EXECUTIVE COMMITTEE OF  
THE MULTILATERAL FUND FOR THE  
IMPLEMENTATION OF THE MONTREAL PROTOCOL  
Sixty-first Meeting  
Montreal, 5-9 July 2010

**STATUS OF IMPLEMENTATION OF DELAYED PROJECTS AND PROSPECTS OF  
ARTICLE 5 COUNTRIES IN ACHIEVING COMPLIANCE WITH THE NEXT  
CONTROL MEASURES OF THE MONTREAL PROTOCOL**

## EXECUTIVE SUMMARY

- All countries that are at risk of not meeting the interim reductions or have remaining consumption prior to the 2010 phase-out (and methyl chloroform (TCA) reduction) have either projects approved to meet those targets, activities in the 2010-2014 business plans that would contribute to achieving them, or activities that had been conducted under the Global Environment Facility (GEF), except:
  - Ecuador for carbon tetrachloride (CTC) where it is in compliance but has remaining CTC consumption of 0.1 ODP tonnes;
  - One country that has not yet provided 2008 or 2009 Article 7 (A7) or country programme (CP) data and therefore the assessments of its prospect of compliance is based on prior years' data;
  - Latest consumption data indicate that 84 countries (60 with 2008 data and one with 2007 data) continued to have CFC consumption, but 59 reported zero level and four reported negative consumption;
  - Latest consumption data, however, indicated that most countries have zero consumption of the remaining substances (excluding HCFCs) with only eight countries reporting halon consumption (seven with 2008 data); 35 countries reporting methyl bromide (MB) consumption (19 with 2008 data); 15 reporting CTC consumption (nine with 2008 data); and two countries exceeding the 70 per cent TCA target for 2010 (one with 2008 data);
  - All countries have received HCFC phase-out management plan (HPMP) preparation funds or have submitted requests to the 61<sup>st</sup> Meeting.
- Concerning countries with possible compliance issues being considered by the Implementation Committee in 2010, of the 41 issues for Article 5 (A5) Parties to be considered, 26 have been resolved;
- Data on the implementation of country programmes (CPs) indicate that:
  - All countries did provide data according to the new format approved over five years ago, but only five countries submitted data using the web-based system for 2009;
  - From an estimated total ODS consumption of 3,073 ODP tonnes in 2009 in A5 countries, excluding HCFCs, about 1,155.1 ODP tonnes (including A7 data for the four countries that have not reported CP data) remain to be considered for action by the Executive Committee;
  - Most of the 1,155.1 ODP tonnes of consumption is for MB (1,107.2 ODP tonnes) followed by CFCs (47.8 ODP tonnes);
  - A total of 441,738 metric tonnes (29,101 ODP tonnes) of HCFC consumption was reported in CP data. For the 53 countries reporting 2008 and 2009 data, HCFC consumption decreased by 0.3 per cent;
  - 102 out of 129 countries reporting information on refrigerant management plan/national phase-out management plan/terminal phase-out management plans (RMP/NPP/TPMPs) indicated either progress or had completed their implementation;
  - Of the countries reporting information on licensing systems, 130 out of 138 have reported them as being operational (all of the 52 countries that reported 2009 data had operational licensing systems with 98 per cent of them functioning 'satisfactorily' or 'very well');
  - In most countries, the price of CFC-11 continues to increase while the prices of CFC-12 (although higher than that of 2005) and of several alternatives are decreasing.

- Of the 19 projects with implementation delays, three have been completed and 15 are recommended for continued monitoring;
- An additional report was recommended for two projects for which status reports were to be presented to the current meeting;
- Additional information on HCFC activities approved at the 60<sup>th</sup> Meeting, and their associated phase-out, has been included in Annex I, Appendix VI.

## Introduction

1. This document consists of four parts:
  - (a) Part I has been prepared in response to decisions 32/76(b) and 46/4, which requested the Secretariat to prepare an update for each Meeting of the Executive Committee on the status of compliance of A5 countries that are subject to the Montreal Protocol's control measures.
  - (b) Part II contains information on those A5 countries that are subject to decisions of the Parties and recommendations of the Implementation Committee on compliance.
  - (c) Part III presents data on the implementation of CPs, including an analysis of the ozone-depleting substances (ODS) consumption data, by sector. It also contains a section that addresses the characteristics of national ODS phase-out programmes.
  - (d) Part IV presents the results of the progress made to achieve compliance, including information on projects with implementation delays.
2. The analysis performed and the conclusions reached in this document are without prejudice to the status of compliance determined by the Meeting of the Parties, which is the only body empowered to assess such status. Data reported pursuant to A7 of the Protocol are used exclusively to determine a country's status of compliance on an annual basis. The analysis in this document uses a mix of data reported to the Fund Secretariat on CP implementation for various compliance periods and A7 data. Therefore, this document does not determine compliance *per se*. Rather, it assesses the prospects of A5 countries in their efforts to comply with one or more of the control measures in the Montreal Protocol. Its main purpose is to identify ODS yet to be addressed by actions supported by the Multilateral Fund.

## **PART I: STATUS OF, AND PROSPECTS FOR, COMPLIANCE (BASED ON LATEST AVAILABLE DATA)**

3. This section presents the results of the analysis of the status of compliance with control measures up to and including the remaining control measures for 2010 for CFCs, halon, and CTC, and 2015 for MB and TCA.<sup>1</sup> The analysis assumes that the latest consumption reported under A7 or in CP data has taken into account the phase-out from completed projects approved by the Executive Committee. Since the inception of the Multilateral Fund up to December 2009, 229,880 ODP tonnes of consumption and 195,848 ODP tonnes of production had been phased out from completed projects.
4. The completed projects were valued at US \$1.92 billion out of an approved total of approximately US \$2.25 billion. A detailed description of the methodology used in the analysis is provided in UNEP/OzL.Pro/ExCom/37/18, which was presented at the 37<sup>th</sup> Meeting of the Executive Committee.
5. The analysis used the latest available data. As of 21 May 2010, 32 A5 countries of 147 had reported 2009 data pursuant to A7 (compared to 28 in June 2009). As of 2 June 2010, an additional 21 countries reported to the Fund Secretariat 2009 data only on progress in the implementation of the country programmes (decision 17/34). For countries that had not submitted 2009 data, the latest consumption data available was used in the analysis. This involved using 2008 A7 data for 93 countries and 2007 A7 data for one country. The analysis assumes that the latest reported levels of ODS

---

<sup>1</sup> No projects have been identified that address Annex B-1 substances; the Executive Committee has neither considered nor funded projects that address these substances that are subject to the 85 per cent baseline reduction starting in 2007.

consumption excluding HCFCs have not increased, although this might not be true for some 94 countries for which 2009 data was not available and which might not be in compliance.

6. The bilateral and multilateral implementing agencies submitted annual progress reports to the 61<sup>st</sup> Meeting of the Executive Committee, which contained data on the status of implementation of all activities and projects approved by the Committee up to the end of 2009. Data on potential approvals in 2010 have been taken from the *Consolidated Revised Business Plan of the Multilateral Fund for the Years 2010-2014* (UNEP/OzL.Pro/ExCom/61/7), as submitted to the 61<sup>st</sup> Meeting.

7. The Fund Secretariat will continue to synthesize all of the data that was included in previous versions of the reports on the status of, and prospects for, compliance, which have been used by the Fund Secretariat for analytical purposes. These data are available upon request.

## **PRODUCTION SECTOR**

8. Of the seven<sup>2</sup> A5 countries with CFC production facilities, the Governments of Argentina, China, India, the Democratic People's Republic of Korea, Mexico and the Bolivarian Republic of Venezuela have agreements in place for scheduled reductions. The Government of Brazil indicated that it has phased out its production of CFCs on its own. For halon production, the Government of China has an agreement in place and the Government of India received a one-time grant for the closure of its halon production facilities.

9. Four countries (Brazil, China, India and the Democratic People's Republic of Korea) have a CTC production baseline. Projects for the complete phase-out of CTC in the production and consumption sectors in three countries (China, the Democratic People's Republic of Korea and India) have been approved by the Executive Committee. A CTC process agent sector project was approved for Brazil at the 54<sup>th</sup> Meeting. TCA production closure projects were only approved for China.

10. MB production closure projects were approved for China, which was the only one of two A5 countries with MB production facilities. The second is the Republic of Korea, which has not sought Fund assistance.

11. The Executive Committee has approved project preparation for the HCFC production sector in China and invited the submission of a technical audit as the Sub-group on the Production Sector continues its discussion on guidelines for the HCFC production sector in the margins of the current meeting.

## **CONSUMPTION SECTOR**

12. This section presents a summary of the results of a detailed analysis of the extent to which countries appear to be in non-compliance or are at risk of non-compliance. The summary is based on data included in Annex I, which contains detailed information for each country, presented by substance. Annex I also indicates whether countries have received all of the assistance expected to be provided by the Multilateral Fund.

13. Information has been included in the assessment of compliance in Annex I on when the activity enabling compliance was approved and whether the country has reported the establishment of a licensing system. This information should further enable the Executive Committee to assess the prospects of compliance for countries because the approval date indicates how long the project or agreement has been under implementation. Further, the information on the establishment of a licensing system indicates that

---

<sup>2</sup> Although Romania received funding for production and consumption phase-out, it is not included since it has been reclassified as a non-Article 5 country as of 1 January 2008.

controls exist to enable future compliance, regardless of the level of current consumption. The information on project approval is taken from the Inventory on Approved Projects. The data on the establishment of licensing systems has been provided by the Ozone Secretariat as at 14 May 2010.

### CFCs

14. A summary of the status of countries with respect to compliance with controls on CFCs is presented in Table 1. Table 1 indicates the type of data reported and includes countries grouped into two categories: (i) those whose latest consumption exceeds the 85 per cent reduction target of 2007 that applies until December 2009; and (ii) those whose latest consumption exceeds the 2010 100 per cent phase-out target.

Table 1

**CFC CONTROL MEASURES:  
SUMMARY OF NON-COMPLIANCE OR AT RISK OF NON-COMPLIANCE**

<b>Data</b>	<b>Countries whose latest consumption exceeds the 85 per cent reduction target of 2007</b>	<b>Countries whose latest consumption exceeds the 2010 100% phase-out target</b>
Latest consumption	3 countries (Bangladesh, Iraq and Vanuatu; Bangladesh was in compliance with its Action Plan for 2009).	84 countries
2009 Data (A7 or CP)	Bangladesh (Bangladesh was in compliance with its Action Plan).	23 countries

15. All of the countries whose latest consumption exceeds their control measures or that are considered to be at risk of non-compliance have either received support from the Multilateral Fund or have activities planned in the 2010-2014 business plans of the agencies, except for Angola, Ethiopia, Somalia and Timor-Leste. The CFC TPMP for these countries will be integrated into HPMPs according to decision 60/5(d).

### Halons

16. A summary of the status of countries with respect to compliance with controls on halons is presented in Table 2. Seventy-five countries have reported no consumption of halons between 1995 and 2009. Sixty-one countries have received support for halon banking activities or phase-out agreements, which includes countries participating in regional halon banks. Table 2 presents the type of data reported and includes countries, which have been grouped into the following two categories: (i) those whose latest consumption exceeds the 50 per cent reduction target of 2005 that applies until December 2009; and (ii) those whose latest consumption exceeds the 2010 100 per cent phase-out target.

Table 2

**HALON CONTROL MEASURES:  
SUMMARY OF NON-COMPLIANCE OR AT RISK OF NON-COMPLIANCE**

<b>Data</b>	<b>Countries whose latest consumption exceeds the 50 per cent reduction target for halons of 2005</b>	<b>Countries whose latest consumption exceeds the 2010 100% phase-out target</b>
Latest consumption	Iraq	8 countries
2009 Data (A7 or CP)	None	Saudi Arabia

17. All of the countries whose latest consumption exceeds their control measures or that are considered to be at risk of non-compliance have received support from the Multilateral Fund, except the Republic of Korea and the United Arab Emirates. The Republic of Korea and the United Arab Emirates had agreed not to receive funding from the Multilateral Fund.

### **Methyl bromide**

18. Table 3 presents a summary of countries' compliance with MB control measures (excluding quarantine and pre-shipment). All of the 144 A5 countries that have ratified the Copenhagen Amendment have reported complete baseline data. The three A5 countries that have not ratified the Copenhagen Amendment are: Angola, Guinea and Nepal. Of the 144 countries that have ratified the Copenhagen Amendment, 58 reported zero for both the baseline consumption and the latest consumption. In one case 2008 consumption data was not available. Ninety-nine A5 countries have received support from the Multilateral Fund for MB phase-out activities and/or projects. Table 3 presents the type of data reported and includes countries, which have been grouped into the following two categories: (i) those whose latest consumption exceeds the 20 per cent reduction target of 2005 that applies until December 2014; and (ii) those whose latest consumption exceeds the 2015 100 per cent phase-out target.

Table 3

**METHYL BROMIDE CONTROL MEASURES:  
SUMMARY OF NON-COMPLIANCE OR AT RISK OF NON-COMPLIANCE\***

<b>Data</b>	<b>Countries whose latest consumption exceeds the 20 per cent MB reduction target of 2005</b>	<b>Countries whose latest consumption exceeds the 2015 100% phase-out target</b>
Latest consumption	Iraq and Turkmenistan	35 countries
2009 data (A7 or CP)	Turkmenistan	16 countries

\* This table refers to 144 A5 countries with baseline and latest consumption data reported.

19. Iraq and Turkmenistan are the only countries whose latest consumption exceeds its 2005 control measures. Turkmenistan has approved projects that will lead to complete phase-out of methyl bromide and Iraq has received project preparation projects at the 58<sup>th</sup> Meeting for methyl bromide activities from the Multilateral Fund. Iraq has a project planned in the 2010-2014 business plan.

### **Carbon tetrachloride**

20. Table 4 presents a summary of countries' compliance with the CTC control measures. The data summarized exclude feedstock and do not differentiate by specific end use (such as solvents and process

agents). Of the 146 countries with reported baseline data, 90 reported zero both for the baseline and the latest consumption. Table 4 presents the type of data reported and identifies countries that have been grouped into the following two categories: (i) those whose latest consumption exceeds the 85 per cent reduction target of 2005 that applies until December 2009; and (ii) those whose latest consumption exceeds the 2010 100 per cent phase-out target.

Table 4

**CARBON TETRACHLORIDE CONTROL MEASURES:  
SUMMARY OF NON-COMPLIANCE OR AT RISK OF NON-COMPLIANCE**

<b>Data</b>	<b>Countries whose latest consumption exceeds the 85 per cent reduction target of 2005</b>	<b>Countries whose latest consumption exceeds the 2010 100% phase-out target</b>
Latest consumption	Ecuador and Iraq	15 countries
2009 data (A7 or CP)	None	6 countries

21. All of the countries whose latest consumption exceeds their control measures or that are considered to be at risk of non-compliance have received support from the Multilateral Fund, except Ecuador. Ecuador is the only country that may not need additional assistance to meet 100 per cent reduction target for CTC. The World Bank looked into the possibility of a project and found that there was no project due to laboratory uses.

**Methyl chloroform**

22. Table 5 presents a summary of countries' compliance with the TCA control measures. Of the 146 countries that have reported baseline data, 103 reported zero both for the baseline and the latest consumption. Table 5 presents the type of data reported and indicates countries, which have been grouped into the following three categories: (i) those whose latest consumption exceeds the 30 per cent reduction target of 2005 that applies until December 2009; (ii) those whose latest consumption exceeds 70 per cent reduction target of 2010; and (iii) those whose latest consumption exceeds the 2015 100 per cent phase-out target.

Table 5

**METHYL CHLOROFORM CONTROL MEASURES:  
SUMMARY OF NON-COMPLIANCE OR AT RISK OF NON-COMPLIANCE**

<b>Data</b>	<b>Countries whose latest consumption exceeds the 30 per cent TCA reduction target of 2005</b>	<b>Countries whose latest consumption exceeds the 70 per cent TCA reduction target of 2010</b>	<b>Countries whose latest consumption exceeds the 100 per cent TCA reduction target of 2015</b>
Latest consumption	None	2 countries (Bangladesh and Republic of Korea (the)). (Bangladesh was in compliance with its Action Plan for 2009).	9 countries
2009 data (A7 or CP)	None	Bangladesh (Bangladesh was in compliance with its Action Plan for 2009).	6 countries

23. All of the countries whose latest consumption exceeds their control measures or that are considered to be at risk of non-compliance have received support from the Multilateral Fund, except for the Republic of Korea. The Republic of Korea has agreed not to receive funding from the Multilateral Fund.

## HCFCs

24. Appendix VI includes an analysis of the latest consumption data on HCFCs and indicates whether the country had received HPMP preparation funding, the number of investment projects approved, the number of demonstration projects approved, total phase-out approved in ODP tonnes and activities planned in the 2010 business plans. A new column has been added to the appendix to indicate HPMP approvals and the duration covered by the HPMP (such as, HPMP approved to achieve the 10 per cent reduction in 2015 or to achieve the 35 per cent reduction in 2020, for example).

25. The baseline data for HCFCs will not be available until 2011 when both of the baseline years (2009 and 2010) will have been reported. All countries have received HPMP preparation projects or have submitted requests to the 61<sup>st</sup> Meeting.

## **PART II: STATUS OF IMPLEMENTATION IN COUNTRIES SUBJECT TO DECISIONS OF THE PARTIES ON COMPLIANCE AND THOSE AT RISK OF NON-COMPLIANCE**

26. This section addresses A5 countries that are subject to decisions on compliance and those at risk of non-compliance.

27. There are 41 compliance-related issues from decisions of the Parties applying to 35 countries that had been considered by the Implementation Committee in 2009 with some decisions relevant to 2010. These issues include regulatory matters (licensing/quotas systems and bans on ODS-containing equipment importation), data reporting, and compliance with the control measures/action plans, by substance. Table 6 indicates the extent to which progress has been made with regard to the decisions of the Implementation Committee based on information provided to the Ozone Secretariat, implementing agencies (IA), and through CP data.

Table 6

**REPORTED COMPLIANCE WITH COMPLIANCE-RELATED DECISIONS OF THE PARTIES**

<b>Resolution of Compliance issue</b>	<b>Halon</b>	<b>MB</b>	<b>CFC</b>	<b>CTC</b>	<b>TCA</b>	<b>Regulatory measures</b>
Yes per Ozone Secretariat			Saudi Arabia	Turkmenistan		Armenia, Equatorial Guinea, Haiti, Holy See (the), Iraq, Tonga
Yes per IA			Vanuatu			Eritrea
Yes per A7 data		Armenia, Guatemala, Honduras, Uruguay	Belize, Dominica	Mexico		
Yes per CP data	Kyrgyzstan	Bosnia and Herzegovina	Bangladesh, Bosnia and Herzegovina, Maldives, Namibia, Paraguay	Paraguay	Bangladesh	
No per Ozone Secretariat						Botswana
No per IA						
No CP or A7 data	Libyan Arab Jamahiriya (the), Somalia	Botswana, Chile, Ecuador, Uganda	Albania, Bolivia (Plurinational State of), Guinea-Bissau, Kenya, Micronesia (Federated States of), Nepal, Nigeria		Chile	

28. Based on the information in Table 6, 26 of the 41 issues have been resolved: seven based on Article 7 data; eight based on reports to the Ozone Secretariat; nine based on country programme data; two based on reports from the implementing agencies. Neither Article 7 nor country programme data was available for 14 countries.

**INFORMATION IN ANNEX II**

29. Annex II presents information on countries subject to decisions of the Parties on compliance. It is arranged by compliance issue and by country. In some cases there is no 2009 data to assess compliance with the control measures and action plans.

30. Annex II also includes a column entitled “Multilateral Fund Comments” that provides information from CP data reports submitted by National Ozone Units, input from the Ozone Secretariat and implementing agencies, and data from the latest status and progress reports on the issue.

**PART III: DATA ON THE IMPLEMENTATION OF COUNTRY PROGRAMMES**

31. Part III contains data on the implementation of CPs, which are submitted to the Fund Secretariat by 1 May of each year and include ODS consumption, by sector. This section also presents additional information on the characteristics of a country’s ODS phase-out programme.

32. The format for country programme data reporting was approved at the 35<sup>th</sup> Meeting of the Executive Committee in decision 35/58 (e).

### ODS CONSUMPTION DATA BY SECTOR

33. The database for the CP data is available on the Fund Secretariat's web site ([www.multilateralfund.org](http://www.multilateralfund.org)) in the spreadsheet programme, Microsoft Excel 2002.

34. As of 2 June 2010 the Secretariat had received reports on the implementation of CPs for 2009 from 52 of the 143 countries required to submit such reports, for 2008 from 82 countries and for 2007 from five countries. The following countries have never reported CP data: Equatorial Guinea, Eritrea and Somalia. Timor-Leste has not reported CP data as it has only recently ratified the Protocol, but the other countries all ratified in 2007 or before. Equatorial Guinea did not receive assistance until July 2006. It should be noted that renewal of institutional strengthening (IS) projects is contingent upon receiving such data. Moreover CP implementation data must be submitted in advance of the last meeting of the year and subsequent meetings as a pre-condition for the approval and release of funding for projects. All of the countries requesting projects for consideration at the 61<sup>st</sup> Meeting submitted 2008 CP data, pursuant to decision 52/5, except for Timor-Leste.

35. Although the consumption levels recorded are from different years and may not necessarily correspond to the A7 data reported, the CP data provides the most recent sectoral assessment by country and on a global basis. These data should assist the A5 countries concerned and the Executive Committee to assess what remains to be phased out on a sectoral basis.

36. Table 7 presents the total remaining ODS consumption to be phased out by sector, taking into account projects that have been approved but are not yet implemented. It also includes total consumption phase-out from approved projects that have not been completed, and the percentage of the balance to be phased out (by sector).

Table 7

### TOTAL REMAINING ODS CONSUMPTION BY SECTOR

Sector	Total latest consumption	Percentage of total latest consumption	Total phase-out approved but not completed	Balance to be phased out	Percentage of balance to total latest consumption
Aerosol	19.3	0.16%	555.1	*	N/A
Foam	98.3	0.82%	3,613.4	*	N/A
Fumigant	5,888.3	48.89%	1,768.4	4,119.9	69.97%
Halon	1,060.0	8.80%	2,137.8	*	N/A
Lab Use	225.0	1.87%	0.0	225.0	100.00%
MDI	1,171.5	9.73%	1,524.4	*	N/A
Process agent	35.6	0.30%	13,483.0	*	N/A
Refrigeration	3,081.6	25.58%	4,766.2	*	N/A
Solvent	462.1	3.84%	235.7	226.4	48.99%
Sterilant	0.0	0.00%	0.0	0.0	N/A
Tobacco	3.2	0.03%	0.0	3.2	100.00%
<b>Total</b>	<b>12,045.0</b>	<b>100.00%</b>	<b>28,084.0</b>	<b>4,574.6</b>	<b>37.98%</b>

\* More phase-out approved than latest consumption.

37. The total ODS phase-out approved but not implemented (Table 7) does not include that approved in principle for multi-year agreements (MYAs) or the phase-out level that is expected to result from the implementation of RMPs and halon banking. In addition to the phase-out already being funded, the Executive Committee has approved, in principle, sectoral and national phase-out projects for which annual tranches are released on the basis of achieved scheduled reductions.

38. The phase-out from future annual tranches will address a significant amount of the remaining consumption identified in Table 7. Moreover, RMPs for low-volume-consuming (LVC) countries account for 85 per cent of the baseline consumption of these countries and TPMPs account for the remaining baseline. However, the data in the projects that have been approved but are not yet implemented do not account for all of this tonnage. In addition, the approved but unimplemented ODS phase-out in Table 7 does not include some halon consumption for countries that have already received a halon banking project.

39. Table 8 presents the remaining consumption, by substance, which has not yet been addressed by the Executive Committee after taking into account MYAs, TPMPs, RMPs for LVC countries, and halon banking.

Table 8

**TOTAL REMAINING ODS CONSUMPTION BY SUBSTANCE BASED ON CP DATA  
(AFTER TAKING INTO ACCOUNT THE PHASE-OUT REPRESENTED BY RMPs FOR  
LVC COUNTRIES, HALON BANKING, TOTAL PHASE-OUT PROJECTS, AND MYAs THAT  
ARE APPROVED IN PRINCIPLE)**

<b>Chemical</b>	<b>Remaining ODS consumption (ODP tonnes)</b>
CFC	25.5
CTC	0.1
<b>Chemical</b>	<b>Remaining ODS consumption (ODP tonnes)</b>
Halons	0.0
MB	1,117.9
TCA	0.0
<b>Total</b>	<b>1,143.5</b>

40. The document submitted to the 58<sup>th</sup> Meeting of the Executive Committee indicated that there were 1,609 ODP tonnes remaining to be addressed, based on the latest CP data, taking into account projects that had been approved but not implemented. The reduction of 465.5 ODP tonnes in consumption is due to the funding approvals at the 58<sup>th</sup>, 59<sup>th</sup> and 60<sup>th</sup> Meetings of the Executive Committee and the updated consumption data received since the document was issued for consideration at the 60<sup>th</sup> Meeting. The remaining ODS consumption is based on the 139 A5 countries that reported CP data. The four countries that have not reported CP data may also seek the Fund's assistance. Using A7 data for those four countries, the total amount of remaining ODS consumption still to be addressed (taking into account the phase-out represented by TPMPs and RMPs for LVC countries, halon banking, total phase-out projects, and MYAs that are approved in principle) appears to be 1,155.1 ODP tonnes (Table 9). This is a reduction from the figure of 3,073 ODP tonnes that had been reported to the 58<sup>th</sup> Meeting.

Table 9

**TOTAL REMAINING ODS CONSUMPTION BY SUBSTANCE BASED ON CP AND A7 DATA  
(AFTER TAKING INTO ACCOUNT THE PHASE-OUT REPRESENTED BY RMPs FOR  
LVC COUNTRIES, HALON BANKING, TOTAL PHASE-OUT PROJECTS, AND MYAs THAT  
ARE APPROVED IN PRINCIPLE)**

<b>Chemical</b>	<b>Remaining ODS consumption (ODP tonnes)</b>
CFC	47.8
CTC	0.1
Halons	0.0
MB	1,107.2
TCA	0.0
<b>Total</b>	<b>1,155.1</b>

#### HCFC data

41. Table 10 presents the levels of HCFC consumption based on the latest data available. It shows that there are 441,738 metric tonnes (29,101 ODP tonnes) of HCFC consumption consisting primarily of HCFC-22 (62.7 per cent of the total) and HCFC-141b (31.8 per cent of the total). The 441,738 metric tonnes of HCFCs represents an increase of 62,754 metric tonnes over the amount reported (378,984 metric tonnes) to the 58<sup>th</sup> Meeting. By comparison, the Fund has phased out 232,317 metric tonnes (250,904 ODP tonnes) of ODS consumption as at 31 December 2009. The level in this report is based on data from 2009 for 52 countries, from 2008 for 82 countries and from 2007 for five countries. For those countries reporting both 2008 and 2009 data, HCFC consumption decreased by 0.3 per cent.

Table 10

**LEVELS OF LATEST HCFC CONSUMPTION DATA BY CHEMICAL**

<b>Chemical</b>	<b>Metric tonnes</b>	<b>ODP tonnes</b>	<b>Percent of total</b>
HCFC-123	1,279.4	25.6	0.09%
HCFC-124	491.5	10.8	0.04%
HCFC-141b	84,042.4	9,244.7	31.77%
HCFC-141b in Imported Pre-blended Polyol	106.5	11.7	0.04%
HCFC-142b	24,184.4	1,572.0	5.40%
HCFC-21	37.2	1.5	0.01%
HCFC-22	331,479.0	18,231.3	62.65%
HCFC-225	4.6	0.3	0.001%
HCFC-225ca	86.2	2.2	0.01%
HCFC-225cb	26.7	0.9	0.003%
<b>Grand Total</b>	<b>441,738.0</b>	<b>29,101.0</b>	<b>100.00%</b>

## CHARACTERISTICS OF COUNTRY PROGRAMMES

42. The new CP reporting format adopted in decision 46/39 and revised at the 60<sup>th</sup> Meeting (decision 60/4(b)(iv)) provides an opportunity for NOUs to assess the prospects for compliance from both a quantitative and qualitative perspective.

### Completeness of the data

43. This is the fifth year of use of the new format for reporting CP data; although it was revised at the 60<sup>th</sup> Meeting for HCFCs, all of the 52 countries provided 2009 data using the new format; however, only 30 countries used the revised format approved at the 60<sup>th</sup> Meeting. Nevertheless, most of the data provided in the new format were incomplete for the three main sections: qualitative, quantitative and regulatory. Only three countries, Bahamas, Egypt and Malaysia provided all the information for all three sections. Only five countries submitted 2009 data using the web-based system, which was initiated on 25 April 2007.

44. Only 52 of the required 143 countries provided 2009 CP data in time for analysis in this document. All countries that submitted requests for funding to the 61<sup>st</sup> Meeting also submitted 2008 CP data, except for Timor-Leste.

### Summary of data

#### All Other ODS

45. Forty-two of the 50 reporting countries with RMPs/NPP/TPMP either indicated progress or had completed the implementation of their RMPs/NPP/TPMP. Including those countries that reported data prior to 2009, 102 out of 129 countries showed progress or completed the implementation of their RMPs/NPP/TPMP.

46. Including those countries that reported data prior to 2009, a total of 14,281 recovery machines and 7,424 recycling machines are operational. Of those countries employing R&R machines, 67.2 per cent reported that the machines had been functioning 'satisfactorily' or 'very well'. A total of 232.4 ODP tonnes of CFC-11 has been recovered all of which were reused, and a total of 5,172 ODP tonnes of CFC-12 have been recovered of which 2,999 ODP tonnes were reused. Data are not collected for the other ODS.

47. Latest data reported for 2006-2009, taken together with that from previous years' reports, indicate that a total of 88,636 refrigeration servicing technicians have been trained, 63,229 have been certified, and 3,807 refrigeration technician trainers have been trained.

48. One-hundred and thirty of the 143 countries with reporting requirements have reported operational licensing systems (all of the 52 countries that reported 2009 data had operational licensing systems with 98 per cent of them functioning 'satisfactorily' or 'very well').

49. One-hundred and twelve of the 131 countries that reported data (including data from previous years' reports) indicated that they had quota systems in place. In addition, 125 countries advised that importer registration was a requirement. A total of 15,360 customs officers have been reported as having been trained. It is not clear whether this is annual or cumulative data. The costs of some ODS and substitutes have been summarized in Table 11.

Table 11

## AVERAGE PRICE OF ODS AND SUBSTITUTES

ODS	Average price/ kilogram (US\$/kg) (2005 per Report to 50 <sup>th</sup> Meeting)	Average Price/ kilogram (US\$/kg) (2006 per Report to 54 <sup>th</sup> Meeting)	Average Price/ kilogram (US\$/kg) (2007 per Report to 57 <sup>th</sup> Meeting)	Average Price/ kilogram (US\$/kg) (2008 per Report to 60 <sup>th</sup> Meeting)	Average Price/ kilogram (US\$/kg) (2009 Report)	Number of countries where prices increased	Number of countries where prices decreased	Range (US\$/kg) (2009 Report)	Number of countries reporting non-zero data for 2009	Data excluded* from the calculation of the average (US\$/kg.) (2009 Report)
CFC-11	\$7.09	\$9.67	\$10.65	\$11.42	\$11.68	6	3	\$4.50 (Saudi Arabia) to \$20.00 (Argentina)	11	\$1.58 (Algeria), \$40.70 (Brazil)
CFC-12	\$8.98	\$10.95	\$12.81	\$11.52	\$9.61	12	10	\$1.94 (Algeria) to \$18.89 (Dominica)	27	\$0.08 (Zambia), \$19.55 (Costa Rica)
CFC-113	\$9.02	\$19.41	\$19.00	\$16.52	\$15.69	N/A	1	\$11.00 (Malaysia) to \$20.38 (Algeria)	4	\$219.07 (Serbia), \$266.00 (Argentina)

ODS	Average price/kilogram (US\$/kg) (2005 per Report to 50 <sup>th</sup> Meeting)	Average Price/kilogram (US\$/kg) (2006 per Report to 54 <sup>th</sup> Meeting)	Average Price/kilogram (US\$/kg) (2007 per Report to 57 <sup>th</sup> Meeting)	Average Price/kilogram (US\$/kg) (2008 per Report to 60 <sup>th</sup> Meeting)	Average Price/kilogram (US\$/kg) (2009 Report)	Number of countries where prices increased	Number of countries where prices decreased	Range (US\$/kg) (2009 Report)	Number of countries reporting non-zero data for 2009	Data excluded* from the calculation of the average (US\$/kg.) (2009 Report)
R-507A	N/A	N/A	\$12.47	\$17.69	\$17.13	6	2	\$8.00 (Malaysia) to \$50.00 (Lesotho)	16	\$5.66 (The Former Yugoslav Republic of Macedonia), \$77.37 (Croatia)

\* All zero \$ entries were excluded.

50. No such data have been provided for halons, MB or CTC.

51. Table 11 indicates that average prices for CFC-12, CFC-113, CFC-114, HCFC-141b, HCFC-142b, HCFC-22, HCFC-245fa, HFC-356mfc, Isobutane (HC-600a), Pentane, R-404A, R-407C, R-502 and R-507A have decreased and that more countries experienced decreases in prices than increases. However, consistent with the 2005, 2006 and 2007 data, the average prices of substitutes (such as R-502) remain higher than those of CFC-11 and CFC-12. Also, HCFC-22, HCFC-141b and HCFC-142b still remain much less expensive than the relevant CFCs, based on this sample of data.

#### HCFC

52. This is the first year of use of the revised format to include relevant information on HCFC phase-out approved at the 60<sup>th</sup> Meeting (decision 60/4(b)(iv)). Thirty of the 52 countries provided 2009 data using the new format with information on HCFC.

53. Six of the 30 countries that reported data indicated that they had quota systems in place and 22 countries advised that importer registration was a requirement. A total of 272.8 ODP tonnes of HCFC-22 has been recovered of which 230.8 ODP tonnes were reused. A total of 875 customs officers have been reported as having been trained on HCFC.

54. A total of 888 recovery machines and 318 recycling machines are operational. 5,590 technicians have been certified, 12,524 technicians have been trained and 354 trainers for technicians have been trained to recover and recycle HCFCs.

#### **PART IV: PROJECTS WITH IMPLEMENTATION DELAYS AND SPECIAL STATUS REPORTS**

55. There are 19 ongoing projects that have been classified as projects with implementation delays and are subject to the Committee's procedures for project cancellation. Projects with implementation delays are those: (i) that are expected to be completed more than 12 months late, and/or, (ii) where no disbursement has been made within 18 months of the project's approval. The breakdown of projects with implementation delays, by implementing and bilateral agency, is presented in Table 12 as follows: UNDP (seven); UNEP (three); UNIDO (three); the World Bank (two); Japan (three) and Australia (one). Delays are most commonly caused by factors associated with technical reasons (9).

Table 12

**SUMMARY OF PROGRESS FOR PROJECTS WITH IMPLEMENTATION DELAYS**

	<b>Australia</b>	<b>Japan</b>	<b>UNDP</b>	<b>UNEP</b>	<b>UNIDO</b>	<b>World Bank</b>	<b>Total</b>
Number of projects reported	1	3	7	3	3	2	19
Number of projects completed			2	1			3
Number of projects with some progress	1	3	4	2	3	2	15
Number of projects with no progress			1				1

*Progress in resolving causes of delays*

56. In their reports, the implementing and bilateral agencies advised that there have been varying degrees of progress in overcoming delays. Three of the projects listed with delays at the 60<sup>th</sup> Meeting have now been completed (Annex III).

*Projects with some progress*

57. Fifteen projects have been classified as showing “some progress”, and the implementing and bilateral agencies indicated that these would continue to be monitored (Annex IV). Notwithstanding progress, it should be noted that projects approved over three years ago must continue to be monitored pursuant to decision 32/4. These projects cannot, therefore, be removed from the list for monitoring prior to final completion irrespective of the progress that may have been made. They are thus recommended for continued monitoring.

*Projects with no progress - letter of possible cancellation*

58. A project for which no progress is being reported for the first time, and where this assessment has been agreed with the relevant agency, include the technical assistance for methyl bromide reductions and formulation of regional phase-out strategies for LVC country (AFR/FUM/38/TAS/32) implemented by UNDP. Under existing procedures, the Fund Secretariat will send notices of possible cancellation in respect of this project on the basis that it has achieved no progress.

*Projects for which additional status reports were requested*

59. IS, halon banking, customs training, recovery and recycling, and demonstration projects are not subject to procedures for project cancellation. Nevertheless, the Executive Committee has decided to continue to monitor them as appropriate (decision 36/14 (b)). At its 60<sup>th</sup> Meeting, the Executive Committee requested six additional status reports. Such status reports are needed when there has been no indication of any progress since the last report and/or where additional impediments to implementation have been reported. Additional status reports are requested for submission to the 61<sup>st</sup> Meeting for two projects (BHE/SEV/43/INS/19 and KUW/PHA/52/TAS/10).

*Projects with automatic cancellation*

60. At its 60<sup>th</sup> Meeting, the Executive Committee decided to cancel four projects if no progress was reported to the 61<sup>st</sup> Meeting (decision 60/4(c)). Three projects have been cancelled automatically since no progress had been reported at the 61<sup>st</sup> Meeting (Annex V).

**RECOMMENDATIONS**

61. The Executive Committee may wish to consider:

(a) Noting:

- (i) The status of implementation of delayed projects and prospects of Article 5 countries in achieving compliance with the next control measures of the Montreal Protocol as contained in document UNEP/OzL.Pro/ExCom/61/6;
- (ii) With appreciation, the status reports on projects with implementation delays submitted to the Secretariat by the Governments of Australia, France, Japan, and the four implementing agencies, addressed in UNEP/OzL.Pro/ExCom/61/6;
- (iii) The completion of three of the 19 projects listed with implementation delays;
- (iv) That the Secretariat and the implementing agencies would take established actions according to the Secretariat's assessments (progress or some progress) and report to and notify governments and implementing agencies as required;

(b) Requesting:

- (i) Additional status reports on the following projects:

Code	Agency	Project Title
BHE/SEV/43/INS/19	UNIDO	Extension of the institutional strengthening project (phase II)
KUW/PHA/52/TAS/10	UNEP	Terminal phase-out management plan for Annex A Group I substances (first tranche)

- (ii) That letters of possible cancellation should be sent in respect of the following project:

Agency	Code	Project Title
UNDP	AFR/FUM/38/TAS/32	Technical assistance for methyl bromide reductions and formulation of regional phase out strategies for low-volume-consuming countries phase-out of methyl bromide use in the cut flower and banana production

(c) Considering automatic cancellation of the following projects at the 61<sup>st</sup> Meeting:

Code	Agency	Project Title
ETH/REF/44/TAS/14	France	Implementation of the refrigerant management plan (RMP) update
KUW/HAL/45/PRP/07	UNIDO	Preparation of a halon phase-out plan
LIB/HAL/47/TAS/26	UNIDO	Plan for the phase-out of import and net consumption of halons in the fire fighting sector

-----

## Annex I

### **DETAILED ANALYSIS OF THE STATUS OF IMPLEMENTATION IN COUNTRIES SUBJECT TO DECISIONS OF THE PARTIES ON COMPLIANCE AND THOSE AT RISK OF NON-COMPLIANCE**

1. Annex I presents the detailed analysis of the status of implementation in countries subject to decisions of the Parties on compliance and those at risk of non-compliance. The data tables in Appendixes I-VI indicate whether a country has received a total phase-out agreement for a specific controlled substance. The analysis of halons (Appendix II) indicates whether a halon banking activity has been approved. Halon banking guidelines require that regulations facilitating production and import bans are established within six months of the establishment of a reclamation centre (decision 18/22). The methyl bromide analysis (Appendix III) indicates further whether a country has received funding for a phase-out to meet the 2005 control measure. Appendixes IV and V present information on the carbon tetrachloride (CTC) and methyl chloroform (TCA) phase-out, respectively. Appendix VI provides information on latest HCFC consumption only, as the baseline will not be established until after 2010.

#### **ANALYSIS OF COMPLIANCE FOR CFCs (Appendix I)**

2. Countries have been grouped into two categories: (a) those whose latest consumption exceeds the 85 per cent baseline reduction target of 2007 that applies until December 2009; and (b) those whose latest consumption exceeds the 2010 100 per cent phase-out target.

##### (a) Countries at risk of not achieving the 85 per cent CFC baseline reduction

3. This category consists of three countries, including one LVC country, which may need to achieve additional CFC phase-out amounting to 1,411 ODP tonnes by 2007 in order to comply with the 85 per cent reduction target. Of these three countries, one was to receive projects with phase-out in the 2010 business plans.

4. Of the three countries, Vanuatu is one of the LVC countries that has phase-out agreement with the Executive Committee as part of the Pacific Island Country (PIC) strategy.

5. The remaining two countries that may require additional actions to achieve the 85 per cent reduction are Bangladesh and Iraq. All countries currently eligible for Fund assistance have national CFC phase-out agreements with the Executive Committee, which contain a phase-out schedule that is consistent with the targets in the Montreal Protocol. All of the countries that are at risk have received support from the Executive Committee to address their compliance needs.

##### (b) Countries whose latest consumption exceeds the 2010 phase-out target

6. This category consists of 84 countries, including 49 LVC countries, which may need to achieve additional CFC phase-out amounting to 5,678 ODP tonnes by 2010 in order to comply with the 100 per cent reduction target. Of these 84 countries, 25 have phase-out projects included in the 2010 business plans.

7. Of the 84 countries, the Executive Committee has approved national CFC phase-out agreements for 78 countries including 45 LVC countries. Two countries (the Republic of Korea and the United Arab Emirates) have agreed not to receive funding from the Multilateral Fund. The remaining four countries do not have projects for complete phase-out of CFC or included in the 2010-2014 business plans including Angola, Ethiopia, Somalia and Timor-Leste. The CFC terminal phase-out management plan for these countries will be integrate into HPMPs according to decision 60/5(d).

## **ANALYSIS OF COMPLIANCE FOR HALONS (Appendix II)**

8. Seventy-five countries have reported no consumption of halons between 1995 and 2009.

9. Sixty-one countries have received support for halon banking activities or phase-out agreements. This includes those countries participating in regional halon banks. Halon banking is presumed to be the last funded activity in the halon consumption sector for most countries but there are some halon phase-out activities that are part of multi-sectoral phase-out agreements.

10. Countries have been grouped into the following two categories: (a) those whose latest consumption exceeds the 50 per cent reduction target of 2005 that applies until December 2009; and (b) those whose latest consumption exceeds the 2010 100 per cent phase-out target.

(a) Countries at risk of not achieving the 50 per cent baseline reduction for halons

11. This category consists of one non-LVC country (Iraq) that may need to phase out additional halons amounting to 3.9 ODP tonnes in order to comply with the 50 per cent reduction targets. The latest consumption for Iraq in 2008 is 39.1 ODP tonnes.

(b) Countries whose latest consumption exceeds the 2010 phase-out target

12. This category consists of eight countries that may need to phase-out additional halons amounting to 1,811 ODP tonnes by 2010 in order to comply with the 100 per cent reduction targets. These countries have received support from the Multilateral Fund, except the Republic of Korea and the United Arab Emirates. The Republic of Korea and the United Arab Emirates have agreed not to receive funding from the Multilateral Fund.

## **ANALYSIS OF COMPLIANCE FOR METHYL BROMIDE (Appendix III)**

13. This section presents the analysis for compliance with methyl bromide control measures. It should be noted that all data reported and used in this analysis relate to controlled use only, which means that the data exclude quarantine and pre-shipment (QPS). All of the 144 Article 5 countries that have ratified the Copenhagen Amendment have reported complete baseline data. Of these 144 countries, 58 reported zero for both the baseline consumption and the latest consumption and one where 2008 consumption data is not available.

14. Ninety-nine Article 5 countries have received support from the Multilateral Fund for methyl bromide activities and/or projects. This includes projects that will lead to a complete phase-out of methyl bromide in 59 of these countries, partial phase-out in an additional 10, and other forms of assistance received by 30.

15. Countries have been grouped into the following two categories: (a) those whose latest consumption exceeds the 20 per cent reduction target of 2005 that applies until December 2014; and (b) those whose latest consumption exceeds the 2015 100 per cent phase-out target. Appendix III identifies those countries that have not ratified the Copenhagen Amendment.

(a) Countries whose latest consumption exceeds the 20 per cent MB baseline reduction target

16. This category consists of the following two countries: Iraq and Turkmenistan. These countries may need to meet additional combined reduction amounting to 1.34 ODP tonnes in order to comply with the 20 per cent reduction targets. Iraq already has methyl bromide preparation project approved at the 58<sup>th</sup> Meeting and Turkmenistan has approved project that will lead to complete phase-out of methyl bromide.

(b) Countries whose latest consumption exceeds the 2015 phase-out target

17. This category consists of 35 countries that may need to meet additional combined reduction amounting to 2,993 ODP tonnes by 2015 in order to comply with the 100 per cent reduction targets. Of the 35 countries, 25 countries have approved projects that will lead to complete phase-out of methyl bromide. Eight countries may need additional assistance from the Multilateral Fund to achieve the phase-out of methyl bromide by 2015. The remaining two countries (South Africa and Singapore) are currently not eligible to receive funding from the Multilateral Fund. It should be noted that South Africa could receive funding for HCFC phase-out.

**CARBON TETRACHLORIDE (CTC) (Appendix IV)**

18. This section presents the analysis of compliance with CTC control measures. All data reported and used in this analysis are those related to controlled use only, which excludes feedstock. Reported CTC consumption was not differentiated by specific end use, such as solvents, process agents and laboratory use.

19. Of the 146 countries with reported baseline data, 90 reported zero both for the baseline and the latest consumption.

20. Countries have been grouped into the following two categories: (a) those whose latest consumption exceeds the 85 per cent reduction target that applies until December 2009; and (b) those whose latest consumption exceeds the 2010 100 per cent phase-out target. Appendix IV notes those countries that have not ratified the London Amendment.

(a) Countries whose latest consumption exceeds the 85 per cent CTC baseline reduction target

21. Two countries might not achieve compliance with the 85 per cent reduction. These countries would need to phase out a total of 1.42 ODP tonnes to meet the 85 per cent reduction by 2005.

22. The Multilateral Fund has provided funding for CTC phase-out agreements or projects in one of the two countries (Iraq). Ecuador is the only country that may not need additional assistance to meet the 100 per cent reduction target for CTC since its consumption is for laboratory uses.

(b) Countries whose latest consumption exceeds the 2010 phase-out target

23. This category consists of 15 countries that may need to phase-out additional CTC amounting to 942 ODP tonnes to meet the 100 per cent reduction by 2010. Thirteen of the 15 countries have received funding for CTC phase-out agreements or projects from the Multilateral Fund. The Republic of Korea has agreed not to receive CTC funding from the Multilateral Fund. Ecuador may not need additional assistance to meet the 100 per cent reduction target for CTC since its consumption is for laboratory uses.

**METHYL CHLOROFORM (TCA) (Appendix V)**

24. This section presents the analysis for compliance with TCA control measures. Of the 146 countries that have reported baseline data, 103 reported zero both for the baseline and the latest consumption.

25. Countries have been grouped into three categories: (a) those whose latest consumption exceeds the 30 per cent reduction target that applies until December 2009; (b) those whose latest consumption exceeds the 70 per cent reduction target of 2010; and (c) those whose latest consumption exceeds

the 2015 100 per cent phase-out target. Appendix V specifies those countries that have not ratified the London Amendment.

- (a) Countries whose latest consumption exceeds the 30 per cent TCA baseline reduction target

26. All countries are in compliance with the 30 per cent TCA baseline reduction target.

- (b) Countries whose latest consumption exceeds the 70 per cent TCA baseline reduction target

27. This category consists of two countries: Bangladesh and the Republic of Korea. These countries may need to phase out additional TCA amounting to 62.5 ODP tonnes by 2010 in order to comply with the 70 per cent reduction targets. Bangladesh has received funding for agreement or project for complete phase-out of TCA. The Republic of Korea is not eligible for funding from the Multilateral Fund.

- (c) Countries whose latest consumption exceeds the 100 per cent TCA baseline reduction target

28. This category consists of nine countries that may need to meet additional combined reduction amounting to 401 ODP tonnes by 2015 in order to comply with the 100 per cent reduction target. Eight of those nine countries have received funding for TCA phase-out agreements or projects from the Multilateral Fund. The remaining country (the Republic of Korea) is not eligible to receive TCA funding from the Multilateral Fund.

#### **HCFCs (Appendix VI)**

29. Appendix VI includes an analysis of the latest consumption data on HCFCs and indicates whether the country had received HPMP preparation funding, the number of investment project approved, the number of demonstration projects approved, total phase-out approved in ODP tonnes and activities planned in the 2010 business plans. The baseline data will not be available until 2011 when both of the baseline years (2009 and 2010) will have been reported. All countries have received HPMP preparation funds or have submitted requests to the 61<sup>st</sup> Meeting. A new column is added to the appendix to indicate HPMP approvals and the duration covered by the HPMP (such as, HPMP approved to achieve up to the 10 per cent reduction in 2015 or to achieve up to the 35 per cent reduction in 2020, for example).

## Appendix I

## CFC ANALYSIS

Annex II

INFORMATION ON COUNTRIES SUBJECT TO DECISIONS OF THE PARTIES ON COMPLIANCE

Party	Decisions	Compliance issue	Action	Fund Secretariat Comments	Achieved/Resolved/Regulatory Measures Operational
Albania	XV/26	CFC phase-out	To phase-out CFC consumption by 1 January 2009	2008 CFC consumption is Zero ODP-tonne. 2009 CFC consumption not available in A7 data.	Not available
Armenia	XVIII/20	MB phase-out	To maintain methyl bromide consumption to Zero ODP-tonne from 2007	2009 consumption is Zero ODP-tonne. Country is in compliance.	Yes per A7 data
Armenia		ODS license system	To monitor its system for licensing the import and export of ozone-depleting substances, including import quotas	The status of establishment of licensing system as at May 14, 2010 indicates that licensing system is in place.	Yes
Bangladesh	XXI/17	CFC phase-out	To reduce CFC consumption to no greater than 140 ODP-tonnes in 2009 and Zero ODP-tonne in 2010.	CFC consumption is 127.6 ODP tonnes in 2009. The country is compliance with the action plan but not with control measures	Yes per action plan.
Bangladesh	XVII/27	TCA phase-out	With a based line of 0.9 ODP-tonne and 30% reduction, the target is 0.63 ODP tonne. In 2010 methyl chloroform consumption should be reduce to 0.2600 ODP tonnes and Zero ODP-tonne by 1 January 2015.	TCA consumption is 0.5 ODP tonnes in 2009 and is within targets	Yes per CP data
Belize	XIV/33	CFC phase-out	To phase-out CFC consumption by 1 January 2008	2008 consumption is Zero ODP-tonne.	Yes per A7 data
Bolivia (Plurinational State of)	XV/29	CFC phase-out	To phase-out CFC consumption by 1 January 2010	2008 consumption is 2.6 ODP-tonnes for a target of 11.4 ODP tonnes. 2009 CFC consumption not available in A7 data.	Not available
Bosnia and Herzegovina	XV/30 and XXI/18	CFC phase-out	To reduce CFC consumption no greater than zero ODP-tonnes in 2009 and 2010.	UNEP reported that the country introduced ban on CFC imports from 1 January 2009. Country reported CFC consumption of 1.2 ODP tons for 2008 and is in compliance. CP data indicates a consumption of Zero ODP-tonne in 2009.	Yes per CP data
Bosnia and Herzegovina	XV/30	MB phase-out	To phase-out methyl bromide consumption by 1 January 2007	2009 consumption is Zero ODP-tonne. The country is in compliance.	Yes per CP data

Party	Decisions	Compliance issue	Action	Fund Secretariat Comments	Achieved/Resolved/Regulatory Measures Operational
Botswana	XV/31 and ImpCom 37/6	MB phase-out	To phase-out methyl bromide consumption by 1 January 2005; to establish a licensing system for methyl bromide, including quotas.	2008 consumption is Zero ODP-tonne. 2009 consumption not available in A7 data.	Not available
Botswana	XV/31 and ImpCom 37/6	ODS license system	To monitor its system for licensing the import and export of ozone-depleting substances, including import quotas	The status of establishment of licensing system as at May 14, 2010 indicates that licensing system is in place.	No
Chile	XVII/29	MB phase-out	To reduce methyl bromide consumption to 170 ODP-tonnes in 2005 and Zero ODP-tonne by 1 January 2015.	2008 consumption 164.4 ODP-tonnes for a target of 170 ODP-tonnes. 2009 consumption not available in A7 data.	Not available
Chile (Methyl chloroform)	XVII/29	TCA phase-out	To reduce methyl chloroform consumption to 1.934 ODP tonnes in 2010 and Zero ODP-tonne by 1 January 2015.	2008 consumption is Zero ODP-tonne. 2009 consumption not available in A7 data.	Not available
Dominica	XVIII/22	CFC phase-out	To reduce CFC consumption to Zero ODP-tonne from 2008	2009 consumption is Zero ODP-tonne.	Yes per A7 data
Ecuador	XX/16	MB phase-out	To reduce methyl bromide consumption to 52.8 ODP-tonnes in 2008 and in each subsequent calendar year until 2014 and Zero ODP-tonne by 1 January 2015	2008 consumption is 51.0 ODP-tonnes. 2009 consumption not available in A7 data.	Not available
Equatorial Guinea		ODS license system	To monitor its system for licensing the import and export of ozone-depleting substances, including import quotas	The status of establishment of licensing system as at May 14, 2010 indicates that licensing system is in place.	Yes
Eritrea		ODS license system	Report establishment of licensing system	The status of establishment of licensing system as at May 14, 2010 indicates that Eritrea has not a licensing system in place. However, UNEP indicated that the licensing system/regulations/legislation is now established and updated.	Yes per IA
Guatemala	XVIII/26	MB phase-out	To reduce methyl bromide consumption to 361 ODP-tonnes in 2007, 320 ODP-tonnes in 2008 and Zero ODP-tonne by 1 January 2015	2009 consumption is 239.9 ODP-tonnes. Country in compliance.	Yes per A7 data
Guinea-Bissau	XVI/24	CFC phase-out	To reduce CFC consumption to 3.941 ODP tonnes in 2007, 2008, 2009 and CFC phase-out consumption by 2010	2008 consumption is 1.4 ODP-tonnes. 2009 consumption not available in A7 data.	Not available

Party	Decisions	Compliance issue	Action	Fund Secretariat Comments	Achieved/Resolved/Regulatory Measures Operational
Haiti	XIX/26	ODS license system	To monitor its system for licensing the import and export of ozone-depleting substances, including import quotas	The status of establishment of licensing system as at May 14, 2010 indicates that licensing system is in place.	Yes
Holy See (the)		ODS license system	To monitor its system for licensing the import and export of ozone-depleting substances, including import quotas	The status of establishment of licensing system as at May 14, 2010 indicates that licensing system is in place.	Yes
Honduras	XVII/34	MB phase-out	To reduce methyl bromide consumption to 207.5454 ODP-tonnes by 2008	2009 consumption is 136.1 ODP-tonnes. Country is in compliance.	Yes per A7 data
Iraq		ODS license system	To monitor its system for licensing the import and export of ozone-depleting substances, including import quotas	The status of establishment of licensing system as at May 14, 2010 indicates that licensing system is in place.	Yes
Kenya	XVIII/28	CFC phase-out	To reduce CFC consumption to 30 ODP-tonnes in 2007, 10 ODP-tonnes in 2008 and Zero ODP-tonne in 2009	2008 consumption is 7.5 ODP tonnes. 2009 consumption not available in A7 data.	Not available
Kyrgyzstan	XVII/36	Halon phase-out	To phase-out halons consumption by 1 January 2008	2009 consumption is Zero ODP-tonne. Country is in compliance.	Yes per CP data
Libyan Arab Jamahiriya (the)	XVII/37	Halon phase-out	To phase-out halons consumption by 1 January 2008	2008 consumption is Zero ODP-tonne. UNEP reported that effort to secure participation of Lybia to network activities in 2009 were not successful. 2009 consumption not available.	Not available
Maldives	XV/37	CFC phase-out	To reduce CFC consumption to Zero ODP-tonne in 2008 and 2009; CFC consumption phase-out by 1 January 2010.	2009 consumption is Zero ODP-tonne. Country is in compliance.	Yes per CP data
Mexico	XVIII/30 and XXI/20	CTC phase-out	To reduce carbon tetrachloride consumption to 9.376 ODP-tonnes in 2008 and Zero ODP-tonne in 2009	2009 consumption is Zero ODP-tonne. Country is in compliance.	Yes per A7 data
Micronesia (Federated States of)	XVII/32	CFC phase-out	To phase-out CFC consumption by January 2006	2008 consumption is Zero ODP-tonne. 2009 consumption not available in A7 data.	Not available
Namibia	XV/38	CFC phase-out	To reduce CFC consumption to 2.0 ODP-tonnes in 2008; 1.0 ODP-tonnes in 2009 and CFC consumption phase-out by 1 January 2010.	2009 consumption is Zero ODP-tonne. Country in compliance.	Yes per CP data

Party	Decisions	Compliance issue	Action	Fund Secretariat Comments	Achieved/Resolved/Regulatory Measures Operational
Nepal	XVI/27	CFC phase-out	To reduce CFC consumption to 4.05 ODP-tonnes in 2007, 4.05 ODP-tonnes in 2008 and 4 ODP-tonnes in 2009, Zero ODP-tonne in 2010	2008 consumption is Zero ODP-tonne. 2009 consumption not available in A7 data.	Not available
Nigeria	XIV/30	CFC phase-out	To reduce CFC consumption to 510 ODP-tonnes in 2007, 300 ODP-tonnes in 2008 and 100 ODP-tonnes in 2009. To phase-out CFC consumption by 1 January 2010	2008 consumption is 16.5 ODP-tonnes. 2009 consumption not available in A7 data.	Not available
Paraguay	XIX/22	CFC phase-out	To reduce CFC consumption to 31.6 ODP-tonnes in 2007, 2008, 2009 and Zero ODP-tonne in 2010	2009 consumption is 10.8 ODP-tonnes. Country is in compliance	Yes per CP data
Paraguay	XIX/22	CTC phase-out	To reduce carbon tetrachloride consumption to 0.1 ODP-tonne in 2007, 2008 and 2009. Zero ODP-tonne in 2010	2009 consumption is Zero ODP-tonne. Country is in compliance	Yes per CP data
Saudi Arabia	XXI/21	CFC phase-out	To submit to the Secretariat, as a matter of urgency and no later than 31 March 2010, for consideration by the Implementation Committee at its next meeting, a plan of action with time-specific benchmarks to ensure the Party's prompt return to compliance	According to the Ozone secretariat, the action plan was reported in April 12, 2009.	Yes
Somalia	XX/19	Halon phase-out	To reduce halon consumption to 9.4 ODP tonnes in 2008, 9.4 ODP tonnes in 2009, Zero ODP tonnes in 2010	2008 consumption is Zero ODP-tonne. 2009 consumption not available in A7 data.	Not available
Tonga	XIX/26	ODS license system	To monitor its system for licensing the import and export of ozone-depleting substances, including import quotas	The status of establishment of licensing system as at May 14, 2010 indicates that licensing system is in place.	Yes
Turkmenistan	XXI/25	CTC phase-out	To request Turkmenistan to submit to the Secretariat, as a matter of urgency and no later than 31 March 2010, for consideration by the Implementation Committee at its next meeting, a plan of action with time-specific benchmarks to ensure the Party's prompt return to compliance.	The action plan was submitted	Yes
Uganda	XV/43	MB phase-out	To phase-out methyl bromide consumption by 1 January 2007	2008 consumption is Zero ODP-tonne. 2009 consumption not available in A7 data.	Not available

<b>Party</b>	<b>Decisions</b>	<b>Compliance issue</b>	<b>Action</b>	<b>Fund Secretariat Comments</b>	<b>Achieved/Resolved/Regulatory Measures Operational</b>
Uruguay	XVII/39	MB phase-out	To reduce methyl bromide consumption to 8.9 ODP-tonnes in 2009 and 6.0 ODP-tonnes in 2010; Phase-out by 2013.	2008 consumption is 8.4 ODP-tonnes. 2009 consumption not available in A7 data.	Yes per A7 data
Vanuatu	XXI/26	CFC phase-out	To submit to the Secretariat, as a matter of urgency and no later than 31 March 2010, for consideration by the Implementation Committee at its next meeting, a plan of action with time-specific benchmarks to ensure the Party's prompt return to compliance	UNEP indicated that the Action Plan to return compliance was submitted before 31 March 2010 following a high-level mission of UNEP CAP/ROAP in Feb 2010. 2008 consumption is 0.7 ODP-tonne while the target is Zero ODP-tonne.	Yes per IA

**ANNEX III**  
**COMPLETED PROJECTS**

<b>Agency</b>	<b>Code</b>	<b>Project Title</b>
UNDP	CHI/SOL/41/TAS/154	Technical assistance to phase-out ozone depleting solvents
UNDP	URU/ARS/43/INV/42	Phase-out of CFC consumption in the manufacture of aerosol metered-dose inhalers (MDIs)
UNEP	SOM/SEV/35/TAS/01	Formulation of national phase-out strategy

ANNEX IV

PROJECTS THAT ARE CLASSIFIED AS “SOME PROGRESS”

Code	Agency	Project Title
AFR/SEV/45/TAS/33	UNEP	Sub-regional project on harmonization of legislative and regulatory mechanisms to improve monitoring and control of ODS consumption in English-speaking Africa
ALG/REF/44/INV/62	UNIDO	Conversion of CFC-11 to HCFC-141b and CFC-12 to HFC-134a technology in the last group of commercial refrigerator manufactures (refrigeration sector terminal project)
ARG/REF/18/INV/39	IBRD	Elimination of CFC in the manufacturing plant of domestic refrigerators of Neba S.A.
ASP/SEV/50/TAS/52	Australia	Additional support for the regional strategy for 11 Article 5 countries in the Pacific (PIC strategy)
COL/PAG/48/INV/66	UNDP	Phase-out of CTC as process agent in the elimination of nitrogen trichloride during chlorine production at Prodesal S.A.
CPR/SEV/43/TRA/413	UNEP	Policy training for local authorities (third tranche)
CUB/ARS/41/INV/23	UNDP	Phase-out of CFC consumption in the manufacture of aerosol metered-dose inhalers (MDIs)
DOM/FUM/38/INV/33	UNIDO	Phase-out of methyl bromide in melon, flowers and tobacco
FIJ/FUM/47/TAS/17	UNDP	Technical assistance project to install alternatives, achieve compliance and phase-out methyl bromide
MAL/FUM/43/TAS/151	UNDP	Technical assistance programme to install alternatives and phase-out all remaining non-QPS uses of methyl bromide
OMA/HAL/46/TAS/12	UNIDO	Halon consumption phase-out through a technical assistance programme and a halon recycling
SRL/PHA/43/TAS/26	Japan	National compliance action plan: incentive programme for commercial and industrial refrigeration end-users
SRL/PHA/43/TAS/27	Japan	National compliance action plan: MAC recovery/recycling and retrofit
SRL/PHA/43/TAS/28	Japan	National compliance action plan: recovery and recycling programme
THA/HAL/32/INV/134	IBRD	Terminal halon-1211 & halon-1301 phase-out project for fire equipment manufacturers and suppliers converting to ABC powder, CO <sub>2</sub> , HFC-227ea and inert gases

**ANNEX V**

**PROJECTS WITH AUTOMATIC CANCELLATION**

<b>Code</b>	<b>Agency</b>	<b>Project Title</b>
ETH/REF/44/TAS/14	France	Implementation of the RMP update
KUW/HAL/45/PRP/07	UNIDO	Preparation of a halon phase-out plan
LIB/HAL/47/TAS/26	UNIDO	Plan for the phase-out of import and net consumption of halons in the fire fighting sector
