EXECUTIVE COMMITTEE OF THE MULTILATERAL FUND FOR THE IMPLEMENTATION OF THE MONTREAL PROTOCOL Fifty-fifth Meeting Bangkok, 14-18 July 2008

# **CONSOLIDATED PROGRESS REPORT AS AT 31 DECEMBER 2007**

Pre-session documents of the Executive Committee of the Multilateral Fund for the Implementation of the Montreal Protocol are without prejudice to any decision that the Executive Committee might take following issuance of the document.

1. This consolidated progress report summarises progress and financial information provided by the implementing and bilateral agencies<sup>1</sup> in both their narrative and database formats. The Secretariat combined the databases from all of the agencies to produce this report, which consists of three parts and two annexes. Part I is a summary of implementation progress at the country level, Part II is a summary of activities to the end of 2007, and Part III contains comments and recommendations made by the Fund Secretariat. Annex I contains project implementation data, by country, and Annex II is an analysis of data from the progress reports.

# PART I: SUMMARY OF IMPLEMENTATION PROGRESS AT THE COUNTRY LEVEL

2. This section is a summary of implementation progress at the country level and for multi-year agreements (MYAs).

## Summary of progress during 2007 at the country level

3. The Secretariat reviewed the status of implementation on a country-by-country basis taking into account implementation delays that have occurred with respect to planned completion dates that had been reported in 2006, the potential impact of these delays on phase-out, the rate of planned disbursements, and the rate of completion in light of ozone-depleting substances (ODS) consumption data reported by Article 5 countries. The reference to "net ODS emissions due to delays" is based on the application of the average monthly amount of ODS to be phased out for the project, multiplied by the number of months of the delay.

4. Of the countries that reported 2007 data, only Ecuador increased its consumption in 2007 (by 36.7 ODP tonnes), which may have been related to implementation delays.

5. Based on revised planned completion dates submitted by bilateral and implementing agencies as per decision 53/38 or planned completion dates reported in the 2006 progress reports, and the results reported in the 2007 progress reports, the agencies completed 52 per cent of the projects they had planned to complete in 2007 and achieved 58 per cent of the phase-out planned.

### Multi-year agreements

6. Within the context of achieving compliance with one or more of the Montreal Protocol's control measures, the Executive Committee has approved 136 multi-year agreements (MYAs) (including approvals at the 54<sup>th</sup> Meeting). An MYA addresses the fulfilment of the Montreal Protocol's requirements by a country with respect to one or more of the groups of controlled substances.

7. The breakdown of MYAs covered by this progress report is indicated in Tables 1 and 2.

<sup>&</sup>lt;sup>1</sup> Progress report data from Finland, Japan and Switzerland were not available for inclusion in this report. Data from their progress reports for 2006 was included, along with approval information for projects approved in 2007.

# Table 1

# **BREAKDOWN OF MULTI-YEAR AGREEMENTS**

Agreement (total agreements)	Party
National ODS or CFC phase-out	Afghanistan, Albania, Algeria, Antigua and Barbuda, Argentina, Bahamas,
plans (96)	Bahrain, Bangladesh, Belize, Bolivia, Bosnia and Herzegovina, Brazil,
	Burkina Faso, Cambodia, Cameroon, Cape Verde, Chad, Colombia,
	Comoros, Congo, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Democratic
	Republic of the Congo, Djibouti, Dominica, Dominican Republic, Ecuador,
	Egypt, El Salvador, Eritrea, Gabon, Gambia, Georgia, Ghana, Grenada,
	Guyana, India, Indonesia, Islamic Republic of Iran, Kenya, Democratic
	People's Republic of Korea, Kuwait, Kyrgyzstan, Lao People's Democratic
	Republic, Lebanon, Lesotho, Liberia, Libyan Arab Jamahiriya, the Former
	Yugoslav Republic of Macedonia, Madagascar, Malawi, Malaysia, Maldives,
	Mali, Mauritius, Mauritania, Mexico, Republic of Moldova, Mongolia,
	Montenegro, Namibia, Nepal, Niger, Nigeria, Oman, Panama, Papua New
	Guinea, Paraguay, Philippines, Qatar, Romania, Rwanda, Saint Kitts and
	Nevis, Saint Lucia,
	Saint Vincent and the Grenadines, Samoa, Sao Tome and Principe,
	Saudi Arabia, Senegal, Serbia, Seychelles, Sudan, Syrian Arab Republic,
	United Republic of Tanzania, Thailand, Togo, Trinidad and Tobago, Tunisia,
	Turkey, Uruguay, Bolivarian Republic of Venezuela, Vietnam, Zambia, Zimbabwe
CFC production phase-out	Argentina, China, India, Mexico, Bolivarian Republic of Venezuela
agreements (5)	Argentina, China, India, Mexico, Donvarian Republic or Venezuera
Halon production phase-out plans (1)	China
ODS production (2)	Democratic People's Republic of Korea, Romania
Methyl bromide production (1)	China
TCA production (1)	China
CTC phase-out plan sector agreement	China (2), India, Democratic People's Republic of Korea, Pakistan
(consumption or production) (5)	
Accelerated phase-out plan for CFC,	China
CTC and halon (1)	

8. The consumption sector phase-out agreements, which are indicated in Table 2, represent a total cost to the Fund (agreed in principle) of US \$282.5 million, including agency fees. Of this, US \$259.4 million has been transferred to the agencies.

#### Table 2

Sector (total agreements)	Party
Foam (1)	China
Halon (1)	China (consumption portion of China's halon sector plan)
Methyl bromide (15)	Argentina, China, Costa Rica, Honduras, Kenya, Lebanon, Libyan
	Arab Jamahiriya, Malawi, Mexico, Morocco, Syrian Arab
	Republic, Thailand, Turkey, Vietnam, Zimbabwe
Solvent (2)	China, Nigeria
RMP (2)	Algeria, Pakistan
Refrigeration servicing (1)	China
Refrigeration domestic (2)	China, Democratic People's Republic of Korea
Tobacco (1)	China

#### CONSUMPTION SECTOR PHASE-OUT AGREEMENTS

9. Progress reporting on most sectoral phase-out programmes is provided by the implementing agencies in their requests for funding of annual work programmes.

10. The Executive Committee has cancelled one MYA, which was for the phase-out of all remaining uses of methyl bromide in soil application pest control in Chile. The cancellation was at the request of the Government of Chile.

11. Table 3 presents the number of ongoing MYAs and individual projects.

#### Table 3

# NUMBER OF ONGOING MULTI-YEAR AGREEMENTS AND INDIVIDUAL PROJECTS

		UNDP	UNEP	UNIDO	World Bank	Bilateral	Total
Multi-Year Projects		70	46	66	41	43	266
Individual Projects	With Phase-Out	40	41	35	8	60	184
(investment/training/	Without Phase-	26	42	6	5	15	94
technical assistance/	Out						
demonstration projects)	Sub-Total	66	83	41	13	75	278
Total		136	129	107	54	118	544

12. The total number of ongoing MYAs is 266 (including multiple tranches for some projects). The total number of individual investment/training/technical assistance/demonstration projects is 278, of which 184 are projects that result in phase-out of some ODS. UNEP is implementing the highest number of individual projects (83) followed by bilateral agencies (75), UNDP (66) and UNIDO (41). The World Bank is only implementing 13 individual projects. The largest number of MYAs is being implemented by UNDP (70) followed by UNIDO (66), UNEP (46), bilateral agencies Canada, France, Germany, Japan , Sweden, and Switzerland (43), and the World Bank (41).

### PART II: SUMMARY OF PROGRESS UP TO AND INCLUDING 2007

13. Annex II provides a detailed analysis of the data contained in the progress reports. What follows is a summary of progress in the implementation of projects and activities supported by the Multilateral Fund, up to 31 December 2007:

- Phase-out: 405,422 ODP tonnes had been phased out at the end of 2007, of an (a) expected total of 419,896 ODP tonnes from projects approved up to the end of 2007 (excluding cancelled and transferred projects). In 2007 alone. 31,346 ODP tonnes (including production) were phased out and 25,680 ODP tonnes were approved for phase-out. By the end of 2006, 374,199 ODP tonnes had been phased out, of an expected total of 390,113 ODP from approved projects (excluding cancelled and transferred projects), which included 68,533 ODP tonnes actually phased out in 2006 (including production) and 28,816 ODP tonnes approved for phase out.
- (b) Disbursements/Approvals: US \$1.74 billion had been disbursed out of the total US \$2.02 billion approved for disbursement up to the end of 2007 (excluding agency fees). This represents a rate of disbursement of 86 per cent. In 2007, US \$146.54 million were disbursed and a further US \$121.71 million were approved.
- (c) **Cost-effectiveness:** The average cost-effectiveness of investment projects was US \$3.96/kg for completed projects and US \$4.88/kg for ongoing projects.
- (d) **Number of projects completed:** 4,654 projects of the 5,429 projects (excluding closed or transferred projects) financed by the Fund were completed by the end of 2007. This represents a completion rate of 86 per cent.
- (e) **Speed of delivery—investment projects:** On average, investment projects have been completed 34 months after their approval by the Executive Committee. First disbursements under these projects were made, on average, 15 months after they had been approved. On an agency basis, first disbursement for completed projects has taken place 13 months after approval for UNDP, nine months for UNIDO and 25 months for the World Bank.
- (f) Speed of delivery—non-investment projects: On average, non-investment projects have been completed 34 months after their approval by the Executive Committee. First disbursements under these projects were made, on average, 10 months after they had been approved. On an agency basis, first disbursement for completed non-investment projects took place 12 months after approval for UNDP, eight months for UNEP, 10 months for UNIDO and 18 months for the World Bank.

- (g) **Project preparation:** Of the 1,147 project preparation activities approved to the end of 2007, 1,083 have been completed. Implementing agencies carried over balances of US \$1,550,387 from 2007 (including approximately US \$527,980 for completed project preparation), which are available for new project preparation activities. This is in addition to the US \$1,305,000 approved in 2008.
- (h) Implementation delays: Ongoing investment projects are experiencing an average delay of 23 months. A list of 57 projects with implementation delays is annexed to this report, and a report on these delays will be submitted to the 56<sup>th</sup> Meeting. The total level of net emissions of ODS due to implementation delays is 18,271 ODP tonnes, which is below the level that was reported last year (22,652 ODP tonnes).

## PART III: COMMENTS AND RECOMMENDATIONS OF THE FUND SECRETARIAT

## COMMENTS

14. The Secretariat's comments address common issues that have been identified during the review of the agencies' progress reports.

15. Most of the issues are addressed in detail in the individual business plans. The Secretariat's comments on the individual progress reports highlight the slow disbursement in MYAs approved over 1.5 years ago, in particular, cases where the necessary project document signatures, MOUs or grant agreement approvals had not been obtained. Those comments note cases of delayed project preparation, slow implementation of RMPs that are preventing the submission of TPMPs, and problems associated with reporting on disbursement and release of funding for institutional strengthening projects. The Executive Committee normally requests additional status reports for these projects on an individual agency basis.

16. The following two issues are highlighted in this document: ongoing projects converting to HCFC-based equipment and the status of the Executive Committee's funding window for chiller projects.

### **Conversions to HCFC-based equipment**

17. There are still approved projects under implementation that will result in the conversion to HCFC-based equipment. One example is UNDP's terminal umbrella project for the phase-out of the use of CFC-11 in the manufacture of polyurethane foam in Chile (CHI/FOA/48/INV/161). Another is UNIDO's project in Algeria regarding the conversion of CFC-11 to HCFC-141b and CFC-12 to HFC-134a technology in the last group of commercial refrigerator manufactures (refrigeration sector terminal project), (ALG/REF/44/INV/62).

18. The World Bank has no further plans for conversion to HCFCs in the phase-out of residual CFCs in the foam sector (second tranche) (IDS/FOA/48/INV/172). A total of 36 companies have been financed under the sector plan. Of these, 25 companies are rigid spray foam companies that converted to HCFC-141b. As all funding has been committed, there are no further plans for conversion to HCFC-based equipment.

19. The Executive Committee may wish to consider whether to urge the countries and the companies involved in ongoing projects to convert to HCFC-based equipment to consider using the approved funding for conversion to non-HCFC alternatives where possible.

### Funding window for chiller projects

20. At its 47<sup>th</sup> Meeting, the Executive Committee approved several chiller projects with the provision that financial resources outside of the Multilateral Fund be obtained due to the energy savings associated with the projects and given the fact that most countries had already received full funding agreements for CFC phase-out (decision 46/33). Although there has been some progress in 2007, the progress is mixed.

21. For the demonstration project on the replacement of CFC centrifugal chillers in Croatia, Macedonia, Romania, and Serbia and Montenegro (EUR/REF/47/DEM/06), UNIDO had received partial counterpart funding to enable the disbursement of US \$381,771 of the US \$1.1 million approved for the project. Twelve chillers are to be purchased, but purchase orders have only been awarded for five. Of these, four have been delivered and started up. An additional chiller in Montenegro was procured and delivered in February 2008. Working arrangements for the implementation of the remaining seven chillers (three in Serbia and four in Croatia) have been prepared and signed with counterparts.

22. The demonstration project for integrated management of the centrifugal chiller sub-sector in the Caribbean, focusing on application of energy-efficient CFC-free technologies for replacement of CFC-based chillers (LAC/REF/47/DEM/36), is being co-financed by UNDP's TTF. UNDP reported that it focuses on four countries – the Dominican Republic, Jamaica, Barbados, and Trinidad and Tobago – as they are the largest and most industrialized in the sub-region.

23. UNDP reported that in Brazil, the demonstration project for integrated management of the centrifugal chiller sub-sector, focusing on application of energy-efficient CFC-free technologies for replacement of CFC-based chillers (BRA/REF/47/DEM/275), has not yet begun. UNDP reported that this is because project co-financing must be implemented in coordination with the GEF component. The necessary MOU has been signed and the project has been approved by the GEF Council, and is awaiting GEF management endorsement. The project document is being finalized in cooperation with the Inter-American Development Bank.

24. In Colombia, UNDP has reported that the demonstration project for integrated management of the centrifugal chiller sub-sector, focusing on application of energy-efficient CFC-free technologies for replacement of CFC-based chillers (COL/REF/47/DEM/65), is in its early stages. It reported that the GEF has approved the project and the co-financing is secured, the project cannot be implemented until there is a second approval by the GEF.

25. No funds have been disbursed under the global technical assistance programme in the chiller sector (GLO/REF/48/TAS/275) under UNEP implementation, which was approved in 2006, although UNEP has reported that activities are ongoing.

26. Similarly, none of the US \$6.88 million approved for the World Bank's global chiller replacement project (GLO/REF/47/DEM/268) that is intended to provide assistance to India, China, Indonesia, Malaysia and the Philippines had been disbursed in 2007. With respect to the project in India, there is a delay due to a decision by India to seek GEF resources at a later date.

27. With respect to the 2006 work programme of the national CFC phase-out plan in Argentina (ARG/PHA/47/INV/148), the World Bank reported that it had identified a list of potential chillers to be replaced by the project in mid-2005, which was in advance of project approval in November 2005. By late 2007, it was decided that Argentina would not participate in the Global Chiller Replacement programme because of difficulties in obtaining the seed money (mainly GEF funds) to make the programme worthwhile. New terms of reference have been developed for a consultancy to propose the best modality for chiller replacement using the national CFC phase-out plan funds and to identify the chillers that will be replaced. This consultancy is currently underway.

28. Several of these projects are delayed pending the procurement of the necessary co-funding. The resources from the Multilateral Fund were released to the agencies at the end of 2005 following their approval in November 2005. Nevertheless, two years later, most disbursements are still awaiting initiation of the projects. The Executive Committee may wish to consider requesting the Multilateral Fund Secretariat to consult the GEF Secretariat on expediting the release of GEF co-funding for projects already approved by the Executive Committee, in order to prevent further delays in the use of approved Multilateral Fund resources.

# RECOMMENDATIONS

- 29. The Executive Committee may wish to:
  - (a) Note the Consolidated Progress Report of the Multilateral Fund as contained in UNEP/OzL.Pro/ExCom/55/9;
  - (b) Urge the countries and the companies involved in ongoing projects to convert to HCFC-based equipment to consider using the approved funding for conversion to non-HCFC alternatives where possible; and

(c) Request the Multilateral Fund Secretariat to consult the GEF Secretariat on expediting the release of GEF co-funding for projects already approved by the Executive Committee, in order to prevent further delays in the use of approved Multilateral Fund resources

### Annex II

#### ANALYSIS OF PROGRESS REPORT DATA

1. In the databases submitted to the Fund Secretariat implementing and bilateral agencies provided detailed information on their respective shares of the 5,689 projects (including closed and transferred projects) approved by the Executive Committee through to 31 December 2007. In 2007, 216 new projects and activities were approved. The Executive Committee requested that detailed information on a project-by-project basis be made available to Committee members, with a printout available upon request (decision 19/23). The database for the Consolidated Progress Report is provided on the Executive Committee's intranet in the spreadsheet programme, Microsoft Excel 2002.

#### **OVERVIEW OF APPROVED FUNDING**

2. The Executive Committee approved around US \$2.02 billion for the implementation of investment and non-investment projects through to the end of 2007. In addition, about US \$222.65 million has been approved for agency fees and administrative support. This level of funding is expected to result in the phase-out of 419,896 ODP tonnes of ODS consumption and production. Table 1 summarises the level of approved funding, by sector and by agency, and indicates that most approvals of the Executive Committee have been in the refrigeration (US \$523.1 million) and foam (US \$359.4 million) sectors.

#### APPROVED FUNDING BY SECTOR AND AGENCY AS AT 31 DECEMBER 2007

#### **ANNUAL SUMMARIES**

3. Table 2 presents an overview of status, by year. The data is presented according to the year when a project was approved by the Executive Committee. It treats all approvals (investment and non-investment projects) equally (i.e., an investment project or annual funding tranche of a multi-year agreement of US \$1 million is considered one project as is a country programme preparation of US \$30,000).

4. Key indicators from the annual summary in Table 2 are: the percentage of projects completed, ODP phased out, and percentage of funds disbursed. In reviewing the data on funds disbursed, it should be noted that there are four types of disbursements: during implementation, after implementation, for retroactively-financed projects, and for time-sensitive projects.

#### Table 2

#### ANNUAL SUMMARY

\*Excludes Closed and Transferred Projects

5. Of the US \$2.02 billion in approved funding (including adjustments), the agencies (including bilateral agencies) have disbursed around US \$1.74 billion. Projects approved by the Executive Committee have thus far resulted in the permanent annual phase-out of 405,422 ODP tonnes of consumption and production of which 360,558 ODP tonnes is from completed projects and 44,864 ODP tonnes is from ongoing projects. Table 2 indicates that the percentage phased out in 1991, 1993, 1994 and 2003 exceeds 100 per cent. This is due to the phase-out of larger amounts of consumption than those originally indicated in some of the project proposals.

6. All projects and activities approved between 1991 and the end of 1997 have now been completed, with the exception of an institutional strengthening project in Uganda (UNEP implementation), a refrigeration project in Argentina (World Bank implementation) and two recovery and recycling technical assistance projects in Lebanon and Morocco (France implementation).

#### SUMMARY DATA BY PROJECT TYPE

7. The Executive Committee approves several different types of projects including: country programme preparation, demonstration projects, institutional strengthening, project preparation, investment projects (including annual tranches of MYAs), training projects and technical assistance. Technical assistance includes UNEP's clearing house and networking activities as well as publications, refrigerant management plans, and recovery and recycling projects. A summary of the status of projects, by category, is presented in Table 3.

#### Table 3

### SUMMARY DATA BY PROJECT TYPE

\*Excludes Closed and Transferred Projects.

8. Of the 5,429 projects approved by the Executive Committee, 2,232 (about 41 per cent) are classified as investment projects. Investment projects represent around US \$1.69 billion of the US \$2.02 billion approved for activities under the Multilateral Fund (83 per cent of the total funds approved). The second largest number of projects, in terms of approved funding, is classified as technical assistance, for which the Committee has approved a total of over US \$156.32 million.

9. By the end of 2007, 99 per cent of country programme preparation projects had been completed and 97 per cent of the funds allocated for project preparation activities had been disbursed.

#### UNEP/OzL.Pro/ExCom/55/9 Annex II

10. By the end of 2007, 89 per cent of investment projects had been completed, 85 per cent of demonstration projects had been completed, and 77 per cent of approved funds had been disbursed for institutional strengthening projects.

### **COMPLETED PROJECTS**

11. Completed projects/activities are defined in decisions 17/22 and 19/23 as projects that have been commissioned and where the ODS addressed has been phased out. A further decision (decision 28/2) extends the definition to cover situations where no further use of CFCs in the sectors covered is in evidence, where an alternative product is being produced (and/or production has begun), and where the equipment using CFCs has been destroyed/dismantled/rendered unusable with respect to ODSs. Work programme activities without an ODS phase-out are considered completed when the activity is finished (e.g., for a workshop, when it has been conducted).

12. Overall, 98 per cent of the funds approved for completed investment projects have been disbursed. The reason that 100 per cent of funds have not been disbursed for completed projects is that it may take from six months to one year to finalise accounting records.

### **Completed Investment Projects**

13. Table 4 presents information on investment projects that have been completed since 1991. The table presents the data in total, followed by data according to region, sector, implementation characteristics, and disbursement method.

#### Table 4

After Implementation	48	17,182,619	100%	2,510	0	21	24	\$6.84
Retroactive Funding	36	14,138,587	100%	2,100	500	15	8	\$5.44

\* No funds are listed for the multiple sector investment project, but are recorded in appropriate sector.

\*\* Total phased out for the Fund is 405,422 includes 10,310 from completed non-investment projects and 44,864 from ongoing projects. Note: The sum of each section (Region, Sector, etc.) equals the Grand Total.

14. As of 31 December 2007, investment projects representing around US 1.39 billion have been completed, resulting in the permanent phase-out of 350,248 ODP tonnes<sup>2</sup> with an overall cost-effectiveness of US 3.96/kg ODP phased out.

<sup>&</sup>lt;sup>2</sup> Total phased out for the Fund includes 350,248 ODP tonnes from completed investment projects, 10,310 ODP tonnes from completed non-investment projects and 44,864 from ongoing projects.

15. The average time from approval to first disbursement was 15 months and the average project duration was 34 months. Project duration is only slightly impacted by retroactive projects (i.e., projects funded after phase-out) since they represent only around two per cent of the total number of completed investment projects.

16. On a regional basis, 1,194 investment projects were completed in the Asia and Pacific region, 450 investment projects in Latin America and the Caribbean, 257 in Africa, and 82 in Europe.

## **Completed Non-Investment Projects**

17. Table 5 presents data on cumulative completed non-investment projects. Since 1991, 1,588 non-investment projects have been completed, representing funding support from the Multilateral Fund of around US \$213.5 million. Ninety-seven (97) per cent of the funds for completed non-investment projects have been disbursed. Fifty-four (54) per cent of completed non-investment funding is in the sector identified as "several", which means those projects that have an impact on more than one sector (such as UNEP's clearinghouse and networking activities).

#### Table 5

#### CUMULATIVE COMPLETED NON-INVESTMENT PROJECTS

After Implementation	25	2,294,764	100%	14	21
Retroactive Funding	0	0	0%	n/a	n/a

18. The average time from approval to first disbursement for non-investment projects is much shorter than for investment projects (10 versus 15 months). Non-investment projects have been completed, on average, 34 months after they were approved by the Executive Committee. This figure is influenced by the large number of projects (863 of 1,588) classified in the sector called "several", which had an average time from approval to completion of 30 months. Non-investment projects in the other sectors (e.g., *inter alia*, solvent and multiple sectors) were completed between 23 and 58 months after they had been approved.

19. Almost all projects (1,322 of 1,588) were implemented by the agency concerned rather than through national implementation. Agency implementation of non-investment projects normally does not require legal agreements, which may explain the shorter period of time (32 months) compared with nationally-implemented non-investment projects (41 months).

20. Non-investment projects include work programme activities, excluding project preparation.

## **ONGOING PROJECTS**

21. Ongoing projects are all projects that have been approved by the Executive Committee and were under implementation as of 31 December 2007. Key indicators in the database of progress towards implementing ongoing projects include:

- (a) Percentage of funds disbursed and percentage of projects that have begun disbursing funds;
- (b) The level of funding expected to be disbursed by the end of the year (funds disbursed plus estimated disbursements in 2008) as a percentage of the approved funding;
- (c) The average length of projected delay in implementation (project completion per proposal and currently planned date of completion); and
- (d) Information provided by the implementing agencies in the remarks column of the project-by-project listing in the database.

#### **Ongoing Investment Projects**

22. Table 6 presents information on the status of investment projects under implementation by region, sector, and implementation characteristics.

## <u>Table 6</u>

\*Based on the ODS to be phased out according to the proposal.

23. There are currently 249 investment projects under implementation. These projects represent approved funding (plus adjustments) of over US \$287.94 million. Around 36 per cent of the funds have already been disbursed. The overall average cost-effectiveness of ongoing investment projects is US \$4.88/kg ODP to be phased out, as approved.

24. Of the ongoing investment projects 46 per cent (114 out of 249) are for countries in the Asia and Pacific region, representing almost 59 per cent (US \$168.53 million) of the funds approved for ongoing investment projects. The Latin American and the Caribbean region has 66 investment projects under implementation, valued at US \$83.56 million, Africa has 48 projects (US \$26.72 million) and Europe has 21 projects (US \$9.13 million).

25. About 33 per cent of the funds approved for ongoing investment projects, representing around US \$94.3 million, are in the phase-out plan sector. The second largest funding allocation for ongoing investment projects is for the production sector (US \$57.2 million) followed by the fumigants sector (US \$38.96 million). The remaining sectors have the following number of investment projects under implementation: aerosol (10), foam (9), solvents (9), halon (4), process agent (7) and refrigeration (24).

26. Of the 249 ongoing investment projects, 57 per cent (143) have begun disbursing funds.

27. Most ongoing investment projects are under agency implementation (127 projects) but there are 122 projects under national implementation. Of agency-implemented ongoing investment projects, 80 per cent have begun disbursement compared with 34 per cent of nationally-implemented ongoing investment projects.

28. The average number of months from approval to first disbursement is 9 months. The average duration of an ongoing investment project is 39 months. Typically, ongoing investment projects are completed 23 months later than originally planned, which could be considered the average delay.

# **Ongoing Non-Investment Projects**

29. Table 7 presents information on the status of non-investment projects under implementation by region, sector, and implementation characteristic.

### Table 7

#### CUMULATIVE ONGOING NON-INVESTMENT PROJECTS

30. There are currently 462 non-investment projects under implementation, representing approved funding (plus adjustments) of around US \$71.09 million. Roughly 24 per cent of the funds for ongoing non-investment projects have been disbursed.

31. The largest amount of funding for non-investment projects, by region, is US \$18.62 million for the Asia and the Pacific region. Funding for ongoing non-investment projects in other regions is as follows: Latin America and the Caribbean, US \$17.88 million; Africa, US \$15.14 million; and, Europe, US \$3.24 million. Ongoing global activities are valued at a total of US \$16.21 million.

32. On a sectoral basis, most non-investment funding is applied to the refrigeration sector (US \$27.44 million for 143 projects). There are 197 ongoing non-investment projects in the "several" sector category (US \$27.21 million), 75 in the phase-out plan sector (US \$8.87 million), 18 in the fumigant sector (US \$3.95 million), 18 in the halon sector (US \$2.71 million) and 11 projects for all other sectors (US \$907,690).

33. Of the 462 ongoing non-investment projects, 61 per cent (282 projects) have begun disbursing funds.

34. The average number of months from approval to first disbursement is 14 months. On average, ongoing non-investment projects are completed 44 months from the date of approval, which represents a delay of 17 months.

# **PROJECT PREPARATION**

35. Project preparation requests are included in annual work programmes and amendments to work programmes. Project preparation leads to investment projects in general and, in some cases, demonstration projects (in particular for methyl bromide) and the implementation of projects included in refrigerant management plans.

36. Table 8 presents data on both completed and ongoing project preparation activities. The implementing agencies have completed 1,083 project preparation activities for which there remains a balance of US \$527,980 that has not yet been disbursed. This figure is around US \$121,839 higher than it had been in 2006. On average, it has taken 17 months to complete project preparation.

37. Implementing agencies have a balance of US \$1.55 million carried over for project preparation activities in 2007. Ongoing project preparation activities are expected to take 27 months to complete. This is 10 months longer than for completed project preparation.

38. On a regional basis, most of the ongoing project development activities (52 per cent) are in Africa. Most of the ongoing project preparation is occurring in the phase-out plan sector (US \$938,000).

# PROJECT IMPLEMENTATION DELAYS

39. The Executive Committee has defined projects with implementation delays as projects approved over 18 months with disbursement less than one per cent, or projects that are expected to be completed 12 months later than forecast in the last progress report (decision 22/61).

40. In 2007, the Secretariat identified 57 projects with implementation delays, 25 of which had been classified with implementation delays in 2006. The total number of projects classified with implementation delays decreased in 2007 compared to 2006 (62 projects). However, it should be noted that pursuant to decision 36/14, the following types of projects are no longer so classified: institutional strengthening, halon banking, customs training, recovery and recycling, and demonstration projects. Decision 36/14 does, however, request that the Secretariat continue to monitor these types of projects, as appropriate. A list of the projects with implementation delays is attached as an appendix to this Annex. The Executive Committee maintains a "watching brief" on these projects as per decision 23/4, and the implementing agencies will be requested to report on these projects to the 56<sup>th</sup> Meeting of the Executive Committee.

41. A separate document entitled "Status on implementation of delayed projects and compliance" (UNEP/OzL.Pro/ExCom/55/6) addresses follow-up information on project implementation delays that had been identified in the 2006 Progress Report.

### **CLOSED AND TRANSFERRED PROJECTS**

42. Table 9 presents a summary of closed and transferred projects. Closed projects are cancelled projects. Of the 220 cancelled projects, 87 were project preparation activities. The World Bank has the highest number of closed projects (92). Remaining balances for closed projects are the result of possible unpaid commitments against these projects; however, projects should be classified as closed only after the balances have been returned. Implementing agencies provide a report on any balances from cancelled projects in the context of the Report on Balances and Availability of Resources (UNEP/OzL.Pro/ExCom/55/4). Four projects were cancelled and closed in 2007.

43. Transferred projects are projects that have been transferred from one agency to another. There are 40 such transferred projects.

# Table 9

# CLOSED AND TRANSFERRED PROJECTS SUMMARY

Agency	Number of projects	Approved funding (US\$)	Adjustments (USS)	Approved funding plus adjustment (US\$)	Funds disbursed (US\$)	Balances (US\$)	Percent of funds disbursed	Consumption ODP to be phased out	Consumption ODP phased out
Closed Project	ets				•				
UNDP	69	15,615,129	-9,474,809	6,140,320	6,140,320	0	100%	574	528

# Appendix

# **PROJECTS WITH IMPLEMENTATION DELAYS**

Code	Agency	Project Title	Category of Delays
JAM/FUM/47/TAS/22	Canada	Technical assistance to phase-out the use of methyl bromide	12 months delays
MEX/FUM/42/TAS/122	Canada	Technical assistance to comply with 2005 phase-out of 20% of methyl bromide	12 months delays
MOR/FUM/29/INV/37	France	Phase-out of methyl bromide use in the cut flower and banana production	12 months delays
SYR/REF/29/INV/53	France	Conversion from CFC-12 to HFC-134a technology in the manufacture of commercial refrigeration equipment	12 and 18 months delays
		at Shoukairi and Co.	
YEM/FUM/41/TAS/21	Germany	Technical assistance programme for the phase-out of methyl bromide in agriculture	12 months delays
ARG/REF/18/INV/39	IBRD	Elimination of CFC in the manufacturing plant of domestic refrigerators of Neba, S.A.	12 months delays
ECU/FUM/26/TAS/23	IBRD	Demonstration project for testing methyl bromide alternatives in soil treatment for the flower growing industry	12 months delays
JOR/HAL/32/INV/69	IBRD	Terminal halon-1211 and halon-1301 phase-out umbrella project for fire equipment manufacturers and	12 months delays
		suppliers in Jordan converting to ABC powder, CO2, HFC-227ea and inert gases as substitutes	
THA/HAL/32/INV/134	IBRD	Terminal halon-1211 and halon-1301 phase-out project for fire equipment manufacturers and suppliers	12 months delays
		converting to ABC powder, CO2, HFC-227ea and inert gases	
NIR/SEV/38/TAS/104	Japan	Assistance for a national information, education and communication campaign for compliance with the	12 months delays
		Montreal Protocol	
SRL/PHA/43/TAS/26	Japan	National compliance action plan: incentive programme for commercial and industrial refrigeration end-users	18 months delays
SRL/PHA/43/TAS/27	Japan	National compliance action plan: MAC recovery/recycling and retrofit	12 months delays
SRL/PHA/43/TAS/28	Japan	National compliance action plan: recovery and recycling programme	12 and 18 months delays
GLO/SEV/47/TAS/269	Portugal	Communication and cooperation support to Portuguese speaking countries (Angola, Cape Verde, East Timor,	18 months delays
		Guinea Bissau, Mozambique and Sao Tome and Principe)	
MEX/FUM/42/TAS/118	Spain	Technical assistance to comply with 2005 phase-out of 20% of methyl bromide	12 months delays
AFR/FUM/38/TAS/32	UNDP	Technical assistance for methyl bromide reductions and formulation of regional phase-out strategies for low-	12 months delays
		volume consuming countries	
ARG/SEV/45/TAS/144	UNDP	Assistance to carry out an HCFC survey	12 months delays
BRA/SEV/45/TAS/271	UNDP	Assistance to carry out an HCFC survey	12 months delays
CHI/FOA/48/INV/161	UNDP	Terminal umbrella project for phase-out of the use of CFC-11 in the manufacture of polyurethane foam	18 months delays
CHI/SOL/41/TAS/154	UNDP	Technical assistance to phase-out ozone depleting solvents	12 months delays
COL/PAG/48/INV/66	UNDP	Phase-out of CTC as process agent in the elimination of nitrogen trichloride during chlorine production at	12 and 18 months delays
		Prodesal S.A.	
COL/SEV/45/TAS/62	UNDP	Assistance to carry out an HCFC survey	12 months delays
FIJ/PHA/47/TAS/15	UNDP	Implementation of the TPMP (investment component)	18 months delays
IDS/SEV/45/TAS/169	UNDP	Assistance to carry out an HCFC survey	12 months delays
IND/ARS/41/TAS/368	UNDP	MDI Transitional Strategy	12 and 18 months delays
IND/SEV/45/TAS/391	UNDP	Assistance to carry out an HCFC survey	12 months delays

## UNEP/OzL.Pro/ExCom/55/9 Annex II

Code	Agency	Project Title	Category of Delays
IRA/SEV/45/TAS/172	UNDP	Assistance to carry out an HCFC survey	12 months delays
LEB/SEV/45/TAS/60	UNDP	Assistance to carry out an HCFC survey	12 months delays
MAL/FUM/43/TAS/151	UNDP	Technical assistance programme to install alternatives and phase-out all remaining non-QPS uses of methyl bromide	12 months delays
MAL/SEV/45/TAS/155	UNDP	Assistance to carry out an HCFC survey	12 months delays
MEX/SEV/45/TAS/127	UNDP	Assistance to carry out an HCFC survey	12 months delays
SRL/SEV/45/TAS/30	UNDP	Assistance to carry out an HCFC survey	12 months delays
SYR/REF/38/INV/86	UNDP	Sector phase out plan for CFCs in the refrigeration manufacturing sector (except domestic refrigeration)	12 months delays
SYR/SEV/45/TAS/90	UNDP	Assistance to carry out an HCFC survey	12 months delays
URU/ARS/43/INV/42	UNDP	Phase-out of CFC consumption in the manufacture of aerosol metered dose inhalers (MDIs)	12 months delays
VEN/SEV/45/TAS/102	UNDP	Assistance to carry out an HCFC survey	12 months delays
AFR/SEV/45/TAS/33	UNEP	Sub-regional project on harmonisation of legislative and regulatory mechanisms to improve monitoring and control of ODS consumption in English-speaking Africa	12 months delays
ARG/REF/32/TRA/115	UNEP	Training programme for the refrigeration servicing sector (Phase III)	12 months delays
GLO/ARS/39/TAS/246	UNEP	Development of guidelines to promote safety an aerosol conversions	12 months delays
GLO/REF/48/TAS/275	UNEP	Global technical assistance programme in the chiller sector	18 months delays
GLO/SEV/39/TAS/248	UNEP	Production of OzonAction Newsletter in Russian, translation of 4 refrigeration/customs training modules into Russian, and reprinting and updating existing publications	12 months delays
GLO/SEV/45/TAS/262	UNEP	Assistance for regional awareness raising (2005)	12 months delays
SOM/SEV/35/TAS/01	UNEP	Formulation of national phase out strategy	12 months delays
SRL/PHA/43/TAS/24	UNEP	National compliance action plan: halon bank management	18 months delays
STK/FUM/50/TAS/11	UNEP	Technical assistance to phase out the use of methyl bromide	12 months delays
ALG/FUM/50/TAS/65	UNIDO	Technical assistance to phase out methyl bromide in pulses disinfestations	12 months delays
ALG/REF/44/INV/62	UNIDO	Conversion of CFC-11 to HCFC-141b and CFC-12 to HFC-134a technology in the last group of commercial refrigerator manufactures (refrigeration sector terminal project)	12 months delays
BRA/FUM/46/INV/273	UNIDO	Total phase-out of MB used in tobacco, flowers, ornamentals, strawberries and other uses	12 months delays
CRO/PHA/52/TAS/30	UNIDO	Monitoring and verification audit report	12 months delays
DOM/FUM/38/INV/33	UNIDO	Phase-out of methyl bromide in melon, flowers and tobacco	12 months delays
IDS/SOL/44/INV/162	UNIDO	Plan for terminal phase-out of ODS in the solvent sector	12 months delays
IRA/FOA/28/INV/50	UNIDO	Phasing out ODS in manufacturing of flexible PU slabstock foam through the use of liquid CO2 blowing technology at Bahman Plastic Co.	12 months delays
IRA/FOA/37/INV/149	UNIDO	Phasing out of ODS in the manufacture of flexible slabstock foam through the use of LCD blowing technology at Esfanj Shirvan Co.	12 months delays
IRA/REF/28/INV/51	UNIDO	Replacement of CFC-12 refrigerant by HFC-134a at Iran Compressor Manufacturing Company (ICMC)	12 months delays
IVC/FUM/42/INV/19	UNIDO	Phase-out the use of methyl bromide commodities and storage fumigation	12 months delays
PAK/PAG/35/INV/42	UNIDO	Conversion of carbon tetrachloride as process solvent to 1,2-dichloroethane at Himont Chemicals Ltd.	12 months delays
ROM/PAG/50/INV/36	UNIDO	Terminal phase-out management plan of CTC production/consumption for process agent uses	12 months delays
