Annex I

DETAILED ANALYSIS OF THE STATUS OF IMPLEMENTATION IN COUNTRIES SUBJECT TO DECISIONS OF THE PARTIES ON COMPLIANCE AND THOSE AT RISK OF NON-COMPLIANCE

1. Annex I presents the detailed analysis of the status of implementation in countries subject to decisions of the Parties on compliance and those at risk of non-compliance. The data tables in Appendixes I-V indicate whether a country has received a total phase-out agreement for a specific controlled substance. The CFC analysis (Appendix I) shows further whether a low-volume consuming country (LVC) has received a Refrigerant Management Plan (RMP) or a RMP update since the 31st Meeting of the Executive Committee, which should be sufficient to ensure a country's compliance at least up to, and including, the 85 per cent reduction target in 2007 (decision 31/48(h)). The analysis of halons (Appendix II) indicates whether a halon banking activity has been approved. Halon banking guidelines require that regulations facilitating production and import bans are established within six months of the establishment of a reclamation centre (decision 18/22). Decision 35/57 presumes that halon banking should be the last project approved for the halon sector. The methyl bromide analysis (Appendix III) indicates further whether a country has received funding for a phase-out to meet the 2005 control measure.

ANALYSIS OF COMPLIANCE FOR CFCs (Appendix I)

2. Based on their latest reported consumption data, 145 countries could now be considered to be in compliance, but 18 have not yet reported 2007 data. The latest reported consumption for these countries, combined, is 16,183 ODP tonnes compared to 36,620 ODP tonnes in last year's report. This is 147,406 ODP tonnes lower than their combined baseline level of 163,589 ODP tonnes. Of these countries, 102 are LVCs of which 91 have received support for RMPs from the Multilateral Fund. This includes support for 75 LVCs to meet their 85 per cent reduction targets by 2007.

3. Countries have been grouped into three categories: (a) those whose latest consumption exceeds the baseline freeze; (b) those in actual non-compliance or at risk of not meeting the 2005 reduction step because their latest consumption exceeds the 50 per cent baseline reduction target; and (c) those in actual non-compliance or at risk of not meeting the 2007 reduction step because their latest consumption exceeds the 85 per cent baseline reduction target.

(a) Countries whose latest consumption exceeds the CFC baseline freeze

4. All countries are in compliance with the CFC freeze target.

(b) Countries at risk of not achieving the 50 per cent CFC baseline reduction

5. This category consists of two LVC countries. These countries may be in non-compliance with the control measures. These countries may need to achieve additional CFC phase-out, amounting to 10.4 ODP tonnes by 2005 in order to comply with the 50 per cent reduction target. Of the two countries in this category, one has projects included in the 2008 business plans.

6. Of the two countries, the Executive Committee has approved RMPs for one LVC, Solomon Islands. The Government of Solomon Islands has already received project funding for complete phase-out of CFCs from the Executive Committee.

7. Bosnia and Herzegovina did not have an approved RMP, but has national phase-out agreement with the Executive Committee.

(c) Countries at risk of not achieving the 85 per cent CFC baseline reduction

8. This category consists of 11 countries, including 6 LVCs, which may need to achieve additional CFC phase-out amounting to 2,630 ODP tonnes by 2007 in order to comply with the 85 per cent reduction target. Of these 11 countries, 3 were to receive projects with phase-out in the 2008 business plans.

9. Of the 11 countries, the Executive Committee has approved RMPs for one non-LVC and four LVCs, including five countries that had already received either an RMP to meet their 50 per cent and 85 per cent reductions or had a national phase-out agreement approved. Solomon Islands are one of the LVCs that have phase-out agreement with the Executive Committee as part of the Pacific Island country strategy.

10. There are one LVC that has approved national phase-out agreement: Bosnia and Herzegovina.

11. The remaining five countries that may require additional actions to achieve the 85 per cent reduction are Philippines, Republic of Korea, Saudi Arabia, Somalia and United Arab Emirates. With the exception of Somalia, all countries currently eligible for Fund assistance have national CFC phase-out agreements with the Executive Committee, which contain a phase-out schedule that is consistent with the targets in the Montreal Protocol. All of the countries that are at risk have received support from the Executive Committee or have projects in the 2008-2010 business plans to address their compliance needs, except for the Republic of Korea and the United Arab Emirates that do not seek Multilateral Fund assistance.

ANALYSIS OF COMPLIANCE FOR HALONS (Appendix II)

12. Based on their latest consumption data, 69 countries could now be considered to be in compliance. The latest combined consumption for these countries is 2,447 ODP tonnes compared to 1,351 ODP tonnes in last year's report. This is 43,986 ODP tonnes lower than their combined baseline level of 46,433 ODP tonnes.

13. Seventy-five countries have reported no consumption of halons between 1995 and 2007.

14. Fifty-nine countries have received support for halon banking activities or phase-out agreements. This includes those countries participating in regional halon banks. Halon banking is presumed to be the last funded activity in the halon consumption sector for most countries but there are some halon phase-out activities that are part of multi-sectoral phase-out agreements.

15. Countries have been grouped into the following two categories: (a) those whose latest consumption exceeds the baseline freeze; and (b) those in actual non-compliance or at risk of not meeting the 2005 control because their latest consumption exceeds the 50 per cent reduction target.

(a) Countries whose latest consumption exceeds the baseline freeze for halons

16. This category consists of one country, Somalia, which may require additional actions to achieve compliance with the freeze on halons. Somalia would need to phase out a total of 1.1 ODP tonnes to meet the freeze target. Activities would be provided for in Somalia once conditions exist for a sustainable activity.

(b) Countries at risk of not achieving the 50 per cent baseline reduction for halons

17. This category consists of one LVC country that may need to phase-out additional halons amounting to 10 ODP tonnes by 2005 in order to comply with the 50 per cent reduction targets. Somalia has reported latest consumption of 18.8 ODP tonnes in 2006.

ANALYSIS OF COMPLIANCE FOR METHYL BROMIDE (Appendix III)

18. This section presents the analysis for compliance with methyl bromide control measures. It should be noted that all data reported and used in this analysis relate to controlled use only, which means that the data excludes quarantine and pre-shipment (QPS). 138 of the 139 Article 5 countries that have ratified the Copenhagen Amendment have reported complete baseline data. Of these 139 countries, 57 reported zero for both the baseline consumption and the latest consumption and two where 2007 consumption data or baseline is not available.

19. Ninety-nine Article 5 countries have received support from the Multilateral Fund for methyl bromide activities and/or projects. This includes projects that will lead to a complete phase-out of methyl bromide in 52 of these countries, partial phase-out in an additional 15, and other forms of assistance received by 32.

20. Countries have been grouped into the following two categories: (a) those whose latest consumption exceeds the baseline freeze; and (b) those that could be in non-compliance or at risk with the 2005 control because their latest consumption exceeds the 20 per cent reduction. Appendix III identifies those countries that have not ratified the Copenhagen Amendment.

(a) Countries whose latest consumption exceeds the MB baseline freeze

21. This category consists of one country that may require additional actions to achieve compliance with the freeze target: Ecuador. This country would need to phase-out a total of 56.2 ODP tonnes to achieve compliance with the freeze. All countries at risk of not achieving the freeze have received assistance from the Multilateral Fund.

22. Ecuador has a project for partial phase-out to achieve the 20 per cent baseline reduction.

(b) Countries at risk of not achieving the 20 per cent MB baseline reduction

23. This category consists of the following two LVC countries: Ecuador and Honduras. These countries may need to meet additional combined reduction amounting to 110.1 ODP tonnes by 2005 in order to comply with the 20 per cent reduction targets. These countries have received support for methyl bromide activities from the Multilateral Fund. One of these two countries (Honduras) has phase-out agreements or projects for total phase-out, and one country (Ecuador) has a project for partial phase-out to achieve the 20 per cent baseline reduction. The Government of Honduras has reported consumption data that are consistent with their Action Plan requirements.

CARBON TETRACHLORIDE (CTC) (Appendix IV)

24. This section presents the analysis of compliance with CTC control measures. All data reported and used in this analysis are those related to controlled use only, which excludes feedstock. Reported CTC consumption was not differentiated by specific end use, such as solvents and process agents.

25. Of the 144 countries with reported baseline data, 88 reported zero both for the baseline and the latest consumption.

26. The analysis addresses those countries that might be in non-compliance or at risk of not meeting the 2005 control measures because their latest consumption exceeds the 85 per cent reduction. Appendix IV notes those countries that have not ratified the London Amendment.

27. Six countries might not achieve compliance with the 85 per cent reduction by 2005. These countries would need to phase-out a total of 72.8 ODP tonnes to meet the 85 per cent reduction by 2005. One of these six countries has reported consumption above 10 ODP tonnes: Mexico (79.1 ODP tonnes).

28. The Multilateral Fund has provided funding for CTC phase-out agreements or projects in all of the six countries (Bolivia, Chile, Cuba, Indonesia, Mexico and Paraguay). All countries that have ratified the London Amendment and are eligible for Multilateral Fund assistance have received assistance or have activities in the business plans.

METHYL CHLOROFORM (TCA) (Appendix V)

29. This section presents the analysis for compliance with TCA control measures. Of the 144 countries that have reported baseline data, 102 reported zero both for the baseline and the latest consumption.

30. Countries have been grouped into two categories: (a) those whose latest consumption exceeds the baseline freeze; and, (b) those that could be in non-compliance or at risk of not meeting the 2005 control measures because their latest consumption exceeds the 30 per cent reduction target. Appendix V specifies those countries that have not ratified the London Amendment.

(a) Countries whose latest TCA consumption exceeds the baseline freeze

31. All countries are in compliance with the 2003 freeze target.

(b) Countries that could be in non-compliance or at risk of not achieving the 30 per cent TCA baseline reduction

32. All countries are in compliance with the 30 per cent TCA baseline reduction target.

Annex II

INFORMATION ON COUNTRIES SUBJECT TO DECISIONS OF THE PARTIES ON COMPLIANCE AND PROJECTS CLASSIFIED WITH IMPLEMENTATION DELAYS IN THOSE COUNTRIES

Party	Compliance issue	Action	Fund Secretariat Comments	Achieved/Resolved/Regulatory Measures Operational	Report on Delayed Project
Albania	CFC phase out	2007 CFC consumption no greater than 6.2ODPT.	Albania has submitted its ODS data for 2007, reporting consumption of 4.1 ODP tonnes chlorofluorocarbons (CFCs). That data places the Party in advance of both its commitment contained in decision XV/26 and CFC phase –out obligations under the Montreal Protocol in 2007.	Yes	
Armenia	Methyl bromide phase out	2007-2015 methyl bromide consumption no greater than zero.	Armenia had submitted its ozone-depleting substance data for 2007, reporting consumption of methyl bromide at zero ODP tonnes. That information indicated that the party was in compliance with its commitment contained in decision XVIII/20.	Yes	

Party	Compliance issue	Action	Fund Secretariat Comments	Achieved/Resolved/Regulatory Measures Operational	Report on Delayed Project
Bangladesh	Anticipated CFC non-compliance in 2007-2009--MDI Project Report	Submit an update on its progress in implementing its national transition strategy and conversion project, including any revisions that could be made to the estimated amount by which the Party expected to exceed its annual allowable consumption of CFCs in each of the years 2007–2009.	An update on the status of the MDI project had not been provided. UNDP and UNEP were informed that the Government was drafting the response and would submit the information before the next implementation committee meeting. UNEP also indicated that Bangladesh was implementing activities for creating awareness on CFC MDI phase-out with support from Lung Foundation of Bangladesh.	No, but information available from agency	
Bangladesh	Anticipated CFC non-compliance in 2007-2009--MDI Project Report Project Document Signatures	Submit information to address the questions raised by the members of the Committee in the course of its discussion of Bangladesh's situation (see comment box for questions).	With regard to the signature of the project document for the MDI projects with UNDP and UNEP, UNDP and UNEP indicated that the Government has arranged a signing ceremony for October 7th. Once the signature is obtained, the projects will begin implementation.	No, but information available from agency	

Party	Compliance issue	Action	Fund Secretariat Comments	Achieved/Resolved/Regulatory Measures Operational	Report on Delayed Project
Bangladesh	Anticipated CFC non-compliance in 2007-2009--NPP Plan Report	Submit a report on the implementation of its national phase-out plan and any revisions that could be made, in the light of the progress made in the implementation of that plan, to the estimated amount by which the Party expected to exceed its annual allowable consumption of CFCs in each of the years 2007–2009.	UNDP and UNEP informed that the Activities in the national phase-out plan were being implemented. The PMU had been hired and operationalised and the procurement of refrigeration tool kits for the training workshops was underway.	No, but information available from agency	
Bangladesh	Methyl chloroform phase out	2007-2009 TCA consumption no greater than 0.550ODPT	No Article 7 or CP data for 2007 yet reported. However, UNEP reported that the 2007 data was under compilation and was expected to be submitted very soon. Preliminary information given by the Government indicates that the consumption in the year 2007 is expected to be below 0.55 ODP tons limit for TCA.	Yes--According report received by Agency	
Barbados	Regulatory measures	Submit a plan of action to ensure the prompt establishment and operation of an import and export	Barbados advised the Ozone Secretariat in August 2008 that it has established a system for licensing the import and export of controlled ozone-depleting substances which would be gazetted as soon as possible in order to become	No	

Party	Compliance issue	Action	Fund Secretariat Comments	Achieved/Resolved/Regulatory Measures Operational	Report on Delayed Project
		licensing system for ozone depleting substances	operational.		
Belize	CFC phase out	2007 CFC consumption no greater than 3.66ODPT	Belize had submitted its ODS data for 2007, reporting consumption of CFCs at 2.2 ODP tonnes. That information indicated that the Party was in advance of its commitment contained in decision XIV/33 and ahead of its CFC phase-out obligations under the Protocol.	Yes	
Bolivia	CFC phase out	2007 CFC consumption no greater than 11.35ODPT	Bolivia had submitted its ODS data for 2007, reporting consumption of CFCs no greater than 11.35 ODP tonnes. That information indicated that the Party was in advance of its commitment contained in decision XV/29 and ahead of its CFC phase-out obligations under the Protocol.	Yes	

Party	Compliance issue	Action	Fund Secretariat Comments	Achieved/Resolved/Regulatory Measures Operational	Report on Delayed Project
Bosnia & Herzegovina	CFC phase out	2007 CFC consumption no greater than 3ODPT	Bosnia and Herzegovina has submitted its ODS data for 2007, reporting the consumption of 22.1 ODP tonnes of chlorofluorocarbons (CFCs). The reported data for CFCs consumption is inconsistent with the benchmarks contained in decision XV/30 to reduce consumption to no greater than 3.0 ODP tones in 2007. UNIDO indicated that the reasons why Bosnia and Herzegovina did not comply with its phase out obligations include: (1) The framework Environmental Law with by laws legally introducing import, export, licensing system and quotas was published on 15 May 2007. Prior to that, there was no proper control on the import and export of ODS; (2) There had been no progress in the implementation of the institutional strengthening project; (3) There was a lack of high level support to the ozone unit within the Ministry of Environment' and (4)The implementation of NPP activities have been progressing slowly.	No	
Bosnia & Herzegovina	Methyl bromide phase out	2007 methyl bromide consumption no greater than zero.	Bosnia and Herzegovina has submitted its ODS data for 2007, reporting the consumption of 0.0 ODP tonnes of methyl bromide. The data for methyl bromide consumption places the Party in compliance with the commitment	Yes

			contained in decision XV/30.		
Bosnia & Herzegovina	Methyl chloroform phase out	2007 TCA consumption no greater than zero ODPT	Bosnia and Herzegovina has submitted its ODS data for 2007, reporting the consumption of 0.0 ODP tonnes of methyl chloroform. The data for methyl chloroform consumption places the Party in compliance with the commitment contained in decision XVII/28.	Yes	
Botswana	Regulatory measures	Explain whether its licensing system controls the export of methyl bromide and the export of mixtures containing that substance.	UNEP was still awaiting feedback from NOU Botswana on the status of establishment of ODS regulations. A Compliance Assistance visit is planned for November 2008 to assist the NOU expedite the process. According to Germany, methyl bromide is being controlled under the Chemical Act, under which licenses are required for methyl bromide.	No	

Party	Compliance issue	Action	Fund Secretariat Comments	Achieved/Resolved/Regulatory Measures Operational	Report on Delayed Project
Chile	CTC phase out	Possible non-compliance in 2007 with the CTC control measure of 0.1 ODP tonnes.	UNDP and UNEP confirmed that the 2007 CTC imports were for laboratory and analytical uses. Through the ongoing UNDP Technical Assistance Project, CTC users for laboratory and analytical purposes have received technical assistance to replace their techniques. A total of ten users are receiving assistance and five of them have reported successful tests with the alternative techniques. It is not expected a CTC import above the control limit for 2008 as the licensing system is already in place since September 2007.	Yes	CHI/SOL/41/TAS/154 - Since the last report to the Executive Committee Meeting in July, formulation work continues in all companies that have not completed the phase out. Consultant to assist Versachem to achieve formulation. Project is expected to be completed in December 2008.

POTENTIAL NON-COMPLIANCE RISK ASSESSMENT

Countries that responded thus far to the Fund Secretariat questionnaire on the assessment of potential risk of non-compliance (they are marked with an asterisk in the tables below)	78 countries (Albania, Algeria, Angola, Antigua and Barbuda, Argentina, Armenia, Bahrain, Barbados, Belize, Benin, Bolivia, Brazil, Brunei Darussalam, Burkina Faso, Burundi, Cambodia, Cameroon, Cape Verde, Chad, Chile, Colombia, Comoros, Congo, Croatia, Democratic Republic of Congo, Dominican Republic, Ecuador, Egypt, El Salvador, Eritrea, Fiji, Gabon, Georgia, Ghana, Guatemala, Guinea, Guyana, Indonesia, Jamaica, Kyrgyzstan, Lebanon, Liberia, Libyan Arab Jamahiriya, Malaysia, Mali, Mauritania, Mexico, Moldova, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Oman, Pakistan, Palau, Peru, Saint Lucia, Saint Vincent and the Grenadines, Senegal, Serbia, Seychelles, Sierra Leone, Sudan, Suriname, Swaziland, Syrian Arab Republic, The Former Yugoslav Republic of Macedonia, Togo, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Venezuela (Bolivarian Republic of), Viet Nam, Zambia, Zimbabwe)
Countries that indicated that are confident in achieving or maintaining compliance when contacted by telephone but did not send thus far their complete answers to the risk assessment questionnaire (they are marked with a double asterisk in the tables below)	5 countries (Botswana, Dominica, Guinea-Bissau, Honduras, Panama)
Countries that provided comments to the risk indicators	31 countries (Albania, Angola, Argentina, Armenia, Bahrain, Barbados, Belize, Brazil, Burkina Faso, Cambodia, Cameroon, Chile, Croatia, Egypt, Fiji, Georgia, Honduras, Jamaica, Kenya, Lao People's Democratic Republic, Liberia, Malaysia, Morocco, Mozambique, Namibia, Oman, Papua New Guinea, Sierra Leone, Turkmenistan, Uruguay, Viet Nam)

The general indicators are grouped into the categories of indicators covering: licensing systems and importer registration; the extent to which the NOU is operational and integrated into the country's national institutions, the country's views on compliance and the forces encouraging or hindering compliance, and the extent to which ongoing projects are delayed. The risk indicators assessed on the basis of each substance can be divided into two groups: main indicators and those that might indicate risk. The main indicators are related to whether or not the Multilateral Fund has provided assistance to address the remaining consumption of a given ODS either through CAP initiatives or approved projects addressing all of the remaining consumption. The second group consists of indicators that are related to delays, timing, and percentage of disbursement for the projects addressing remaining consumption, approval of annual tranches, consumption patterns and comparisons between imports and quotas, as well as to the cost of ODS versus their alternatives (where available).

General indicators of potential risk of non-compliance

Indicator	Indicator Description	Countries at risk	Countries for which the indicator could not be calculated
-----------	-----------------------	-------------------	---

Indicator	Indicator Description	Countries at risk	Countries for which the indicator could not be calculated
Established licensing system	Countries that have not established licensing systems are at risk of unexpected imports leading to non-compliance.	15 countries (Angola*, Armenia*, Barbados* ³ , Botswana**, Brunei Darussalam*, Cook Islands, Equatorial Guinea*, Eritrea*, Ethiopia, Haiti, Lesotho ⁴ , Nauru, Somalia, Tonga, Vanuatu)	-
Operational licensing system	If licensing systems are not operating effectively, countries could still be at risk of non-compliance.	8 countries (Afghanistan, Gambia, Lebanon*, Libyan Arab Jamahiriya*, Mauritania*, Nicaragua, Sierra Leone*, Solomon Islands) For two countries (Mozambique* and United Republic of Tanzania) it is too early to evaluate their licensing systems as they were recently established)	4 countries
Importers registered	Countries that do not register importers may be at risk of non-compliance because they do not have full knowledge of ODS importers.	10 countries (Guyana*, Haiti, Kiribati, Malawi, Mozambique*, Nauru, Niue, Sierra Leone*, Solomon Islands, Tuvalu)	17 countries
Operational NOU	Countries that have not identified activities under implementation by an NOU may not have operational NOUs and are considered to be at risk because NOUs are the front-line managers of the national ODS phase-out plan.	-	3 countries
NOUs fully integrated into national institutions	When NOUs are fully integrated into national institutions they are more likely to encourage government action to support compliance.	-	5 countries
Projects with implementation delays	Progress in resolving causes of delays	Fourteen of the projects listed with delays at the 55 th Meeting have now been completed. (Annex IV) Six project, where there has been either progress from one milestone to another or a resolution of the implementation delay may be removed from future reporting of projects with implementation delays (Annex V).	
	Projects with some progress	Thirty projects were classified as showing “some progress”. (Annex VI)	
	Projects with no progress - letter of possible cancellation	France. Phase-out of methyl bromide use in the cut flower and banana production (MOR/FUM/29/INV/37). Net approved funds: US \$1,006,652. Funds disbursed: US \$928,212.	

³ Barbados approved the ODS licensing system and with the posting of the ODS Import/Export regulation in the National Gazette, it will become formal as well.

⁴ In the list received on February 20, 2008 from the Ozone Secretariat, Lesotho is not among the countries with an established licensing system. However, in the 2006 Implementation of the Country Programme Report for 2006, Lesotho reported the establishing of the ODS import/export licensing system as of March 2007.
