COMITÉ EJECUTIVO DEL FONDO MULTILATERAL
PARA LA APLICACIÓN DEL
PROTOCOLO DE MONTREAL
Quincuagésima quinta Reunión
Bangkok, 14 al 18 de julio de 2008

**INFORME REFUNDIDO SOBRE LA MARCHA DE LAS ACTIVIDADES AL
31 DE DICIEMBRE DE 2007**

1. Este informe consolidado de la marcha de actividades resume el avance y la información financiera proporcionada por los organismos ejecutores y bilaterales¹, tanto en formato narrativo como en bases de datos. La Secretaría combina las bases de datos de todos los organismos para elaborar este informe, que consta de tres partes y dos anexos. La Parte I: es un resumen de la marcha de la ejecución en el ámbito de país; Parte II es un resumen de las actividades hasta el final de 2007; y Parte III incluye los comentarios y recomendaciones de la Secretaría del Fondo. El Anexo I incluye datos de ejecución de proyectos, país por país y el Anexo II es un análisis de los datos de los informes sobre la marcha de las actividades.

PARTE I: RESUMEN DE LA MARCHA DE LA EJECUCIÓN EN EL ÁMBITO DE PAÍS

2. Esta sección es un resumen de la marcha de la ejecución en el ámbito de país y para acuerdos plurianuales (APAs)

Resumen de la marcha de las actividades durante 2007 en el ámbito de país

3. La Secretaría examinó la situación de ejecución país por país, tomando en cuenta las demoras en la ejecución respecto de las fechas de terminación planificadas que fueron reportadas en 2006, las posibles repercusiones de estas demoras en la eliminación, el porcentaje de desembolsos planificados y el porcentaje de conclusión a la luz de los datos de consumo de sustancias que agotan la capa de ozono (SAO), reportados por los países que operan al amparo del Artículo 5. Se debe notar que la referencia a las “emisiones netas de SAO debidas a las demoras” se basa en la aplicación de la cantidad promedio mensual de SAO a ser eliminadas por el proyecto, multiplicadas por el número de meses de demora.

4. De los países que reportaron datos de 2007, solamente Ecuador incrementó su consumo en 2007 (en 36,7 toneladas PAO), lo cual podría estar relacionado con demoras en la ejecución.

5. En base a las fechas revisadas de conclusión presentadas por los organismos bilaterales y ejecutores, en conformidad con la decisión 53/38 o las fechas planificadas de conclusión reportadas en los informes de la marcha de actividades de 2006 y los resultados reportados en los informes de la marcha de actividades de 2007, los organismos completaron un 52 por ciento de los proyectos planificados para 2007 y lograron un 58 por ciento de la eliminación planificada.

Acuerdos plurianuales

6. Dentro del contexto del logro de cumplimiento de una o más medidas de control del Protocolo de Montreal, el Comité Ejecutivo ha aprobado 136 acuerdos plurianuales (APAs) (incluyendo los aprobados en la 54^a Reunión). Un APA está dirigido al cumplimiento de los requerimientos del Protocolo de Montreal por parte de un país, con respecto a uno o más de los grupos de sustancias controladas.

¹ Los datos del informe de la marcha de actividades de Finlandia, Japón y Suiza no estaban disponibles para su inclusión en este informe. Se incluyeron datos de sus informes acerca de la marcha de actividades para el 2006, juntamente con aprobación de la información para los proyectos aprobados en 2007

7. El desglose de APAs que cubre este informe de la marcha de actividades está incluido en las Tablas 1 y 2.

Tabla 1

DESGLOSE DE LOS ACUERDOS PLURIANUALES

Acuerdos (total de acuerdos)	Parte
Planes nacionales de eliminación de SAO o CFC (96)	Afganistán, Albania, Antigua y Barbuda, Arabia Saudita, Argelia, Argentina, Bahama, Bahrein, Bangladesh, Belice, Bolivia, Bosnia y Herzegovina, Brasil, Burkina Faso, Camboya, Camerún, Cabo Verde, Chad, Colombia, Comoras, Congo, Costa Rica, Cote d'Ivoire, Croacia, Cuba, , Djibouti, Dominica, , Ecuador, Egipto, El Salvador, Eritrea, ex República Yugoslava de Macedonia, Filipinas, Gabón, Gambia, Georgia, Ghana, Granada, Guyana, India, Indonesia, Jamahiriya Árabe Libia, Kenia, Kuwait, Kirguistán, Lesoto, Líbano, Liberia, , Madagascar, Malawi, Malasia, Maldivas, Malí, Mauricio, Mauritania, México, República Bolivariana de Venezuela, República de Moldova, Mongolia, Montenegro, Namibia, Nepal, Níger, Nigeria, Omán, Panamá, Papúa Nueva Guinea, Paraguay, Qatar, República Árabe Siria, República Democrática del Congo, República Popular Democrática de Corea, República Democrática Popul Lao República Dominicana República Islámica del Irán, República Unida de Tanzania, Rumania, Rwanda, Saint Kitts y Nevis, Saint Lucia, San Vicente y las Granadinas, Samoa, Santo Tomé y Príncipe, Senegal, Serbia, Seychelles, Sudán, Tailandia, Togo, Trinidad y Tobago, Túnez, Turquía, Uruguay, Vietnam, Zambia, Zimbabwe
Acuerdos para eliminación de producción de CFC (5)	Argentina, China, India, México, República Bolivariana de Venezuela
Planes para eliminación de producción de halones (1)	China
Producción de SAO (2)	República Popular Democrática de Corea, Rumania
Producción de Bromuro de Metilo (1)	China
Producción de TCA (1)	China
Acuerdo del plan sectorial de eliminación de CTC (consumo o producción) (5)	China (2), India, Pakistán, República Popular Democrática de Corea
Plan de eliminación acelerada de CFC, CTC y halones (1)	China

8 Los acuerdos de eliminación del sector de consumo, que están descritos en la Tabla 2 representan un costo total para el Fondo (acordados en principio) de \$EUA 282,5 millones, incluyendo honorarios de los organismos. De éstos, \$EUA 259,4 millones han sido transferidos a los organismos.

Tabla 2**ACUERDOS PARA ELIMINACIÓN EN EL SECTOR DE CONSUMO**

Sector (total de acuerdos)	Parte
Espuma (1)	China
Halones (1)	China (porción del consumo del plan del sector de halones de China)
Bromuro de Metilo (15)	Argentina, China, Costa Rica, Honduras, Kenia, Líbano, Jamahiriya Árabe Libia, Malawi, México, Marruecos, República Árabe Siria, Tailandia, Turquía, Vietnam, Zimbabwe
Solventes (2)	China, Nigeria
Plan de Gestión de Refrigerantes (2)	Argelia, Pakistán
Servicio y mantenimiento de refrigerantes (1)	China
Refrigeración doméstica (2)	China, República Popular Democrática de Corea
Tabaco (1)	China

9. Los organismos proporcionan informes sobre la marcha de las actividades en la mayor parte de los programas de eliminación sectorial en sus solicitudes de fondos para sus programas de trabajo anuales.

10. El Comité Ejecutivo canceló un acuerdo plurianual para la eliminación de todos los usos remanentes de bromuro de metilo para la aplicación en suelos en el control de plagas en Chile. Esta cancelación fue a solicitud del Gobierno de Chile.

11. La Tabla 3 presenta el número de Acuerdos Plurianuales en curso y proyectos individuales.

Tabla 3**NUMERO DE ACUERDOS PLURIANUALES EN CURSO Y PROYECTOS INDIVIDUALES**

		PNUD	PNUMA	ONUDI	Banco Mundial	Bilateral	Total
Proyectos Plurianuales		70	46	66	41	43	266
Proyectos Individuales (inversión/capacitación/asistencia técnica/proyectos de demostración)	Con Eliminación	40	41	35	8	60	184
	Sin Eliminación	26	42	6	5	15	94
	Sub-Total	66	83	41	13	75	278
Total		136	129	107	54	118	544

12. El número total de acuerdos plurianuales en curso es de 266 (incluyendo tramos múltiples para algunos proyectos). El número total de proyectos individuales de inversión/capacitación/asistencia técnica/demostración es de 278, de los cuales 184 son proyectos que dan por resultado la eliminación de algunos SAO. El PNUMA está ejecutando el mayor número de proyectos individuales (83) seguido por organismos bilaterales (75), PNUD (66), y ONUDI (41). El Banco Mundial está ejecutando solamente 13 proyectos individuales. El mayor número de acuerdos plurianuales está siendo ejecutado por el PNUD (70), seguido por ONUDI (66), PNUMA (46), organismos bilaterales Alemania, Canadá, Francia, Japón, Suecia y Suiza (43) y el Banco Mundial (41).

PARTE II: RESUMEN DE LA MARCHA DE ACTIVIDADES HASTA 2007 INCLUSIVE

13. En el Anexo II, se proporciona un análisis detallado de los datos de informes sobre la marcha de actividades. A continuación se presenta un resumen del avance realizado en la ejecución de los proyectos y las actividades apoyadas por el Fondo Multilateral hasta el 31 de diciembre de 2007:

- a) **Eliminación:** Se eliminaron 405.422 toneladas PAO de un total de 419.896 toneladas PAO con los proyectos aprobados hasta fines de 2007 (excluidos los proyectos eliminados y transferidos). Solamente en 2007, se eliminaron 31.346 toneladas PAO (incluyendo producción), y fueron aprobadas para su eliminación 25.680 toneladas PAO. Hasta fines de 2006, se eliminaron 374.199 toneladas PAO de un total esperado de 390.113 toneladas PAO de proyectos aprobados (excluyendo proyectos cancelados y transferidos), que incluían 68.533 toneladas PAO efectivamente eliminadas en 2006 (incluyendo producción) y 28.816 toneladas PAO aprobadas para su eliminación.
- b) **Desembolsos/Aprobaciones:** Se desembolsaron 1,74 mil millones de \$EUA de los 2,02 mil millones de \$EUA aprobados para desembolso hasta fines de 2007 (excluidos los honorarios del organismo), y que representan un porcentaje de desembolso del 86 por ciento. En 2007 se desembolsaron \$EUA 146,54 millones y se aprobaron \$EUA 121,71 millones adicionales.
- c) **Relación de Costo-eficacia:** La relación de costo-eficacia promedio de los proyectos de inversión concluidos fue de 3,96 \$EUA/kg, y para los proyectos de inversión en curso, de 4,88 \$EUA/kg.
- d) **Número de Proyectos Concluidos:** Se concluyeron 4.654 de los 5.429 proyectos financiados por el Fondo (excluidos los proyectos clausurados o transferidos) hasta finales de 2007. Esto representa un porcentaje de conclusión de 86 por ciento.
- e) **Plazo de Entrega--Proyectos de Inversión:** En promedio, los proyectos de inversión se completaron 34 meses después de su aprobación por el Comité Ejecutivo, Los primeros desembolsos para estos proyectos se efectuaron, en promedio, 15 meses después de su aprobación. En base a los organismos, los primeros desembolsos para proyectos completados se realizaron 13 meses

después de su aprobación para el PNUD, 9 meses para ONUDI y 25 meses para el Banco Mundial.

- f) **Plazo de Entrega--Proyectos sin Inversión:** En promedio, los proyectos sin inversión se completaron 34 meses después de ser aprobados por el Comité Ejecutivo. Los primeros desembolsos se efectuaron, en promedio, 10 meses después de su aprobación. En base a los organismos, los primeros desembolsos para proyectos sin inversión completados se realizaron 12 meses después de su aprobación para el PNUD, 8 meses para PNUMA, 10 meses para ONUDI y 18 meses para el Banco Mundial.
- g) **Preparación de Proyectos:** De las 1.147 actividades de preparación de proyectos, aprobadas hasta fines de 2007, se completaron 1.083. Los organismos ejecutores arrastraron saldos por un valor de \$EUA 1.550.387 de 2007 (incluidos aproximadamente \$EUA 527.980 para la conclusión de la preparación de proyectos), disponibles para nuevas actividades de preparación de proyectos, además de los \$EUA 1.305.000 aprobados en 2008.
- h) **Demoras en la Ejecución:** Los proyectos de inversión en curso experimentan una demora promedio de 23 meses. Se anexa a este informe una lista de 57 proyectos con demoras en la ejecución y se enviará un informe de estas demoras a la 56ª Reunión. La cantidad total de emisiones netas de SAO debidas a demoras en la ejecución es de 18.271 toneladas PAO, la cual está por debajo del nivel reportado el pasado año (22.652 toneladas PAO).

PARTE III: COMENTARIOS Y RECOMENDACIONES DE LA SECRETARÍA DEL FONDO

COMENTARIOS

14. Los comentarios de la Secretaría abordan cuestiones comunes que se identificaron durante la revisión de los informes de la marcha de las actividades de los organismos.

15. La mayor parte de las cuestiones se abordan en detalle en los planes de negocios individuales. Los comentarios de la Secretaría sobre los informes de la marcha de las actividades destacan el lento desembolso en los proyectos plurianuales aprobados hace 1,5 años atrás, en particular los casos donde no se obtuvieron las firmas del documento de proyecto necesarias, memorandos de entendimiento o aprobaciones al acuerdo de donación. Los comentarios destacan casos de demoras en la elaboración de proyectos, lenta ejecución del Plan de Gestión de Refrigerantes que evitan la presentación del Plan de Gestión de Eliminación Definitiva y problemas asociados con el informe de desembolsos y la liberación de fondos para proyectos de fortalecimiento institucional. El Comité Ejecutivo usualmente solicita informes de situación adicionales para estos proyectos, en base a organismos individuales.

16. Las siguientes dos cuestiones se destacan en este documento: proyectos en curso para la conversión de equipo basado en HCFC y la situación de la ventana de financiación del Comité Ejecutivo para proyectos de enfriadores.

Conversión de equipos basados en HCFC

17. Aún existen proyectos aprobados en ejecución que resultarán en la conversión de equipos basados en CFC. Un ejemplo es el proyecto general terminal del PNUD para la eliminación del uso de CFC-11 en la fabricación de espuma de poliuretano en Chile (CHI/FOA/48/INV/161). Otro es el proyecto de ONUDI en Argelia respecto a la conversión de tecnología CFC-11 a HCFC-141b y CFC-12 a HFC-134a en el último grupo de fabricación de refrigeradores comerciales (proyecto terminal del sector de refrigeración), (ALG/REF/44/INV/62).

18. El Banco Mundial no tiene planes adicionales para la conversión de HCFC en la eliminación de CFCs residuales del sector de espumas (segundo tramo) (IDS/FOA/48/INV/172). Un total de 36 empresas fueron financiadas en el plan sectorial. De ellas, 25 empresas son de pulverización de espuma rígida que fueron convertidos a HCFC-141b. Toda la financiación fue comprometida, no existen planes adicionales para la conversión de equipo basado en HCFC.

19. El Comité Ejecutivo desearía considerar instar a los países y a las empresas que participan en proyectos en curso a convertir equipo basado en HCFC a que contemplen el uso de la financiación aprobada para la conversión a alternativas no basadas en HCFC, siempre que sea posible.

Ventana de financiación para proyectos de enfriadores

20. En su 47ª Reunión, el Comité Ejecutivo aprobó varios proyectos de enfriadores con la condición que se obtengan recursos financieros de una fuente que no sea el Fondo Multilateral debido al ahorro de energía asociado con los proyectos y dado el hecho que la mayoría de los países a la fecha cuentan con acuerdos con financiación completa para la eliminación de CFC (decisión 46/33). Aún cuando existió algún progreso en 2007, dicho progreso es heterogéneo.

21. Para el proyecto de demostración de reemplazo de enfriadores centrífugos basados en CRFC en Croacia, Macedonia, Rumania y Serbia y Montenegro (EUR/REF/47/DEM/06), ONUDI recibió una financiación de contraparte parcial para permitir el desembolso de EUA\$ 381.771 de EUA\$ 1,1 millones aprobados para el proyecto. Deben adquirirse doce enfriadores, pero solamente se han otorgado cinco órdenes de compra. De éstas, cuatro han sido entregadas y comenzaron a funcionar. Un enfriador adicional fue adquirido y entregado en Montenegro en febrero de 2008. Se han elaborado y suscrito con las contrapartes acuerdos de trabajo para la ejecución de los siete enfriadores restantes (tres en Serbia y cuatro en Croacia).

22. El proyecto de demostración para gestión integrada del sub-sector de enfriadores centrífugos en el Caribe, que se enfoca en la aplicación de tecnologías libres de CFC con eficiencia energética para reemplazar enfriadores basados en CFC (LAC/REF/47/DEM/36), está siendo co-financiando por el Fondo Temático Fiduciario del PNUD. El PNUD reportó que se focaliza en cuatro países: República Dominicana, Jamaica, Barbados y Trinidad y Tobago puesto que son los países más grandes e industrializados de la sub-región.

23. El PNUD reportó que en Brasil, el proyecto de demostración para la gestión integrada del sub-sector de enfriadores centrífugos que se enfoca en la aplicación de tecnologías libres de CFC con eficiencia energética para reemplazar enfriadores basados en CFC (BRA/REF/47/DEM/275), no ha comenzado aún. El PNUD reportó que esto es debido a que la co-financiación del proyecto debe ejecutarse en coordinación con el componente del Fondo para el Medio Ambiente Mundial (FMAM). Se ha suscrito el memorando de entendimiento requerido y el proyecto fue aprobado por el Consejo del FMAM y está a la espera del aval de gestión de FMAM. El documento del proyecto se está concluyendo en colaboración con el Banco Interamericano de Desarrollo.

24. En Colombia el PNUD reportó que el proyecto de demostración para la gestión integrada del sub-sector de enfriadores centrífugos que se enfoca en la aplicación de tecnologías libres de CFC con eficiencia energética para reemplazar enfriadores basados en CFC (COL/REF/47/DEM/65), está en sus etapas iniciales. Reportó que el FMAM aprobó el proyecto y que el co-financiamiento está asegurado, el proyecto no puede ser ejecutado hasta que se obtenga una segunda aprobación del FMAM.

25. No se desembolsaron fondos del programa de asistencia técnica global en el sector de enfriadores (GLO/REF/48/TAS/275), en ejecución por el PNUMA, que fue aprobado en 2006, aún cuando el PNUMA reportó que las actividades están en curso.

26. De manera similar, no se desembolsaron en 2007 los EUA\$ 6,88 millones aprobados para el proyecto global de reemplazo de enfriadores del Banco Mundial (GLO/REF/47/DEM/268), que está dirigido a brindar asistencia a India, China, Indonesia, Malasia y Filipinas. Con respecto al proyecto en India, existe una demora debido a la decisión de India de buscar recursos de FMAM en una fecha posterior.

27. Con respecto al programa de trabajo de 2006, del plan nacional de eliminación de CFC en Argentina (ARG/PHA/47/INV/148), el Banco Mundial reportó que identificó una lista de potenciales enfriadores a ser reemplazados por el proyecto a mediados de 2005, lo cual estaba anticipado a la aprobación del proyecto. A fines de 2007 se decidió que Argentina no participaría en el programa de Reemplazo Global de Enfriadores debido a dificultades para obtener el capital generador de inversiones (principalmente fondos de FMAM) para que el programa valga la pena. Se han desarrollado nuevos términos de referencia para una consultoría que proponga la mejor modalidad para el reemplazo de enfriadores utilizando los fondos del plan nacional de eliminación de CFC e identificar los enfriadores que serán reemplazados. Esta consultoría está actualmente en curso.

28. Varios de estos proyectos están demorados dependiendo de la obtención de la co-financiación requerida. Se liberaron recursos del Fondo Multilateral para los organismos a finales de 2005 después de su aprobación en noviembre de 2005. No obstante, dos años más tarde, la mayor parte de los desembolsos aún esperan la iniciación de los proyectos. El Comité Ejecutivo desearía considerar que la Secretaria del Fondo Multilateral consulte a la Secretaria de FMAM para que acelere la liberación de la co-financiación del FMAM para proyectos aprobados por el Comité Ejecutivo, con objeto de evitar mayores demoras en el uso de recursos del Fondo Multilateral aprobados.

RECOMENDACIONES

29. El Comité Ejecutivo desearía:
- a) Tomar nota del Informe Consolidado de la Marcha de las Actividades del Fondo Multilateral, tal como se presenta en UNEP/OzL.Pro/ExCom/55/9;
 - b) Instar a los países y a las empresas involucradas en proyectos en curso para la conversión de equipo basado en HCFC que consideren utilizar la financiación aprobada para la conversión de alternativas no basadas en HCFC, siempre que sea posible; y
 - c) Solicitar que la Secretaría del Fondo Multilateral consulte a la Secretaria de FMAM para que acelere la liberación de la co-financiación de FMAM para proyectos ya aprobados por el Comité Ejecutivo, con objeto de evitar mayores demoras en el uso de recursos del Fondo Multilateral aprobados.

Annex I

PROJECT IMPLEMENTATION BY COUNTRY

Annex II**ANALYSIS OF PROGRESS REPORT DATA**

1. In the databases submitted to the Fund Secretariat implementing and bilateral agencies provided detailed information on their respective shares of the 5,689 projects (including closed and transferred projects) approved by the Executive Committee through to 31 December 2007. In 2007, 216 new projects and activities were approved. The Executive Committee requested that detailed information on a project-by-project basis be made available to Committee members, with a printout available upon request (decision 19/23). The database for the Consolidated Progress Report is provided on the Executive Committee's intranet in the spreadsheet programme, Microsoft Excel 2002.

OVERVIEW OF APPROVED FUNDING

2. The Executive Committee approved around US \$2.02 billion for the implementation of investment and non-investment projects through to the end of 2007. In addition, about US \$222.65 million has been approved for agency fees and administrative support. This level of funding is expected to result in the phase-out of 419,896 ODP tonnes of ODS consumption and production. Table 1 summarises the level of approved funding, by sector and by agency, and indicates that most approvals of the Executive Committee have been in the refrigeration (US \$523.1 million) and foam (US \$359.4 million) sectors.

Table 1

ANNUAL SUMMARIES

3. Table 2 presents an overview of status, by year. The data is presented according to the year when a project was approved by the Executive Committee. It treats all approvals (investment and non-investment projects) equally (i.e., an investment project or annual funding tranche of a multi-year agreement of US \$1 million is considered one project as is a country programme preparation of US \$30,000).

4. Key indicators from the annual summary in Table 2 are: the percentage of projects completed, ODP phased out, and percentage of funds disbursed. In reviewing the data on funds disbursed, it should be noted that there are four types of disbursements: during implementation, after implementation, for retroactively-financed projects, and for time-sensitive projects.

Table 2

ANNUAL SUMMARY

Year approved	Number of approvals*	Number completed	Per cent completed	Consumption ODP to be phased out*	Consumption ODP phased out*	Per cent of consumption ODP phased out	Production ODP to be phased out*	Production ODP phased out*	Per cent of production ODP phased out	Approved funding plus adjustment (US\$)	Funds disbursed (US\$)	Per cent of funds disbursed	Balance (US\$)	Estimated disbursement in current year (US\$)

*Excludes Closed and Transferred Projects

5. Of the US \$2.02 billion in approved funding (including adjustments), the agencies (including bilateral agencies) have disbursed around US \$1.74 billion. Projects approved by the Executive Committee have thus far resulted in the permanent annual phase-out of 405,422 ODP tonnes of consumption and production of which 360,558 ODP tonnes is from completed projects and 44,864 ODP tonnes is from ongoing projects. Table 2 indicates that the percentage phased out in 1991, 1993, 1994 and 2003 exceeds 100 per cent. This is due to the phase-out of larger amounts of consumption than those originally indicated in some of the project proposals.

6. All projects and activities approved between 1991 and the end of 1997 have now been completed, with the exception of an institutional strengthening project in Uganda (UNEP implementation), a refrigeration project in Argentina (World Bank implementation) and two recovery and recycling technical assistance projects in Lebanon and Morocco (France implementation).

SUMMARY DATA BY PROJECT TYPE

7. The Executive Committee approves several different types of projects including: country programme preparation, demonstration projects, institutional strengthening, project preparation, investment projects (including annual tranches of MYAs), training projects and technical assistance. Technical assistance includes UNEP's clearing house and networking activities as well as publications, refrigerant management plans, and recovery and recycling projects. A summary of the status of projects, by category, is presented in Table 3.

Table 3

SUMMARY DATA BY PROJECT TYPE

Type	Number of approvals *	Number completed	Per cent completed	Approved funding (US\$)	Adjustment (US \$)	Funds disbursed (US \$)	Per cent of funds disbursed	Balance (US\$)	Estimated disbursement in current year (US \$)
Country Programme Preparation	165	163	99%	8,529,659	-1,223,632	7,169,579	98%	136,448	124,861

Training Projects	322	286	89%	26,036,833	-162,281	23,578,201	91%	2,296,352	2,279,817
TOTAL	5,429	4,654	86%	2,079,695,648	-58,762,700	1,737,132,431	86%	283,808,799	158,201,217

*Excludes Closed and Transferred Projects.

8. Of the 5,429 projects approved by the Executive Committee, 2,232 (about 41 per cent) are classified as investment projects. Investment projects represent around US \$1.69 billion of the US \$2.02 billion approved for activities under the Multilateral Fund (83 per cent of the total funds approved). The second largest number of projects, in terms of approved funding, is classified as technical assistance, for which the Committee has approved a total of over US \$156.32 million.

9. By the end of 2007, 99 per cent of country programme preparation projects had been completed and 97 per cent of the funds allocated for project preparation activities had been disbursed.

10. By the end of 2007, 89 per cent of investment projects had been completed, 85 per cent of demonstration projects had been completed, and 77 per cent of approved funds had been disbursed for institutional strengthening projects.

COMPLETED PROJECTS

11. Completed projects/activities are defined in decisions 17/22 and 19/23 as projects that have been commissioned and where the ODS addressed has been phased out. A further decision (decision 28/2) extends the definition to cover situations where no further use of CFCs in the sectors covered is in evidence, where an alternative product is being produced (and/or production has begun), and where the equipment using CFCs has been destroyed/dismantled/rendered unusable with respect to ODSs. Work programme activities without an ODS phase-out are considered completed when the activity is finished (e.g., for a workshop, when it has been conducted).

12. Overall, 98 per cent of the funds approved for completed investment projects have been disbursed. The reason that 100 per cent of funds have not been disbursed for completed projects is that it may take from six months to one year to finalise accounting records.

Completed Investment Projects

13. Table 4 presents information on investment projects that have been completed since 1991. The table presents the data in total, followed by data according to region, sector, implementation characteristics, and disbursement method.

Table 4

CUMULATIVE COMPLETED INVESTMENT PROJECTS

Retroactive Funding	36	14,138,587	100%	2,100	500	15	8	\$5.44
* No funds are listed for the multiple sector investment project, but are recorded in appropriate sector.								
** Total phased out for the Fund is 405,422 includes 10,310 from completed non-investment projects and 44,864 from ongoing projects.								
Note: The sum of each section (Region, Sector, etc.) equals the Grand Total.								

14. As of 31 December 2007, investment projects representing around US \$1.39 billion have been completed, resulting in the permanent phase-out of 350,248 ODP tonnes² with an overall cost-effectiveness of US \$3.96/kg ODP phased out.

² Total phased out for the Fund includes 350,248 ODP tonnes from completed investment projects, 10,310 ODP tonnes from completed non-investment projects and 44,864 from ongoing projects.

15. The average time from approval to first disbursement was 15 months and the average project duration was 34 months. Project duration is only slightly impacted by retroactive projects (i.e., projects funded after phase-out) since they represent only around two per cent of the total number of completed investment projects.

16. On a regional basis, 1,194 investment projects were completed in the Asia and Pacific region, 450 investment projects in Latin America and the Caribbean, 257 in Africa, and 82 in Europe.

Completed Non-Investment Projects

17. Table 5 presents data on cumulative completed non-investment projects. Since 1991, 1,588 non-investment projects have been completed, representing funding support from the Multilateral Fund of around US \$213.5 million. Ninety-seven (97) per cent of the funds for completed non-investment projects have been disbursed. Fifty-four (54) per cent of completed non-investment funding is in the sector identified as “several”, which means those projects that have an impact on more than one sector (such as UNEP’s clearinghouse and networking activities).

Table 5

CUMULATIVE COMPLETED NON-INVESTMENT PROJECTS

Item	Number of projects	Approved funds plus adjustment (US \$)	Per cent of funds disbursed	Average number of months from approval to first disbursement	Average number of months from approval to completion

18. The average time from approval to first disbursement for non-investment projects is much shorter than for investment projects (10 versus 15 months). Non-investment projects have been completed, on average, 34 months after they were approved by the Executive Committee. This figure is influenced by the large number of projects (863 of 1,588) classified in the sector called "several", which had an average time from approval to completion of 30 months. Non-investment projects in the other sectors (e.g., *inter alia*, solvent and multiple sectors) were completed between 23 and 58 months after they had been approved.

19. Almost all projects (1,322 of 1,588) were implemented by the agency concerned rather than through national implementation. Agency implementation of non-investment projects normally does not require legal agreements, which may explain the shorter period of time (32 months) compared with nationally-implemented non-investment projects (41 months).

20. Non-investment projects include work programme activities, excluding project preparation.

ONGOING PROJECTS

21. Ongoing projects are all projects that have been approved by the Executive Committee and were under implementation as of 31 December 2007. Key indicators in the database of progress towards implementing ongoing projects include:

- (a) Percentage of funds disbursed and percentage of projects that have begun disbursing funds;
- (b) The level of funding expected to be disbursed by the end of the year (funds disbursed plus estimated disbursements in 2008) as a percentage of the approved funding;
- (c) The average length of projected delay in implementation (project completion per proposal and currently planned date of completion); and
- (d) Information provided by the implementing agencies in the remarks column of the project-by-project listing in the database.

Ongoing Investment Projects

22. Table 6 presents information on the status of investment projects under implementation by region, sector, and implementation characteristics.

Table 6

*Based on the ODS to be phased out according to the proposal.

23. There are currently 249 investment projects under implementation. These projects represent approved funding (plus adjustments) of over US \$287.94 million. Around 36 per cent of the funds have already been disbursed. The overall average cost-effectiveness of ongoing investment projects is US \$4.88/kg ODP to be phased out, as approved.

24. Of the ongoing investment projects 46 per cent (114 out of 249) are for countries in the Asia and Pacific region, representing almost 59 per cent (US \$168.53 million) of the funds approved for ongoing investment projects. The Latin American and the Caribbean region has 66 investment projects under implementation, valued at US \$83.56 million, Africa has 48 projects (US \$26.72 million) and Europe has 21 projects (US \$9.13 million).

25. About 33 per cent of the funds approved for ongoing investment projects, representing around US \$94.3 million, are in the phase-out plan sector. The second largest funding allocation for ongoing investment projects is for the production sector (US \$57.2 million) followed by the fumigants sector (US \$38.96 million). The remaining sectors have the following number of investment projects under implementation: aerosol (10), foam (9), solvents (9), halon (4), process agent (7) and refrigeration (24).

26. Of the 249 ongoing investment projects, 57 per cent (143) have begun disbursing funds.

27. Most ongoing investment projects are under agency implementation (127 projects) but there are 122 projects under national implementation. Of agency-implemented ongoing investment projects, 80 per cent have begun disbursement compared with 34 per cent of nationally-implemented ongoing investment projects.

28. The average number of months from approval to first disbursement is 9 months. The average duration of an ongoing investment project is 39 months. Typically, ongoing investment projects are completed 23 months later than originally planned, which could be considered the average delay.

Ongoing Non-Investment Projects

29. Table 7 presents information on the status of non-investment projects under implementation by region, sector, and implementation characteristic.

Table 7

CUMULATIVE ONGOING NON-INVESTMENT PROJECTS

Item	Number of projects	Approved funds plus adjustment (US\$)	Per cent of funds disbursed	Number of projects disbursing	Per cent of projects disbursing	Average number of months from approval to first disbursement	Average number of months from approval to planned completion	Average length of delay in project planned completion

Retroactive Funding	0	0	0%	0	0%	n/a	n/a	n/a

30. There are currently 462 non-investment projects under implementation, representing approved funding (plus adjustments) of around US \$71.09 million. Roughly 24 per cent of the funds for ongoing non-investment projects have been disbursed.

31. The largest amount of funding for non-investment projects, by region, is US \$18.62 million for the Asia and the Pacific region. Funding for ongoing non-investment projects in other regions is as follows: Latin America and the Caribbean, US \$17.88 million; Africa, US \$15.14 million; and, Europe, US \$3.24 million. Ongoing global activities are valued at a total of US \$16.21 million.

32. On a sectoral basis, most non-investment funding is applied to the refrigeration sector (US \$27.44 million for 143 projects). There are 197 ongoing non-investment projects in the “several” sector category (US \$27.21 million), 75 in the phase-out plan sector (US \$8.87 million), 18 in the fumigant sector (US \$3.95 million), 18 in the halon sector (US \$2.71 million) and 11 projects for all other sectors (US \$907,690).

33. Of the 462 ongoing non-investment projects, 61 per cent (282 projects) have begun disbursing funds.

34. The average number of months from approval to first disbursement is 14 months. On average, ongoing non-investment projects are completed 44 months from the date of approval, which represents a delay of 17 months.

PROJECT PREPARATION

35. Project preparation requests are included in annual work programmes and amendments to work programmes. Project preparation leads to investment projects in general and, in some cases, demonstration projects (in particular for methyl bromide) and the implementation of projects included in refrigerant management plans.

36. Table 8 presents data on both completed and ongoing project preparation activities. The implementing agencies have completed 1,083 project preparation activities for which there remains a balance of US \$527,980 that has not yet been disbursed. This figure is around US \$121,839 higher than it had been in 2006. On average, it has taken 17 months to complete project preparation.

Table 8

PROJECT PREPARATION

37. Implementing agencies have a balance of US \$1.55 million carried over for project preparation activities in 2007. Ongoing project preparation activities are expected to take 27 months to complete. This is 10 months longer than for completed project preparation.

38. On a regional basis, most of the ongoing project development activities (52 per cent) are in Africa. Most of the ongoing project preparation is occurring in the phase-out plan sector (US \$938,000).

PROJECT IMPLEMENTATION DELAYS

39. The Executive Committee has defined projects with implementation delays as projects approved over 18 months with disbursement less than one per cent, or projects that are expected to be completed 12 months later than forecast in the last progress report (decision 22/61).

40. In 2007, the Secretariat identified 57 projects with implementation delays, 25 of which had been classified with implementation delays in 2006. The total number of projects classified with implementation delays decreased in 2007 compared to 2006 (62 projects). However, it should be noted that pursuant to decision 36/14, the following types of projects are no longer so classified: institutional strengthening, halon banking, customs training, recovery and recycling, and demonstration projects. Decision 36/14 does, however, request that the Secretariat continue to monitor these types of projects, as appropriate. A list of the projects with implementation delays is attached as an appendix to this Annex. The Executive Committee maintains a “watching brief” on these projects as per decision 23/4, and the implementing agencies will be requested to report on these projects to the 56th Meeting of the Executive Committee.

41. A separate document entitled “Status on implementation of delayed projects and compliance” (UNEP/OzL.Pro/ExCom/55/6) addresses follow-up information on project implementation delays that had been identified in the 2006 Progress Report.

CLOSED AND TRANSFERRED PROJECTS

42. Table 9 presents a summary of closed and transferred projects. Closed projects are cancelled projects. Of the 220 cancelled projects, 87 were project preparation activities. The World Bank has the highest number of closed projects (92). Remaining balances for closed projects are the result of possible unpaid commitments against these projects; however, projects should be classified as closed only after the balances have been returned. Implementing agencies provide a report on any balances from cancelled projects in the context of the Report on Balances and Availability of Resources (UNEP/OzL.Pro/ExCom/55/4). Four projects were cancelled and closed in 2007.

43. Transferred projects are projects that have been transferred from one agency to another. There are 40 such transferred projects.

Table 9

CLOSED AND TRANSFERRED PROJECTS SUMMARY

Agency	Number of projects	Approved funding (US\$)	Adjustments (US\$)	Approved funding plus adjustment (US\$)	Funds disbursed (US\$)	Balances (US\$)	Percent of funds disbursed	Consumption ODP to be phased out	Consumption ODP phased out

Appendix

PROJECTS WITH IMPLEMENTATION DELAYS

Code	Agency	Project Title	Category of Delays
JAM/FUM/47/TAS/22	Canada	Technical assistance to phase-out the use of methyl bromide	12 months delays
MEX/FUM/42/TAS/122	Canada	Technical assistance to comply with 2005 phase-out of 20% of methyl bromide	12 months delays
MOR/FUM/29/INV/37	France	Phase-out of methyl bromide use in the cut flower and banana production	12 months delays
SYR/REF/29/INV/53	France	Conversion from CFC-12 to HFC-134a technology in the manufacture of commercial refrigeration equipment at Shoukairi and Co.	12 and 18 months delays
YEM/FUM/41/TAS/21	Germany	Technical assistance programme for the phase-out of methyl bromide in agriculture	12 months delays
ARG/REF/18/INV/39	IBRD	Elimination of CFC in the manufacturing plant of domestic refrigerators of Neba, S.A.	12 months delays
ECU/FUM/26/TAS/23	IBRD	Demonstration project for testing methyl bromide alternatives in soil treatment for the flower growing industry	12 months delays
JOR/HAL/32/INV/69	IBRD	Terminal halon-1211 and halon-1301 phase-out umbrella project for fire equipment manufacturers and suppliers in Jordan converting to ABC powder, CO ₂ , HFC-227ea and inert gases as substitutes	12 months delays
THA/HAL/32/INV/134	IBRD	Terminal halon-1211 and halon-1301 phase-out project for fire equipment manufacturers and suppliers converting to ABC powder, CO ₂ , HFC-227ea and inert gases	12 months delays
NIR/SEV/38/TAS/104	Japan	Assistance for a national information, education and communication campaign for compliance with the Montreal Protocol	12 months delays
SRL/PHA/43/TAS/26	Japan	National compliance action plan: incentive programme for commercial and industrial refrigeration end-users	18 months delays
SRL/PHA/43/TAS/27	Japan	National compliance action plan: MAC recovery/recycling and retrofit	12 months delays
SRL/PHA/43/TAS/28	Japan	National compliance action plan: recovery and recycling programme	12 and 18 months delays
GLO/SEV/47/TAS/269	Portugal	Communication and cooperation support to Portuguese speaking countries (Angola, Cape Verde, East Timor, Guinea Bissau, Mozambique and Sao Tome and Principe)	18 months delays
MEX/FUM/42/TAS/118	Spain	Technical assistance to comply with 2005 phase-out of 20% of methyl bromide	12 months delays
AFR/FUM/38/TAS/32	UNDP	Technical assistance for methyl bromide reductions and formulation of regional phase-out strategies for low-volume consuming countries	12 months delays
ARG/SEV/45/TAS/144	UNDP	Assistance to carry out an HCFC survey	12 months delays
BRA/SEV/45/TAS/271	UNDP	Assistance to carry out an HCFC survey	12 months delays
CHI/FOA/48/INV/161	UNDP	Terminal umbrella project for phase-out of the use of CFC-11 in the manufacture of polyurethane foam	18 months delays
CHI/SOL/41/TAS/154	UNDP	Technical assistance to phase-out ozone depleting solvents	12 months delays
COL/PAG/48/INV/66	UNDP	Phase-out of CTC as process agent in the elimination of nitrogen trichloride during chlorine production at Prodesal S.A.	12 and 18 months delays
COL/SEV/45/TAS/62	UNDP	Assistance to carry out an HCFC survey	12 months delays
FIJ/PHA/47/TAS/15	UNDP	Implementation of the TPMP (investment component)	18 months delays
IDS/SEV/45/TAS/169	UNDP	Assistance to carry out an HCFC survey	12 months delays
IND/ARS/41/TAS/368	UNDP	MDI Transitional Strategy	12 and 18 months delays
IND/SEV/45/TAS/391	UNDP	Assistance to carry out an HCFC survey	12 months delays

Code	Agency	Project Title	Category of Delays
IRA/SEV/45/TAS/172	UNDP	Assistance to carry out an HCFC survey	12 months delays
LEB/SEV/45/TAS/60	UNDP	Assistance to carry out an HCFC survey	12 months delays
MAL/FUM/43/TAS/151	UNDP	Technical assistance programme to install alternatives and phase-out all remaining non-QPS uses of methyl bromide	12 months delays
MAL/SEV/45/TAS/155	UNDP	Assistance to carry out an HCFC survey	12 months delays
MEX/SEV/45/TAS/127	UNDP	Assistance to carry out an HCFC survey	12 months delays
SRL/SEV/45/TAS/30	UNDP	Assistance to carry out an HCFC survey	12 months delays
SYR/REF/38/INV/86	UNDP	Sector phase out plan for CFCs in the refrigeration manufacturing sector (except domestic refrigeration)	12 months delays
SYR/SEV/45/TAS/90	UNDP	Assistance to carry out an HCFC survey	12 months delays
URU/ARS/43/INV/42	UNDP	Phase-out of CFC consumption in the manufacture of aerosol metered dose inhalers (MDIs)	12 months delays
VEN/SEV/45/TAS/102	UNDP	Assistance to carry out an HCFC survey	12 months delays
AFR/SEV/45/TAS/33	UNEP	Sub-regional project on harmonisation of legislative and regulatory mechanisms to improve monitoring and control of ODS consumption in English-speaking Africa	12 months delays
ARG/REF/32/TRA/115	UNEP	Training programme for the refrigeration servicing sector (Phase III)	12 months delays
GLO/ARS/39/TAS/246	UNEP	Development of guidelines to promote safety an aerosol conversions	12 months delays
GLO/REF/48/TAS/275	UNEP	Global technical assistance programme in the chiller sector	18 months delays
GLO/SEV/39/TAS/248	UNEP	Production of OzonAction Newsletter in Russian, translation of 4 refrigeration/customs training modules into Russian, and reprinting and updating existing publications	12 months delays
GLO/SEV/45/TAS/262	UNEP	Assistance for regional awareness raising (2005)	12 months delays
SOM/SEV/35/TAS/01	UNEP	Formulation of national phase out strategy	12 months delays
SRL/PHA/43/TAS/24	UNEP	National compliance action plan: halon bank management	18 months delays
STK/FUM/50/TAS/11	UNEP	Technical assistance to phase out the use of methyl bromide	12 months delays
ALG/FUM/50/TAS/65	UNIDO	Technical assistance to phase out methyl bromide in pulses disinfestations	12 months delays
ALG/REF/44/INV/62	UNIDO	Conversion of CFC-11 to HCFC-141b and CFC-12 to HFC-134a technology in the last group of commercial refrigerator manufactures (refrigeration sector terminal project)	12 months delays
BRA/FUM/46/INV/273	UNIDO	Total phase-out of MB used in tobacco, flowers, ornamentals, strawberries and other uses	12 months delays
CRO/PHA/52/TAS/30	UNIDO	Monitoring and verification audit report	12 months delays
DOM/FUM/38/INV/33	UNIDO	Phase-out of methyl bromide in melon, flowers and tobacco	12 months delays
IDS/SOL/44/INV/162	UNIDO	Plan for terminal phase-out of ODS in the solvent sector	12 months delays
IRA/FOA/28/INV/50	UNIDO	Phasing out ODS in manufacturing of flexible PU slabstock foam through the use of liquid CO2 blowing technology at Bahman Plastic Co.	12 months delays
IRA/FOA/37/INV/149	UNIDO	Phasing out of ODS in the manufacture of flexible slabstock foam through the use of LCD blowing technology at Esfanj Shirvan Co.	12 months delays
IRA/REF/28/INV/51	UNIDO	Replacement of CFC-12 refrigerant by HFC-134a at Iran Compressor Manufacturing Company (ICMC)	12 months delays
IVC/FUM/42/INV/19	UNIDO	Phase-out the use of methyl bromide commodities and storage fumigation	12 months delays
PAK/PAG/35/INV/42	UNIDO	Conversion of carbon tetrachloride as process solvent to 1,2-dichloroethane at Himont Chemicals Ltd.	12 months delays
ROM/PAG/50/INV/36	UNIDO	Terminal phase-out management plan of CTC production/consumption for process agent uses	12 months delays
