, Chile, Indonesia, Iran and Nigeria) have received support for TCA phase-out activities. Three of the countries (Bosnia and Herzegovina, Iran and Nigeria) had projects included in the 2006 business plan. Iran has received project preparation funds for the TCA sector. The Republic of Korea is the only country that does not seek Fund assistance.

41. All countries that have not ratified the London Amendment could meet their 30 per cent reduction by 2005 based on their latest reported consumption except Albania and Ethiopia. Albania and Ethiopia are the only countries that have not received assistance from the Multilateral Fund for TCA activities.

Appendix I

CFC ANALYSIS

Country	Source	Year of Latest Consumption	Baseline	Latest Consumption	Compliance Decision	2004 Action Plan Target	2005 Action Plan Target	Percentage Over Freeze	Percentage Over 50% Reduction	Percentage Over 85% Reduction	Ongoing Phase-Out (as of May 2006)	Phase-Out in 2006 Business Plan	Remarks

Annex II

COUNTRIES SUBJECT TO DECISIONS/RECOMMENDATIONS ON COMPLIANCE

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Afghanistan	XVII/23		Regulatory measures	Report establishment of licensing system.	ASAP	UNEP reported that the NOU successfully received approval for banning the imports of ODS-based equipment. A Presidential decree was issued from the President's Office banning the imports of ODS-based equipment. The Draft ODS regulations are in the final stages of becoming operational.	Progress.
Albania	XV/26		CFC phase out	36.2 ODPT.	2005	Article 7 data for 2005 indicates a CFC consumption of 14.34 ODP-tonnes, which is below the 36.2 ODP tonnes required by the Action Plan. UNEP reported that the NOU worked on ODS legislation and MP Amendments during 2005.	Accomplished.
Armenia	XVII/25		Methyl bromide phase out	Submit methyl bromide plan of action.	June 2006	At its 47 th Meeting, the Executive Committee decided that UNEP's CAP funds should provide assistance to Armenia and subsequently, regional CAP funds were allocated for a workshop and for training of major users. UNEP reported that Armenia prepared draft methyl bromide plan of action for the compliance session which took place in the margins of the European/Central Asian network meeting in Tbilisi, Georgia, 11-13 April 2006. UNEP intends to provide its comments soon.	Accomplished zero consumption.
Bahamas	XVII/23		Regulatory measures	Report establishment of licensing system.	ASAP	A letter on the establishment of ODS Licensing System was submitted to the Ozone Secretariat.	Accomplished.
Bangladesh	XVII/27		Methyl chloroform phase out	Maintain methyl chloroform at no greater than 0.550 ODPT.	2005	Information provided by the Ozone Secretariat indicates a methyl chloroform consumption of 0.55 ODP tonnes that is equal to the 0.55 maximum required by the Action Plan. UNDP reported that it is awaiting project document signature before completing the TAS project on ODS solvents (CTC and methyl chloroform).	Accomplished.
Bangladesh	XVII/27		Regulatory measures	Monitor its existing system for licensing imports and exports of ozone-depleting substances, which includes import quotas.		UNEP's progress report on CAP activities indicated that the work plan for 2005/2006 addresses how to manage the Enforcement Centre along with comprehensive draft ODS regulations and a licensing system for import/exports of ODS. The Enforcement Centre was being set up according to the last report.	Progress.
Barbados	XVII/23		Regulatory measures	Report establishment of licensing system.	ASAP	UNEP reported that a Local Consultant was recruited to prepare the ODS Licensing System; a policy workshop for the establishment of the ODS legislative process was completed in March 2006; and, legislation is planned for completion in June 2006 with customs training planned for July 2006.	Progress.
Belize	XIV/33		CFC phase out	12.2 ODPT.	2005	CP data for 2005 indicates a CFC consumption of 9.6 ODP tonnes that is below the 12.2 ODP tonnes maximum in the Action Plan. UNEP reported that the ODS licensing system is working properly; approximately 6.806 ODP tonnes of the 12.2 tonnes allowable for 2005 were imported.	Accomplished.

Annex II

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Bolivia			2005 data exceeds control measure	To be determined.		Bolivia reported in its CP data that its 2005 CTC consumption was 0.11 ODP tonnes, which exceeds the 85% reduction level of 0.05 ODP-tonnes. Bolivia may not be in compliance based on its CP data report.	N/A
Bolivia	XV/29		CFC phase out	37.84 ODPT.	2005	CP data for 2005 indicates a CFC consumption of 26.73 ODP tonnes, which is below the 37.84 ODP tonnes required by the Action Plan. Bolivia reported in its 2005 CP data that its licensing system is operating very well and importer registration is required. Import quotas totalling 29.67 metric tonnes of CFC-12 were issued in 2005. The RMP is progressing, the recovery and recycling programme is satisfactory. Only 2.2 ODP tonnes have been reused of the 2.8 ODP tonnes that had been recovered from the 78 recovery and recycling machines in Bolivia. 194 customs officers have been trained of which 38 have been trained to be trainers. 265 technicians have been trained of which 7 have been trained to be trainers and 50 technicians have been certified. No end users have been retrofitted with Fund resources. Despite the fact that Bolivia indicated that its licensing system was operating well, it forecasts compliance for the 2005 and 2007 controls, but did not mention a forecast for 2010. Canada reported that preliminary data indicates that a total of 575 kg of R-12 was recovered in Bolivia in 2005. UNDP reported that the Commercial Refrigeration project that is ongoing will phase out 5.8 ODP tonnes in 2007, as programmed.	Accomplished.
Bolivia	XV/29		Regulatory measures	Monitor system for licensing imports and exports of ODS, including quotas, introduced in 2003.		Bolivia reported in its 2005 CP data that its licensing system was functioning well, a quota system is in place, and import registration is required.	Accomplished.
Bolivia	XV/29		Regulatory measures	Monitor ban on imports of ODS-using equipment, introduced in 1997 for CFC-12 and extended to other ODS in 2003.		UNEP reported that ODS import controls are in place.	To be determined.
Bosnia & Herzegovina	XV/30		CFC phase out	102.1 ODPT.	2005	The Fund Secretariat has not received CP data for 2005. UNDP reported that all of the investment projects were completed and the implementation of the RMP is ongoing. UNIDO reported at the 48 th Meeting of the Executive Committee that post-2006 CFC consumption was mostly in the refrigeration servicing sector, and that it expected Bosnia & Herzegovina to meet its 2005 CFC phase-out obligations.	To be determined.
Bosnia & Herzegovina	XV/30		Methyl bromide phase out	Reduce methyl bromide to 5.61 ODPT.	2005	The Fund Secretariat has not received CP data for 2005. UNIDO reported to the 48 th Meeting of the Executive Committee that its project implementation was well advanced and has informed the Fund Secretariat that according to its information Bosnia & Herzegovina is in advance of its 2005 reduction target. The project is planned for completion in 2006.	To be determined.

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Bosnia & Herzegovina	XV/30		Regulatory measures	Establish system for licensing imports and exports of ODS, including quotas.	2004	ODS regulations are in their final format, subject to approval by the customs authority and ministers. In 2005 a new ozone officer was appointed in Bosnia & Herzegovina, being trained jointly by UNIDO and UNEP. UNEP reported that the new Ozone Officer was trained by the NOU from Macedonia in May 2006 followed by a wrap-up session with UNIDO and UNEP in Vienna. UNEP and UNIDO sent a joint letter to the relevant ministries at the State and entity levels proposing a high-level mission to the country in June 2006 to facilitate the timely adoption of the regulations. A joint UNIDO / UNEP fax to the 3 ministers involved in the adoption of the licensing system was sent on 10 May 2006.	Progress.
Bosnia & Herzegovina	XV/30		Regulatory measures	Ban imports of equipment using ODS.	2006	ODS regulations are in their final format, subject to approval by the customs authority and ministers. UNIDO has confirmed that the ban on the import of ODS-using equipment is part of the regulations under development. UNEP reported that the new Ozone Officer was trained by the NOU from Macedonia in May 2006 followed by a wrap-up session with UNIDO and UNEP in Vienna. A joint UNIDO / UNEP fax to the 3 ministers involved in the adoption of the licensing system was sent on 10 May 2006. The ODS regulation and ODS Import/Export.	To be determined.
Bosnia & Herzegovina	XVII/28		methyl chloroform phase-out	Reduce consumption of methyl chloroform to 1.3 ODP tonnes.	2005	The Fund Secretariat has not received CP data for 2005. UNIDO reported at the Executive Committee Meeting that the remaining 2.44 ODP tonnes of consumption relates to one enterprise, and that the entire methyl chloroform consumption is expected to be phased out in 2006.	To be determined.
Bosnia & Herzegovina	XVII/28		Regulatory measures	Establish a system for licensing imports and exports of ODS, including quotas.	End January 2006	ODS regulations are in their final format, subject to approval by the customs authority and ministers. In 2005 a new ozone officer was appointed in Bosnia & Herzegovina, being trained jointly by UNIDO and UNEP. UNEP reported that the new Ozone Officer was trained by the NOU from Macedonia in May 2006 followed by a wrap-up session with UNIDO and UNEP in Vienna. UNEP and UNIDO sent a joint letter to the relevant ministries at the State and entity levels proposing a high-level mission to the country in June 2006 to facilitate the timely adoption of the regulations. A joint UNIDO / UNEP fax to the 3 ministers involved in the adoption of the licensing system was sent on 10 May 2006.	Progress.
Botswana	XV/31	35/7	Methyl bromide phase out	Total phase out of methyl bromide consumption.	2005	The Fund Secretariat has not received ODS data for 2005. UNEP reported that Botswana has returned to compliance and is in advance of MP obligations in 2004, 0.036 ODP tonnes. UNIDO reported that the methyl bromide project was completed in December 2004 and a total phase out is expected in 2005. UNEP contacted the Ozone Officer who explained that the country is likely to have met total phase-out of methyl bromide by 2005 but he needed to check this in a couple of weeks when he goes for data collection. The country promised to submit the ODS data before the end of June.	To be determined.

Annex II

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Botswana	XV/31	35/7	Regulatory measures	Establish a system for licensing imports and exports of methyl bromide, including quotas.	June 2006	UNEP/OzL.Pro/ImpCom/36/3 (ImpCom (36/3)) reported that in correspondence dated 31 March 2006, Botswana notified the Ozone Secretariat that it wished to commence in the first half of 2006 the consultative process required to produce an issue paper for the basis of its ODS licensing and quota system. UNEP will undertake a mission in mid-June to discuss an action plan for the development of outstanding regulations.	Progress.
Cameroon	XV/32		Regulatory measures	Monitor the existing system for licensing imports and exports of ODS, including quotas introduced in 2003.		UNEP reported that Cameroon undertook to submit an Action Plan soon for the drafting of ODS regulations.	To be determined.
Cameroon	XV/32		Regulatory measures	Monitor existing ban on imports equipment using ODS, introduced in 1996.		UNEP reported that Cameroon undertook to submit an Action Plan soon for the drafting of ODS regulations.	To be determined.
Cape Verde	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	Cape Verde reported in its 2005 CP data that its licensing system was not operating so well. The quota system is not in place so no import quotas were issued in 2005. However, importers are required to register imports. UNEP reported that the NOU informed the CAP team that regulations will be enacted by the end of June 2006.	To be determined.
Cape Verde			2005 data exceeds control measure	To be determined.		Despite the fact that Cape Verde reported in its 2005 CP data that its licensing system was not operating so well and there was no import quota system in place, it reported that importer legislation was required and the RMP was progressing. No ODS has been recovered or recycled. Zero customs officers have been trained. Zero technicians have been trained. No end users have been retrofitted using Fund resources. Cape Verde nevertheless forecasts compliance with the 2007 and 2010 control measures. UNEP reported that the NOU informed the CAP team that regulations would be enacted by the end of June 2006, which may explain, to some extent, the apparent deviation from the control measure.	N/A
Chile	XVII/29		Methyl chloroform phase out	Maintain methyl chloroform consumption at a level no greater than 4.512 ODP tonnes.	2005	Chile reported in its CP data that its 2005 methyl chloroform consumption was 5.23 ODP tonnes. This level of consumption exceeds the Action Plan's requirement of 4.512 ODP tonnes. Chile indicated that it had a quota system in place and importer registration was required but it did not indicate that it had a licensing or that any customs officers were trained	Not achieved.
Chile	XVII/29		Methyl bromide phase out	Reduce methyl bromide consumption to 170 ODP tonnes.	2005	2005 CP data indicated a consumption of 0 ODP tonnes, which is below the 170 ODP tonnes required by the Action Plan. UNDP reported that preliminary data provided to UNDP by the Government in March 2006 to support the request for change in ongoing project strategy (tree and nursery replant project) [request for change approved by ExCom 48] indicated that methyl bromide consumption for 2005 stood at 168.24 ODP tonnes, in compliance with the Chile's 2005 20% reduction target of 170 ODP tonnes. UNEP informed the Fund Secretariat that the NOU is going to be submitting revised data.	Accomplished.

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Chile	XVII/29		Regulatory measures	Introduce an enhanced ODS licensing and import quota system from the moment the bill is approved by its legislature, and to ensure compliance in the interim period by adopting regulatory measures under the authority of the executive branch of Government.		Chile did not report on the operation of its licensing systems in its report on 2005 CP data, but indicated that importer registration is required and Chile had a quota system in place. In the 2006 business plan submitted by the World Bank to the 48 th ExCom Meeting (April 2006) it was stated that Chile had "put in place an import/export control system for ODS, through the issuance of quotas."	To be determined.
China	XVII/30		"Other" CFC phase out	Submit B/I explanation for excess consumption, together with a plan of action with time-specific benchmarks to ensure a prompt return to compliance.	June 2006	ImpCom (36/3) reported that China agrees with the levels of consumption in 2004, but disagrees with its designation as a Party in non-compliance on the basis that it has a different understanding of its baseline (the use of three decimal points versus one decimal point) and resulting maximum allowable consumption level in 2004 for the substances in question. ImpCom (36/3) has further reported that China's production of CFC-13 in 2005 was 20.292 ODP tonnes, which is below the 21.334 ODP tonnes maximum allowable production under the Montreal Protocol.	Accomplished.
Cook Islands	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	UNEP reported that the Cook Islands hope to begin national consultations on ODS regulations soon, and establish the regulations by July 2006.	Progress.
Croatia			2005 data exceeds control measure	To be determined.		Croatia reported in its CP data that its 2005 methyl chloroform consumption was 0.0003 ODP tonnes. This level of consumption exceeds the 30% reduction level of 0.00 ODP tonnes. Croatia may not be in compliance based on its CP data report.	N/A
Democratic Republic of Congo	XVII/23		Regulatory measures	Report establishment of licensing system.	ASAP	The Democratic Republic of Congo reported in its 2005 CP data that its licensing system was not operating so well but a quota system is in place and importer registration is required. Import quotas totalling 100 metric tonnes of CFC-12 and 20 metric tonnes of CFC-13 were issued in 2005. The RMP is also not progressing so well and no ODS was reported recovered or recycled. Nevertheless, 115 customs officers have been trained of which 62 have been trained to be trainers. 781 technicians have been trained of which 28 have been trained to be trainers and 809 technicians have been certified. No end users have been retrofitted using Fund resources. Despite the fact that DR Congo indicated that its licensing system and RMP were not operating or progressing so well, it forecasts compliance for the 2005, 2007, and 2010 controls.	Accomplished.
Djibouti			2005 data exceeds control measure	To be determined.		Djibouti reported in its CP data that its 2005 CFC consumption was 12.12 ODP tonnes. This level of consumption exceeds the 50% reduction level of 10.51 ODP tonnes. Djibouti may not be in compliance based on its CP data report.	N/A

Annex II

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Dominica			2005 data exceeds control measure	To be determined.		Party reported 2005 A/I CFC consumption of 1.388 ODP tonnes, deviating from its obligation under the MP to reduce CFC consumption to no more than 0.740 ODP tonnes. This report was received by the Ozone Secretariat after 26 May 2006 and is therefore not in the analysis in the other parts of this document. Dominica and the United Kingdom are looking into imports from the UK to assess what caused the apparent deviation. UNEP's progress report indicated that draft legislation was completed in 2004 and was awaiting approval of Attorney General.	N/A
Ecuador	XVII/31		Methyl chloroform phase out	Reduce methyl bromide consumption to 1.3979 ODP tonnes.	2005	2005 CP data indicated a methyl chloroform consumption of 0.82 ODP tonnes that is below the 1.3979 ODP tonnes maximum allowed by the Action Plan. Ecuador reported in its 2005 CP data that its licensing systems was operating very well and importer registration was required. An import quota of 1.3979 ODP tonnes was issued for methyl chloroform in 2005. 22 customs officers have been trained of which 11 have been trained to be trainers. No forecast for future compliance with methyl chloroform was made. The World Bank is preparing a methyl chloroform project for Ecuador.	Accomplished.
Ecuador	XVII/31		Regulatory measures	Monitor its existing system for licensing imports and exports of ODS, which includes import quotas.		Ecuador reported in its 2005 CP data that its licensing systems was operating very well and importer registration was required. 252.07 metric tonnes of import quotas were issued in 2005.	Accomplished.
Eritrea	XVII/21		Data reporting	Submit Article 7 data.	ASAP	UNEP has reported that more accurate and reliable data is being collected through CP/TPMP preparation by UNEP. ImpCom (36/3) reported that the preparation of Eritrea's CP is planned for completion and submission to the ExCom in December 2006.	Not achieved.
Eritrea	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	UNEP indicated that preparations of the country programme and TPMP had begun as well as consultations on ODS regulations.	Progress
Ethiopia	XIV/34		CFC phase out	Reduce CFC consumption to 17 ODP tonnes.	2005	2005 Article 7 data indicate a CFC consumption of 15 ODP tonnes, which is below the 17 ODP tonnes maximum allowed by the Action Plan and in advance of its CFC phase-out obligations under the Protocol. France has reported that Ethiopia has undergone a complete restructuring in the National Agency responsible for the implementation of the Montreal Protocol. This means that the new Ozone officer has had to be trained. Ethiopia is only now slowly starting to implement ODS phase-out activities.	Accomplished.
Federated States of Micronesia	XVII/32		CFC phase out	Reduce CFC consumption to 1.351 ODP tonnes.	2005	The Fund Secretariat has not received CP data. UNEP has reported that the Federated States of Micronesia is in the process of collecting 2005 data. UNEP is following up with the country to have the data submitted as soon as possible.	To be determined.
Federated States of Micronesia	XVII/32		Regulatory measures	Introduce a system for licensing imports and exports of ODS, including a quota system.	1 January 2006	UNEP has informed the Secretariat that draft ODS regulations are with the office of the Attorney General. FSM aims to complete the regulations during the first half of 2006, but due to the shortage of legal staff in the Office of the Attorney General, there have been delays.	Progress.

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Federated States of Micronesia	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	UNEP has informed the Secretariat that draft ODS regulations are with the office of the Attorney General. FSM aims to complete the regulations during the first half of 2006.	Progress.
Fiji	XVII/33		Methyl bromide phase out	Reduce methyl bromide consumption to 1.5 ODP tonnes.	2005	Fiji reported a consumption of 1.74 ODP tonnes in its Article 7 data, which exceeds the 1.5 ODP tonnes allowed by its Action Plan. However, UNDP and UNEP reported that the CP data indicates non-QPS methyl bromide use at 0.58 ODP tonnes, which is below the 1.5 ODP tonnes allowed by the Action Plan.	Accomplished/D ata to be clarified
Fiji	XVII/33		Regulatory measures	Monitor its existing system for licensing imports and exports of ODS		Fiji reported in its 2005 CP data that its licensing systems was operating very well and an import quota system was in place but importer registration was not required. No import quotas were issued in 2005 for ODS. 125 customs officers have been trained of which 17 have been trained to be trainers. ImpCom (36/3) reported the Fiji has developed a new reporting system for importers and distributors of methyl bromide, which, <i>inter alia</i> , improves its ability to distinguish accurately between methyl bromide or quarantine and pre-shipment and non-quarantine and pre-shipment uses.	Accomplished.
Fiji	XVII/33		Regulatory measures	Commence the implementation of a methyl bromide import quota system.	2006	Fiji reported in its 2005 CP data that an import quota system was in place but importer registration was not required. The Ozone Secretariat has reported that it received a progress report from Fiji indicating that the system began operation on 1 January 2006. No import quotas were issued in 2005 for methyl bromide.	Accomplished.
Grenada	XVII/23		Regulatory measures	Report on the establishment of licensing system.	ASAP	UNEP reported that government approved the licensing system in March 2006.	Accomplished
Guatemala			2005 data exceeds control measure	To be determined.			N/A
Guatemala	XV/34	35/16	CFC phase out	Reduce CFC consumption to 85 ODP tonnes.	2005	2005 CP data indicate a CFC consumption of 57.5 ODP tonnes, which is below the 360 ODP tonnes maximum allowed in the Action Plan. UNEP reported that the NOU was restructured and a new NOO has been designated, but that the CFC import license system has not been cancelled.	Accomplished.
Guatemala	XV/34	35/16	Methyl bromide phase out	Reduce methyl bromide consumption to 360 ODP tonnes.	2005	2005 CP data indicates a methyl bromide consumption of 522.79 ODP-tonnes, which exceeds the 360 ODP tonnes maximum required by the Action Plan. UNIDO reported that a UNIDO mission is scheduled for the week of 22 May 2006 and additional information will be provided after that mission. UNEP reported that Guatemala plans to submit a new schedule for methyl bromide reductions at the 36 th Meeting of the Implementation Committee.	Not achieved.
Guatemala	XV/34	35/16	Regulatory measures	Ban imports of equipment using ODS.	2005	A report to the 47 th Meeting of the Executive Committee noted that a law had been approved to ban the import of CFC-based technology but the it could not enter into force until appropriate administrative arrangements were put in place. UNEP has reported that advancement on the issue of banning the import of equipment that uses ODS is not expected.	Progress.

Annex II

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Guinea Bissau	XVI/24	35/17	CFC phase out	Reduce CFC consumption to 13.137 ODP tonnes.	2005	The Fund Secretariat has not received CP data for 2005. UNEP reported that a return to compliance is expected as a result of implementation of training activities under RMP. UNDP reported that it is still awaiting confirmation that a licensing and quota system is in place before R&R activity can start (as per ExCom decision).	To be determined.
Guinea Bissau	XVI/24	35/17	Regulatory measures	Establish a system for licensing imports and exports of ODS, including quotas.	2004	UNEP has reported that a decree to enforce the licensing and quota system is awaiting the signature of new head of State. Government departments were sent notification for enforcement of West African Monetary and Economic Union (WAMEU) harmonized ODS regulations. However, Government departments have been sent notification for the enforcement of the harmonized ODS regulations from the WAMEU that require each member to establish an annual quota system. The decree is intended to enforce the WAMEU regulations.	Progress.
Guyana	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	UNEP reported that Parliamentary approval of licensing system is still pending. Follow up actions are being carried out by the CAP team.	To be determined.
Haiti	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	UNEP reported that political instability during first half of 2005 has prevented any action in Haiti.	Not achieved.
Honduras	XVII/34		Methyl bromide phase out	Reduce methyl bromide consumption to 327.600 ODP tonnes.	2005	2005 CP data indicate a methyl bromide consumption of zero ODP-tonnes, which is below the 327.6 ODP tonnes maximum allowed by the Action Plan. Honduras did not report on a licensing system in its 2005 CP data and indicated that it did not have a quota system in place. However, it also reported import quotas having been issued amounting to 325.8 ODP tonnes in 2005 for methyl bromide. No customs officers were reported as having been trained. Honduras did not provide a forecast for compliance in the future. UNIDO reported that the Executive Committee approved the new phase out schedule for Honduras that is consistent with MOP decision XVII/74 and UNIDO could submit an action plan and funding requirements for complete phase-out of methyl bromide to the 50th Meeting. Preliminary data shows that Honduras will not exceed the 2005 limit of 327.6 ODP tonnes.	Accomplished.
Honduras	XVII/34		Regulatory measures	Monitor its system for licensing imports and exports of ODS, including quotas, that has been in place since May 2003		Honduras did not report on a licensing system in its 2005 CP data and indicated that it did not have a quota system in place.	Not achieved.
Honduras	XVII/34		Regulatory measures	Monitor its ban on imports of equipment that use ODS, that has been in force since May 2003		ImpCom (36/3) reported that UNEP is providing institutional strengthening to Honduras with funding from the Multilateral Fund, in the areas of data reporting and policy development to combat illegal trade in ODS. .	To be determined.
Islamic Republic of Iran	XVI/20	35/19	CTC and methyl chloroform phase out	Submit the findings of its CTC and methyl chloroform baseline data verification exercise.	18 May 2006	Iraq has withdrawn its request to change its CTC and TCA baseline. UNIDO reported that it will submit a project proposal to phase out methyl chloroform and CTC consumption in Iran to the 50 th Meeting of the Executive Committee and assist Iran in preparing the plan of action to present to the 37 th Meeting of the Implementation Committee in October 2006. Iran has decided to withdraw its request to revise its CTC and methyl chloroform consumption baseline data, but had not presented a plan of action for returning into compliance as of time of writing.	Withdrawn

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Islamic Republic of Iran	XVI/20	35/19	Methyl Chloroform phase out	Submit a revised plan of action for methyl chloroform.	18 May 2006	UNIDO reported that it will submit a project proposal to phase out methyl chloroform consumption in Iran to the 50th Meeting and assist Iran in preparing the plan of action to the 37th meeting of the Implementation committee in October.	To be determined.
Kenya	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	UNEP reported that ODS regulations including licensing and quota system have been submitted to the Attorney General's Office for Gazettement and this is expected to take place by the middle of 2006. The Ozone Officer has been reminded to follow up with Attorney General.	To be determined.
Kiribati	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	Kiribati did not report on a licensing system in its 2005 CP data and indicated that importer registration was required and a quota system was not in place. There was no report about any recovery and recycling equipment. 8 refrigeration technicians have been trained of which 2 have been trained to be trainers. 12 technicians have been certified. There was no forecast of future compliance. UNEP reported that Kiribati is in the process of adapting the draft ODS regulations into their Environment Act.	Not achieved.
Kyrgyzstan	XVII/36		Halon phase out	Maintain halon consumption at a level no greater than 2.40 ODP tonnes.	2005	2005 CP data indicate a zero consumption of halon, which is below the 2.4 ODP tonnes maximum allowed by the Action Plan and return the Party to compliance with the Protocol's halon control measures. Kyrgyzstan reported in its 2005 CP data that 114 customs officers have been trained of which 28 have been trained to be trainers. There is no forecast for compliance with the halon control measures. UNEP reported that Kyrgyzstan submitted its halon plan of action and a halon project obtained approval of ExCom 48. Kyrgyzstan will participate in the ECA halon meeting in Czech Republic on 22-23 June 2006.	Accomplished.
Kyrgyzstan	XVII/36		Regulatory measures	Monitor its system for licensing imports and exports of ODS.		Kyrgyzstan reported in its 2005 CP data that its licensing systems was operating satisfactorily and importer registration was required. 24 metric tonnes of import quotas were issued in 2005.	Accomplished.
Kyrgyzstan	XVII/36		Regulatory measures	Introduce a ban on the import of equipment containing halons and equipment that uses halons.	1 January 2006	ImpCom (36/3) reported that the Party has reported the introduction of a ban on the import of equipment containing halons and equipment that uses halons.	Accomplished.
Kyrgyzstan	XVII/36		Regulatory measures	Introduce an import quota system to limit the annual consumption of halons.	Start of 2006	Kyrgyzstan reported in its 2005 CP data that its licensing systems was operating satisfactorily and importer registration was required. No import quotas were issued for halon in 2005. Imp.Com (36/3) reported that the Party has reported that starting in 2006 it is implementing an import quota system which limits 2006 halon imports to no greater than 1.2 ODP tonnes.	Accomplished.
Lesotho	XVI/25		Halon phase out	Reduce consumption to 0.2 ODP tonnes.	2005	UNEP reported that Lesotho has returned to compliance and is in advance of MP obligations in 2004 and reported zero ODP tonnes in 2005.	Accomplished.
Lesotho	XVI/25		Regulatory measures	Introduce a quota system for the import of halons.		Lesotho has reported to the Ozone Secretariat that in accordance with its new regulations, the import or use of halons or fire-extinguishing devices using halons would be banned from December 2006 and that halon permit arrangements incorporated a quota system for the regulation of halon imports.	Accomplished.

Annex II

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Lesotho	XVI/25		Regulatory measures	Introduce a ban on the import of halon-based equipment and systems.	2005	Lesotho has reported to the Ozone Secretariat that in accordance with its new regulations, the import or use of halons or fire-extinguishing devices using halons would be banned from December 2006 and that halon permit arrangements incorporated a quota system for the regulation of halon imports.	Accomplished.
Liberia	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	UNEP reported that Liberia has approved ODS regulations.	Accomplished.
Libyan Arab Jamahiriya	XV/36		CFC phase out	Reduce CFC consumption to 303 ODP tonnes.	2005	The Fund Secretariat has not received 2005 CP data. UNIDO reported that all activities as part of the annual implementation plan were carried out and Libyan Arab Jamahiriya is expected to be in compliance. The Party is preparing the documents to reports the data.	To be determined.
Libyan Arab Jamahiriya	XV/36		Regulatory measures	Establish a system for licensing imports and exports of ODS, including quotas.	2004	UNIDO reported that permit arrangements for ODS are still in place. No information that the licensing system is adopted is given by the NOU. Imp.Com (36/3) reported that the Party has indicated that the legislation to introduce the licensing and quota system was expected to be enacted at the end of January 2006, at the latest, and in the meantime an interim permit system is in place.	Progress
Libyan Arab Jamahiriya	XV/36		Regulatory measures	Monitor the ban imports of equipment that uses ODS.	2003	No information provided.	To be determined.
Libyan Arab Jamahiriya	XVII/37		Halon phase out	Maintain halon consumption at a level no greater than 714.5 ODP tonnes.	2005	The Fund Secretariat has not received 2005 CP data. UNIDO reported that the Party is preparing the documents to report the data. It is expected that Libya will not exceed the 714.5 ODP tonnes. ImpCom (36/3) has reported that UNIDO further indicated that in 2006, a business model would be prepared with the aim of making the halon banking centre a self-sustaining operation.	To be determined.
Libyan Arab Jamahiriya	XVII/37		Methyl bromide phase out	Maintain methyl bromide consumption at a level no greater than 96 ODP tonnes.	2005	The Fund Secretariat has not received 2005 CP data. UNIDO reported that the Party is preparing the documents to report the data. It is expected that Libya will not exceed 96 ODP tonnes.	To be determined.
Macedonia			2005 data exceeds control measure	To be determined.		Macedonia reported in its CP data that its 2005 CTC consumption was 0.012 ODP tonnes. This level of consumption exceeds the 85% reduction level of 0.010 ODP tonnes. Macedonia may not be in compliance based on its CP data report.	N/A
Maldives	XV/37		CFC phase out	Maintain zero consumption of CFCs.	2005	Article 7 data indicate zero consumption of CFCs in 2005.	Accomplished.
Maldives	XV/37		Regulatory measures	Monitor the system for licensing imports and exports of ODS, including quotas.		UNEP reported that the <i>Maldives Handbook on National Regulations and Import Licensing System for the Phase out of Ozone Depleting Substances</i> was prepared by the Environment Research Centre (ERC) and was distributed to the participants during the final workshop.	Progress.
Marshall Islands	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	Australia reported that ODS regulations were approved.	Accomplished.

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Mauritania	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	Mauritania reported that its licensing system is not operating so well but importer registration is required and an import quota system is in place. Import quotas totalling 27.12 metric tonnes were issued in 2005. The RMP is progressing and the recovery and recycling programme is satisfactory but no information was provided on the programme. 85 customs officers have been trained of which 10 have been trained to be trainers. 40 technicians have been trained of which 28 have been trained to be trainers and 60 technicians have been certified. No end users have been retrofitted using Fund resources. Despite the fact that Mauritania indicated that its licensing system was operating well, it forecasts compliance for the 2005, 2007 and 2010 controls.	Accomplished.
Mauritius			2005 data exceeds control measure	To be determined.		Mauritius has reported CTC consumption in 2005 in excess of the 85% reduction to the Ozone Secretariat	
Mexico			2005 data exceeds control measure	To be determined.		Mexico reported in its CP data that its 2005 CTC consumption 68.08 ODP tonnes. This level of consumption exceeds the 85% reduction level of 0.00 ODP tonnes. Mexico may not be in compliance based on its CP data report.	N/A
Mexico		35/25	CTC phase out	Submit outstanding information on the request to revise the CTC baseline, in accordance with Decision XV/19, including the reason for the absence of CTC imports in the years 1999 and 2000 for the process agent application of the recovery of chloride from tail gas in chlorine production.	June 2006	UNIDO reported that the National Ozone office is working on the report requested by the Implementation Committee. UNIDO is following up with the NOU.	To be determined.
Mozambique	XVII/20		Data reporting	Submit Article 7 data for 2004.	ASAP	The Fund Secretariat has not received CP data. UNEP reported that a new ozone officer was appointed and CAP is planning a mission to assist the new ozone officer compile 2004 and 2005 data.	Not Achieved.
Namibia	XV/38		CFC phase out	Reduce consumption of CFCs to 10 ODP tonnes.	2005	2005 CP data indicate a CFC consumption of zero, which is below the 10 ODP tonnes maximum allowed by the Action Plan. Namibia reported that their licensing system is operating very well, importer registration is required, and a quota system is in place. No import quotas were issued in 2005. The RMP is progressing, but the recovery and recycling programme is not functioning so well. No ODP was reported recovered and only 10 of the 20 funded recovery and recycling machines are operational. Only 3 individuals have been trained to train customs officers, but no customs officers have been trained. Also, only 3 individuals were trained to be trainers of refrigeration technicians, but no technicians were reported as having been trained. Six end users have been retrofitted, but not from Fund resources. Despite the fact that there has been no reported training of customs officers or refrigeration technicians, Namibia forecasts compliance with the 2010 controls. UNEP reported that Namibia has returned to compliance.	Accomplished.

Annex II

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Nauru	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	UNEP reported that Nauru plans to establish ODS regulations and licensing systems in 2006 and is considering amending the Customs Act to incorporate prohibitions on ODS.	Progress.
Nepal	XVI/27		CFC phase out	Reduce consumption of CFCs to 13.5 ODP tonnes.	2005	2005 CP data indicate a CFC consumption of 12 ODP tonnes that is below the 13.5 ODP tonnes maximum allowed by the Action Plan. Nepal reports that its licensing systems is operating very well, importer registration is required, and a quota system is in place. Import quotas totalling 20.1 metric tonnes were issued in 2005. The RMP is progressing, the recovery and recycling programme is operating very well but only 0.75 ODP tonnes have been reused of the 2 ODP tonnes that had been recovered from the 10 recovery and recycling machines in Nepal despite the fact that only 1 of the 10 machines is operational. Fifty-one customs officers have been trained of which 6 have been trained to be trainers. 201 technicians have been trained of which 11 have been trained to be trainers. No end users have been retrofitted using Fund resources. Nepal does not forecast future compliance.	Accomplished.
Nepal	XVI/27		Regulatory measures	Monitor its existing system for licensing imports of ODS, including quotas, introduced in 2001, which includes a commitment not to issue import licenses for CFCs, in order to remain in compliance with its plan of action.		Nepal reports that its licensing systems is operating very well, importer registration is required, and a quota system is in place. Import quotas totalling 20.1 metric tonnes were issued in 2005.	Accomplished.
Nepal	XVI/27		Data reporting	Report annually on the quantity of CFCs released.		Nepal reported that 0 metric tonnes of the 12 tonnes held in bond were released in 2005.	Accomplished.
Nepal	XVI/27		Data reporting	Ensure that any quantities of CFCs remaining after 2010 are not released on to its market except in compliance with Nepal's obligations under the Montreal Protocol.		Nepal reported that 0 metric tonnes of the 12 tonnes held in bond were released in 2005.	Accomplished.
Niue	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	UNEP reported that Niue is currently working to establish ODS regulations. The latest development is that the legal officer had made initial comments on the draft regulations supplied by SPREP. They will liaise with SPREP to finalize the regulations. Some initial changes made included changes to the names of agencies and changes to penalty charges.	Progress.
Niger			2005 data exceeds control measure	To be determined.		Niger reported in its CP data that its 2005 CFC consumption was 22.38 ODP tonnes. This level of consumption exceeds the 50% reduction level of 16.01 ODP tonnes. Niger may not be in compliance based on its CP data report.	N/A
Nigeria	XIV/30		CFC phase out	Reduce CFC consumption to 1,800 ODP tonnes.	2005	The Fund Secretariat has not received 2005 CP data. UNDP reported that the Agreement states maximum allowable for 2005 as 1725.4 ODP tonnes. Nigeria will be reporting 1195.22 ODP tonnes for CFC-12 and 0 for CFC-11 for 2005. They will be well within compliance limits.	To be determined.

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Nigeria	XIV/30		Regulatory measures	Report periodically on the operation of the system for licensing imports and exports of ODS as required for all Parties under Article 4 B paragraph 4 of the Montreal Protocol.		No information provided.	To be determined.
Nigeria	XIV/30		Regulatory measures	Ban imports of equipment that uses ODS. -	1 January 2008	No information provided.	To be determined.
Pakistan	XVI/29		Halon phase out	Reduce consumption of halons to 7.1 ODP tonnes.	2005	No 2005 CP data was reported to the Fund Secretariat. UNIDO reported that the licensing and quota system only allowed 6.9 ODP tonnes to be imported in 2005. It also reported that some delay occurred in the halon banking project due to bankruptcy of subcontractor and the selection of a new subcontractor. The halon recovery and recycling centre has been established and put into operation. Equipment was manufactured and delivered to project site. The Government was requested to introduce full ban on halon imports by 30 June 2006.	To be determined.
Pakistan	XVI/29		Regulatory measures	Monitor its enhanced system for licensing imports and exports of ODS, including quotas, introduced in 2004.		No information provided.	To be determined.
Palau	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	UNEP reported that Palau became the second country to establish regulations in the Pacific Island Country Strategy.	Accomplished.
Papua New Guinea	XV/40		CFC phase out	Reduce CFC consumption to 17 ODP tonnes.	2005	2005 CP data indicate a consumption of 14.74 ODP tonnes, which is below the 17 ODP tonnes maximum allowed by the Action Plan.	Accomplished.
Papua New Guinea	XV/40		Regulatory measures	Ban imports of equipment that uses ODS.	2004	The Ozone Secretariat reported that the Party has reported that the import ban has yet to be introduced as the regulations required to give effect to the ban were awaiting cabinet endorsement, which was expected by the end of March 2006. No information has been provided about whether or not this occurred.	To be determined.
Paraguay	N/A		2005 data exceeds control measure	To be determined.		Paraguay reported in its CP data that its 2005 CFC consumption was 110 ODP tonnes. This level of consumption exceeds the 50% reduction level of 105.28 ODP tonnes. Paraguay may not be in compliance based on its CP data report.	N/A
Rwanda	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	UNDP reported that after a long wait, UNDP CO understood that legislation had been passed, and thus placed PO for equipment in November 2005. All activity has stopped now, since the Fund Secretariat learned that legislation not yet passed. Once resolved, subcontract with R&R centre and recruitment of national consultants will take place. UNEP reported that ODS regulations were adopted and arrangement have been made to raise awareness of stakeholders on the regulations.	Accomplished.
Saint Vincent & the Grenadines	XVI/30		CFC phase out	Reduce CFC consumption to 1.39 ODP tonnes.	2005	The Fund Secretariat has not received 2005 CP data. UNEP reported that Saint Vincent & the Grenadines maintained compliance with its plan of action to return to compliance.	To be determined.
Saint Vincent & the Grenadines	XVI/30		Regulatory measures	Monitor its existing system for licensing imports of ODS and its ban on imports of equipment that uses ODS, which was introduced in 2003		UNEP reported that the ODS license system is in force.	Accomplished.

Annex II

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Samoa	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	No information provided.	To be determined.
Sao Tomé & Príncipe	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	UNDP reported that it is still awaiting confirmation that licensing and quota system in place before R&R activity can start (as per ExCom decision). UNEP reported that the drafting of ODS regulations has been completed and enactment is pending action from the new government.	Progress.
Serbia & Montenegro	XVII/22		Data reporting	Submit outstanding data for Annex B group (I-III) and Annex E.	ASAP	Serbia & Montenegro has reported CP data through 2005. UNIDO reported that it is working with the Party to collect the required information to enable the Party to report outstanding data. UNEP reported that a compliance session took place on the margins of the recent ECA network meeting in Tbilisi, Georgia, 11-13 April 2006. The issue of missing baseline data was discussed. Serbia & Montenegro expects to submit the missing data in the near future as explained in its recent correspondence to the Ozone Secretariat.	Not achieved.
Serbia & Montenegro	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	Serbia and Montenegro reports that its licensing system is operating very well and importer registration is required, however, a quota system is not in place. Serbia & Montenegro reported, however, that import quotas totalling 445.4 metric tonnes were issued in 2005--this could be from the licensing or registration systems. No customs officers or refrigeration technicians have been trained. No end users have been retrofitted using Fund resources. Serbia and Montenegro indicated that its licensing system was operating well and forecasts compliance for the 2005 and 2007 controls. It did not mention a forecast for 2010.	Accomplished.
Sierra Leone		34/37	Halon phase out	Submit an explanation for halon deviation and a plan of action.	Dec. 2005	The Fund Secretariat has not received 2005 CP data. UNEP reported that a plan of action developed with the assistance of UNDP has already been submitted to the Ozone Secretariat. UNDP reported that the halon survey has been completed. No more halon is in use. UNDP will submit a TAS project to the 50 th Meeting of the Executive Committee.	To be determined.
Sierra Leone	XVII/38		Halon phase out	Submit a halon plan of action with time-specific benchmarks to ensure a prompt return to compliance.	June 2006	The Fund Secretariat has not received 2005 CP data. UNEP reported that a plan of action developed with the assistance of UNDP has already been submitted to the Ozone Secretariat. UNDP reported that the halon survey has been completed. No more halon is in use. UNDP will submit a TAS project to the 50 th Meeting of the Executive Committee.	To be determined.
Solomon Islands	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	UNEP reported that there has been no change in the status of the establishment of the licensing system. Solomon Islands is facing an unstable political situation. Australia reported that the situation in the Solomon Islands remains unstable following national elections and civil unrest in April 2006.	Not achieved.
Somalia	XVI/19		Halon phase out	Submit a halon plan of action with time-specific benchmarks for returning it to compliance.	June 2005	UNEP reported that a plan of action is unlikely to be implemented as re-organisation of the NOU and other institutional structures may take a long time. There is now a completely new ozone team for Somalia, based outside Somalia, with no contact with the previous NOU, which had been based in Mogadishu.	Not achieved.

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Somalia		35/37	Halon phase out	Submit clarification on its plan of action, including the regulatory and other measures that the Party would undertake to support its proposed halon consumption reduction benchmarks.	June 2006	UNEP reported that turn-over in the NOU and among key ministry officials will necessitate a fresh start on ODS regulations in Somalia.	Not achieved.
Somalia	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	UNEP reported that turn-over in the NOU and among key ministry officials will necessitate a fresh start on ODS regulations in Somalia. It has reported that it is uncertain whether an ODS licensing system could be established by the Somali legislature in the near future.	Not achieved.
Tanzania	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	UNEP reported that draft ODS regulations, which includes a licensing system is undergoing stakeholder consultations and review.	Progress.
Tonga	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	UNEP reported that a new ODS officer was appointed in April 2006 and is following up on the approval of a licensing system.	To be determined.
Turkey		35/39	BCM phase out	Deferred consideration of BCM consumption deviation in 2004 until 36 ImpCom can consider the Party's situation in the light of the conclusions by the 17 th MOP on the assessment by the TEAP of the additional information submitted by Turkey.		UNIDO has a project in its 2007 business plan that is pending resolution of the Parties of the issue of whether BCM used be used as a process agent or a feedstock.	To be determined.
Tuvalu	XVII/23		Regulatory measures	Report on the establishment of a licensing system	ASAP	UNEP reported that Tuvalu's ODS regulations are still in draft form and are with its Attorney General's office. It was intended to make the ODS regulations under the Environment Act. However, the Environment Act is also in the process of being reviewed and the ODS regulations cannot be put in place until the review of the Environment Act is completed.	Not achieved.
Uganda	XV/43		Methyl bromide phase out	Reduce methyl bromide consumption to 6 ODP tonnes.	2005	Uganda is in compliance with the Action Plan's maximum level of methyl bromide consumption of 6 ODP tonnes in 2005 allowed by Decision XV/43. UNEP reported methyl bromide consumption of 6.0 ODP tonnes in 2005, which puts the Party in compliance.	Accomplished.
Uruguay	XVII/39		Methyl bromide phase out	Reduce methyl bromide consumption to 8.9 ODP tonnes.	2005	2005 CP data indicates that methyl bromide consumption was 19.9 ODP-tonnes, which appears to exceed the 8.9 ODP tonnes maximum allowed by the Action Plan. However, it is possible that some of this total is for QPS as the total amount for QPS and non-QPS was not specified in the CP data report. Uruguay reported that its licensing system is satisfactorily, importer registration is required, and a quota system is in place. An import quota of zero was assigned to methyl bromide in 2005. 80 customs officers have been trained of which 34 have been trained to be trainers. Uruguay did not mention a forecast for future compliance. UNEP reported that Uruguay has submitted 2005 CP report to MFS. It shows a methyl bromide consumption of 8.64 ODP- tonnes of methyl bromide, which is within the 8.9 OPD tonnes required by the Action Plan and the revised agreement with the Executive Committee from its 46 th Meeting.	Not achieved.
Uruguay	XVII/39		Regulatory measures	Monitor its system for licensing imports and exports of ODS, including quotas.		Uruguay reports that its licensing system is satisfactory, importer registration is required, and a quota system is in place. A total of 417.28 metric tonnes of import quotas were issued in 2005.	Accomplished.

Annex II

Party	Decision	Recommendation	Issue	Action	Due Date	Comments	Action Accomplished
Vietnam	XVII/23		Regulatory measures	Report on the establishment of a licensing system.	ASAP	The World Bank reported that the Government of Vietnam established an import/export licensing system, which is one of the policy recommendations of the Plan, in July 2005. It went into force in August 2005. An import/export licensing system has been in operation since then. A ban on imports of CFC containing equipment was issued in January 2006. A Project Management Unit was established in October 2005.	Accomplished.
Zimbabwe			2005 data exceeds control measure for methyl chloroform	To be determined.		Zimbabwe reported in Article 7 data received after 26 May 2006 that its 2005 methyl chloroform consumption was 0.04 ODP tonnes. This level of consumption exceeds the 30% reduction level of 0.002 ODP tonnes. Zimbabwe may not be in compliance.	N/A
Zimbabwe			2005 data exceeds control measure for CTC	To be determined.		Zimbabwe reported 2005 CTC consumption of 3.487ODP tonnes in Article 7 data received after 26 May 2006. This exceeds the 1.737 ODP tonnes maximum required by the control measure. UNEP reported that ODS importers apply for registration and that a data base for all importers of ODS is available.	N/A
