- **Delete** the row for Colombia in Table 4 as Germany is withdrawing this request from their work programme amendment.
- **Add** paragraph 27 *qua* as follows:

27 *qua*. In countries where HCFC is used in both servicing and manufacturing, it was also agreed that for those where they are the only agency, the costs proposed by the Secretariat are agreed as per the countries' consumption levels. However, in the case of Bolivia where UNDP is a cooperating agency, there continues to be no agreement on the costs since additional funds were being sought for each country on top of the recommended amount of the Secretariat to cover costs of the involvement of the cooperating agency. The Secretariat noted that the total funding level for which a country is eligible is the basis for the recommendation per country and any sharing of funds should be within the amounts proposed therefore it could not agree to the additional costs requested for the cooperating agency. In line with this, the Secretariat cannot recommend the requested amount for Bolivia, and therefore this remains pending.
