COMITÉ EJECUTIVO DEL FONDO MULTILATERAL
PARA LA APLICACIÓN DEL
PROTOCOLO DE MONTREAL
Quincuagésima segunda Reunión
Montreal, 23 al 27 de julio de 2007

**INFORME CONSOLIDADO DE LA MARCHA DE ACTIVIDADES
AL 31 DE DICIEMBRE DE 2006**

Los documentos previos al período de sesiones del Comité Ejecutivo del Fondo Multilateral para la Aplicación del Protocolo de Montreal no van en perjuicio de cualquier decisión que el Comité Ejecutivo pudiera adoptar después de la emisión de los mismos.

Para economizar recursos, sólo se ha impreso un número limitado de ejemplares del presente documento. Se ruega a los delegados que lleven sus propios ejemplares a la reunión y eviten solicitar otros.

1. Este informe consolidado de la marcha de actividades presenta un resumen de la información sobre la marcha de las actividades y de índole financiera proporcionada por los organismos de ejecución y bilaterales¹, tanto en formato narrativo como en bases de datos. La Secretaría combinó las bases de datos de todos los organismos para elaborar este informe, que consta de tres partes y dos anexos. La Parte I es un resumen de la marcha de la ejecución a nivel de país, la Parte II es un resumen de las actividades hasta el final de 2006, y la Parte III contiene comentarios y recomendaciones de la Secretaría del Fondo. El Anexo I contiene datos de ejecución de proyectos, país por país, y el Anexo II es un análisis de los datos de los informes sobre la marcha de las actividades.

PARTE I: RESUMEN DE LA MARCHA DE LA EJECUCIÓN A NIVEL DE PAÍSES

2. Esta sección presenta un resumen de la marcha de la ejecución a nivel de países y acuerdos plurianuales.

Resumen de la marcha de las actividades durante 2006 a nivel de país

3. La Secretaría examinó la situación de la ejecución país por país. El examen tiene en cuenta las demoras en la ejecución respecto de las fechas de terminación planificadas que fueron notificadas en 2005, las posibles repercusiones de dichas demoras en la eliminación, el índice de desembolsos previstos y el índice de terminación a la luz de los datos de consumo de sustancias que agotan la capa de ozono (SAO) notificados por los países que operan al amparo del Artículo 5. La referencia a las “emisiones netas de SAO debidas a las demoras” se basa en la aplicación de la cantidad promedio mensual de SAO a ser eliminadas multiplicada por el número de meses de las demoras.

4. En el Anexo I se proporciona una evaluación de las actividades de los organismos de ejecución por país en 2006. En ese año los organismos habían programado desembolsos en 143 países o regiones. Lograron un porcentaje de desembolsos del 87 por ciento y superaron este porcentaje en 32 países. Como resultado, los siguientes 19 países alcanzaron sus objetivos de eliminación conforme a lo previsto (sin demoras): India (24 413 toneladas PAO eliminadas), República Bolivariana de Venezuela (3 054 toneladas PAO), Tailandia (1 265 toneladas PAO), Yemen (202 toneladas PAO), Turquía (180 toneladas PAO), Filipinas (149 toneladas PAO), Jamahiriya Árabe Libia (105 toneladas PAO), Rumania (92 toneladas PAO), Kuwait (64 toneladas PAO), Sudán (55 toneladas PAO), Cuba (42 toneladas PAO), Jordania (41 toneladas PAO), Bosnia y Herzegovina (40 toneladas PAO), Burkina Faso (31 toneladas PAO), Kenya (23 toneladas PAO), Georgia (20 toneladas PAO), Zimbabwe (12 toneladas PAO), La ex República Yugoslava de Macedonia (10 toneladas PAO) y Uganda (6 toneladas PAO).

5. Se notificaron niveles de consumo en el año 2006 para los siguientes 9 de esos 19 países: Bosnia y Herzegovina, Burkina Faso, Cuba, Jordania, Kuwait, la ex República Yugoslava de Macedonia, Sudán, Tailandia y Turquía. Los datos de niveles de consumo en 2006 se basaron en

¹ No se dispuso de datos de informes sobre la marcha de las actividades de Finlandia, Portugal, Suecia y Estados Unidos de América para su inclusión en este informe. Se incluyeron los datos de sus informes sobre la marcha de las actividades de 2005, juntamente con información sobre la aprobación de los proyectos aprobados en 2006.

los requisitos del Artículo 7 o la ejecución en los programas de países. Para seis de los nueve países que notificaron datos, los datos de consumo de 2006 fueron inferiores a los de 2005.

6. Las demoras en la ejecución pudieron haber incrementado las emisiones netas en algunos países, sobre la base de las fechas de terminación de actividades prevista y la eliminación relacionada con su aprobación. Los países que pudieron haber tenido notables emisiones netas debidas a retrasos fueron:

- República Popular Democrática de Corea (se eliminaron 1 536 toneladas PAO menos que lo planificado y se alcanzó el 149 por ciento de los desembolsos planificados);
- Indonesia (1 498 toneladas PAO menos y 78 por ciento desembolsado);
- México (940 toneladas PAO menos y 127 por ciento desembolsado);
- Egipto (891 toneladas PAO menos y 100 por ciento desembolsado);
- Colombia (767 toneladas PAO menos y 35 por ciento desembolsado);
- China (707 toneladas PAO menos pero 104 por ciento desembolsado);
- Argentina (667 toneladas PAO menos y 77 por ciento desembolsado);
- Perú (244 toneladas PAO menos y 9 por ciento desembolsado);
- Líbano (206 toneladas PAO menos y 94 por ciento desembolsado);
- Argelia (194 toneladas PAO menos y 61 por ciento desembolsado);
- República Dominicana (156 toneladas PAO menos y 127 por ciento desembolsado);
- Haití (156 toneladas PAO menos y 22 por ciento desembolsado);
- Costa Rica (124 toneladas PAO menos y 119 por ciento desembolsado);
- Brunei Darussalam (84 toneladas PAO menos y 6 por ciento desembolsado);
- Honduras (73 toneladas PAO menos y 12 por ciento desembolsado); y
- Marruecos (71 toneladas PAO menos y 57 por ciento desembolsado).

7. De los países con emisiones netas debidas a demoras, no notificaron datos para 2006 los siguientes: Afganistán, Bahrein, Bangladesh, Bolivia, Brunei Darussalam, Cabo Verde, China, Congo, Cote D'Ivoire, Croacia, Etiopía, Guinea-Bissau, Indonesia, Lesotho, Líbano, Malasia, Malí, Mauritania, Myanmar, Panamá, Paraguay, Perú, República Democrática Popular Lao, República Dominicana, República Popular Democrática de Corea, República Unida de Tanzania, Rumania, Rwanda, Santo Tomé y Príncipe, Sierra Leona y Togo.

8. De los países que notificaron datos para 2006, los siguientes seis países aumentaron su consumo en ese año: Colombia (113,6 toneladas PAO de consumo más que en 2005), Barbados (1,2 toneladas PAO), Gabón (0,9 toneladas PAO), Albania (0,9 toneladas PAO), Liberia (0,4 toneladas PAO) y San Vicente y las Granadinas (0,1 toneladas PAO).

9. En los siguientes 18 países el consumo disminuyó en 2006, a pesar de los proyectos demorados: México (2 197,3 toneladas PAO menos consumo que en 2005), Brasil (637,4 toneladas PAO), Argelia (556,4 toneladas PAO), Egipto (257 toneladas PAO), Marruecos (121,7 toneladas PAO), Sudán (65,8 toneladas PAO), Costa Rica (47,2 toneladas PAO), Honduras (45,3 toneladas PAO), Haití (30,7 toneladas PAO), Camboya (16,1 toneladas PAO), Omán (16,1 toneladas PAO), Uruguay (13 toneladas PAO), Argentina (9,2 toneladas PAO), Suriname (7 toneladas PAO), Madagascar (5,6 toneladas PAO), República de Moldova (2,6 toneladas PAO), Mauricio (0,5 toneladas PAO) y Antigua y Barbuda (0,1 toneladas PAO).

10. Sobre la base de las fechas de terminación previstas en los informes sobre la marcha de las actividades para 2005 y en los resultados de los informes sobre la marcha de las actividades para 2006, los organismos concluyeron 41 por ciento de los proyectos que programaron concluir en 2006 y lograron un 94 por ciento de la eliminación proyectada.

Acuerdos plurianuales

11. Dentro del contexto del logro de cumplimiento de una o más medidas de control del Protocolo de Montreal, el Comité Ejecutivo ha aprobado 98 acuerdos plurianuales (incluyendo los aprobados en la 51ª Reunión). Un acuerdo plurianual está dirigido al cumplimiento de los requisitos del Protocolo de Montreal por parte de un país con respecto a uno o más de los grupos de sustancias controladas.

12. El detalle de los acuerdos plurianuales abarcados en este informe sobre la marcha de las actividades figura en la Tabla 1.

Tabla 1

DETALLE DE ACUERDOS PLURIANUALES

Acuerdo (total de acuerdos)	Parte
Planes nacionales de eliminación de SAO o CFC (58)	Afganistán, Albania, Antigua y Barbuda, Argentina, Bahamas, Bahrein, Bangladesh, Bolivia, Bosnia y Herzegovina, Brasil, Burkina Faso, Camerún, Colombia, Croacia, Cuba, República Democrática del Congo, Dominica, República Dominicana, Ecuador, Egipto, Georgia, Ghana, Granada, India, Indonesia, República Islámica del Irán, Kenya, República Popular Democrática de Corea, Kirguistán, Líbano, Lesotho, Jamahiriya Árabe Libia, La ex República Yugoslava de Macedonia, Malasia, Mauricio, México, Mongolia, Namibia, Nigeria, Panamá, Papua Nueva Guinea, Paraguay, Filipinas, Rumania, Saint Kitts y Nevis, San Vicente y las Granadinas, Serbia, Seychelles, Sudán, República Árabe Siria, Tailandia, Trinidad y Tabago, Túnez, Turquía, Uruguay, República Bolivariana de Venezuela, Vietnam, Zimbabwe
Acuerdos de eliminación de producción de CFC (5)	Argentina, China, India, México, República Bolivariana de Venezuela
Planes de eliminación de producción de halones (1)	China
Producción de SAO (2)	República Popular Democrática de Corea, Rumania
Producción de metilbromuro (1)	China
Producción de TCA (1)	China
Acuerdo sectorial de eliminación de CTC (consumo o producción) (5)	China (2), India, República Popular Democrática de Corea, Pakistán
Plan de eliminación acelerada para CFC, CTC y halones (1)	China

13. Los acuerdos de eliminación del sector de consumo, que se indican en la Tabla 2, representan un costo total para el Fondo (acordado en principio) de 273 millones \$EUA, incluyendo los honorarios de los organismos. De ellos, 245,7 millones \$EUA se han transferido a los organismos.

Tabla 2

ACUERDOS DE ELIMINACIÓN EN EL SECTOR DE CONSUMO

Sector (total de acuerdos)	Acuerdos
Espuma (1)	China
Halones (1)	China (porción de consumo del plan del sector de halones de China)
Metilbromuro (14)	Argentina, China, Costa Rica, Honduras, Kenya, Líbano, Jamahiriya Árabe Libia, Malawi, Marruecos, República Árabe Siria, Tailandia, Turquía, Vietnam, Zimbabwe
Solventes (2)	China, Nigeria
Plan de gestión de refrigerantes (3)	Argelia, Bolivia, Pakistán
Manufactura de refrigeración (1)	China
Mantenimiento de refrigeración (1)	China
Refrigeración doméstica (1)	República Popular Democrática de Corea
Tabaco (1)	China

14. Los organismos de ejecución proporcionan informes sobre la mayoría de los programas de eliminación sectorial en sus solicitudes de fondos para sus programas de trabajo anuales.

15. El Comité Ejecutivo canceló un acuerdo plurianual para la eliminación de todos los usos remanentes de metilbromuro para aplicación en suelos en control de plagas en Chile, a solicitud del Gobierno de Chile.

16. En la Tabla 3 se presenta el número de acuerdos plurianuales en curso y proyectos individuales.

Tabla 3

NÚMERO DE ACUERDOS PLURIANUALES EN CURSO Y PROYECTOS INDIVIDUALES

		PNUD	PNUMA	ONUDI	Banco Mundial	Bilaterales	Total
Proyectos plurianuales		50	21	61	32	46	210
Proyectos individuales (proyectos de inversión/capacitación/asistencia técnica/demostración)	Con eliminación	78	4	42	12	34	170
	Sin eliminación	23	99	9	6	60	197
	Subtotal	101	103	51	18	94	367
Total		151	124	112	50	140	577

17. El número total de acuerdos plurianuales en curso es de 210 (incluyendo múltiples tramos para algunos proyectos). El número total de proyectos individuales de inversión/capacitación/asistencia técnica/demostración es de 367, de los cuales 170 proyectos que dan por resultado la eliminación de algunas SAO. El PNUMA está ejecutando el mayor número

de proyectos individuales (103) seguido por el PNUD (101), organismos bilaterales (94) y la ONUDI (51). El Banco Mundial está ejecutando solamente 18 proyectos individuales. El mayor número de acuerdos plurianuales está siendo ejecutado por la ONUDI (61) seguida por el PNUD (50), organismos bilaterales (46), el Banco Mundial (32) y el PNUMA (21).

PARTE II: RESUMEN DE LA MARCHA DE ACTIVIDADES HASTA 2006 INCLUSIVE

18. En el Anexo II se proporciona un análisis detallado de los datos de informes sobre la marcha de actividades. A continuación se presenta un resumen de los progresos realizados en la ejecución de proyectos y actividades apoyados por el Fondo Multilateral hasta el 31 de diciembre de 2006:

- a) **Eliminación:** Para 2006 se han eliminado 374 199 toneladas PAO de un total de 390 113 toneladas PAO que se esperaba eliminar con los proyectos aprobados hasta fines de 2006 (excluidos los proyectos cancelados y transferidos). En 2006 solamente, se eliminaron 68 533 toneladas PAO (incluyendo producción) y se aprobaron para su eliminación 28 816 toneladas PAO. Para fines de 2005, se habían eliminado 305 648 toneladas PAO, de un total 361 133 toneladas PAO que se esperaba eliminar con proyectos aprobados (excluyendo proyectos cancelados y transferidos), que incluían 62 460 toneladas PAO efectivamente eliminadas en 2005 (incluyendo producción) y 91 252 toneladas PAO aprobadas para eliminación.
- b) **Desembolsos/Aprobaciones:** Se desembolsaron 1,57 mil millones \$EUA de los 1,9 mil millones \$EUA aprobados para desembolso hasta fines de 2006 (excluyendo honorarios de organismo). Esto representa un porcentaje de desembolso del 83 por ciento. En 2006, se desembolsaron 152,72 millones \$EUA y se aprobaron 124,41 millones \$EUA adicionales.
- c) **Relación de costo-eficacia:** La relación de costo-eficacia promedio de los proyectos de inversión concluidos fue de 4,05 \$EUA/kg y para los proyectos de inversión en curso de 4,54 \$EUA/kg.
- d) **Número de proyectos concluidos:** Se concluyeron 4 373 proyectos de los 5 229 proyectos financiados por el Fondo (excluyendo proyectos clausurados o transferidos) hasta fines de 2006 inclusive. Esto representa un índice de conclusión del 84 por ciento.
- e) **Plazo de entrega—proyectos de inversión:** En promedio, los proyectos de inversión se completaron 34 meses después de su aprobación por el Comité Ejecutivo. Los primeros desembolsos para estos proyectos se efectuaron, en promedio, 15 meses después de su aprobación. A nivel de organismo, el primer desembolso para proyectos completados se efectuó 13 meses después de la aprobación para el PNUD, 9 meses para la ONUDI y 25 meses para el Banco Mundial.

- f) **Plazo de entrega—proyectos ajenos a la inversión:** En promedio, los proyectos ajenos a la inversión se completaron 33 meses después de su aprobación por el Comité Ejecutivo. Los primeros desembolsos para estos proyectos se efectuaron, en promedio, 10 meses después de la aprobación. A nivel de organismo, el primer desembolso para proyectos ajenos a la inversión concluidos se efectuó 11 meses después de la aprobación para el PNUD, 8 meses para el PNUMA, 8 meses para la ONUDI y 16 meses para el Banco Mundial.
- g) **Preparación de proyectos:** Se completaron 1 027 de las 1 134 actividades de preparación de proyectos aprobadas hasta fines de 2006. Los organismos de ejecución arrastraron saldos por valor de 2 490 157 \$EUA de 2006 (incluidos aproximadamente 406 141 \$EUA para la conclusión de preparación de proyectos), disponibles para nuevas actividades en preparación de proyectos, además de los 240 000 \$EUA aprobados en 2007.
- h) **Demoras en la ejecución:** Los proyectos de inversión en curso experimentan una demora promedio de 21 meses. Se anexa a este informe una lista de 62 proyectos con demoras de ejecución, y se enviará a la 53^a Reunión un informe sobre estas demoras. La cantidad total de emisiones netas de SAO debidas a demoras en la ejecución es de 22 652 toneladas PAO, lo cual está por encima del nivel notificado el pasado año (19 188 toneladas PAO).

PARTE III: COMENTARIOS Y RECOMENDACIONES DE LA SECRETARÍA DEL FONDO

COMENTARIOS

19. Los comentarios de la Secretaría se ocupan de cuestiones comunes que han sido identificadas durante el examen de los informes de los organismos sobre la marcha de las actividades.

20. Sobre la base de las fechas planificadas de conclusión en el informe de marcha de actividades de 2005 y los resultados del informe de marcha de actividades de 2006, el Banco Mundial completó 48 por ciento de los proyectos que había planificado completar en 2006. La ONUDI completó 51 por ciento, el PNUD 33 por ciento y el PNUMA 47 por ciento de los proyectos que habían planificado completar. Este es el cuarto año consecutivo en que los índices de conclusión de proyectos han estado muy por debajo del 70 por ciento. Solamente el PNUMA ha incrementado su índice de conclusión de proyectos (de 35 por ciento a 47 por ciento), mientras que los índices de conclusión para los otros organismos cayeron por lo menos un punto. El índice de conclusión del Banco Mundial cayó 22 puntos.

21. El lento índice de conclusión podría relacionarse con el carácter plurianual de las actividades, dificultades en la ejecución, pronósticos optimistas o la incorrecta aplicación de las decisiones del Comité Ejecutivo que definen la conclusión. Está en marcha un mecanismo para encarar dificultades de proyectos plurianuales y de ejecución caso por caso. Los pronósticos y las

aplicaciones de las definiciones del Comité se efectúan a discreción de los propios organismos. El Comité Ejecutivo podría tomar nota, una vez más, de los lentos índices de conclusión e informar a los jefes de los organismos de ejecución respecto de esta continua preocupación con miras a lograr una mejora general en 2007.

22. Cabe señalar que el número de proyectos en proceso de ejecución es considerablemente superior para el PNUD, el PNUMA y la ONUDI (cada uno ejecutando por lo menos 112 proyectos) que para el Banco Mundial (que ejecuta 50 proyectos). Este es también el caso con los acuerdos plurianuales donde la ONUDI y el PNUD están ejecutando casi el doble de tramos de acuerdos que el Banco Mundial (nótese que el PNUMA está en general en un papel de apoyo para la mayoría de estos acuerdos). No obstante, en términos de la capacidad de cada organismo para entregar servicios a través del equilibrio de los honorarios en su posesión y sus gastos unitarios básicos, existe una diferencia en el nivel de capacidad de cada organismo para estas entregas. El Banco Mundial tiene un saldo de alrededor de 10,88 millones \$EUA, el saldo del PNUD es de 8,81 millones \$EUA y el saldo de la ONUDI es de 7,14 millones de \$EUA. El Comité Ejecutivo podría considerar estas cantidades. Los honorarios de organismo para el PNUMA son enviados a la sede para su administración y no están disponibles para la ejecución de proyectos. El estudio sobre costos administrativos tratará esta cuestión.

RECOMENDACIONES

23. El Comité Ejecutivo podría:
- a) tomar nota del informe consolidado de la marcha de actividades del Fondo Multilateral como figura en UNEP/OzL.Pro/ExCom/52/10;
 - b) tomar nota del lento índice de conclusión de proyectos por cuarto año consecutivo y los índices del logro de conclusión de proyectos como sigue: PNUD (33 por ciento), PNUMA (47 por ciento), ONUDI (51 por ciento), y Banco Mundial (48 por ciento);
 - c) comunicar a los jefes de los organismos de ejecución la constante preocupación con respecto al lento índice de conclusión de proyectos con miras a lograr una mejora general por cada organismo en 2007;
 - d) tomar nota de los saldos de honorarios de organismo mantenidos por los organismos al 31 de diciembre de 2006, que alcanzan alrededor de 10,88 millones \$EUA para el Banco Mundial, 8,81 millones \$EUA para el PNUD, y 7,14 millones \$EUA para la ONUDI.

Annex I

PROJECT IMPLEMENTATION BY COUNTRY

Country	Phased out in 2006	Percentage of planned phase-out achieved in 2006	Estimated funds disbursed in 2006 (US\$)	Funds disbursed in 2006 (US\$)	Percentage of funds disbursed over estimation in 2006	Percentage of planned projects completed in 2006	Net emission due to delay in 2006 (actual versus revised planned date of completion)	Net emission due to delay in 2006 (actual versus date of completion per proposal)	Changes in A7 or CP data (2006 vs 2005)

*2006 Data submitted after completion of "Status/Prospects of Article 5 Countries in Achieving Compliance with the Initial and Intermediate Control Measures of the Montreal Protocol" document (UNEP/OzL.Pro/ExCom/52/7).

Annex II

ANALYSIS OF PROGRESS REPORT DATA

1. In the databases submitted to the Fund Secretariat implementing and bilateral agencies provided detailed information about their respective shares of the 5,472 projects (including closed and transferred projects) approved by the Executive Committee through to 31 December 2006. In 2006, 267 new projects and activities were approved. The Executive Committee requested that detailed information on a project-by-project basis be made available to Committee members, with a printout available upon request (decision 19/23). The database for the Consolidated Progress Report is provided on the Executive Committee's intranet in the spreadsheet programme, Microsoft Excel 2002.

OVERVIEW OF APPROVED FUNDING

2. The Executive Committee approved around US \$1.9 billion for the implementation of investment and non-investment projects through to the end of 2006. In addition, about US \$208.17 million has been approved for agency fees and administrative support. This level of funding is expected to result in the phase-out of 390,113 ODP tonnes of ODS consumption and production. Table 1 summarises the level of approved funding, by sector and by agency, and indicates that most approvals of the Executive Committee have been in the refrigeration (US \$522.15 million) and foam (US \$355.81 million) sectors.

ANNUAL SUMMARIES

3. Table 2 presents an overview of status, by year. The data is presented according to the year when a project was approved by the Executive Committee. It treats all approvals (investment and non-investment projects) equally (i.e., an investment project or annual funding tranche of a multi-year agreement of US \$1 million is considered one project as is a country programme preparation of US \$30,000).

4. Key indicators from the annual summary in Table 2 are: the percentage of projects completed, ODP phased out, and percentage of funds disbursed. In reviewing the data on funds disbursed, it should be noted that there are four types of disbursements: during implementation, after implementation, for retroactively-financed projects, and for time-sensitive projects.

Table 2

ANNUAL SUMMARY

Year approved	Number of approvals*	Number completed	Per cent completed	Consumption ODP to be phased out*	Consumption ODP phased out*	Per cent of consumption ODP phased out	Production ODP to be phased out*	Production ODP phased out*	Per cent of production ODP phased out	Approved funding plus adjustment (US\$)	Funds disbursed (US\$)	Per cent of funds disbursed	Balance (US\$)	Estimated disbursement in current year (US\$)

*Excludes Closed and Transferred Projects

5. Of the US \$1.9 billion in approved funding (including adjustments), the agencies (including bilateral agencies) have disbursed around US \$1.57 billion. Projects approved by the Executive Committee have thus far resulted in the permanent annual phase-out of 374,199 ODP tonnes of consumption and production of which 310,964 ODP tonnes is from completed projects and 63,235 ODP tonnes is from ongoing projects. Table 2 indicates that the percentage phased out in 1991, 1993, 1994 and 2003 exceeds 100 per cent. This is due to the phase-out of larger amounts of consumption than those originally indicated in some of the project proposals.

6. All projects and activities approved between 1991 and the end of 1996 have now been completed, with the exception of an institutional strengthening project in Uganda (UNEP implementation) and a refrigeration project in Argentina (World Bank implementation).

SUMMARY DATA BY PROJECT TYPE

7. The Executive Committee approves several different types of projects including: country programme preparation, demonstration projects, institutional strengthening, project preparation, investment projects (including annual tranches of MYAs), training projects and technical assistance. Technical assistance includes UNEP's clearing house and networking activities as well as publications, refrigerant management plans, and recovery and recycling projects. A summary of the status of projects, by category, is presented in Table 3.

Table 3

SUMMARY DATA BY PROJECT TYPE

Type	Number of approvals *	Number completed	Per cent completed	Approved funding (US\$)	Adjustment (US \$)	Funds disbursed (US \$)	Per cent of funds disbursed	Balance (US\$)	Estimated disbursement in current year (US \$)
Country Programme Preparation	165	161	98%	8,489,659	-1,208,796	7,075,925	97%	204,939	148,073

Institutional Strengthening Projects	519	351	68%	56,423,555	205,025	43,506,248	77%	13,122,332	9,561,257
Investment Projects	2,147	1,919	89%	1,621,459,513	-34,452,685	1,321,284,070	83%	265,722,759	109,264,013
Project Preparation	1,134	1,027	91%	60,227,525	-11,966,273	45,771,097	95%	2,490,157	2,202,629
Technical Assistance Projects	858	577	67%	151,589,285	-7,569,944	113,149,642	79%	30,869,699	20,726,385
Training Projects	321	269	84%	26,000,654	-97,808	22,947,632	89%	2,955,214	2,752,403
TOTAL	5,229	4,373	84%	1,957,693,235	-56,106,594	1,571,213,221	83%	330,373,421	146,709,146

*Excludes Closed and Transferred Projects.

8. Of the 5,229 projects approved by the Executive Committee, 2,147 (about 41 per cent) are classified as investment projects. Investment projects represent around US \$1.59 billion of the US \$1.9 billion approved for activities under the Multilateral Fund (83 per cent of the total funds approved). The second largest number of projects are classified as technical assistance, for which the Committee has approved a total of over US \$144.02 million.

9. By the end of 2006, 98 per cent of country programme preparation projects had been completed and 95 per cent of the funds allocated for project preparation activities had been disbursed.

10. By the end of 2006, 89 per cent of investment projects had been completed, 81 per cent of demonstration projects had been completed, and 77 per cent of approved funds had been disbursed for institutional strengthening projects.

COMPLETED PROJECTS

11. Completed projects/activities are defined in decisions 17/22 and 19/23 as projects that have been commissioned and where the ODS addressed has been phased out. A further decision (decision 28/2) extends the definition to cover situations where no further use of CFCs in the sectors covered is in evidence, where an alternative product is being produced (and/or production has begun), and where the equipment using CFCs has been destroyed/dismantled/rendered unusable with respect to ODSs. Work programme activities without an ODS phase-out are considered completed when the activity is finished (e.g., for a workshop, when it has been conducted).

12. Overall, 96 per cent of the funds approved for completed investment projects have been disbursed. The reason that 100 per cent of funds have not been disbursed for completed projects is that it may take from six months to one year to finalise accounting records.

Completed Investment Projects

13. Table 4 presents information on investment projects that have been completed since 1991. The table presents the data in total, followed by data according to region, sector, implementation characteristics, and disbursement method.

Table 4

CUMULATIVE COMPLETED INVESTMENT PROJECTS

Disbursement Method								
During implementation	1,836	1,208,083,561	96%	178,259	122,762	15	35	\$4.01
After implementation	47	16,073,499	100%	2,318	0	21	24	\$6.93
Retroactive funding	36	14,136,103	100%	2,100	500	15	8	\$5.44
* No funds are listed for the multiple sector investment projects, but are recorded in the appropriate sector.								
** Total phased out for the Fund is 374,199 including 5,025 from completed non-investment projects and 63,235 from ongoing projects.								
Note: The sum of each section (Region, Sector, etc.) equals the Total.								

14. Up to 31 December 2006, investment projects representing around US \$1.24 billion have been completed, resulting in the permanent phase-out of 305,939 ODP tonnes² with an overall cost-effectiveness of US \$4.05/kg ODP phased out.

² Total phased out for the Fund includes 305,939 ODP tonnes from completed investment projects 5,025 ODP tonnes from completed non-investment projects and 63,235 from ongoing projects.

15. The average time from approval to first disbursement was 15 months and the average project duration was 34 months. Project duration is only slightly impacted by retroactive projects (i.e., projects funded after phase-out) since they represent only around two per cent of the total number of completed investment projects.

16. On a regional basis, 1,164 investment projects were completed in the Asia and Pacific region, 437 investment projects in Latin America and the Caribbean, 243 in Africa, and 75 in Europe.

Completed Non-Investment Projects

17. Table 5 presents data on cumulative completed non-investment projects. Since 1991, 1,427 non-investment projects have been completed, representing funding support from the Multilateral Fund of around US \$184.16 million. Ninety-eight (98) per cent of the funds for completed non-investment projects have been disbursed. Fifty-five (55) per cent of completed non-investment funding is in the sector identified as “several”, which means those projects that have an impact on more than one sector (such as UNEP’s clearinghouse and networking activities).

Table 5

CUMULATIVE COMPLETED NON-INVESTMENT PROJECTS

Item	Number of projects	Approved funds plus adjustment (US \$)	Per cent of funds disbursed	Average number of months from approval to first disbursement	Average number of months from approval to completion

18. The average time from approval to first disbursement for non-investment projects is much shorter than for investment projects (10 months versus 15 months). Non-investment projects have been completed, on average, 33 months after they were approved by the Executive Committee. This figure is influenced by the large number of projects (791 of 1,427) classified in the sector called “several”, which had an average time from approval to completion of 30 months. Non-investment projects in the other sectors (e.g., *inter alia*, halon and solvents) were completed between 21 and 58 months after they had been approved.

19. Almost all projects (1,014 of 1,427) were implemented by the agency concerned rather than through national implementation. Agency implementation of non-investment projects normally does not require legal agreements, which may explain the shorter period of time (30 months) compared with nationally-implemented non-investment projects (40 months).

20. Non-investment projects include work programme activities, excluding project preparation.

ONGOING PROJECTS

21. Ongoing projects are all projects that have been approved by the Executive Committee and were under implementation as of 31 December 2006. Key indicators in the database of progress towards implementing ongoing projects include:

- a) Percentage of funds disbursed and percentage of projects that have begun disbursing funds;
- b) The level of funding expected to be disbursed by the end of the year (funds disbursed plus estimated disbursements in 2006) as a percentage of the approved funding;
- c) The average length of projected delay in implementation (project completion per proposal and currently planned date of completion); and
- d) Information provided by the implementing agencies in the remarks column of the project-by-project listing in the database.

Ongoing Investment Projects

22. Table 6 presents information on the status of investment projects under implementation by region, sector, and implementation characteristics.

Table 6

CUMULATIVE ONGOING INVESTMENT PROJECTS

*Based on the ODS to be phased out according to the proposal.

23. There are currently 228 investment projects under implementation. These projects represent approved funding (plus adjustments) of over US \$338.48 million. Around 36 per cent of the funds have already been disbursed. The overall average cost-effectiveness of ongoing investment projects is US \$4.54/kg ODP to be phased out, as approved.

24. Of the ongoing investment projects 48 per cent (110 out of 228) are for countries in the Asia and Pacific region, representing almost 62 per cent (US \$211.48 million) of the funds approved for ongoing investment projects. The Latin American and the Caribbean region has 58 investment projects under implementation, valued at US \$82.9 million, Africa has 42 projects (US \$33.11 million) and Europe has 18 projects (US \$10.99 million).

25. About 31 per cent of the funds approved for ongoing investment projects, representing around US \$104.29 million, are in the phase-out plan sector. The second largest funding allocation for ongoing investment projects is for the production sector (US \$50.05 million) followed by the fumigants sector (US \$46.49 million). The remaining sectors have the following number of investment projects under implementation: aerosol (7), foam (14), solvents (8), halon (4), other sectors (1), process agent (7) and refrigeration (30).

26. Of the 228 ongoing investment projects, 61 per cent (138) have begun disbursing funds.

27. Most ongoing investment projects are under agency implementation (132 projects) but there are 96 projects under national implementation. Of agency-implemented ongoing investment projects, 77 per cent have begun disbursement compared with 39 per cent of nationally-implemented ongoing investment projects.

28. The average number of months from approval to first disbursement is 10 months. The average duration of an ongoing investment project is 40 months. Typically, ongoing investment projects are completed 21 months later than originally planned, which could be considered the average delay.

Ongoing Non-Investment Projects

29. Table 7 presents information on the status of non-investment projects under implementation by region, sector, and implementation characteristic.

Table 7

CUMULATIVE ONGOING NON-INVESTMENT PROJECTS

Item	Number of projects	Approved funds plus adjustment (US\$)	Per cent of funds disbursed	Number of projects disbursing	Per cent of projects disbursing	Average number of months from approval to first disbursement	Average number of months from approval to planned completion	Average length of delay in project planned completion

30. There are currently 521 non-investment projects under implementation, representing approved funding (plus adjustments) of around US \$81.73 million. Roughly 29 per cent of the funds for ongoing non-investment projects have been disbursed.

31. The largest amount of funding for non-investment projects, by region, is US \$22.2 million for the Asia and the Pacific region. Funding for ongoing non-investment projects in other regions is as follows: Latin America and the Caribbean, US \$19.99 million; Africa, US \$18.95 million; and, Europe, US \$4.9 million. Ongoing global activities are valued at a total of US \$15.7 million.

32. On a sectoral basis, most non-investment funding is applied to the refrigeration sector (US \$36.15 million for 207 projects). There are 202 ongoing non-investment projects in the “several” sector category (US \$27.83 million), 49 in the phase-out plan sector (US \$5.89 million), 25 in the halon sector (US \$6.14 million), 25 in the fumigant sector (US \$4.95 million) and 13 projects for all other sectors (US \$772,690).

33. Of the 521 ongoing non-investment projects, 62 per cent (323 projects) have begun disbursing funds.

34. The average number of months from approval to first disbursement is 13 months. On average, ongoing non-investment projects are completed 44 months from the date of approval, which represents a delay of 16 months.

PROJECT PREPARATION

35. Project preparation requests are included in annual work programmes and amendments to work programmes. Project preparation leads to investment projects in general and, in some cases, demonstration projects (in particular for methyl bromide) and the implementation of projects included in refrigerant management plans.

36. Table 8 presents data on both completed and ongoing project preparation activities. The implementing agencies have completed 1,027 project preparation activities for which there remains a balance of US \$406,141 that has not yet been disbursed. This figure is around US \$10,131 higher than it had been in 2005. On average, it has taken 17 months to complete project preparation.

Table 8

37. Implementing agencies have a balance of US \$2.49 million carried over for project preparation activities in 2006. Ongoing project preparation activities are expected to take 20 months to complete. This is three months longer than for completed project preparation.

38. On a regional basis, most of the ongoing project development activities (51 per cent) are in Africa. Most of the ongoing project preparation is occurring in the phase-out plan sector (US \$1.72 million).

PROJECT IMPLEMENTATION DELAYS

39. The Executive Committee has defined projects with implementation delays as projects where no disbursement had occurred 18 months after approval, or projects that are expected to be completed 12 months later than forecast in the last progress report (decision 22/61).

40. In 2006 the Secretariat identified 62 projects with implementation delays, 31 of which had been classified with implementation delays in 2005. The total number of projects classified with implementation delays decreased in 2006 compared to 2005 (110 projects). However, it should be noted that pursuant to decision 36/14, the following types of projects are no longer so classified: institutional strengthening, halon banking, customs training, recovery and recycling, and demonstration projects. Decision 36/14 does, however, request that the Secretariat continue to monitor these types of projects, as appropriate. A list of the projects with implementation delays is attached as an appendix to this Annex. The Executive Committee maintains a “watching brief” on these projects as per decision 23/4, and the implementing agencies will be requested to report on these projects to the 53rd Meeting of the Executive Committee.

41. A separate document entitled “Project Implementation Delays” (UNEP/OzL.Pro/ExCom/52/17) addresses follow-up information on project implementation delays that had been identified in the 2005 Progress Report.

CLOSED AND TRANSFERRED PROJECTS

42. Table 9 presents a summary of closed and transferred projects. Closed projects are cancelled projects. Of the 216 cancelled projects, 85 were project preparation activities. The World Bank has the highest number of closed projects (92). Remaining balances for closed projects are the result of possible unpaid commitments against these projects; however, projects should be classified as closed only after the balances have been returned. Implementing agencies provide a report on any balances from cancelled projects in the context of the Report on Balances and Availability of Resources (UNEP/OzL.Pro/ExCom/52/4). Two projects were cancelled and closed in 2006.

43. Transferred projects are projects that have been transferred from one agency to another. There are 27 such transferred projects.

Table 9

CLOSED AND TRANSFERRED PROJECTS SUMMARY

Agency	Number of projects	Approved funding (US\$)	Adjustments (US\$)	Approved funding plus adjustment (US\$)	Funds disbursed (US\$)	Balances (US\$)	Percent of funds disbursed	Consumption ODP to be phased out	Consumption ODP phased out

Appendix

PROJECTS WITH IMPLEMENTATION DELAYS

Code	Agency	Project Title	Category of Delays
MEX/FUM/42/TAS/122	Canada	Technical assistance to comply with 2005 phase-out of 20% of methyl bromide	12 and 18 months delays
MOR/FUM/29/INV/37	France	Phase-out of methyl bromide use in the cut flower and banana production	12 and 18 months delays
SYR/REF/29/INV/48	France	Conversion from CFC-11 to HCFC-141b and from CFC-12 to HFC-134a technology in the manufacture of commercial refrigeration equipment at Sarkisian Refrigerators	12 months delays
SYR/REF/29/INV/53	France	Conversion from CFC-12 to HFC-134a technology in the manufacture of commercial refrigeration equipment at Shoukairi and Co.	12 months delays
ALG/SEV/43/CPG/60	Germany	Development of a country programme update	12 months delays
CPR/REF/43/TAS/414	Germany	Development of a suitable strategy for the long term management of HCFCs, in particular HCFC-22	12 months delays
IRA/FOA/37/INV/152	Germany	Conversion from CFC-11 to fully water-based technology in the manufacture of flexible molded PU foam at Sanayeh Dashboard Iran	12 months delays
KEN/SOL/39/INV/32	Germany	Conversion of TCA based cleaning process to non-ODS alternatives at the Kenya Power and Lighting Company	12 months delays
YEM/FUM/41/TAS/21	Germany	Technical assistance programme for the phase-out of methyl bromide in agriculture	12 months delays
ARG/REF/18/INV/39	IBRD	Elimination of CFC in the manufacturing plant of domestic refrigerators of Neba, S.A.	12 and 18 months delays
CPR/REF/36/INV/389	IBRD	Replacement of CFC-12 refrigerant with HCFC-22 in the manufacture of small and medium open compressors at 5 enterprises (Dalian No.2, Shanghai Minhang, Zhejiang Beifeng, Zhejiang Chunlian, Zhejiang Yuhuan)	12 months delays
ECU/FUM/26/TAS/23	IBRD	Demonstration project for testing methyl bromide alternatives in soil treatment for the flower growing industry	12 and 18 months delays
IDS/FOA/23/INV/77	IBRD	Flexible boxfoam. Technical assistance programme for SMEs at Indonesian Foam Association (AFI)	12 and 18 months delays
JOR/HAL/32/INV/69	IBRD	Terminal halon-1211 and halon-1301 phaseout umbrella project for fire equipment manufacturers and suppliers in Jordan converting to ABC powder, CO ₂ , HFC-227ea and inert gases as substitutes	12 and 18 months delays
JOR/PHA/38/INV/77	IBRD	National ODS phase out plan: aerosol, foam, MAC service and solvent sectors	18 months delays
THA/HAL/32/INV/134	IBRD	Terminal halon-1211 and halon-1301 phaseout project for fire equipment manufacturers and suppliers converting to ABC powder, CO ₂ , HFC-227ea and inert gases	12 and 18 months delays
YUG/REF/34/INV/13	Italy	Replacement of CFC-11 with cyclopentane foam blowing agent and CFC-12 with HFC-134a refrigerant in the manufacture of domestic refrigerators and freezers at Obod Elektroindustria	12 months delays
NIR/SEV/38/TAS/104	Japan	Assistance for a national information, education and communication campaign for compliance with the Montreal Protocol	12 and 18 months delays
SRL/PHA/43/TAS/27	Japan	National compliance action plan: MAC recovery/recycling and retrofit	12 months delays
SRL/PHA/43/TAS/28	Japan	National compliance action plan: recovery and recycling programme	12 months delays
MEX/FUM/42/TAS/118	Spain	Technical assistance to comply with 2005 phase-out of 20% of methyl bromide	12 months Delays
ASP/SEV/34/TAS/42	Sweden	Regional cooperation for monitoring and control of ODS consumption	12 months delays
GLO/SEV/41/TAS/253	Sweden	Development of handbook on industry operated systems for recovery and reuse of ozone depleting substances	12 months delays
AFR/FUM/38/TAS/32	UNDP	Technical assistance for methyl bromide reductions and formulation of regional phase-out strategies for low-	12 months delays

Appendix

Code	Agency	Project Title	Category of Delays
		volume consuming countries	
ARG/FOA/38/INV/132	UNDP	Terminal umbrella project for phaseout of the use of CFC-11 in the manufacture of polyurethane foam	12 months delays
BOL/FUM/35/INV/16	UNDP	Terminal methyl bromide phase-out, excluding QPS applications	12 months delays
CHI/FUM/32/INV/143	UNDP	Demonstration and phase-out project for methyl bromide soil fumigation for fruit tree production and replant	12 months delays
CHI/SOL/41/TAS/154	UNDP	Technical assistance to phase-out ozone depleting solvents	12 months delays
IND/ARS/38/INV/358	UNDP	Terminal umbrella project in the aerosol sector	12 months delays
IND/ARS/41/TAS/368	UNDP	MDI Transitional Strategy	12 months delays
JAM/PHA/37/TAS/17	UNDP	Terminal phase-out management plan for CFCs: retrofitting/replacement programme	12 months delays
LIB/FOA/32/INV/05	UNDP	Phaseout of CFC-11 by conversion to methylene chloride in the manufacture of flexible polyurethane foam at Sebha Unit	12 and 18 months delays
LIB/FOA/32/INV/08	UNDP	Phaseout of CFC-11 by conversion to methylene chloride in the manufacture of flexible polyurethane foam at Ben Ghazi Unit	12 and 18 months delays
MEX/FOA/42/INV/117	UNDP	Foam sector ODS phase-out plan (second tranche)	12 months delays
NIR/SEV/36/CPG/102	UNDP	Country programme update	12 months delays
PAR/SOL/45/TAS/14	UNDP	Technical assistance for the phase-out of ODSs in the solvent sector	12 months delays
SRL/FUM/38/TAS/21	UNDP	Methyl bromide phase-out for all remaining uses excluding QPS applications	12 and 18 months delays
SYR/REF/38/INV/86	UNDP	Sector phase out plan for CFCs in the refrigeration manufacturing sector (except domestic refrigeration)	12 months delays
URU/ARS/38/TAS/40	UNDP	Transition strategy for the phase-out of CFCs use in MDIs	18 months delays
URU/ARS/43/INV/42	UNDP	Phase-out of CFC consumption in the manufacture of aerosol metered dose inhalers (MDIs)	18 months delays
ARG/REF/32/TRA/115	UNEP	Training programme for the refrigeration servicing sector (Phase III)	12 months delays
ARG/SEV/30/TAS/104	UNEP	Policy assistance for the design and implementation of an ODS import/export licensing system for Argentina	12 and 18 months delays
GLO/ARS/39/TAS/246	UNEP	Development of guidelines to promote safety an aerosol conversions	12 months delays
GLO/SEV/34/TAS/230	UNEP	Study on development of ODS phase-out strategy for SMEs	18 months delays
GLO/SEV/39/TAS/248	UNEP	Production of OzonAction Newsletter in Russian, translation of 4 refrigeration/customs training modules into Russian, and reprinting and updating existing publications	12 months delays
GLO/SEV/45/TAS/262	UNEP	Assistance for regional awareness raising (2005)	12 months delays
SOM/SEV/35/TAS/01	UNEP	Formulation of national phase out strategy	12 months delays
BAH/SOL/45/TAS/14	UNIDO	Training and awareness workshop in the solvents and process agents (CTC and TCA) sector	12 months delays
BDI/SOL/45/TAS/19	UNIDO	Training and awareness workshop in the process agents (TCA) sector	12 months delays
CPR/FOA/35/INV/379	UNIDO	Phase out of CFC-12 in the manufacturing of extruded polystyrene foams through the use of butane as a blowing agent at 7 enterprises (terminal umbrella project)	12 months delays
EGY/SOL/44/INV/89	UNIDO	Terminal solvent sector umbrella project	12 months delays
ELS/FUM/45/TAS/18	UNIDO	Training and awareness workshop in the fumigants sector (methyl bromide)	12 months delays
ETH/SOL/45/TAS/15	UNIDO	Training and awareness workshop in the solvents and process agents (CTC and TCA) sector	12 months delays
IDS/SOL/44/INV/162	UNIDO	Plan for terminal phase-out of ODS in the solvent sector	12 months delays
IRA/FOA/28/INV/50	UNIDO	Phasing out ODS in manufacturing of flexible PU slabstock foam through the use of liquid CO2 blowing	12 months delays

Code	Agency	Project Title	Category of Delays
		technology at Bahman Plastic Co.	
IRA/FOA/37/INV/149	UNIDO	Phasing out of ODS in the manufacture of flexible slabstock foam through the use of LCD blowing technology at Esfanj Shirvan Co.	12 months delays
IRA/REF/28/INV/51	UNIDO	Replacement of CFC-12 refrigerant by HFC-134a at Iran Compressor Manufacturing Company (ICMC)	12 months delays
MOR/FUM/32/INV/41	UNIDO	Phase out of methyl bromide for soil fumigation in strawberry production	12 months delays
OMA/HAL/46/TAS/12	UNIDO	Halon consumption phase-out through a technical assistance programme and a halon recycling	12 months delays
PAK/PAG/35/INV/42	UNIDO	Conversion of carbon tetrachloride as process solvent to 1,2-dichloroethane at Himont Chemicals Ltd.	12 months delays
TUN/SOL/45/TAS/45	UNIDO	Training and awareness workshop in the solvents and process agents (CTC and TCA) sectors	12 months delays
VEN/FUM/45/TAS/104	UNIDO	Training and awareness workshop in the fumigants sector (methyl bromide)	12 months delays
